We grant you a nonexclusive, nontransferable limited license to use the programs: (a) for purposes of developing, testing, prototyping and running applications you have developed for your own internal data processing operations; (b) to distribute the programs with applications you have developed to your customers provided that each such licensee agrees to license terms consistent with the terms of this Agreement, you do not charge your end users any additional fees for the use of the programs, and your end users may only use the programs to run your applications for their own business operations; and (c) to use the programs to provide third party demonstrations and training. You are not permitted to use the programs for any purpose other than as permitted under this Agreement. If you want to use the programs for any purpose other than as expressly permitted under this agreement you must contact us, or an Oracle reseller, to obtain the appropriate license. We may audit your use and distribution of the programs. Program documentation is either shipped with the programs, or documentation may accessed online at <http://www.oracle.com/technetwork/indexes/documentation/index.html>.

#### Ownership and Restrictions

We retain all ownership and intellectual property rights in the programs. You may make a sufficient number of copies of the programs for the licensed use and one copy of the programs for backup purposes.

You may not:

- use the programs for any purpose other than as provided above;
- distribute the programs unless accompanied with your applications;
- charge your end users for use of the programs;
- remove or modify any program markings or any notice of our proprietary rights;
- use the programs to provide third party training on the content and/or functionality of the programs, except for training your licensed users;
- assign this agreement or give the programs, program access or an interest in the programs to any individual or entity except as provided under this agreement;
- cause or permit reverse engineering (unless required by law for interoperability), disassembly or decompilation of the programs;
- disclose results of any program benchmark tests without our prior consent.

#### Program Distribution

We grant you a nonexclusive, nontransferable right to copy and distribute the programs to your end users provided that you do not charge your end users for use of the programs and provided your end users may only use the programs to run your applications for their business operations. Prior to distributing the programs you shall require your end users to execute an agreement binding them to terms consistent with those contained in this section and the sections of this agreement entitled "License Rights," "Ownership and Restrictions," "Export," "Disclaimer of Warranties and Exclusive Remedies," "No Technical Support," "End of Agreement," "Relationship Between the Parties," and "Open Source." You must also include a provision stating that your end users shall have no right to distribute the programs, and a provision specifying us as a third party beneficiary of the agreement. You are responsible for obtaining these agreements with your end users.

You agree to: (a) defend and indemnify us against all claims and damages caused by your distribution of the programs in breach of this agreements and/or failure to include the required contractual provisions in your end user agreement as stated above; (b) keep executed end user agreements and records of end user information including

name, address, date of distribution and identity of programs distributed; (c) allow us to inspect your end user agreements and records upon request; and, (d) enforce the terms of your end user agreements so as to effect a timely cure of any end user breach, and to notify us of any breach of the terms.

#### Export

You agree that U.S. export control laws and other applicable export and import laws govern your use of the programs, including technical data; additional information can be found on Oracle's Global Trade Compliance web site located at <http://www.oracle.com/products/export/index.html?content.html>. You agree that neither the programs nor any direct product thereof will be exported, directly, or indirectly, in violation of these laws, or will be used for any purpose prohibited by these laws including, without limitation, nuclear, chemical, or biological weapons proliferation.

#### Disclaimer of Warranty and Exclusive Remedies

THE PROGRAMS ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND. WE FURTHER DISCLAIM ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT.

IN NO EVENT SHALL WE BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, PUNITIVE OR CONSEQUENTIAL DAMAGES, OR DAMAGES FOR LOSS OF PROFITS, REVENUE, DATA OR DATA USE, INCURRED BY YOU OR ANY THIRD PARTY, WHETHER IN AN ACTION IN CONTRACT OR TORT, EVEN IF WE HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. OUR ENTIRE LIABILITY FOR DAMAGES HEREUNDER SHALL IN NO EVENT EXCEED ONE THOUSAND DOLLARS (U.S. \$1,000).

#### No Technical Support

Our technical support organization will not provide technical support, phone support, or updates to you for the programs licensed under this agreement.

