## OVERVIEW

The Cisco UCS C480 M5 High-Performance Rack Server (*Figure 1*) is a four-rack-unit (4RU) server supporting the 2<sup>nd</sup> Generation Intel® Xeon® processor scalable family CPUs.

The C480 M5 has the following features:

- 2<sup>nd</sup> Generation Intel® Xeon® Scalable Processors.
- DDR4-2933MHz memory DIMMs.
- 128 GB, 256 GB, and 512 GB Intel® Optane™ Persistent Memory Modules (PMem).
- Up to 18 TB of memory is available if the memory slots are populated as follows:
  - 24 x 256 GB DDR4 DIMMs
  - 24 x 512 GB PMem
- Up to 12 TB is possible using only 48 x 256 GB DDR4 RDIMMs.

12 PCI Express (PCIe) expansion slots support Cisco UCS C-Series network adapters storage controllers, and up to 10 GPUs, with additional I/O provided by two 10GBase-T LOM ports and one 1GbE dedicated out-of-band (OOB) management port. A separate PCIe slot is reserved inside the chassis for a RAID controller card.

### Front View

### Rear View

# DETAILED VIEWS

## Chassis Front View

Figure 2 is a detailed front view of the Cisco UCS C480 M5 Rack Server.

Figure 2 Chassis Front View

|   |                           |    |   |
|---|---------------------------|----|---|
| 1 | Power button/LED          | 8  | Drive bay module 1 (drive bays 1 - 8) <ul style="list-style-type: none"> <li>■ Bays 3, 4, 5, 6 support SAS/SATA drives only</li> <li>■ Bays 1, 2, 7, 8 support SAS/SATA or NVMe drives</li> </ul>   |
| 2 | Identification button/LED | 9  | Drive bay module 2 (drive bays 9 - 16) <ul style="list-style-type: none"> <li>■ Bays 11, 12, 13, 14 support SAS/SATA drives only</li> <li>■ Bays 9, 10, 15, 16 support SAS/SATA or NVMe drives</li> </ul>   |
| 3 | System status LED         | 10 | Drive bay module 3, supports either: <ul style="list-style-type: none"> <li>■ Optional DVD drive module, or</li> <li>■ Drive bays 17 - 24 (shown)                         <ul style="list-style-type: none"> <li>– Bays 19, 20, 21, 22 support SAS/SATA drives only</li> <li>– Bays 17, 18, 23, 24 support SAS/SATA or NVMe drives</li> </ul> </li> </ul> |

|   |                           |    |  |
|---|---------------------------|----|--|
| 4 | Fan status LED            | 11 | KVM console connector (used with a KVM cable that provides two USBs, one VGA, and one serial connector) <sup>1</sup>   |
| 5 | Temperature status LED    | 12 | Pull-out asset tag   |
| 6 | Power supply status LED   | 13 | CPU module bay 1<br>The system must have at least one CPU module in bay 1 to boot.<br>It must also have either a CPU module or a blank filler module in bay 2. |
| 7 | Network link activity LED | 14 | CPU module bay 2<br>If no CPU module is present in bay 2, there must be a blank filler module in bay 2 for the system to boot.                                 |

**Notes:**

1. For more details on the KVM connector, see [KVM CABLE on page 72](#).

## Chassis Rear View

Figure 3 shows the external features of the rear panel.

## BASE SERVER STANDARD CAPABILITIES and FEATURES

*Table 1* lists the capabilities and features of the base server. Details about how to configure the server for a particular feature or capability (for example, number of processors, disk drives, or amount of memory) are provided in *CONFIGURING the SERVER on page 11*.

**NOTE:** The C480 M5 blade server requires UCS Manager (UCSM) to operate as part of the UCS system as follows:

- With Intel® Xeon® Scalable processor family CPUs, the server requires UCSM 3.2(2) or later
- With 2nd Generation Intel® Xeon® Scalable processor family CPUs, the server requires UCSM 4.0(4).

**Table 1** Capabilities and Features

| Capability/Feature         | Description  |
|----------------------------|--|
| Chassis                    | Four rack unit (4RU) chassis.  |
| CPU                        | Two or four 2 <sup>nd</sup> Generation Intel® Xeon® scalable family CPUs.  |
| Chipset                    | Intel C621 series chipset.   |
| Memory                     | Two CPU modules, each consisting of two CPUs and 24 DIMM slots, plug into the midplane from the front of the chassis, for a total of up to 48 DIMM slots for the chassis with support for registered ECC DIMMs (RDIMMs), load-reduced DIMMs (LRDIMMs), through silicon via (TSV) DIMMs and support for Intel® Optane™ Persistent Memory (PMem)   |
| Multi-bit error protection | This server supports multi-bit error protection  |
| Expansion slots            | There are 12 full-height full-length PCIe expansion slots: <ul style="list-style-type: none"> <li>■ Slot 1: CPU1 controlled, Gen-3 x16, FL, FH, GPU, NCSI, VIC primary</li> <li>■ Slot 2: CPU1 controlled, Gen-3 x16, FL, FH, GPU, NCSI, VIC secondary</li> <li>■ Slot 3: CPU3 controlled, Gen-3 x8, FL, FH, GPU, NCSI, VIC</li> <li>■ Slot 4: CPU3 controlled, Gen-3 x16, FL, FH, GPU, NCSI, VIC</li> <li>■ Slot 5: CPU2 controlled, Gen-3 x8, FL, FH, GPU, NCSI, VIC</li> <li>■ Slot 6: CPU3 controlled, Gen-3 x16, FL, FH, GPU, NCSI, VIC</li> <li>■ Slot 7: CPU4 controlled, Gen-3 x8, FL, FH, GPU, NCSI, VIC</li> <li>■ Slot 8: CPU2 controlled, Gen-3 x16, FL, FH, GPU, NCSI, VIC</li> <li>■ Slot 9: CPU2 controlled, Gen-3 x8, FL, FH, GPU</li> <li>■ Slot 10: CPU2 controlled, Gen-3 x16, FL, FH, GPU</li> <li>■ Slot 11: CPU4 controlled, Gen-3 x8, FL, FH</li> <li>■ Slot 12: CPU4 controlled, Gen-3 x8, FL, FH</li> </ul> |

Table 1 Capabilities and Features (continued)

| Capability/Feature | Description   |
|--------------------|---|
|                    |  <p><b>NOTE:</b> Specific slots are supported by specific CPUs. The CPU installation options are either:</p> <ul style="list-style-type: none"> <li>■ CPU1 and CPU2 (CPU module in bay 1), or</li> <li>■ CPU1, CPU2, CPU3, and CPU4 (CPU modules in bays 1 and 2).</li> </ul> <p>See <a href="#">CHOOSE PCIe OPTION CARD(S) on page 32</a> for more details on which slots are supported by each CPU.</p>  |
| Storage controller | <p>For front-loading drives:</p> <ul style="list-style-type: none"> <li>■ UCSC-RAID-M5HD is an internally mounted Cisco 12G Modular RAID controller with a 4GB cache with a supercap cache backup (UCSC-SCAP-M5). It is used for controlling the SAS/SATA drives in the front drive bays. It cannot control NVMe drives in the front drive bays.</li> <li>■ NVMe drives in the front drive bays are controlled directly from the PCIe interfaces on the CPUs.</li> </ul> <p>For top-loading auxiliary module drives:</p> <ul style="list-style-type: none"> <li>■ UCSC-SAS9460-8i Cisco 12G 9460-8i RAID controller is a PCI controller with a 2GB cache and supercap cache.</li> <li>■ Ordering the UCSC-SAS9460-8i requires the Auxiliary drive module as the SuperCap is required. The SuperCap requires the diffuser and in turn the diffuser requires the Auxiliary drive module.</li> </ul> <p>External drives:</p> <ul style="list-style-type: none"> <li>■ Cisco 12G 9400-8e SAS HBA                             <ul style="list-style-type: none"> <li>• Supports external JBOD attach</li> <li>• Plugs into an appropriate riser slot</li> <li>• No RAID support</li> </ul> </li> </ul> |
| RAID backup        | <p>The system supports up to two supercap power modules (SCPMs):</p> <ul style="list-style-type: none"> <li>■ Front-loading drive bay controller (UCSC-RAID-M5H)—the SCPM mounting bracket is on the chassis wall near the front RAID controller socket.</li> <li>■ Auxiliary drive module controller (UCSC-SAS9460-8i)—the SCPM mounting bracket is on the auxiliary drive module.</li> </ul>  |
| DVD drive option   | <p>Front-loading drive bay 3 can optionally be replaced with a DVD drive module.</p>  |

Table 1 Capabilities and Features (continued)

| Capability/Feature       | Description  |
|--------------------------|--|
| Internal storage devices | <p>The server can hold up to 32 2.5-inch drives:</p> <ul style="list-style-type: none"> <li>■ Front drive bays are divided across three removable drive bay modules. Each drive bay module has 8 drive bays for a total of 24 front-loading drive bays. <ul style="list-style-type: none"> <li>• All 24 front drive bays support SAS/SATA drives.</li> <li>• Each of the three drive bay modules has four bays that support NVMe SSDs as well as SAS/SATA drives, for a total of 12 bays that support NVMe SSDs.</li> </ul> </li> <li>■ One auxiliary top (rear) drive bay supports a total of 8 top-loading drive bays. See <a href="#">CHOOSE DRIVE MODULES and DRIVES (OPTIONAL) on page 22</a> for details.</li> </ul> <p>SAS and SATA drives are hot-swappable<sup>1</sup>; PCIe drives are hot-pluggable<sup>2</sup></p>   |
| Internal removable media | <ul style="list-style-type: none"> <li>■ A mini-storage module connector on the motherboard supports either: <ul style="list-style-type: none"> <li>• An SD card module with two SD card slots. Mixing different capacity (32, 64, or 128 GB) SD cards is not supported, or</li> <li>• An M.2 module with two SATA M.2 SSD slots. Mixing different capacity (240 or 960 GB) M.2 modules is not supported.</li> </ul> </li> </ul> <hr/> <div style="display: flex; align-items: center;">  <p><b>NOTE:</b> SD cards and M.2 SSDs cannot be mixed. See details for RAID functionality in the <a href="#">ORDER SECURE DIGITAL CARDS or M.2 DEVICES (OPTIONAL)</a> section.</p> </div> <hr/> <ul style="list-style-type: none"> <li>■ One USB 2.0 port on the chassis motherboard.</li> </ul> |
| ACPI                     | This server supports the advanced configuration and power interface (ACPI) 6.2 standard.   |
| Video                    | <ul style="list-style-type: none"> <li>■ Resolution up to 1600 x1200, 16 bpp at 60 Hz. Up to 256 MB of video memory.</li> </ul>  |
| Interfaces               | <ul style="list-style-type: none"> <li>■ Rear panel <ul style="list-style-type: none"> <li>• One 10/100/1000 dedicated management Ethernet port</li> <li>• Two 10 Base-T Gbps Ethernet ports</li> <li>• One RS-232 serial port (DB-9 connector)</li> <li>• One VGA video port (DB-15 connector)</li> <li>• Three USB 3.0 connectors</li> </ul> </li> <li>■ Front panel <ul style="list-style-type: none"> <li>• One KVM connector (used with the included KVM cable, which provides two USB, one VGA, and one serial connector)</li> </ul> </li> </ul>   |

Table 1 Capabilities and Features (continued)

| Capability/Feature              | Description   |
|---------------------------------|---|
| Power subsystem                 | <ul style="list-style-type: none"> <li>■ Power supplies are hot-swappable and rear-accessible. They default to redundant as 2+2 (or 1+1 for servers with only two power supplies), but may be changed to 3+1 via the Cisco Integrated Management Controller. Set Chassis-&gt;Sensors-&gt;Power Supply-&gt;Redundancy Policy to N+1. The recommendation is to connect PSU-1 and -2 to one feed and PSU-3 and -4 to another in the case of N+N.</li> <li>■ 1600W AC power supply</li> </ul><br> For more information about your server's power consumption, use the power calculator accessible at <a href="http://ucspowercalc.cisco.com">http://ucspowercalc.cisco.com</a> |
| Fans                            | <p>Chassis:</p> <ul style="list-style-type: none"> <li>■ 4 fans modules with 2 fans each, hot-swappable</li> </ul> <p>Power supply:</p> <ul style="list-style-type: none"> <li>■ Each power supply is equipped with a fan.</li> </ul>   |
| Baseboard management            | <p>Cisco Integrated Management Controller (Cisco IMC) firmware.</p> <p>Depending on your settings, the Cisco IMC can be accessed through the 10/100/1000 dedicated management ports, the 10 GBase-T LOM ports, or a Cisco virtual interface card.</p>   |
| Integrated management processor | <p>The built-in Cisco Integrated Management Controller (CIMC) GUI or CLI interface enables you to monitor the server inventory, health, and system event logs.</p>  |

Notes:

1. Hot-swappable = No preconditioning of the component is required before removal while the server is powered on.
2. Hot-pluggable = The component must be shut down in the operating system before removal while the server is powered on.

# CONFIGURING the SERVER

Follow these steps to configure the Cisco UCS C480 M5 High-Performance Rack Server:

- *STEP 1 VERIFY BASE SKU, page 12*
- *STEP 2 CHOOSE CPU(S), page 13*
- *STEP 3 CHOOSE MEMORY, page 16*
- *STEP 4 CHOOSE DRIVE MODULES and DRIVES (OPTIONAL), page 22*
- *STEP 5 CHOOSE RAID CONFIGURATION, page 29*
- *STEP 6 CHOOSE PCIe OPTION CARD(S), page 32*
- *STEP 7 ORDER OPTIONAL PCIe OPTION CARD ACCESSORIES, page 38*
- *STEP 8 ORDER OPTICAL DRIVE (OPTIONAL), page 39*
- *STEP 9 ORDER SECURE DIGITAL CARDS or M.2 DEVICES (OPTIONAL), page 40*
- *STEP 10 ORDER INTERNAL MICRO-SD CARD MODULE (OPTIONAL), page 43*
- *STEP 11 ORDER GPU CARDS and ACCESSORIES (OPTIONAL), page 44*
- *STEP 12 ORDER POWER SUPPLIES, page 46*
- *STEP 13 SELECT AC POWER CORD(s), page 47*
- *STEP 14 ORDER OPTIONAL CABLE MANAGEMENT ARM, page 49*
- *STEP 15 ORDER USB DRIVE (OPTIONAL), page 50*
- *STEP 16 ORDER SECURITY DEVICES (OPTIONAL), page 51*
- *STEP 17 ORDER A BEZEL (OPTIONAL), page 52*
- *STEP 18 SELECT MANAGEMENT CONFIGURATION (OPTIONAL), page 53*
- *STEP 19 SELECT SERVER BOOT MODE (OPTIONAL), page 54*
- *STEP 20 CHOOSE OPERATING SYSTEM AND VALUE-ADDED SOFTWARE, page 55*
- *STEP 21 CHOOSE SERVICE and SUPPORT LEVEL, page 59*

## STEP 1 VERIFY BASE SKU

Verify the product ID (PID) of the base server as shown in [Table 2](#).

Table 2 PID of the Base C480 M5 Rack Server

| Product ID (PID) | Description  |
|------------------|--|
| UCSC-C480-M5     | UCS C480 M5 standard base chassis w/o CPU, mem, HDD, PCIe, PSU |

The base server:

■ Includes:

- Blanking panels for empty drive locations (to maintain cooling air flow)
- Rail kit

■ Does not include:

- CPUs
- DIMMs
- Intel® Optane™ Persistent Memory (PMem)
- Power supplies
- Hard disk drives (HDDs)
- Solid-state Drives (SSDs)
- Plug-in PCIe cards

**NOTE:** Use the steps on the following pages to configure the server with the components that you want to include.

---

## STEP 2 CHOOSE CPU(S)

The standard CPU features are:

- 2<sup>nd</sup> Generation Intel® Xeon® scalable processor family CPUs.
- Intel C621 series chipset
- Up to 28 cores per processor, for a total of up to 112 cores per server

### NOTE:

The CPUs designated as Ix2xx are 2<sup>nd</sup> Generation Intel® Xeon® scalable processor family CPUs.

Select one or two CPU Modules and two CPUs per module

| Product ID (PID) | Description                         |
|------------------|-------------------------------------|
| UCSC-C480-CM     | UCS C480 M5 CPU Module w/o CPU, mem |

The available CPUs are listed in [Table 3](#).

Table 3 Available Intel CPUs

| Product ID (PID)  | Clock Freq (GHz) | Power (W) | Cache Size (MB) | Cores | UPI <sup>1</sup> Links (GT/s) | Highest DDR4 DIMM Clock Support (MHz) <sup>2</sup> | Workload/ Processor Type                                       |
|---|------------------|-----------|-----------------|-------|-------------------------------|--|--|
| <b>Cisco Recommended Processors<sup>3</sup> (2<sup>nd</sup> Generation Intel® Xeon® Processors)</b> |                  |           |                 |       |                               |  |  |
| UCS-CPU-I8276   | 2.2              | 165       | 38.50           | 28    | 3 x 10.4                      | 2933   | Oracle, SAP  |
| UCS-CPU-I8260   | 2.4              | 165       | 35.75           | 24    | 3 x 10.4                      | 2933   | Microsoft Azure Stack  |
| UCS-CPU-I6262V  | 1.9              | 135       | 33.00           | 24    | 3 x 10.4                      | 2400   | Virtual Server infrastructure or VSI                           |
| UCS-CPU-I6248   | 2.5              | 150       | 27.50           | 20    | 3 x 10.4                      | 2933   | VDI, Oracle, SQL, Microsoft Azure Stack                        |
| UCS-CPU-I6238   | 2.1              | 140       | 30.25           | 22    | 3 x 10.4                      | 2933   | SAP  |
| UCS-CPU-I6234   | 3.3              | 130       | 24.75           | 8     | 3 x 10.4                      | 2933   | Oracle, SAP  |
| UCS-CPU-I6230   | 2.1              | 125       | 27.50           | 20    | 3 x 10.4                      | 2933   | Big Data, Virtualization                                       |
| UCS-CPU-I5220   | 2.2              | 125       | 24.75           | 18    | 2 x 10.4                      | 2666   | HCI  |
| UCS-CPU-I5218   | 2.3              | 125       | 22.00           | 16    | 2 x 10.4                      | 2666   | Virtualization, Microsoft Azure Stack, Splunk, Data Protection |

| UCS-CPU-I5215L               | 2.5              | 85        | 13.75           | 10        | 2 x 10.4                      | 2666   | 2 <sup>nd</sup> Gen Intel® Xeon® |
| UCS-CPU-I5215                | 2.5              | 85        | 13.75           | 10        | 2 x 10.4                      | 2666   | 2 <sup>nd</sup> Gen Intel® Xeon® |

Notes:

1. UPI = Ultra Path Interconnect.

2. If higher or lower speed DIMMs are selected than what is shown in the table for a given CPU, the DIMMs will be clocked at the lowest common denominator of CPU clock and DIMM clock.
3. For details on memory support for processor classes and CPU modes, see [Memory Support for CPU Classes and CPU Modes on page 70](#).
4. For 2<sup>nd</sup> Generation Intel® Xeon® Scalable Processor, UCSM 4.0(4b) software release is required.

### Approved Configurations

---

#### (1) Two-CPU Configuration

- Choose two identical CPUs from any one of the rows of [Table 3 on page 13](#). CPUs 1 and 2 will be populated. In this case, you must also choose one CPU module (UCSC-C480-CM).

#### (2) Four-CPU Configuration

- Choose four identical CPUs from any one of the rows of [Table 3 on page 13](#). CPUs 1, 2, 3, and 4 will be populated. In this case, you must also choose two CPU modules (UCSC-C480-CM).

### Caveats

---

- You must select one or two CPU modules with two identical processors per CPU module.
- For 2-CPU systems (one CPU module), only 24 DIMM slots are functional
  - 2 DIMMs per channel
  - The CPU module has channels A - F for CPU1 and G - M for CPU2)
- For 4-CPU systems (two CPU modules), all 48 DIMM slots are functional
  - 2 DIMMs per channel
  - CPU module 1 has channels A - F for CPU1 and G - M for CPU2
  - CPU module 2 has channels A - F for CPU3 and G - M for CPU4.

**NOTE:** See [CHOOSE MEMORY on page 16](#) for details on the compatibility of CPUs and DIMM speeds.

---

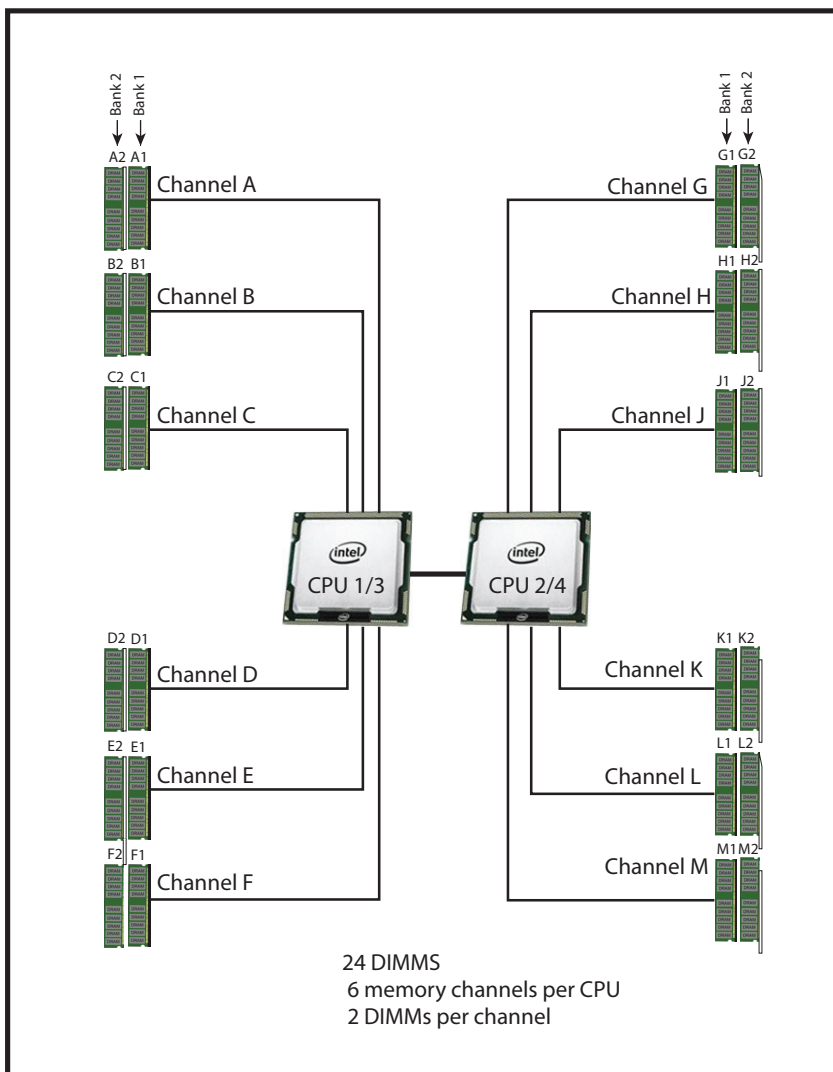

### STEP 3 CHOOSE MEMORY

The available memory for the C480 M5 is as follows:

- Clock speed: Up to 2933 MHz; See available CPUs and their associated DDR4 DIMM maximum clock support in [Table 3](#).
- Rank per DIMM: 1, 2, 4, or 8
- Operational voltage: 1.2 V
- Registered ECC DDR4 DIMMs (RDIMMs), Load-reduced DIMMs (LRDIMMs), or Intel® Optane™ Persistent Memory Modules (PMem)

Memory is organized with six memory channels per CPU, with up to two DIMMs per channel, as shown in [Figure 4](#).

Figure 4 C480 M5 Memory Organization

## Select DIMMs and Memory Mirroring

Select the memory configuration and whether or not you want the memory mirroring option. The available memory DIMMs and mirroring option are listed in [Table 4](#).

**NOTE:** When memory mirroring is enabled, the memory subsystem simultaneously writes identical data to two channels. If a memory read from one of the channels returns incorrect data due to an uncorrectable memory error, the system automatically retrieves the data from the other channel. A transient or soft error in one channel does not affect the mirrored data, and operation continues unless there is a simultaneous error in exactly the same location on a DIMM and its mirrored DIMM. Memory mirroring reduces the amount of memory available to the operating system by 50% because only one of the two populated channels provides data.

**Table 4 Available DDR4 DIMMs**

| Product ID (PID)  | PID Description                                   | Voltage | Ranks /DIMM |
|---|---|---------|-------------|
| UCS-ML-256G8RW <sup>1</sup>                                       | 256 GB DDR4-3200MHz LRDIMM 8Rx4 (16Gb) (3DS)      | 1.2 V   | 8           |
| UCS-ML-128G4RW <sup>1</sup>                                       | 128 GB DDR4-3200MHz LRDIMM 4Rx4 (16Gb) (non-3DS)  | 1.2 V   | 4           |
| UCS-MR-X64G2RW <sup>1</sup>                                       | 64 GB DDR4-3200MHz RDIMM 2Rx4 (16Gb)              | 1.2 V   | 2           |
| UCS-MR-X32G2RW <sup>1</sup>                                       | 32 GB DDR4-3200MHz RDIMM 2Rx4 (8Gb)               | 1.2 V   | 2           |
| UCS-MR-X16G1RW <sup>1</sup>                                       | 16 GB DDR4-3200MHz RDIMM 1Rx4 (8Gb)               | 1.2 V   | 1           |
| <b>Intel® Optane™ Persistent Memory Product</b>                   |   |         |             |
| UCS-MP-128GS-A0   | Intel® Optane™ Persistent Memory, 128GB, 2666 MHz |         |             |
| UCS-MP-256GS-A0   | Intel® Optane™ Persistent Memory, 256GB, 2666 MHz |         |             |
| UCS-MP-512GS-A0   | Intel® Optane™ Persistent Memory, 512GB, 2666 MHz |         |             |
| <b>Intel® Optane™ Persistent Memory Product Operational Modes</b> |   |         |             |
| UCS-DCPMM-AD  | App Direct Mode                                   |         |             |
| UCS-DCPMM-MM  | Memory Mode                                       |         |             |
| <b>Memory Mirroring Option</b>                                    |   |         |             |
| N01-MMIRROR   | Memory mirroring option                           |         |             |

**Notes:**

1. DDR4-3200MHz replacement part numbers will operate at the maximum speed of the Intel 2nd generation Xeon Scalable processor memory interface, ranging from 2133 MHz to 2933 MHz.

### CPU Configuration Without Memory Mirroring

Select from 4, 6, 8, or 12 DIMMs per CPU (DIMMs for all four CPUs must be configured identically). The DIMMs will be placed in each CPU module by the factory as shown in the following tables.

| #DIMMs | CPU 1/3 DIMM Placement in Channels (for identically ranked DIMMs) |
|--------|---|
| 4      | (A1, B1); (D1, E1)  |
| 6      | (A1, B1, C1); (D1, E1, F1)  |
| 8      | (A1, A2, B1, B2); (D1, D2, E1, E2)                                |
| 12     | (A1, A2, B1, B2, C1, C2); (D1, D2, E1, E2, F1, F2)                |

| #DIMMs | CPU 2/4 DIMM Placement in Channels (for identically ranked DIMMs) |
|--------|---|
| 4      | (G1, H1); (K1, L1)  |
| 6      | (G1, H1, J1); (K1, L1, M1)  |
| 8      | (G1, G2, H1, H2); (K1, K2, L1, L2)                                |
| 12     | (G1, G2, H1, H2, J1, J2); (K1, K2, L1, L2, M1, M2)                |

### CPU Configuration With Memory Mirroring

Select from 4, 6, 8, or 12 DIMMs per CPU (DIMMs for all four CPUs must be configured identically). In addition, the memory mirroring option (N01-MMIRROR) as shown in [Table 4 on page 17](#) must be selected.

The DIMMs will be placed by the factory as shown in the following tables.

| #DIMMs | CPU 1/3 DIMM Placement in Channels<br>(for identical ranked DIMMs) | CPU 2/4 DIMM Placement in Channels<br>(for identical ranked DIMMs) |
|--------|--|--|
|        | CPU 1  | CPU 2  |
| 8      | (A1,B1); (D1,E1)   | (G1, H1); (K1, L1)   |
| 12     | (A1, B1, C1); (D1, E1, F1)   | (G1, H1, J1); (K1, L1, M1)   |
| 16     | (A1, A2, B1, B2); (D1, D2, E1, E2)                                 | (G1, G2, H1, H2); (K1, K2, L1, L2)                                 |
| 24     | (A1, A2, B1, B2, C1, C2); (D1, D2, E1, E2, F1, F2)                 | (G1, G2, H1, H2, J1, J2); (K1, K2, L1, L2, M1, M2)                 |

**NOTE:** System performance is optimized when the DIMM type and quantity are equal for both CPUs, and when all channels are filled equally across the CPUs in the server.