#### Restricted Rights

If you distribute a license to the United States government, the programs, including documentation, shall be considered commercial computer software and you will place a legend, in addition to applicable copyright notices, on the documentation, and on the media label, substantially similar to the following:

#### NOTICE OF RESTRICTED RIGHTS

"Programs delivered subject to the DOD FAR Supplement are 'commercial computer software' and use, duplication, and disclosure of the programs, including documentation, shall be subject to the licensing restrictions set forth in the applicable Oracle license agreement. Otherwise, programs delivered subject to the Federal Acquisition Regulations are 'restricted computer software' and use, duplication, and disclosure of the programs, including documentation, shall be subject to the restrictions in FAR 52.227-19, Commercial Computer Software-Restricted Rights (June 1987). Oracle America, Inc., 500 Oracle Parkway, Redwood City, CA 94065."

#### End of Agreement

You may terminate this agreement by destroying all copies of the programs. We have the right to terminate your right to use the programs if you fail to comply with any of the terms of this agreement, in which case you shall destroy all copies of the programs.

## Relationship Between the Parties

The relationship between you and us is that of licensee/licensor. Neither party will represent that it has any authority to assume or create any obligation, express or implied, on behalf of the other party, nor to represent the other party as agent, employee, franchisee, or in any other capacity. Nothing in this agreement shall be construed to limit either party's right to independently develop or distribute software that is functionally similar to the other party's products, so long as proprietary information of the other party is not included in such software.

## Open Source

"Open Source" software - software available without charge for use, modification and distribution - is often licensed under terms that require the user to make the user's modifications to the Open Source software or any software that the user 'combines' with the Open Source software freely available in source code form. If you use Open Source software in conjunction with the programs, you must ensure that your use does not: (i) create, or purport to create, obligations of us with respect to the Oracle programs; or (ii) grant, or purport to grant, to any third party any rights to or immunities under our intellectual property or proprietary rights in the Oracle programs. For example, you may not develop a software program using an Oracle program and an Open Source program where such use results in a program file(s) that contains code from both the Oracle program and the Open Source program (including without limitation libraries) if the Open Source program is licensed under a license that requires any "modifications" be made freely available. You also may not combine the Oracle program with programs licensed under the GNU General Public License ("GPL") in any manner that could cause, or could be interpreted or asserted to cause, the Oracle program or any modifications thereto to become subject to the terms of the GPL.

## Entire Agreement

You agree that this agreement is the complete agreement for the programs and licenses, and this agreement supersedes all prior or contemporaneous agreements or representations. If any term of this agreement is found to be invalid or unenforceable, the remaining provisions will remain effective.

The GNU General Public License (GPL)

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the

software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any

derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and

its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source

code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to

distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE

PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type 'show w'. This is free software, and you are welcome to redistribute it under certain conditions; type 'show c' for details.

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than 'show w' and 'show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
'Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

#### "CLASSPATH" EXCEPTION TO THE GPL

Certain source files distributed by Oracle America and/or its affiliates are subject to the following clarification and special exception to the GPL, but only where Oracle has expressly included in the particular source file's header the words "Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the LICENSE file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for

everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the

most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making

modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR

THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author Gnomovision comes
with ABSOLUTELY NO WARRANTY; for details type 'show w'. This is free
software, and you are welcome to redistribute it under certain conditions;
type 'show c' for details.
```

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than 'show w' and 'show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
'Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
signature of Ty Coon, 1 April 1989
```

```
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

#### "CLASSPATH" EXCEPTION TO THE GPL

Certain source files distributed by Oracle America and/or its affiliates are subject to the following clarification and special exception to the GPL, but only where Oracle has expressly included in the particular source file's header the words "Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the LICENSE file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an

executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

The GNU General Public License (GPL)

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.  
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share

and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of

this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable

sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software

distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL

ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type 'show w'. This is free software, and you are welcome to redistribute it under certain conditions;

type 'show c' for details.

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than 'show w' and 'show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

#### "CLASSPATH" EXCEPTION TO THE GPL

Certain source files distributed by Oracle America and/or its affiliates are subject to the following clarification and special exception to the GPL, but only where Oracle has expressly included in the particular source file's header the words "Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the LICENSE file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to

You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work

(and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

#### APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

# 1.700 OpenSSH 5.9p1-22.fc17

## 1.700.1 Available under license :

This file is part of the OpenSSH software.

The licences which components of this software fall under are as follows. First, we will summarize and say that all components are under a BSD licence, or a licence more free than that.

OpenSSH contains no GPL code.

1)

- \* Copyright (c) 1995 Tatu Ylonen <ylo@cs.hut.fi>, Espoo, Finland
- \* All rights reserved
- \*
- \* As far as I am concerned, the code I have written for this software
- \* can be used freely for any purpose. Any derived versions of this
- \* software must be clearly marked as such, and if the derived work is
- \* incompatible with the protocol description in the RFC file, it must be
- \* called by a name other than "ssh" or "Secure Shell".

[Tatu continues]

- \* However, I am not implying to give any licenses to any patents or
- \* copyrights held by third parties, and the software includes parts that
- \* are not under my direct control. As far as I know, all included
- \* source code is used in accordance with the relevant license agreements
- \* and can be used freely for any purpose (the GNU license being the most
- \* restrictive); see below for details.

[However, none of that term is relevant at this point in time. All of these restrictively licenced software components which he talks about have been removed from OpenSSH, i.e.,

- RSA is no longer included, found in the OpenSSL library
- IDEA is no longer included, its use is deprecated
- DES is now external, in the OpenSSL library
- GMP is no longer used, and instead we call BN code from OpenSSL
- Zlib is now external, in a library
- The make-ssh-known-hosts script is no longer included
- TSS has been removed
- MD5 is now external, in the OpenSSL library
- RC4 support has been replaced with ARC4 support from OpenSSL
- Blowfish is now external, in the OpenSSL library

[The licence continues]

Note that any information and cryptographic algorithms used in this

software are publicly available on the Internet and at any major bookstore, scientific library, and patent office worldwide. More information can be found e.g. at "<http://www.cs.hut.fi/crypto>".

The legal status of this program is some combination of all these permissions and restrictions. Use only at your own responsibility. You will be responsible for any legal consequences yourself; I am not making any claims whether possessing or using this is legal or not in your country, and I am not taking any responsibility on your behalf.

#### NO WARRANTY

BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