## System Speed

Memory will operate at the maximum speed of the Intel Xeon Scalable processor memory controller, ranging from 2133 MHz to 2933 MHz for M5 servers. Check CPU specifications for supported speeds

**NOTE:** Detailed mixing DIMM configurations are described in Cisco UCS [Cisco UCS C220/C240/B200 M5 Memory Guide](#)

## Memory Configurations and Modes

### DIMM Guidelines

- System speed is dependent on the CPU DIMM speed support. Refer to [Table 4 on page 17](#) for DIMM Speeds
- The C480 M5 server supports four different memory reliability, availability, and serviceability (RAS) modes:
  - Independent Channel Mode
  - Mirrored Channel Mode
  - Lockstep Channel Mode
  - Rank Sparing Mode

**NOTE:** Mixing of Non-Mirrored and Mirrored mode is not allowed.

- Do not mix RDIMMs, LRDIMMs, and TSV-RDIMMs.
- Single-rank DIMMs can be mixed with dual-rank DIMMs in the same channel
- For best performance, observe the following:
  - DIMMs with different timing parameters can be installed on different slots within the same channel, but only timings that support the slowest DIMM will be applied to all. As a consequence, faster DIMMs will be operated at timings supported by the slowest DIMM populated.
  - When one DIMM is used, it must be populated in DIMM slot 1 (farthest away from the CPU) of a given channel.
  - When single or dual rank DIMMs are populated for 2DPC, always populate the higher number rank DIMM first (starting from the farthest slot). For a 2DPC example, first populate with dual rank DIMMs in the DIMM slot 1. Then single-rank DIMMs in the DIMM 2 slot.
- DIMMs for all four CPUs must always be configured identically.

- Cisco memory from previous generation servers (DDR3 and DDR4) is not compatible with UCS C480 M5 server.

**NOTE:** System performance is optimized when the DIMM type and quantity are equal for both CPUs, and when all channels are filled equally across the CPUs in the server.

- Memory can be configured in any number of DIMMs as pairs, though for optimal performance, refer to the C480 Memory Guide at Cisco.com.

### PMem Guidelines

- PMem require second generation Intel Xeon Scalable Family processors. First generation Xeon Scalable processors do not support PMem.
- All installed PMem must be the same size. Mixing PMem of different capacities is not supported.
- The use of 1Rx8 DIMMs with PMem is not supported.
- PMem and DIMMs must be populated as shown in [Table 5](#) (6 DIMMs per CPU with 2, 4, or 6 PMem per CPU, as shown).

**Table 5 2<sup>nd</sup> Generation Intel® Xeon® Scalable Processor DIMM and PMem<sup>1</sup> Physical Configurations (quad socket)**

| DIMM to PMem Count | CPU 1/3   |      |           |      |           |      |           |      |           |      |           |      |
|--------------------|-----------|------|-----------|------|-----------|------|-----------|------|-----------|------|-----------|------|
|                    | iMC1      |      |           |      |           |      | iMCO      |      |           |      |           |      |
|                    | Channel 2 |      | Channel 1 |      | Channel 0 |      | Channel 2 |      | Channel 1 |      | Channel 0 |      |
|                    | F2        | F1   | E2        | E1   | D2        | D1   | C2        | C1   | B2        | B1   | A2        | A1   |
| 6 to 2             |           | DIMM |           | DIMM | PMem      | DIMM |           | DIMM |           | DIMM | PMem      | DIMM |
| 6 to 4             |           | DIMM | PMem      | DIMM | PMem      | DIMM |           | DIMM | PMem      | DIMM | PMem      | DIMM |
| 6 to 6             | PMem      | DIMM | PMem      | DIMM | PMem      | DIMM | PMem      | DIMM | PMem      | DIMM | PMem      | DIMM |
| DIMM to PMem Count | CPU 2/4   |      |           |      |           |      |           |      |           |      |           |      |
|                    | iMC1      |      |           |      |           |      | iMCO      |      |           |      |           |      |
|                    | Channel 2 |      | Channel 1 |      | Channel 0 |      | Channel 2 |      | Channel 1 |      | Channel 0 |      |
|                    | M2        | M1   | L2        | L1   | K2        | K1   | J2        | J1   | H2        | H1   | G2        | G1   |
| 6 to 2             |           | DIMM |           | DIMM | PMem      | DIMM |           | DIMM |           | DIMM | PMem      | DIMM |
| 6 to 4             |           | DIMM | PMem      | DIMM | PMem      | DIMM |           | DIMM | PMem      | DIMM | PMem      | DIMM |
| 6 to 6             | PMem      | DIMM | PMem      | DIMM | PMem      | DIMM | PMem      | DIMM | PMem      | DIMM | PMem      | DIMM |

**Notes:**

1. All systems must be fully populated with four CPUs when using PMem at this time.

- Two CPUs must be installed in each CPU module when using PMem.
- For Memory Mode, install a minimum 2 PMem and 6 DIMMs per CPU
- For App Direct Mode, install a minimum 2 PMem and 6 DIMMs per CPU
- When either Memory Mode or Mixed Mode is used, the ratio of DIMM capacity to PMem capacity per CPU must be between 1:2 and 1:16, and the recommended ratio is 1:6 for the best performance. For example, 6x 16GB DIMMs + 2x 256GB PMem is a ratio of 1:5.33 (96GB:512GB). In Mixed Mode, the ratio is between memory and only the volatile portion of the PMem. This ratio requirement does not apply to App Direct mode. See [Table 6](#) for PMem memory modes.

**Table 6 Intel® Optane™ Persistent Memory Modes**

| Intel® Persistent Memory Modes |  |
|--------------------------------|--|
| App Direct Mode:               | PMem operates as a solid-state disk storage device. Data is saved and is non-volatile. Both PMem and DIMM capacity counts towards CPU tiering (both PMem and DIMM capacities count towards the CPU capacity limit)                         |
| Memory Mode: <sup>1</sup>      | PMem operates as a 100% memory module. Data is volatile and DRAM acts as a cache for PMem. Only PMem capacity counts towards CPU tiering (only the PMem capacity counts towards the CPU capacity limit). This is the factory default mode. |
| Mix Mode:                      | DRAM as cache. Only PMem capacity counts towards CPU tiering (only the PMem capacity counts towards the CPU capacity limit).   |

**Notes:**

1. For Memory Mode, the Intel-recommended DIMM to PMem capacity ratio in the same CPU socket is from 1:2 to 1:16.

- For each memory channel with both a PMem and a DIMM installed, the PMem is installed in channel slot 2 (closest) and the DIMM is installed in channel slot 1.
- To maximize performance, balance all memory channels
- In configurations with PMem installed, memory mirroring is supported, with two restrictions:
  - Mirroring is only enabled on the DIMMs installed in the server; The PMem themselves do not support mirroring.
  - Only App Direct mode is supported. Memory mirroring cannot be enabled when PMem are in Memory Mode or Mixed Mode.
- Memory sparing is not supported with PMem installed

For detailed Intel PMem configurations, refer to the following link:

[https://www.cisco.com/c/en/us/td/docs/unified\\_computing/ucs/c/hw/C480M5/install/C480M5/C480M5\\_chapter\\_011.html?bookSearch=true#concept\\_b1k\\_mbt\\_tgb](https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/c/hw/C480M5/install/C480M5/C480M5_chapter_011.html?bookSearch=true#concept_b1k_mbt_tgb)

For detailed DIMM/PMem informations, refer to

[Cisco UCS C480 M5 Memory Guide](#)

## STEP 4 CHOOSE DRIVE MODULES and DRIVES (OPTIONAL)

### Choose Drive Modules

You can choose the following drive modules:

- Up to three UCSC-C480-8HDD drive modules. Each drive module is a front-mounting drive cage that accommodates 8 drives as follows:
  - Up to 8 SAS/SATA HDDs or SSDs per module, or
  - Up to 4 SAS/SATA HDDs or SSDs and up to 4 NVMe drives per drive module (NVMe drives are restricted to the first two and last two slots) per module
- Up to three UCSC-C480-8NVME drive modules. Each drive module is a front-mounting drive cage accommodating up to 8 drives each as follows:
  - The NVMe drive modules can only be ordered in a quantity of 3. The NVMe drive modules can only support NVMe drives; HDD drives are not allowed. Up to 24 NVMe drives can be used with NVMe drive modules.
  - By contrast, 3 HDD drive modules (see first main bullet) can hold up to 3x8 HDD drives, 3x4 NVMe drives (in the designated 2 leftmost and 2 rightmost cage slots only), or any combination of 24. The only restriction is that NVMe drives must ONLY be in designated slots. Otherwise an HDD drive can be used in any slot.
- Auxiliary Drive Module for 8 drives. This is a top (rear) mounting drive cage that accommodates 8 drives as follows:
  - If front facing cages are UCSC-C480-8HDD, up to 8 SAS/SATA HDDs or SSDs
  - If front facing cages are UCSC-C480-8NVME, up to 8 NVMe drives
  - NVMe drives cannot be mixed with HDD or SSD in the auxiliary drive module
  - Add an auxiliary drive module after the front facing drive slots are filled
- C480 M5 requires 2 CPU modules (supporting total of 4 CPUs) if any NVMe drives are to be used in HDD or NVMe drive modules.

The available drive modules are listed in [Table 7](#).

**Table 7 Available Drive Modules and Cable**

| Product ID (PID)     | PID Description  |
|----------------------|--|
| <b>Drive Modules</b> |  |
| UCSC-C480-8HDD       | UCS C480 M5 Drive Module for 8x HDD (standard cage front facing) |
| UCSC-C480-8NVME      | UCS C480 M5 Drive Module for 8x NVMe drives (front facing cage)  |
| <b>Drive Cable</b>   |  |
| CBL-AUX-NVME-M5      | UCS C480 M5 AUX Drive NVME Cable                                 |

## Approved Configurations

- For the UCSC-C480-8HDD drive module, the NVMe drives are restricted to the first two and last two slots per module.
- The UCSC-C480-8NVME drive module requires two CPU modules (4 CPUs total).
- At initial release, no NVMe drives are allowed in the system if the auxiliary drive cage is used with SAS/SATA drives.
- Field upgrade of a system with UCSC-C480-8HDD to use UCSC-C480-8NVME instead (or vice versa) is not currently supported.

## Choose HDDS and SSDs

The standard hard disk drive (HDD) and solid-state drive (SSD) features are:

- 2.5-inch small form factor
- Hot-swappable
- Sled-mounted

The available drives are listed in [Table 8](#), [Table 10 on page 32](#), and [Table 11 on page 34](#).

**Table 8 Supported Drives**

| Product ID (PID)      | PID Description                     | Drive Type | Capacity |
|-----------------------|-------------------------------------|------------|----------|
| <b>HDDs</b>           |                                     |            |          |
| <b>HDDs (15K RPM)</b> |                                     |            |          |
| UCS-HD300G15K12N      | 300 GB 12G SAS 15K RPM SFF HDD      | SAS        | 300 GB   |
| UCS-HD600G15K12N      | 600 GB 12G SAS 15K RPM SFF HDD      | SAS        | 600 GB   |
| UCS-HD900G15K12N      | 900 GB 12G SAS 15K RPM SFF HDD      | SAS        | 900 GB   |
| <b>HDDs (10K RPM)</b> |                                     |            |          |
| UCS-HD300G10K12N      | 300 GB 12G SAS 10K RPM SFF HDD      | SAS        | 300 GB   |
| UCS-HD600G10K12N      | 600 GB 12G SAS 10K RPM SFF HDD      | SAS        | 600 GB   |
| UCS-HD12TB10K12N      | 1.2 TB 12G SAS 10K RPM SFF HDD      | SAS        | 1.2 TB   |
| UCS-HD18TB10K4KN      | 1.8 TB 12G SAS 10K RPM SFF HDD (4K) | SAS        | 1.8 TB   |
| UCS-HD24TB10K4KN      | 2.4 TB 12G SAS 10K RPM SFF HDD (4K) | SAS        | 2.4 TB   |
| <b>HDDs (7K RPM)</b>  |                                     |            |          |
| UCS-HD1T7K12N         | 1.0 TB 12G SAS 7.2K RPM SFF HDD     | SAS        | 1.0 TB   |
| UCS-HD2T7K12N         | 2.0 TB 12G SAS 7.2K RPM SFF HDD     | SAS        | 2.0 TB   |

Table 8 Supported Drives

| Product ID (PID)  | PID Description  | Drive Type | Capacity |
|---|--|------------|----------|
| <b>SAS/SATA SSDs</b>  |  |            |          |
| <b>Enterprise Performance SSDs (High endurance, supports up to 10X or 3X DWPD (drive writes per day))</b> |  |            |          |
| <b>SAS SSDs</b>   |  |            |          |
| UCS-SD32TKA3X-EP  | 3.2TB 2.5in Enter Perf 12G SAS Kioxia G2 SSD (3X)                                | SAS        | 3.2 TB   |
| <b>SATA SSDs</b>  |  |            |          |
| UCS-SD480G63X-EP  | 480 GB 2.5in Enterprise performance 6G SATA SSD(3X endurance) (IntelS4600/S4610) | SATA       | 480 GB   |

| <b>NOTE:</b> Cisco uses solid state drives from a number of vendors. All solid state drives are subject to physical write limits and have varying maximum usage limitation specifications set by the manufacturer. Cisco will not replace any solid state drives that have exceeded any maximum usage specifications set by Cisco or the manufacturer, as determined solely by Cisco. |  |            |          |

**Notes:**

1. Except HGST, Intel and Western Digital (WD) NVMe drives can be mixed anywhere in a C480 M5.

## Approved Configuration

---

Many configurations are possible. Some will be shown here.

### (1) Three Drive Modules for 8x HDD

- Option 1: Fill all three drive modules with all SAS/SATA HDDs or SSDs for a total of 24 drives
- Option 2: Fill one drive module with all SAS/SATA HDDs or SSDs and the other two with four SAS/SATA HDDs/SSDs and four NVMe drives. You will then have 16 SAS/SATA drives and 8 NVMe drives.
- Option 3: Fill two drive modules with all SAS/SATA drives and the remaining drive module with four SAS/SATA drives and four NVMe drives. You will then have 20 SAS/SATA drives and four NVMe drives.
- Option 4: Fill each drive module with four SAS/SATA drives and four NVMe drives. You will then have 12 SAS/SATA drives and 12 NVMe drives.