2)

The 32-bit CRC compensation attack detector in deattack.c was contributed by CORE SDI S.A. under a BSD-style license.

\* Cryptographic attack detector for ssh - source code

\*

\* Copyright (c) 1998 CORE SDI S.A., Buenos Aires, Argentina.

\*

\* All rights reserved. Redistribution and use in source and binary forms, with or without modification, are permitted provided that this copyright notice is retained.

\*

\* THIS SOFTWARE IS PROVIDED ``AS IS" AND ANY EXPRESS OR IMPLIED

\* WARRANTIES ARE DISCLAIMED. IN NO EVENT SHALL CORE SDI S.A. BE

\* LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY OR

\* CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OR MISUSE OF THIS  
\* SOFTWARE.  
\*  
\* Ariel Futoransky <futo@core-sdi.com>  
\* <<http://www.core-sdi.com>>

3)

ssh-keyscan was contributed by David Mazieres under a BSD-style license.

\* Copyright 1995, 1996 by David Mazieres <dm@lcs.mit.edu>.  
\*  
\* Modification and redistribution in source and binary forms is  
\* permitted provided that due credit is given to the author and the  
\* OpenBSD project by leaving this copyright notice intact.

4)

The Rijndael implementation by Vincent Rijmen, Antoon Bosselaers and Paulo Barreto is in the public domain and distributed with the following license:

\* @version 3.0 (December 2000)  
\*  
\* Optimised ANSI C code for the Rijndael cipher (now AES)  
\*  
\* @author Vincent Rijmen <vincent.rijmen@esat.kuleuven.ac.be>  
\* @author Antoon Bosselaers <antoon.bosselaers@esat.kuleuven.ac.be>  
\* @author Paulo Barreto <paulo.barreto@terra.com.br>  
\*  
\* This code is hereby placed in the public domain.  
\*  
\* THIS SOFTWARE IS PROVIDED BY THE AUTHORS "AS IS" AND ANY EXPRESS  
\* OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED  
\* WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE  
\* ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHORS OR CONTRIBUTORS BE  
\* LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR  
\* CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF  
\* SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR  
\* BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY,  
\* WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE  
\* OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE,  
\* EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

5)

One component of the ssh source code is under a 3-clause BSD license, held by the University of California, since we pulled these parts from original Berkeley code.

\* Copyright (c) 1983, 1990, 1992, 1993, 1995

\* The Regents of the University of California. All rights reserved.

\*

\* Redistribution and use in source and binary forms, with or without

\* modification, are permitted provided that the following conditions

\* are met:

\* 1. Redistributions of source code must retain the above copyright

\* notice, this list of conditions and the following disclaimer.

\* 2. Redistributions in binary form must reproduce the above copyright

\* notice, this list of conditions and the following disclaimer in the

\* documentation and/or other materials provided with the distribution.

\* 3. Neither the name of the University nor the names of its contributors

\* may be used to endorse or promote products derived from this software

\* without specific prior written permission.

\*

\* THIS SOFTWARE IS PROVIDED BY THE REGENTS AND CONTRIBUTORS ``AS IS" AND

\* ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE

\* IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE

\* ARE DISCLAIMED. IN NO EVENT SHALL THE REGENTS OR CONTRIBUTORS BE LIABLE

\* FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL

\* DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS

\* OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION)

\* HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT

\* LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY

\* OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF

\* SUCH DAMAGE.

6)

Remaining components of the software are provided under a standard

2-term BSD licence with the following names as copyright holders:

Markus Friedl

Theo de Raadt

Niels Provos

Dug Song

Aaron Campbell

Damien Miller

Kevin Steves

Daniel Kouril

Wesley Griffin

Per Allansson

Nils Nordman

Simon Wilkinson

Portable OpenSSH additionally includes code from the following copyright

holders, also under the 2-term BSD license:

Ben Lindstrom

Tim Rice  
Andre Lucas  
Chris Adams  
Corinna Vinschen  
Cray Inc.  
Denis Parker  
Gert Doering  
Jakob Schlyter  
Jason Downs  
Juha Yrjölä  
Michael Stone  
Networks Associates Technology, Inc.  
Solar Designer  
Todd C. Miller  
Wayne Schroeder  
William Jones  
Darren Tucker  
Sun Microsystems  
The SCO Group  
Daniel Walsh  
Red Hat, Inc

- \* Redistribution and use in source and binary forms, with or without
- \* modification, are permitted provided that the following conditions
- \* are met:
- \* 1. Redistributions of source code must retain the above copyright
- \* notice, this list of conditions and the following disclaimer.