#### NOTE:

1. All these options require a UCSC-RAID-M5HD RAID controller
  2. Supports RAID 0, 1, 5, 6, 10, 50, 60, and JBOD mode. Supports running mixed RAID and JBOD mode.
  3. For all self-encrypting drives (SED), standalone Management (CIMC/UCSM) is supported for configuring and managing local keys.
  4. SEDs are managed with local key management only. Third-party key management will be supported (KMIP compliant).
- 

## Caveats

---

- You can mix SAS/SATA drives. You can also mix HDD and SSD drives, as long as all the HDDs are in the same RAID volume and all the SSDs are in the same RAID volume.
- SSDs and HDDs should not be mixed in the same RAID volume.
- You can mix SAS/SATA and NVMe drives in the front facing HDD drive module.

### (2) Three Drive Modules for 8x NVMe

- Option 1: Fill all three drive modules with NVMe drives for a total of 24 drives. SSDs or HDDs cannot be placed in this module.

### (3) Auxiliary Drive Module for 8x Rear Drives

You can install 8 drives in the top rear module with either of the front-facing drive cage options

- Option 1: Fill the module with up to 8 SAS/SATA drives. This option is available when UCSC-C480-8HDD selected for front-facing cages and there are no NVMe drives anywhere in the server.

**NOTE:** PCIe slot 11 must be populated with a UCSC-SAS9460-8i Cisco 12G 9460-8i RAID controller with a 2GB cache to control SAS/SATA drives in the auxiliary drive module.

---

- Option 2: Fill the module with up to 8 NVMe drives. This option available when UCSC-C480-NVME selected for front-facing cages.

**NOTE:** PCIe slot 10 must be populated with a UCSC-NVME-SC PCIe NVMe Switch Module to control NVMe drives in the auxiliary drive module.

---

## Intel® Virtual RAID on CPU (Intel® VROC)

The server supports Intel® Virtual RAID on CPU (Intel® VROC). VROC is an enterprise RAID solution used with Intel NVMe SSDs (see [Table 13](#) for supported Intel NVMe SSDs). The Intel® Volume Management Device (Intel® VMD) is a controller integrated into the CPU PCIe root complex. Intel® VMD NVMe SSDs are connected to the CPU, which allows the full performance potential of fast Intel® Optane™ SSDs to be realized. Intel® VROC, when implemented, replaces traditional hardware RAID host bus adapter (HBA) cards placed between the drives and the CPU.

**NOTE:**

- Intel® VROC is only supported with Intel drives
  - Intel® VROC enablement key factory pre-provisioned to BIOS - no additional licensing required.
- 

VROC has the following features:

- Small Form Factor (SFF) drive support (only)
- No battery backup (BBU) or external SuperCap needed
- Software-based solution utilizing Intel SFF NVMe direct connected to Intel CPU
- RAID 0/1/5/10 support
- Windows, Linux, VMware OS support.
- Host Tools- Windows GUI/CLI, Linux CLI.
- UEFI Support- HII Utility, OBSE.
- Intel VROC NVMe operates in UEFI mode only

See the [instructions on setting up and managing VROC for Intel NVMe SSDs](#) for more information.

## STEP 5 CHOOSE RAID CONFIGURATION

The C480 M5 server accommodates any one of the following RAID controllers for internal drives:

- Cisco 12G Modular RAID controller with 4GB cache
- Cisco 12G 9460-8i Raid controller with 2GB cache

The C480 M5 server accommodates the following HBA for external drives:

- Cisco 9400-8E 12G SAS HBA (supports JBOD only)

The C480 M5 chassis contains three front drive modules, each housing up to 8 HDD/SSD drives or up to 4 HDD/SSD and up to 4 NVMe drives (24 front facing drives total).

Cisco can provide factory-configured RAID 0, 1, 5, 6, and 10 systems depending on the RAID implementation chosen, the RAID controller chosen, and the number of drives ordered. Factory-configured RAID options are listed at the end of [Table 9](#). Note that RAID levels 50 and 60 are supported on the Cisco 12G SAS Modular 12-port RAID controller, but are not factory configurable.

SSDs and HDDs require a RAID controller.

### Choose Drive RAID Controller

Choose one internal RAID controller with a desired RAID configuration option from [Table 9](#) and, if desired, one external drive RAID controller.

**NOTE:** NVMe drives in the front drive bays are controlled directly from the PCIe interfaces on the CPUs. NVMe drives in the auxiliary drive bay are controlled with the UCSC-NVME-SC PCIe NVMe Switch Module.

**Table 9 Available Internal Drive RAID Options**

| Product ID (PID)                            | PID Description  |
|---|--|
| <b>RAID Controllers for Internal Drives</b> |  |
| UCSC-RAID-M5HD                              | <p>Cisco 12G Modular RAID controller with 4GB cache (RAID 0, 1, 5, 6, 10, 50, 60 supported)</p> <ul style="list-style-type: none"> <li>■ Plugs into a dedicated PCIe slot on the server motherboard (see <a href="#">Figure 6 on page 66</a>).</li> <li>■ Supports from 1 to 24 internal SAS or SATA drives.</li> <li>■ Must be ordered with a UCSC-SCAP-M5 supercap cache backup.</li> <li>■ Factory-configured RAID options: RAID 0, 1, 5, 6, 10 (see the RAID PIDs section in this table).</li> <li>■ This RAID controller supports only SAS/SATA drives in the front-facing HDD card cages.</li> </ul> |

Table 9 Available Internal Drive RAID Options (*continued*)

| Product ID (PID)                        | PID Description  |
|---|--|
| UCSC-SAS9460-8i                         | <p>Cisco 12G 9460-8i Raid controller with 2 GB cache (RAID 0, 1, 5, 10, 50 supported)</p> <ul style="list-style-type: none"> <li>■ Plugs into PCIe slot 11 to control up to 8 SAS/SATA in the rear auxiliary drive module</li> <li>■ Used only when front facing drive cages are UCSC-C480-8HDD</li> <li>■ Supports up to 8 SAS or SATA drives</li> <li>■ Factory-configured RAID options: RAID 0, 1, 5, 10 (see the RAID PIDs section in this table)</li> <li>■ This controller is only required for the top loading eight drives when they are SAS/SATA. Not used if this is an all NVMe system and top-loading drives are NVMe</li> </ul> |
| <b>SAS HBA for External JBOD Attach</b> |  |
| UCSC-9400-8E                            | Cisco 9400-8E 12G SAS HBA for external JBOD attach   |
| <b>RAID Configuration</b>               |  |
| R2XX-RAID0                              | Factory pre-configured RAID striping option<br>Enable RAID 0 Setting. Requires a minimum of 1 hard drive.  |
| R2XX-RAID1                              | Factory pre-configured RAID mirroring option<br>Enable RAID 1 Setting. Requires exactly 2 drives, with same size, speed, capacity.   |
| R2XX-RAID5                              | Factory pre-configured RAID option<br>Enable RAID 5 Setting. Requires minimum 3 drives of same size, speed, capacity.  |
| R2XX-RAID6                              | Factory pre-configured RAID option<br>Enable RAID 6 Setting. Requires minimum 4 drives of same size, speed, capacity.  |
| R2XX-RAID10                             | Factory pre-configured RAID option<br>Enable RAID 10 Setting. Requires an even number of drives (minimum 4 drives) of same size, speed, capacity.  |

**NOTE:**

- No RAID option can be chosen if you have one of the following configurations:
  - A mix of SAS and SATA drives
  - No drives
- For Cisco SAS 9400-8e 12G SAS HBA external drive enclosure support, see the enclosure section of the compatibility list at the following link:  
<https://www.broadcom.com/support/storage/interop-compatibility/>  
 Customers should contact their storage vendor for technical support related to external JBOD enclosures.

---

## Approved Configurations

---

### (1) One RAID controller card for drive module for 8x HDD SAS/SATA drives

- Choose the UCSC-RAID-M5HD Cisco 12G Modular RAID controller with 4GB cache if you have SAS/SATA drives mounted in any drive module for 8x HDD.

### (2) One RAID controller card for rear top facing auxiliary card cage SAS/SATA drives

- Choose the UCSC-SAS9460-8i Cisco 12G 9460-8i RAID controller with 2 GB cache if you have SAS/SATA drives mounted in the auxiliary drive module. This RAID controller mounts in PCIe slot 11 in a four CPU configuration. This RAID controller mounts in PCIe slot 10 in a two CPU configuration.

**NOTE:** NVMe drives in either of the front facing cage options are controlled directly from the PCIe interfaces on the CPUs. For NVMe drives in the auxiliary drive bay, use the UCSC-NVME-SC PCIe NVMe Switch Module.

---

### (3) External drive control

- The Cisco 12G 9400-8e SAS HBA controls external drives and can be installed simultaneously with the Cisco 12G SAS Modular RAID controller card (UCSC-RAID-M5) or Cisco 12 Gbps Modular SAS HBA(UCSC-SAS-M5). A maximum of two Cisco 9400-8e 12G SAS HBAs can be installed.

---

## Caveats

---

- You can choose an optional RAID configuration for the internal drive SAS/SATA RAID controller (RAID 0, 1, 5, 6, or 10), which is pre-configured at the factory. If you do not choose a RAID configuration, the disks will be configured as a JBOD.

## STEP 6 CHOOSE PCIe OPTION CARD(S)

For up-to-date server compatibility, please check the Hardware and Software compatibility list (HCL) at <https://ucshcltool.cloudapps.cisco.com/public/>.

The standard PCIe card offerings are:

- Converged Network Adapters (CNAs)
- Network Interface Cards (NICs)
- Accelerators/Smart (NICs)
- Host Bus Adapters (HBAs)
- UCS NVMe/PCIe Add in Cards

### Choose PCIe Option Cards

The available PCIe option cards are listed in [Table 10](#).

**Table 10 Available PCIe Option Cards**

| Product ID (PID)                         | PID Description  | Form Factor | Electrical Slot |
|--|--|-------------|-----------------|
| <b>Converged Network Adapters (CNAs)</b> |  |             |                 |
| UCSC-PCIE-C100-04                        | Cisco UCS VIC 1495 Dual Port 40/100G QSFP28 CNA PCIe Spare | HHHL        | x 16            |
| UCSC-PCIE-C40Q-03                        | Cisco UCS VIC 1385 Dual Port 40Gb QSFP+ CNA w/RDMA         | HHHL        | x 16            |
| UCSC-PCIE-C25Q-04                        | Cisco UCS VIC 1455 Quad Port 10/25G SFP28 CNA PCIE         | HHHL        | x 16            |
| <b>Network Interface Cards (NICs)</b>    |  |             |                 |
| <b>1 Gb NICs</b>                         |  |             |                 |
| UCSC-PCIE-IRJ45                          | Intel i350 Quad Port 1GBase-T NIC                          | HHHL        | x 8             |
| <b>10 Gb NICs</b>                        |  |             |                 |
| N2XX-AIPCI01                             | Intel X520 Dual Port 10Gb SFP+ NIC                         | HHHL        | x 8             |
| UCSC-PCIE-ID10GC                         | Intel X550-T2 Dual Port 10GBase-T NIC                      | HHHL        | x 8             |
| UCSC-PCIE-ID10GF                         | Intel X710-DA2 Dual Port 10Gb SFP+ NIC                     | HHHL        | x 8             |
| UCSC-PCIE-IQ10GF                         | Intel X710 Quad Port 10Gb SFP+ NIC                         | HHHL        | x 8             |
| UCSC-PCIE-IQ10GC                         | Intel X710 Quad Port 10GBase-T NIC                         | HHHL        | x 8             |
| <b>25 Gb NICs</b>                        |  |             |                 |
| UCSC-PCIE-QD25GF                         | Qlogic QL41212H Dual Port 25Gb NIC                         | HHHL        | x 8             |

| <b>UCS NVMe/PCIe Add in Cards</b>    |  |             |                 |
| UCSC-NVME-SC                         | PCIe NVME Switch Module - plugs into PCIe slot 10 when NVMe drives are used on the auxiliary drive module. | HHHL        | x 8             |

### Approved Configurations

#### (1) Select up to 12 PCIe Cards (restricted to 6 cards for 2-CPU systems)

- Use Table 13 as a guide for adding PCIe cards. See [Figure 5](#) for the slot locations.

Table 11 PCIe Expansion Slot Numbering

| Slot Number | Slot Characteristics   |
|-------------|--|
| 1           | CPU1 controlled, PCIe Gen 3, x16 lanes, FL, FH card, x24 connector, GPU, NCSI, VIC pri |
| 2           | CPU1 controlled, PCIe Gen 3, x16 lanes, FL, FH card, x24 connector, GPU, NCSI, VIC sec |
| 3           | CPU3 controlled, PCIe Gen 3, x8 lanes, FL, FH card, x24 connector, GPU, NCSI, VIC      |
| 4           | CPU3 controlled, PCIe Gen 3, x16 lanes, FL, FH card, x24 connector, GPU, NCSI, VIC     |
| 5           | CPU2 controlled, PCIe Gen 3, x8 lanes, FL, FH card, x24 connector, GPU, NCSI, VIC      |
| 6           | CPU3 controlled, PCIe Gen 3, x16 lanes, FL, FH card, x24 connector, GPU, NCSI, VIC     |
| 7           | CPU4 controlled, PCIe Gen 3, x8 lanes, FL, FH card, x24 connector, GPU, NCSI, VIC      |
| 8           | CPU2 controlled, PCIe Gen 3, x16 lanes, FL, FH card, x24 connector, GPU, NCSI, VIC     |
| 9           | CPU2 controlled, PCIe Gen 3, x8 lanes, FL, FH card, x24 connector, GPU                 |
| 10          | CPU2 controlled, PCIe Gen 3, x16 lanes, FL, FH card, x24 connector, GPU                |
| 11          | CPU4 controlled, PCIe Gen 3, x8 lanes, FL, FH card, x24 connector                      |
| 12          | CPU4 controlled, PCIe Gen 3, x8 lanes, FL <sup>1</sup> , FH card, x24 connector        |

Notes:

- 1. This slot cannot be used when the auxiliary drive module is installed because of lack of clearance

Figure 5 PCIe Slot Locations

306013

---

## Caveats

---

- C480M5-8HDD - Disk slots 1, 2, and 18 not VMD/VROC capable
- C480M5-8NVME - Disk slots 7, 8, and 23 not VMD/VROC capable
- CPU1 and CPU2 must be installed to support PCIe slots 1, 2, 5, 8, 9, 10
- CPU3 and CPU4 must be installed to support PCIe slots 3, 4, 6, 11, 12.
- The Cisco Card NIC mode is currently supported only with a Cisco VIC card that is installed in PCIe slot 1, 2, 3, 4, 5, 6, 7, 8
- The C480 M5 server accommodates a Cisco Virtual Interface card, which is supported primarily in slot 1.
  - Only one Cisco 1385 VIC can be used for both UCSM management and data traffic in the C480 M5 server
  - The Cisco 1385 VIC in slot 1 handles management and data traffic.
  - If a second Cisco 1385 VIC is installed in slot 2, 3, 4, 5, 6, 7 or 8 it will be used for data traffic only.
  - Only two VICs total are supported in UCSM modeThe following combinations of VICs are supported:
  - Max 8 x 1385, or
  - Max 8 x 1495, or
  - Max 4 x 1455, or
  - Max 2 x 1455 + max 2 x 1495 (mixed mode)UCSM mode: a maximum of four VICs are supported  
CIMC mode: a maximum of eight VICs are supported
- All PCIe slots are standard-height and require a standard-height mounting bracket on the PCIe card.
- Additional considerations for the Cisco 1385 VIC card:
  - Supports dual 40G SFP+ optical and copper twinax connections
  - To use the Cisco Card NIC mode, this card must be installed in PCIe slot 1, 2, 3, 4, 5, 6, 7, 8. Slot 1 or 2 can operate while the server is in standby power mode.
- To help ensure that your operating system is compatible with the cards you have selected, please check the Hardware Compatibility List at this URL:

[http://www.cisco.com/en/US/products/ps10477/prod\\_technical\\_reference\\_list.html](http://www.cisco.com/en/US/products/ps10477/prod_technical_reference_list.html)

**NOTE:** Mixing 1300 and 1400 series VIC and MLOMs configurations is not supported.

---

## PCIe Card Configuration with 2 and 4 CPU

Below tables helps in finding the right slot for the selected PCIe cards

**Table 12 PCIe Card configuration with 2 CPU**

| PCIe Card Type              | Primary Slot  | Secondary Slot | Alternate Slot | Notes                         |
|-----------------------------|---------------|----------------|----------------|-------------------------------|
| Laguna Beach Plus RAID card | Midplane Slot | None           |                |                               |
| Talledega RAID card         | 10            | None           |                |                               |
| PCIe Switch card            | 10            | None           |                |                               |
| Cisco x16 VIC (Clearlake)   | 1             | 2              | 8, 5           |                               |
| Nvidia and AMD GPUs         | 2             | 8              | 10, 1          | Slot 1 only if no VIC present |
| Other 16x PCIe I/O card     | 8             | 10             | 2, 1           |                               |
| Other 8x PCIe I/O card      | 9             | 5              | 8, 2, 10, 1    |                               |
| Cisco x16 VIC (Bodaga)      | 1             | 2              | 8              |                               |

**Table 13 PCIe Card configuration with 4 CPU**

| PCIe Card Type              | Primary Slot  | Secondary Slot | Alternate Slot                 | Notes                         |
|-----------------------------|---------------|----------------|--------------------------------|-------------------------------|
| Laguna Beach Plus RAID card | Midplane Slot | None           |                                |                               |
| Talledega RAID card         | 11            | None           |                                |                               |
| PCIe Switch card            | 10            | None           |                                |                               |
| Cisco x16 VIC (Clearlake)   | 1             | 2              | 8, 6, 4, 7, 5, 3               |                               |
| Nvidia and AMD GPUs         | 2             | 4              | 6, 8, 10, 1                    | Slot 1 only if no VIC present |
| Other 16x PCIe I/O card     | 4             | 6              | 8, 2, 10, 1                    |                               |
| Other 8x PCIe I/O card      | 9             | 12             | 7, 5, 3, 11, 8, 6, 4, 2, 10, 1 |                               |
| Cisco x16 VIC (Bodaga)      | 1             | 2              | 8, 6, 4                        |                               |

**NOTE:**

- Primary Slots are first priorities
  - Slot 1 only if no VIC present
  - When no VIC presents in the configuration, GPU primary slot could be 1
  - First VIC has the highest priority, then GPUs, then others.
  - Secondary slots are for additional card of the same type, follow the order listed
  - Alternate slots can be used but may be with reduced functionality
-

## STEP 7 ORDER OPTIONAL PCIe OPTION CARD ACCESSORIES

- These optics and cables have been tested for compatibility and are approved for use with Intel® Ethernet Network Adapter (as of the time of this publication). For the latest update, check the and consult Cisco Compatibility Matrix at <https://tmgmatrix.cisco.com>.
- For list of supported optics and cables for VIC1385, VIC 1387, VIC 1440, VIC 1455, VIC 1457, VIC 1495 and VIC 1497 refer to VIC 1300 and VIC 1400 series data sheet at the following links:
  - <https://www.cisco.com/c/en/us/products/collateral/interfaces-modules/unified-computing-system-adapters/datasheet-c78-741130.html>
  - <https://www.cisco.com/c/en/us/products/interfaces-modules/ucs-virtual-interface-card-1387/index.html>
  - <https://www.cisco.com/c/en/us/products/collateral/interfaces-modules/unified-computing-system-adapters/datasheet-c78-734727.html>

Refer to the these links for additional Connectivity Options.

| Intel:                            | Marvell/Qlogic:                                      | Mellanox:                              |
|-----------------------------------|--|--|
| <a href="#">Product Guide</a>     | <a href="#">41000 series Interoperability Matrix</a> | <a href="#">Firmware Release Notes</a> |
| <a href="#">Speed White Paper</a> | <a href="#">45000 series Interoperability Matrix</a> |  |

## STEP 8 ORDER OPTICAL DRIVE (OPTIONAL)

You can order an optional front facing optical drive (DVDRW). If you do, it displaces drive bay module 3 in the front facing drive cage.

### Select Optical Drive

---

The available optical drive is listed in [Table 19](#).

Table 14 Available Optical Drive

| Product ID (PID) | PID Description                |
|------------------|--------------------------------|
| UCSC-C480-DVD    | UCS C480 M5 Optional DVD drive |

---

## STEP 9 ORDER SECURE DIGITAL CARDS or M.2 DEVICES (OPTIONAL)

A mini-storage connector is provided on the motherboard. There are two choices of mini-storage modular adapters that fit in the connector on the motherboard.

1. Adapter with two SD HC sockets that accommodate up to two SDHC cards
2. Adapter with two M.2 sockets that accommodate up to two M.2 devices

### SD Cards and Modular Adapter

The SDHC card ordering information is listed in [Table 15](#).

Table 15 PIDs for Secure Digital High-Capacity Card(s) and Modular Adapter

| Product ID (PID)          | PID Description               |
|---------------------------|-------------------------------|
| UCS-SD-32G-S              | 32 GB SD Card for UCS servers |
| UCS-SD-64G-S              | 64 GB SD Card for UCS servers |
| UCS-SD-128G               | 128GB SD Card for UCS servers |
| UCS-MSTOR-SD <sup>1</sup> | Modular adapter for SD card   |

**Notes:**

1. The SD modular adapter (PID UCS-MSTOR-SD) is auto-included in CCW and is not selectable.

**NOTE:** Starting from vSphere 8.0, SD cards/USB media as a standalone boot device will not be supported by VMware. For more information please refer to the VMware KB article: <https://kb.vmware.com/s/article/85685>

### Supported Configurations

- (1) Select one or two Cisco secure digital cards
  - Select up to two 32, 64, or 128 GB SD cards
- (2) Do not mix SD cards
- (3) If you select SDHC cards, you cannot select any M.2 SATA SSD drive.

### M.2 SATA Cards and Modular Adapter

Order one or two matching M.2 SATA SSDs (see [Table 16](#)) along with a mini storage carrier or a boot-optimized RAID controller (see [Table 17](#)).

**NOTE:** It is recommended that M.2 SATA SSDs be used as boot-only devices.

Each mini storage carrier or boot-optimized RAID controller can accommodate up to two SATA M.2 SSDs shown in [Table 16](#).

**Table 16 M.2 SATA SSDs**

| Product ID (PID) | PID Description     |
|------------------|---------------------|
| UCS-M2-I240GB    | 240 GB M.2 SATA SSD |
| UCS-M2-I480GB    | 480 GB M.2 SATA SSD |
| UCS-M2-240G      | 240GB SATA M.2      |
| UCS-M2-480G      | 480GB M.2 SATA SSD  |
| UCS-M2-960G      | 960GB SATA M.2      |

**Table 17 Mini Storage Carrier/Boot-Optimized RAID Controller**

| Product ID (PID) | PID Description  |
|------------------|--|
| UCS-MSTOR-M2     | Mini Storage Carrier for M.2 SATA (holds up to 2 M.2 SATA SSDs)        |
| UCS-M2-HWRAID    | Cisco Boot optimized M.2 RAID controller (holds up to 2 M.2 SATA SSDs) |

**NOTE:**

- The UCS-M2-HWRAID boot-optimized RAID controller supports RAID 1 and JBOD mode
- (CIMC/UCSM) is supported for configuring of volumes and monitoring of the controller and installed SATA M.2 drives
- The minimum version of Cisco IMC and Cisco UCS Manager that support this controller is 4.0(4b) and later. The name of the controller in the software is MSTOR-RAID
- The SATA M.2 drives can boot in UEFI mode only. Legacy boot mode is not supported
- Hot-plug replacement is not supported. The server must be powered off.
- The boot-optimized RAID controller is not supported when the server is used as a compute node in HyperFlex configurations

- Order either the Mini Storage carrier or the Boot-Optimized RAID controller from [Table 17](#).
  - Choose the UCS-MSTOR-M2 mini storage carrier for controlling the M.2 SATA drives with no RAID control.

- Choose the UCS-M2-HWRAID Boot-Optimized RAID controller for hardware RAID across the two internal SATA M.2 drives. The Boot-Optimized RAID controller holds up to 2 matching M.2 SATA drives.
- Order up to two matching M.2 SATA SSDs from [Table 16](#).

**NOTE:** The Boot-Optimized RAID controller supports VMWare, Windows and Linux Operating Systems

---

### Caveats

---

- You cannot mix M.2 SATA SSDs with SD cards.
- Order either one or two identical M.2 SATA SSDs for the mini-storage carrier or boot-optimized RAID controller. You cannot mix M.2 SATA SSD capacities.
- When ordering two M.2 SATA drives with embedded software RAID, the maximum number of internal SATA drives supported is six. To support greater than six internal drives, a Cisco 12G Raid Controller or a Cisco 12G SAS HBA must be ordered

## STEP 10 ORDER INTERNAL MICRO-SD CARD MODULE (OPTIONAL)

A blank 32 GB micro-SD card can be ordered. It serves as a dedicated local resource for utilities such as HUU. Images can be pulled from a file share (NFS/CIFS) and uploaded to the card for future use.

Table 18 32 GB Secure Digital (SD) Card (blank)

| Product ID (PID) | PID Description                     |
|------------------|-------------------------------------|
| UCS-MSD-32G      | 32 GB Micro-SD Card for UCS servers |

## STEP 11 ORDER GPU CARDS and ACCESSORIES (OPTIONAL)

### Select GPU Options

The available GPU PCIe options are listed in [Table 19](#).

Table 19 Available PCIe Option Cards

| Product ID (PID)                              | PID Description                        | Card Size                | Maximum cards Per node |
|---|--|--------------------------|------------------------|
| <b>GPU PCIe Cards<sup>1</sup></b>             |  |                          |                        |
| UCSC-GPU-M10 <sup>2</sup>                     | NVIDIA M10                             | Full-Height Dual Width   | 3                      |
| UCSC-GPU-T4-16 <sup>3</sup>                   | NVIDIA T4 16GB                         | Low Profile Single-Width | 9                      |
| UCSC-GPU-A100-80                              | TESLA A100, PASSIVE, 300W, 80GB        | Full-Height Dual Width   | 6                      |
| UCSC-GPU-A40                                  | TESLA A40 RTX, PASSIVE, 300W, 48GB     | Full-Height Dual Width   | 6                      |
| <b>GPU Individual Power Cable<sup>4</sup></b> |  |                          |                        |
| UCS-P100CBL-480M5                             | C480M5 NVIDIA P40/P100/V100/A100 Cable |                          |                        |
| UCS-P10CBL-480M5                              | C480M5 NVIDIA M10 Cable                |                          |                        |

**Notes:**

1. Refer to [C480 GPU Card Installation](#) for more details.
2. The maximum number of M10 GPUs is limited to 3 in a C480 M5 server.
3. T4 GPUs can be populated as follows:  
 If a VIC (slot 1) and an NVMe switch (slot 10) are both installed, single-width T4 GPUs can be installed in slots 2 through 9 (8 T4 GPUs total)  
 If a VIC (slot 1) is installed and an NVMe switch (slot 10) is not installed, single-width T4 GPUs can be installed in slots 2 through 10 (9 T4 GPUs total)  
 If neither a VIC or NVMe switch are installed, T4 GPUs can be installed in slots 1 through 10. for the additional information related to GPU card slots, refer to [PCIe Card Configuration with 2 and 4 CPU on page 36](#)
4. GPU power cables are auto selected when configuring a server.

**CAUTION:**

- The maximum allowable operating temperature for the M10 GPUs is 35° C (95° F).
- For the complete operating temperature requirement of double-wide GPUs Please refer to [table 3](#) of the below url:  
[https://www.cisco.com/c/en/us/td/docs/unified\\_computing/ucs/c/hw/C480M5/install/C480M5/C480M5\\_appendix\\_0110.html](https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/c/hw/C480M5/install/C480M5/C480M5_appendix_0110.html)

**NOTE:**

- A 2-CPU configuration can have 6 GPUs (if there is no VIC in slot 1 and no NVMe switch in slot 10) and a 4-CPU configuration can have up to 10 GPUs (if there is no VIC in slot 1 and no NVMe switch in slot 10). Any configuration that includes a GPU requires four 1600 W power supplies in the server.
  - All GPU cards must be procured from Cisco as there is a unique SBIOS ID required by CIMC and UCSM
  - GPUs cannot be mixed
- 

**Caveats**

---

- NVIDIA M10 can support only less than 1TB of total memory in the server.