- \* 2. Redistributions in binary form must reproduce the above copyright
- \* notice, this list of conditions and the following disclaimer in the
- \* documentation and/or other materials provided with the distribution.
- \*

\* THIS SOFTWARE IS PROVIDED BY THE AUTHOR ``AS IS" AND ANY EXPRESS OR  
\* IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES  
\* OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.  
\* IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY DIRECT, INDIRECT,  
\* INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT  
\* NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE,  
\* DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY  
\* THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT  
\* (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF  
\* THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

8) Portable OpenSSH contains the following additional licenses:

a) md5crypt.c, md5crypt.h

- \* "THE BEER-WARE LICENSE" (Revision 42):
- \* <phk@login.dknet.dk> wrote this file. As long as you retain this

- \* notice you can do whatever you want with this stuff. If we meet
- \* some day, and you think this stuff is worth it, you can buy me a
- \* beer in return. Poul-Henning Kamp

b) snprintf replacement

- \* Copyright Patrick Powell 1995
- \* This code is based on code written by Patrick Powell
- \* (papowell@astart.com) It may be used for any purpose as long as this
- \* notice remains intact on all source code distributions

c) Compatibility code (openbsd-compat)

Apart from the previously mentioned licenses, various pieces of code in the openbsd-compat/ subdirectory are licensed as follows:

Some code is licensed under a 3-term BSD license, to the following copyright holders:

Todd C. Miller  
Theo de Raadt  
Damien Miller  
Eric P. Allman  
The Regents of the University of California  
Constantin S. Svintsoff

- \* Redistribution and use in source and binary forms, with or without
- \* modification, are permitted provided that the following conditions
- \* are met:
- \* 1. Redistributions of source code must retain the above copyright
- \* notice, this list of conditions and the following disclaimer.
- \* 2. Redistributions in binary form must reproduce the above copyright
- \* notice, this list of conditions and the following disclaimer in the
- \* documentation and/or other materials provided with the distribution.
- \* 3. Neither the name of the University nor the names of its contributors
- \* may be used to endorse or promote products derived from this software
- \* without specific prior written permission.

- \* THIS SOFTWARE IS PROVIDED BY THE REGENTS AND CONTRIBUTORS ``AS IS" AND
- \* ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE
- \* IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE
- \* ARE DISCLAIMED. IN NO EVENT SHALL THE REGENTS OR CONTRIBUTORS BE LIABLE
- \* FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL
- \* DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS
- \* OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION)
- \* HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT
- \* LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY
- \* OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF

\* SUCH DAMAGE.

Some code is licensed under an ISC-style license, to the following  
copyright holders:

Internet Software Consortium.

Todd C. Miller

Reyk Floeter

Chad Mynhier

\* Permission to use, copy, modify, and distribute this software for any  
\* purpose with or without fee is hereby granted, provided that the above  
\* copyright notice and this permission notice appear in all copies.

\*

\* THE SOFTWARE IS PROVIDED "AS IS" AND TODD C. MILLER DISCLAIMS ALL  
\* WARRANTIES WITH REGARD TO THIS SOFTWARE INCLUDING ALL IMPLIED WARRANTIES  
\* OF MERCHANTABILITY AND FITNESS. IN NO EVENT SHALL TODD C. MILLER BE LIABLE  
\* FOR ANY SPECIAL, DIRECT, INDIRECT, OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES  
\* WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION  
\* OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN  
\* CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

Some code is licensed under a MIT-style license to the following  
copyright holders:

Free Software Foundation, Inc.

\* Permission is hereby granted, free of charge, to any person obtaining a \*  
\* copy of this software and associated documentation files (the \*  
\* "Software"), to deal in the Software without restriction, including \*  
\* without limitation the rights to use, copy, modify, merge, publish, \*  
\* distribute, distribute with modifications, sublicense, and/or sell \*  
\* copies of the Software, and to permit persons to whom the Software is \*  
\* furnished to do so, subject to the following conditions: \*

# 1.701 openssh-client 7.2\_p2 :r4

## 1.701.1 Available under license :

SSH-ADD(1)            General Commands Manual            SSH-ADD(1)

### NAME

ssh-add M-bM-^@M-^S adds private key identities to the authentication agent

### SYNOPSIS