## STEP 12 ORDER POWER SUPPLIES

The available power supplies are listed in [Table 20](#).

Table 20 Power Supplies

| Product ID (PID) | PID Description  |
|------------------|--|
| UCSC-PSU1-1600W  | Cisco UCS 1600W AC Power Supply for Rack Server Platinum |

---

### Caveats

- If any GPU is installed, four power supplies are required

## STEP 13 SELECT AC POWER CORD(S)

Select the appropriate AC power cords listed in [Table 21](#). You may select a minimum of no power cords and a maximum of two power cords.

Table 21 Available Power Cords

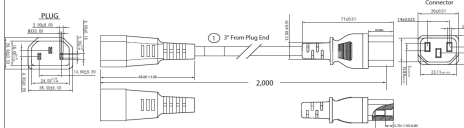

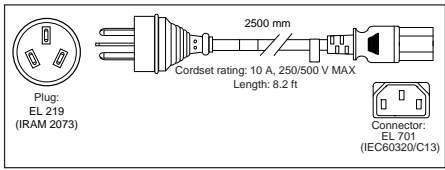

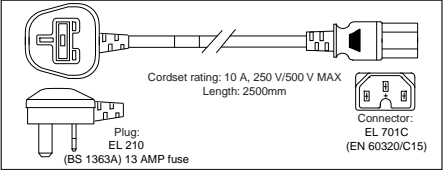

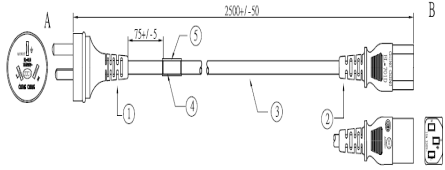

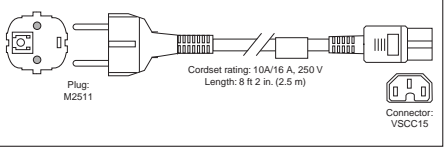

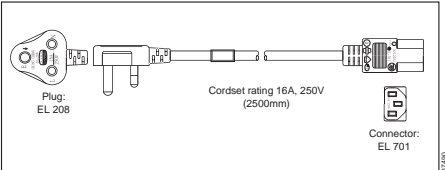

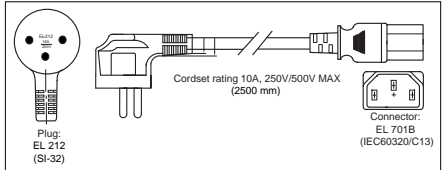

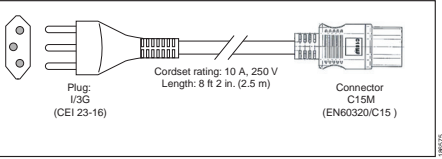

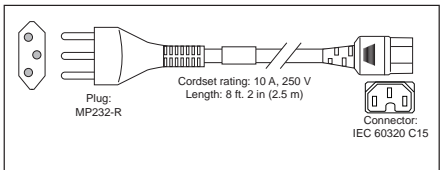

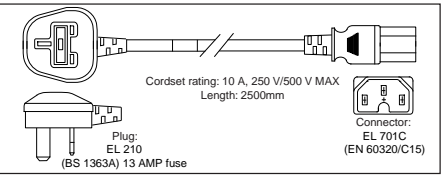

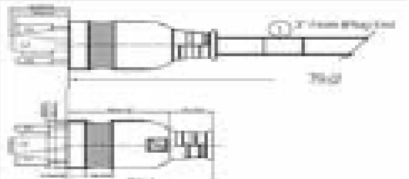

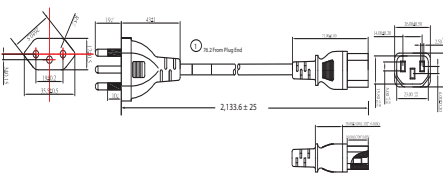

| Product ID (PID) | PID Description   | Images   |
|------------------|---|--|
| NO-POWER-CORD    | ECO friendly green option, no power cable will be shipped | Not applicable   |
| CAB-C13-C14-2M   | CABASY,WIRE,JUMPER CORD, PWR, 2 Meter, C13/C14,10A/250V   |    |
| CAB-250V-10A-AR  | Power Cord, SFS, 250V, 10A, Argentina                     |    |
| CAB-9K10A-AU     | Power Cord, 250VAC 10A 3112 Plug, Australia               |   |
| CAB-250V-10A-CN  | AC Power Cord - 250V, 10A - PRC                           |  |
| CAB-9K10A-EU     | Power Cord, 250VAC 10A CEE 7/7 Plug, EU                   |  |
| CAB-250V-10A-ID  | Power Cord, SFS, 250V, 10A, India                         |  |

Table 21 Available Power Cords

| Product ID (PID)  | PID Description  | Images  |
|-------------------|--|---|
| CAB-250V-10A-IS   | Power Cord, SFS, 250V, 10A, Israel                             |  <p>Plug: EL 212 (SI-32)</p> <p>Cordset rating 10A, 250V/500V MAX (2500 mm)</p> <p>Connector: EL 701B (IEC60320/C13)</p>                          |

| CAB-C13-C14-IN    | Power Cord Jumper, C13-C14 Connectors, 1.4 Meter Length, India | Image not available   |
| CAB-C13-C14-3M-IN | Power Cord Jumper, C13-C14 Connectors, 3 Meter Length, India   | Image not available   |

## STEP 14 ORDER OPTIONAL CABLE MANAGEMENT ARM

A cable management arm is available for the tool-less slide rail kit (PID UCSC-RAIL-4U-M5). The cable management arm attaches to the left and right slide rails at the rear of the server and is used for cable management. You can order the cable management arm listed in [Table 22](#).

Table 22 Cable Management Arm

| Product ID (PID) | PID Description                      |
|------------------|--------------------------------------|
| UCSC-CMA-4U-M5   | Cable Management Arm for UCS C480 M5 |

## STEP 15 ORDER USB DRIVE (OPTIONAL)

You can order up to one optional blank USB drive. The ordering information is listed in [Table 23](#).

Table 23 USB Drive (blank)

| Product ID (PID)  | PID Description                              |
|-------------------|--|
| UCS-USBFLSHB-16GB | UCS Servers 16 GB Flash USB Drive (optional) |

See [Figure 6 on page 66](#) for the location of the USB drive socket.

## STEP 16 ORDER SECURITY DEVICES (OPTIONAL)

The Trusted Platform Module (TPM) is a computer chip (microcontroller) that can securely store artifacts used to authenticate the platform (server). These artifacts can include passwords, certificates, or encryption keys. A TPM can also be used to store platform measurements that help ensure that the platform remains trustworthy. Authentication (ensuring that the platform can prove that it is what it claims to be) and attestation (a process helping to prove that a platform is trustworthy and has not been breached) are necessary steps to ensure safer computing in all environments.

A safety intrusion switch gives a notification of any unauthorized mechanical access into the server

The security device ordering information listed in [Table 24](#).

**Table 24 Security Devices**

| Product ID (PID) | PID Description   |
|------------------|---|
| UCSX-TPM2-001    | Trusted Platform Module 1.2 for UCS Servers                       |
| UCSX-TPM2-002    | Trusted Platform Module 2.0 for UCS servers                       |
| UCSX-TPM2-002B   | Trusted Platform Module 2.0 M5 UCS Servers (FIPS 140-2 Compliant) |
| UCS-C480-INT-SW  | UCS C480 Safety Intrusion Switch                                  |

**NOTE:** The module used in this server conforms to TPM v1.2 and 2.0, as defined by the Trusted Computing Group (TCG).

## STEP 17 ORDER A BEZEL (OPTIONAL)

The bezel ordering information is listed in [Table 25](#).

**Table 25 Available Bezels**

| Product ID (PID) | PID Description                            |
|------------------|--|
| UCSC-BZL-EX-M5   | Optional bezel for UCS C480 M5 rack server |

## STEP 18 SELECT MANAGEMENT CONFIGURATION (OPTIONAL)

By default, the C480 M5 server NIC mode is configured to be Shared LOM Extended. This NIC mode allows any LOM port or adapter card port to be used to access the Cisco Integrated Management Controller (CIMC). The Cisco VIC card must be installed in a slot with NCSI support.

To change the default NIC mode to Dedicated, select the UCSC-DLOM-01 PID shown in [Table 26](#). In Dedicated NIC mode, the CIMC can be accessed only through the dedicated management port. See [Chassis Rear View on page 6](#) for the location of the management port.

To change the default NIC mode to Cisco Card Mode, select the UCSC-CCARD-01 PID shown in [Table 26](#). In this mode, you can assign an IP address to the CIMC using DHCP and from there you can fully automate your deployment.

For more details on all the NIC mode settings, see

[https://www.cisco.com/c/en/us/td/docs/unified\\_computing/ucs/c/hw/C480M5/install/C480M5/C480M5\\_chapter\\_010.html#concept\\_rqj\\_vsr\\_fz](https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/c/hw/C480M5/install/C480M5/C480M5_chapter_010.html#concept_rqj_vsr_fz)

**Table 26 Management Configuration Ordering Information**

| Product ID (PID) | PID Description                                   |
|------------------|---|
| UCSC-DLOM-01     | Dedicated Mode BIOS setting for C-Series Servers  |
| UCSC-CCARD-01    | Cisco Card Mode BIOS setting for C-Series Servers |

## STEP 19 SELECT SERVER BOOT MODE (OPTIONAL)

By default, the C480 M5 server ships with UEFI as the default boot mode. To have a server shipped with the Legacy BIOS mode (which was standard on M4 and previous generation servers), select the Legacy BIOS PID

Table 27 Server Boot Mode Ordering Information

| Product ID (PID) | PID Description                                    |
|------------------|--|
| UCSC-LBIOS-01    | Legacy Boot Mode BIOS setting for C-Series Servers |

## STEP 20 CHOOSE OPERATING SYSTEM AND VALUE-ADDED SOFTWARE

For more details on supported operating systems and software for this server, see the Hardware and Software Compatibility List (HCL).

**Note:** PIDs tagged with an asterisk (\*) are Resell of an OEM Vendor's Support. They are required to be added to the associated Product License PID.

**NOTE:** VMware is on Compliance Hold. Contact the [Compute-Vmware-Hold@cisco.com](mailto:Compute-Vmware-Hold@cisco.com) mailer to see if you are allowed to receive VMware Licenses

### Select

- Cisco Software ([Table 28](#))
- OEM Software ([Table 29](#))
- Operating System ([Table 30](#))

**Table 28 Cisco Software**

| Product ID (PID)  | PID Description   |
|---|---|
| <b>IMC Supervisor</b>   |   |
| CIMC-SUP-BASE-K9  | IMC Supervisor One-time Site Installation License                   |

## STEP 21 CHOOSE SERVICE and SUPPORT LEVEL

A variety of service options are available, as described in this section.

### Unified Computing Warranty, No Contract

If you have noncritical implementations and choose to have no service contract, the following coverage is supplied:

- Three-year parts coverage.
- Next business day (NBD) parts replacement eight hours a day, five days a week.
- 90-day software warranty on media.
- Downloads of BIOS, drivers, and firmware updates.
- UCSM updates for systems with Unified Computing System Manager. These updates include minor enhancements and bug fixes that are designed to maintain the compliance of UCSM with published specifications, release notes, and industry standards.

### Smart Net Total Care (SNTC) for UCS

For support of the entire Unified Computing System, Cisco offers the Cisco Smart Net Total Care for UCS Service. This service provides expert software and hardware support to help sustain performance and high availability of the unified computing environment. Access to Cisco Technical Assistance Center (TAC) is provided around the clock, from anywhere in the world

For systems that include Unified Computing System Manager, the support service includes downloads of UCSM upgrades. The Cisco Smart Net Total Care for UCS Service includes flexible hardware replacement options, including replacement in as little as two hours. There is also access to Cisco's extensive online technical resources to help maintain optimal efficiency and uptime of the unified computing environment. For more information please refer to the following url: <http://www.cisco.com/c/en/us/services/technical/smart-net-total-care.html?stickynav=1>

You can choose a desired service listed in [Table 31](#).

\*Includes Drive Retention (see [UCS Drive Retention Service on page 64](#))

\*\*Includes Local Language Support (see [Local Language Technical Support for UCS on page 65](#)) – Only available in China and Japan

\*\*\*Includes Local Language Support and Drive Retention – Only available in China and Japan

\*\*\*\* Available in China Only

## Smart Net Total Care for Cisco UCS Onsite Troubleshooting Service

An enhanced offer over traditional Smart Net Total Care which provides onsite-troubleshooting expertise to aid in the diagnostics and isolation of hardware issue within our customers' Cisco Unified Computing System (UCS) environment. It is delivered by a Cisco Certified field engineer (FE) in collaboration with remote TAC engineer and Virtual Internet working Support Engineer (VISE). You can choose a desired service listed in [Table 32](#)

**Table 32 SNTC for Cisco UCS Onsite Troubleshooting Service (PID UCSC-C480-M5)**

| Service SKU        | Service Level GSP | On Site? | Description             |

## Solution Support for UCS

Solution Support includes both Cisco product support and solution-level support, resolving complex issues in multivendor environments, on average, 43% more quickly than product support alone. Solution Support is a critical element in data center administration, to help rapidly resolve any issue encountered, while maintaining performance, reliability, and return on investment.

This service centralizes support across your multivendor Cisco environment for both our products and solution partner products you've deployed in your ecosystem. Whether there is an issue with a Cisco or solution partner product, just call us. Our experts are the primary point of contact and own the case from first call to resolution. For more information please refer to the following url:

<http://www.cisco.com/c/en/us/services/technical/solution-support.html?stickynav=1>

You can choose a desired service listed in [Table 33](#)

## Smart Net Total Care for UCS Hardware Only Service

For faster parts replacement than is provided with the standard Cisco Unified Computing System warranty, Cisco offers the Cisco Smart Net Total Care for UCS Hardware Only Service. You can choose from two levels of advanced onsite parts replacement coverage in as little as four hours. Smart Net Total Care for UCS Hardware Only Service provides remote access any time to Cisco support professionals who can determine if a return materials authorization (RMA) is required. You can choose a desired service listed in [Table 34](#)

## Partner Support Service for UCS

Cisco Partner Support Service (PSS) is a Cisco Collaborative Services service offering that is designed for partners to deliver their own branded support and managed services to enterprise customers. Cisco PSS provides partners with access to Cisco's support infrastructure and assets to help them:

- Expand their service portfolios to support the most complex network environments
- Lower delivery costs
- Deliver services that increase customer loyalty

PSS options enable eligible Cisco partners to develop and consistently deliver high-value technical support that capitalizes on Cisco intellectual assets. This helps partners to realize higher margins and expand their practice.

PSS is available to all Cisco PSS partners.

The two Partner Unified Computing Support Options include:

- Partner Support Service for UCS
- Partner Support Service for UCS Hardware Only

PSS for UCS provides hardware and software support, including triage support for third party software, backed by Cisco technical resources and level three support. You can choose a desired service listed in [Table 35](#).

**Table 35 PSS for UCS (PID UCSC-C480-M5)**

| Service SKU        | Service Level GSP | On Site? | Description          |
|--------------------|-------------------|----------|----------------------|
| CON-PSJ8-SCC480M5  | PSJ8              | Yes      | UCS PSS 24X7X2 OS    |
| CON-PSJ7-SCC480M5  | PSJ7              | Yes      | UCS PSS 24X7X4 OS    |

|-------------------|------|----|---------------------|
| CON-PSW4-SCC480M5 | PSW4 | No | UCS W PL PSS 24X7X2 |
| CON-PSW3-SCC480M5 | PSW3 | No | UCS W PL PSS 24X7X4 |
| CON-PSW2-SCC480M5 | PSW2 | No | UCS W PL PSS 8X5X4  |

Note: For PID UCSC-C480-M5-CH, select Service SKU with C480M5CH suffix (Example: CON-PSJ1-C480M5CH)

\*Includes Drive Retention (see [UCS Drive Retention Service on page 64](#))

## Unified Computing Combined Support Service

Combined Services makes it easier to purchase and manage required services under one contract. SNTC services for UCS help increase the availability of your vital data center infrastructure and realize the most value from your unified computing investment. The more benefits you realize from the Cisco Unified Computing System (Cisco UCS), the more important the technology becomes to your business. These services allow you to:

- Optimize the uptime, performance, and efficiency of your UCS
- Protect your vital business applications by rapidly identifying and addressing issues
- Strengthen in-house expertise through knowledge transfer and mentoring
- Improve operational efficiency by allowing UCS experts to augment your internal staff resources
- Enhance business agility by diagnosing potential issues before they affect your operations,

You can choose a desired service listed in [Table 37](#)

**Table 37 Combined Support Service for UCS (PID UCSC-C480-M5)**

| Service SKU        | Service Level GSP | On Site? | Description       |
|--------------------|-------------------|----------|-------------------|
| CON-NCF2P-SCC480M5 | NCF2P             | Yes      | CMB SVC 24X7X2OS  |
| CON-NCF4P-SCC480M5 | NCF4P             | Yes      | CMB SVC 24X7X4OS  |
| CON-NCF4S-SCC480M5 | NCF4S             | Yes      | CMB SVC 8X5X4OS   |
| CON-NCFCS-SCC480M5 | NCFCS             | Yes      | CMB SVC 8X5XNBDOS |
| CON-NCF2-SCC480M5  | NCF2              | No       | CMB SVC 24X7X2    |
| CON-NCFP-SCC480M5  | NCFP              | No       | CMB SVC 24X7X4    |
| CON-NCFE-SCC480M5  | NCFE              | No       | CMB SVC 8X5X4     |
| CON-NCFT-SCC480M5  | NCFT              | No       | CMB SVC 8X5XNBD   |
| CON-NCFW-SCC480M5  | NCFW              | No       | CMB SVC SW        |

Note: For PID UCSC-C480-M5-CH,select Service SKU with C480M5CH suffix (Example:CON-NCF2P-C480M5CH)

## UCS Drive Retention Service

With the Cisco Unified Computing Drive Retention Service, you can obtain a new disk drive in exchange for a faulty drive without returning the faulty drive.

Sophisticated data recovery techniques have made classified, proprietary, and confidential information vulnerable, even on malfunctioning disk drives. The Drive Retention service enables you to retain your drives and ensures that the sensitive data on those drives is not compromised, which reduces the risk of any potential liabilities. This service also enables you to comply with regulatory, local, and federal requirements.

If your company has a need to control confidential, classified, sensitive, or proprietary data, you might want to consider one of the Drive Retention Services listed in the above tables (where available)

**NOTE:** Cisco does not offer a certified drive destruction service as part of this service.

---

## Local Language Technical Support for UCS

Where available, and subject to an additional fee, local language support for calls on all assigned severity levels may be available for specific product(s) - see tables above.

For a complete listing of available services for Cisco Unified Computing System, see the following URL:

[http://www.cisco.com/en/US/products/ps10312/serv\\_group\\_home.html](http://www.cisco.com/en/US/products/ps10312/serv_group_home.html)

# SUPPLEMENTAL MATERIAL

## Chassis

An internal view of the C480 M5 chassis with the top cover removed is shown in [Figure 6](#).

**Figure 6** C480 M5 With Top Cover Removed

|   |  |    |   |
|---|--|----|---|
| 1 | RAID controller card for front-loading drives (not visible in this view; position is near chassis floor under CPU modules)                                       | 8  | PCIe slots 1 - 12<br>For PCIe slot specifications, see <a href="#">Table 11 on page 34</a>  |
| 2 | Supercap power module (RAID backup battery) for front RAID controller (not visible in this view; mounting bracket position is on chassis wall under CPU modules) | 9  | PCIe slot 11: Default slot for rear RAID controller when the rear drive module is used with SAS/SATA drives.<br><br>In systems with only one CPU module, slot 11 is not supported. In this case, the rear RAID controller must be installed in slot 10 and a blanking panel must be installed in slot 11. |
| 3 | Fan modules (four modules with two fans each; hot-swappable)   | 10 | PCIe slot 10: Required slot for NVMe switch card when the rear drive module is used with NVMe SSDs.<br><br>This slot must also be used for the rear RAID controller in systems with only one CPU module.  |

|   |   |    |   |
|---|---|----|---|
| 4 | Air diffuser for auxiliary rear drive module<br>This diffuser is required only when using SAS/SATA drives in the rear drive module.   | 11 | PCIe slot 01: Primary slot for Cisco VIC adapter card. (Secondary slot for Cisco VIC is slot 02.) |
| 5 | Position of the supercap unit (RAID backup) for the rear RAID controller.<br>The clip for the supercap is on the inside surface of the air diffuser.  | 12 | Power connectors for high-power GPU cards (six)   |
| 6 | Auxiliary Drive Module for 8x rear drives; holds either (no mixing): <ul style="list-style-type: none"> <li>■ Up to eight 2.5-inch SAS/SATA drives, or</li> <li>■ Up to eight 2.5-inch NVMe SSDs</li> </ul> | 13 | Trusted platform module (TPM) on motherboard  |
| 7 | Internal USB 2.0 socket on motherboard  | -  | -   |

## DIMM and CPU Logical Layout

Memory is organized as shown in [Figure 7](#).

**Figure 7** UCS C480 M5 Memory Organization

## CPU and DIMM Physical Layout

**NOTE:** There are two plug-in CPU modules, each with two CPUs and 24 DIMMs (12 DIMMs per CPU). The bottom CPU module contains CPU1 and CPU2 and the top CPU module contains CPU3 and CPU4.

Each CPU has six DIMM channels:

- CPU1 and CPU3 have channels A, B, C, D, E, and F
- CPU2 and CPU4 have channels G, H, J, K, L, and M

Each DIMM channel has two slots: slot 1 and slot 2. The blue-colored DIMM slots are for slot 1 and the black slots for slot 2.

As an example, DIMM slots A1, B1, C1, D1, E1, and F1 belong to slot 1, while A2, B2, C2, D2, E2, and F2 belong to slot 2.

**Figure 8** shows how slots and channels are physically laid out on the motherboard. The DIMM slots on the right half of the motherboard (channels A, B, C, D, E, and F) are associated with CPU 1 and CPU3, while the DIMM slots on the left half of the motherboard (channels G, H, J, K, L, and M) are associated with CPU2 and CPU4. The slot 1 (blue) DIMM slots are always located farther away from a CPU than the corresponding slot 2 (black) slots.

**Figure 8 Physical Layout of CPU DIMM Channels and Slots**

For more details, see the “*Memory Configuration Best Practices*” document, available at <https://www.cisco.com/c/dam/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/memory-guide-c220-c240-b200-m5.pdf>

## DIMM Population Rules

When considering the memory configuration of your server, consider the following items:

- Each channel has two DIMM slots (for example, channel A = slots A1 and A2).
  - A channel can operate with one or two DIMMs installed.
- Populate the DIMM slots of each CPU identically.
- Any DIMM installed in a DIMM socket for which the CPU is absent is not recognized.
- Observe the DIMM mixing rules shown in [Table 38](#)

**Table 38 DIMM Rules for C480 M5 Servers**

| DIMM Parameter   | DIMMs in the Same Channel  | DIMM in the Same Slot <sup>1</sup>  |
|--|--|---|
| <u>DIMM Capacity</u>   |  |   |
| RDIMM = 16, 32, or 64 GB<br>LRDIMM = 32, 64, or 128 GB<br>TSV-RDIMM = 64 or 128 GB | DIMMs in the same channel (for example, A1 and A2) can have different capacities.                                  | For best performance, DIMMs in the same slot (for example, A1, B1, C1, D1, E1, F1) should have the same capacity. |
|  | Do not mix TSV-RDIMMS with LRDIMMs nor RDIMMS  | Do not mix TSV-RDIMMS with LRDIMMS nor RDIMMS   |
| <u>DIMM Speed</u>  |  |   |
| 2666 MHz or 2933 MHz   | DIMMs will run at the lowest speed of the CPU installed  | DIMMs will run at the lowest speed of the CPU installed   |
| <u>DIMM Type</u>   |  |   |
| TSV-RDIMMS, RDIMMS, or LRDIMMS   | Do not mix DIMM types in a channel   | Do not mix DIMM types in a slot   |
| <b>DIMMs per Channel (DPC)</b>   |  |   |
|  | <b>1 DPC or 2 DPC</b>  |   |
|  | See <a href="#">STEP 3 CHOOSE MEMORY, page 16</a> for valid LRDIMM and RDIMM 1 DPC and 2 DPC memory configurations |   |

**Notes:**

1. Although different DIMM capacities can exist in the same slot, this will result in less than optimal performance. For optimal performance, all DIMMs in the same slot should be identical.

For more details, see the document titled “*Cisco UCS C480 M5 Memory Guide*,” available at

<https://www.cisco.com/c/en/us/products/servers-unified-computing/ucs-c-series-rack-servers/datasheet-listing.html>

## Memory Support for CPU Classes and CPU Modes

### For 2<sup>nd</sup> Generation Intel® Xeon® Scalable Processors:

- DIMMs and PMem are supported
- CPU PIDs ending in “M” support up to a limit of 2048 GB per CPU
- CPU PIDs ending in “L” support up to a limit of 4608 GB per CPU
- All other CPU PIDs support up to a limit of 1024 GB per CPU
- For the App Direct Mode, both PMem and DIMM capacities count towards the CPU capacity limit
- For the Memory Mode and Mixed Mode only the PMem capacity counts towards the CPU capacity limit

### For Configurations Using Only DIMMs

- CPU PIDs ending in “M” support DIMM capacities up to 1536 GB per CPU (using 12 x 128 GB DIMMs) and DIMM capacities up to 2048 GB per CPU (using 8 x 256 GB DIMMs).
- CPU PIDs ending in “L” support DIMM capacities up to 1536 GB per CPU (using 12 x 128 GB DIMMs) and DIMM capacities up to 3072 GB per CPU (using 12 x 256 GB DIMMs). The 4608 GB limit cannot be reached with these capacity DIMMs.
- CPU PIDs not ending in “L” or “M” support DIMM capacities up to 1024 GB per CPU (using 8 x 128 GB DIMMs or 4 x 256 GB DIMMs).

### For Configurations Using DIMMs and PMem in App Direct Mode

- CPU PIDs ending in “M” support capacities up to 1792 GB per CPU (using 6 x 128 GB DIMMs and 2 x 512 GB PMem or 4 x 256 GB PMem) or up to 2048 GB per CPU (using 6 x 256 GB DIMMs and 2 x 256 GB PMem or 6 x 256 GB DIMMs and 4 x 128 GB PMem)
- CPU PIDs ending in “L” support capacities up to 3840 GB per CPU (using 6 x 128 GB DIMMs and 6 x 512 GB PMem) or up to 4608 GB per CPU (using 6 x 256 GB DIMMs and 6 x 512 GB PMem)
- CPU PIDs not ending in “L” or “M” support capacities up to 1024 GB per CPU (using 6 x 128 GB DIMMs and 2 x 128 GB PMem).

### For Configurations Using DIMMs and PMem in Memory or Mixed Mode

**NOTE:** For Memory and Mixed Modes, DIMMs are used as cache and do not factor into CPU capacity.

---

- CPU PIDs ending in “M” support capacities up to 2048 GB per CPU using:
  - 6 x 128 GB DIMMs as cache and 4 x 512 GB PMem as memory, or
  - 6x 256 GB DIMMs as cache and 4 x 512 GB PMem as memory
- CPU PIDs ending in “L” support capacities up to 3072 GB using:

- 6 x 128 GB DIMMs as cache and 6 x 512 GB PMem as memory, or
- 6 x 256 GB DIMMs as cache and 6 x 512 GB PMem as memory

The allowable 4608 limit for PMem capacity is not reached in this case.

- CPU PIDs not ending in “L” or “M” support capacities up to 1024 GB per CPU using:
  - 6 x 128 GB DIMMs as cache and 2 x 512 GB PMem as memory, or
  - 6 x 256 GB DIMMs as cache and 2 x 512 GB PMem as memory

**For Intel® Xeon® Scalable Processors:**

- DIMMs are supported; PMem are not supported
- CPU PIDs ending in “M” support DIMM capacities up to 1536 GB per CPU (using 12 x 128 GB DIMMs).
- All other CPU PIDs support DIMM capacities up to 768 GB per CPU (using 6 x 128 GB DIMMs or 12 x 64 GB DIMMs)

**DIMM Population Order**

Populate the DIMMs for a CPU according to [Table 39](#).

**Table 39 DIMM Population Order**

|    | Populate CPU 1 or CPU 3 Slot |                              | Populate CPU 2 or CPU 4 Slots |                              |
|----|------------------------------|------------------------------|-------------------------------|------------------------------|
|    | Blue #1 Slots                | Black #2 Slots               | Blue #1 Slots                 | Black #2 Slots               |
| 1  | (A1)                         | -                            | (G1)                          | -                            |
| 2  | (A1, B1)                     | -                            | (G1, H1)                      | -                            |
| 3  | (A1, B1, C1)                 | -                            | (G1, H1, J1)                  | -                            |
| 4  | (A1, B1); (D1, E1)           | -                            | (G1, H1); (K1, L1)            | -                            |
| 8  | (A1, B1); (D1, E1)           | (A2, B2); (D2, E2)           | (G1, H1); (K1, L1)            | (G2, H2); (K2, L2)           |
| 12 | (A1, B1); (C1, D1); (E1, F1) | (A2, B2); (C2, D2); (E2, F2) | (G1, H1); (J1, K1); (L1, M1)  | (G2, H2); (J2, K2); (L2, M2) |

## KVM CABLE

The KVM cable provides a connection into the server, providing a DB9 serial connector, a VGA connector for a monitor, and dual USB 2.0 ports for a keyboard and mouse. With this cable, you can create a direct connection to the operating system and the BIOS running on the server.

The KVM cable ordering information is listed in [Table 40](#).

Table 40 KVM Cable

| Product ID (PID) | PID Description                   |
|------------------|-----------------------------------|
| N20-BKVM         | KVM cable for server console port |

Figure 9 KVM Cable

192621

|   |                                   |   |   |
|---|-----------------------------------|---|---|
| 1 | Connector (to server front panel) | 3 | VGA connector (for a monitor)                         |
| 2 | DB-9 serial connector             | 4 | Two-port USB 2.0 connector (for a mouse and keyboard) |

## SPARE PARTS

This section lists the upgrade and service-related parts for the UCS C480 M5 server. Some of these parts are configured with every server.

**Table 41 Spare Parts**

| Product ID (PID)             | PID Description  |
|------------------------------|--|
| <b>KVM Cable</b>             |  |
| N20-BKVM=                    | KVM local IO cable for UCS servers console port                                  |
| <b>CPU Accessories</b>       |  |
| UCSC-HS-02-EX                | CPU Heat Sink for UCS C480 M5 Rack Server  |
| UCS-CPU-TIM=                 | Single CPU thermal interface material syringe for M5 server HS seal <sup>1</sup> |
| UCSX-HSCK=                   | UCS Processor Heat Sink Cleaning Kit (when replacing a CPU) <sup>2</sup>         |
| UCS-CPUAT=                   | CPU Assembly Tool for M5 Servers   |
| UCS-M5-CPU-CAR=              | UCS M5 CPU Carrier   |
| UCSC-C480-CM-FLR=            | UCS C480 M5 CPU Module Filler  |
| UCSC-C480-DM-FLR=            | UCS C480 M5 Disk Module Filler   |
| <b>CPU</b>                   |  |
| <b>8000 Series Processor</b> |  |
| UCS-CPU-I8280L=              | 2.7  |
| UCS-CPU-I8280=               | 2.7  |
| UCS-CPU-I8276L=              | 2.2  |
| UCS-CPU-I8276=               | 2.2  |
| UCS-CPU-I8270=               | 2.7  |
| UCS-CPU-I8268=               | 2.9  |
| UCS-CPU-I8260Y=              | 2.4  |
| UCS-CPU-I8260L=              | 2.4  |
| UCS-CPU-I8260=               | 2.4  |
| UCS-CPU-I8253=               | 2.2  |
| <b>6000 Series Processor</b> |  |
| UCS-CPU-I6262V=              | 1.9  |
| UCS-CPU-I6254=               | 3.1  |

Table 41 Spare Parts (continued)

| Product ID (PID)                        | PID Description  |
|---|--|
| UCS-CPU-I6252=                          | 2.1  |
| UCS-CPU-I6248=                          | 2.5  |
| UCS-CPU-I6246=                          | 3.3  |

| SLES-2S-LP-3S=   | SUSE Linux Live Patching Add-on (1-2 CPU); 3yr SnS Required  |

**Notes:**

1. This part is included with the purchase of option or spare CPU or CPU processor kits.
2. For 2<sup>nd</sup> Generation Intel® Xeon® Scalable Processor, UCSM 4.0(4b) software release is required.

## UPGRADING or REPLACING CPUs

**NOTE:** Before servicing any CPU, do the following:

- Decommission and power off the server.
- Slide the server out from the rack.
- Remove the top cover.

To replace an existing CPU, follow these steps:

(1) Have the following tools and materials available for the procedure:

- T-30 Torx driver—Supplied with replacement CPU.
- #1 flat-head screwdriver—Supplied with replacement CPU.
- CPU assembly tool—Supplied with replacement CPU. Can be ordered separately as Cisco PID UCS-CPUAT=.
- Heatsink cleaning kit—Supplied with replacement CPU. Can be ordered separately as Cisco PID UCSX-HSCK=.
- Thermal interface material (TIM)—Syringe supplied with replacement CPU. Can be ordered separately as Cisco PID UCS-CPU-TIM=.

(2) Order the appropriate replacement CPU from [Table 3 on page 13](#).

(3) Carefully remove and replace the CPU and heatsink in accordance with the instructions found in “Cisco UCS C480 M5 Blade Server Installation and Service Note,” found at:

[https://www.cisco.com/c/en/us/td/docs/unified\\_computing/ucs/c/hw/C480M5/install/C480M5/C480M5\\_chapter\\_011.html#task\\_j5g\\_bzp\\_hz](https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/c/hw/C480M5/install/C480M5/C480M5_chapter_011.html#task_j5g_bzp_hz)

To add a new CPU, follow these steps:

(1) Have the following tools and materials available for the procedure:

- T-30 Torx driver—Supplied with new CPU.
- #1 flat-head screwdriver—Supplied with new CPU
- CPU assembly tool—Supplied with new CPU. Can be ordered separately as Cisco PID UCS-CPUAT=
- Thermal interface material (TIM)—Syringe supplied with replacement CPU. Can be ordered separately as Cisco PID UCS-CPU-TIM=

(2) Order the appropriate new CPU from [Table 3 on page 13](#).

(3) Order one heat sink for each new CPU. Order PID UCSB-HS-M5-F= for front CPUs and PID UCSB-HS-M5-R= for rear CPUs.

(4) Carefully install the CPU and heatsink in accordance with the instructions found in “Cisco UCS B480 M5 Blade Server Installation and Service Note,” found at:

[https://www.cisco.com/c/en/us/td/docs/unified\\_computing/ucs/c/hw/C480M5/install/C480M5/C480M5\\_chapter\\_011.html#task\\_j5g\\_bzp\\_hz](https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/c/hw/C480M5/install/C480M5/C480M5_chapter_011.html#task_j5g_bzp_hz)

#### (5) UPGRADING or REPLACING MEMORY

**NOTE:** Before servicing any DIMM or PMem, do the following:

- Decommission and power off the server.
- Remove the top cover from the server
- Slide the server out the front of the chassis.

To add or replace DIMMs or PMem, follow these steps:

- (1) Order new DIMMs or PMem as needed from [Table 4 on page 17](#).
- (2) Order DIMM/PMem blanks as needed (PID UCS-DIMM-BLK=)
- (3) Open both connector latches and remove and replace the DIMM/PMem or blank as needed.

Figure 10 Replacing Memory

- (4) Press evenly on both ends of the DIMM/PMem until it clicks into place in its slot.

**NOTE:** Ensure that the notch in the DIMM/PMem aligns with the slot. If the notch is misaligned, it is possible to damage the DIMM/PMem, the slot, or both.

---

- (5) Press the connector latches inward slightly to seat them fully.
- (6) Populate all slots with a DIMM, PMem, or DIMM blank. A slot cannot be empty.

For additional details on replacing or upgrading DIMMs and PMem, see “Cisco UCS X480 M5 Server Installation and Service Guide,” found at these links:

## DISCONTINUED EOL PRODUCTS

Below is the list of parts were previously available for this product and are no longer sold. Please refer to the EOL Bulletin Links via the [Table 42](#) below to determine if still supported.

Table 42 EOL Products

| EOS option PID   | Description  | EOL bulletin link   |
|------------------|--|---|
| <b>MEMORY</b>    |  |   |
| UCS-MR-X16G2RS-H | 16GB DDR4-2666-MHz RDIMM/PC4-21300/dual rank/x4/1.2v     | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/eos-eol-notice-c51-740780.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/eos-eol-notice-c51-740780.html</a>                   |
| UCS-MR-X16G1RT-H | 16GB DDR4-2933MHz RDIMM 1Rx4 (8Gb)/1.2v                  | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html</a> |
| UCS-MR-X32G2RT-H | 32GB DDR4-2933MHz RDIMM 2Rx4 (8Gb)/1.2v                  | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html</a> |
| UCS-MR-X64G2RT-H | 64GB DDR4-2933MHz RDIMM 2Rx4 (16Gb)/1.2v                 | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html</a> |
| UCS-ML-X64G4RT-H | 64GB DDR4-2933MHz LRDIMM 4Rx4 (8Gb)/1.2v                 | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html</a> |
| UCS-ML-128G4RT-H | 128GB DDR4-2933MHz LRDIMM 4Rx4 (16Gb)/1.2v               | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/ucs-hyperflex-accessories-eol14611.html</a> |
| UCS-ML-X64G4RS-H | 64GB DDR4-2666-MHz LRDIMM/PC4-21300/quad rank/x4/1.2v    | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/eos-eol-notice-c51-2412151.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/eos-eol-notice-c51-2412151.html</a>                 |
| UCS-ML-X32G2RS-H | 32GB DDR4-2666-MHz LRDIMM/PC4-21300/dual rank/x4/1.2v    | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/eos-eol-notice-c51-2412151.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/eos-eol-notice-c51-2412151.html</a>                 |
| UCS-ML-X32G2RSHM | 32GB DDR4-2666-MHz LRDIMM/dual rank/x4/1.2v. Micron only | <a href="https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/eos-eol-notice-c51-2412151.html">https://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c-series-rack-servers/eos-eol-notice-c51-2412151.html</a>                 |

# TECHNICAL SPECIFICATIONS

## Dimensions and Weight

Table 43 UCS C480 M5 Dimensions and Weight<sup>1</sup>

| Parameter  | Value             |
|--|-------------------|
| Height   | 6.9 in. (176 mm)  |
| Width  | 19.0 in. (483 mm) |
| Length (including front handles and power supplies)                                    | 32.7 in. (830 mm) |
| Front Clearance  | 3 in. (7.62 cm)   |
| Side Clearance   | 1 in. (25.4 mm)   |
| Rear Clearance   | 6 in. (152.4 mm)  |
| Weight (maximum configuration, including slide rail brackets and cable management arm) | 146 lbs (66.3kg)  |

Notes:

1. The system weight given here is an estimate for a fully configured system and will vary depending on the number of peripheral devices and power supplies.

## Power Specifications

Table 44 Power Supplies

| Product ID (PID) | PID Description                                 |
|------------------|---|
| UCSC-PSU1-1600W  | Cisco UCS 1600W AC Power Supply for Rack Server |

The general power specifications for the C480 M5 server are listed in [Table 45](#).

Table 45 UCS C480 M5 1600 W (AC) Power Supply Specifications

| Description          | Specification                               |
|----------------------|---|
| AC input voltage     | Voltage Range 180 - 264 VAC                 |
| AC input frequency   | 50 to 60 Hz nominal<br>(range: 47 to 63 Hz) |
| Max AC Input current | < 9.5 A maximum at 200 VAC                  |
| Maximum Input VA     | 1600 VA @200 VAC                            |

**Table 45 UCS C480 M5 1600 W (AC) Power Supply Specifications**

| Description                           | Specification   |
|---------------------------------------|---|
| Maximum output power per power supply | In the 180-265 VAC range the maximum rated output power is 1600 W, not including the standby 12V power.       |
| Maximum inrush current                | < 30A Peak at +35 degrees C<br>(charging current for EMI-X capacitors is not considered to be inrush current) |
| Maximum hold up time                  | Greater than 12 ms with 2,200 uF of load capacitance  |
| Power supply output voltage           | 12 VDC  |
| Power supply standby voltage          | 12 VDC  |
| Efficiency rating                     | Climate Savers Platinum Efficiency (80Plus Platinum Certified)  |
| Form Factor                           | RSP2  |
| Input connector                       | IEC60320 C14 type connector   |

For configuration-specific power specifications, use the Cisco UCS Power Calculator at:

<http://ucspowercalc.cisco.com>

## Environmental Specifications

The power specifications for the C480 M5 server are listed in [Table 46](#).

**Table 46 UCS C480 M5 Environmental Specifications**

| Parameter                 | Minimum  |
|---------------------------|--|
| Temperature operating     | 10° C to 35° C (50° F to 95° F)                                      |
| Temperature non-operating | -40° C to 70° C (-40° F to 158° F)                                   |
| Altitude                  | -30 m to 1500 m (-100 ft to 5000 ft)                                 |
| Humidity non-operating    | 95%, noncondensing at temperatures of 25° C (77° F) to 30° C (86° F) |

## Compliance Requirements

The regulatory compliance requirements for C-Series servers are listed in [Table 47](#).

**Table 47 UCS C-Series Regulatory Compliance Requirements**

| Parameter             | Description   |
|-----------------------|---|
| Regulatory Compliance | Products should comply with CE Markings per directives 2004/108/EC and 2006/95/EC   |
| Safety                | UL 60950-1 Second Edition<br>CAN/CSA-C22.2 No. 60950-1 Second Edition<br>EN 60950-1 Second Edition<br>IEC 60950-1 Second Edition<br>AS/NZS 60950-1<br>GB4943 2001                                   |
| EMC - Emissions       | 47CFR Part 15 (CFR 47) Class A<br>AS/NZS CISPR22 Class A<br>CISPR22 Class A<br>EN55022 Class A<br>ICES003 Class A<br>VCCI Class A<br>EN61000-3-2<br>EN61000-3-3<br>KN22 Class A<br>CNS13438 Class A |
| EMC - Immunity        | EN55024<br>CISPR24<br>EN300386<br>KN24  |