```
ssh-add [-cDdkLIXx] [-E fingerprint_hash] [-t life] [file ...]
ssh-add -s pkcs11
ssh-add -e pkcs11
```

### DESCRIPTION

ssh-add adds private key identities to the authentication agent, ssh-agent(1). When run without arguments, it adds the files ~/.ssh/id\_rsa, ~/.ssh/id\_dsa, ~/.ssh/id\_ecdsa, ~/.ssh/id\_ed25519 and ~/.ssh/identity. After loading a private key, ssh-add will try to load corresponding certificate information from the filename obtained by appending -cert.pub to the name of the private key file. Alternative file names can be given on the command line.

If any file requires a passphrase, ssh-add asks for the passphrase from the user. The passphrase is read from the user's tty. ssh-add retries the last passphrase if multiple identity files are given.

The authentication agent must be running and the SSH\_AUTH\_SOCKET environment variable must contain the name of its socket for ssh-add to work.

The options are as follows:

- c    Indicates that added identities should be subject to confirmation before being used for authentication. Confirmation is performed by ssh-askpass(1). Successful confirmation is signaled by a zero exit status from ssh-askpass(1), rather than text entered into the requester.
  
- D    Deletes all identities from the agent.

- d Instead of adding identities, removes identities from the agent. If ssh-add has been run without arguments, the keys for the default identities and their corresponding certificates will be removed. Otherwise, the argument list will be interpreted as a list of paths to public key files to specify keys and certificates to be removed from the agent. If no public key is found at a given path, ssh-add will append .pub and retry.
  
- E fingerprint\_hash  
Specifies the hash algorithm used when displaying key fingerprints. Valid options are: M-bM-^@M-^\md5M-bM-^@M-^] and M-bM-^@M-^\sha256M-bM-^@M-^]. The default is M-bM-^@M-^\sha256M-bM-^@M-^].
  
- e pkcs11  
Remove keys provided by the PKCS#11 shared library pkcs11.
  
- k When loading keys into or deleting keys from the agent, process plain private keys only and skip certificates.
  
- L Lists public key parameters of all identities currently represented by the agent.
  
- l Lists fingerprints of all identities currently represented by the agent.
  
- s pkcs11  
Add keys provided by the PKCS#11 shared library pkcs11.
  
- t life  
Set a maximum lifetime when adding identities to an agent. The lifetime may be specified in seconds or in a time format specified in sshd\_config(5).
  
- X Unlock the agent.
  
- x Lock the agent with a password.

## ENVIRONMENT

### DISPLAY and SSH\_ASKPASS

If ssh-add needs a passphrase, it will read the passphrase from the current terminal if it was run from a terminal. If ssh-add does not have a terminal associated with it but DISPLAY and SSH\_ASKPASS are set, it will execute the program specified by SSH\_ASKPASS (by default M-bM-^@M-^\ssh-askpassM-bM-^@M-^]) and open an X11 window to read the passphrase. This is particularly useful when calling ssh-add from a .xsession or related script. (Note that on some

machines it may be necessary to redirect the input from /dev/null to make this work.)

## SSH\_AUTH\_SOCK

Identifies the path of a UNIX-domain socket used to communicate with the agent.

## FILES

~/.ssh/identity

Contains the protocol version 1 RSA authentication identity of the user.

~/.ssh/id\_dsa

Contains the protocol version 2 DSA authentication identity of the user.

~/.ssh/id\_ecdsa

Contains the protocol version 2 ECDSA authentication identity of the user.

~/.ssh/id\_ed25519

Contains the protocol version 2 Ed25519 authentication identity of the user.

~/.ssh/id\_rsa

Contains the protocol version 2 RSA authentication identity of the user.

Identity files should not be readable by anyone but the user. Note that ssh-add ignores identity files if they are accessible by others.

## EXIT STATUS

Exit status is 0 on success, 1 if the specified command fails, and 2 if ssh-add is unable to contact the authentication agent.

## SEE ALSO

ssh(1), ssh-agent(1), ssh-askpass(1), ssh-keygen(1), sshd(8)

## AUTHORS

OpenSSH is a derivative of the original and free ssh 1.2.12 release by Tatu Ylonen. Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt and Dug Song removed many bugs, re-added newer features and created OpenSSH. Markus Friedl contributed the support for SSH protocol versions 1.5 and 2.0.

.Nm

adds private key identities to the authentication agent,

.Xr ssh-agent 1 .

When run without arguments, it adds the files

.Pa ~/.ssh/id\_rsa ,

.Pa ~/.ssh/id\_dsa ,

.Pa ~/.ssh/id\_ecdsa ,

.Pa ~/.ssh/id\_ed25519

and

.Pa ~/.ssh/identity .

After loading a private key,

.Nm

will try to load corresponding certificate information from the filename obtained by appending

.Pa -cert.pub

to the name of the private key file.

Alternative file names can be given on the command line.

.Pp

If any file requires a passphrase,

.Nm

asks for the passphrase from the user.

The passphrase is read from the user's tty.

.Nm

retries the last passphrase if multiple identity files are given.

.Pp

The authentication agent must be running and the

.Ev SSH\_AUTH\_SOCK

environment variable must contain the name of its socket for

.Nm

to work.

.Pp

The options are as follows:

.Bl -tag -width Ds

.It Fl c

Indicates that added identities should be subject to confirmation before being used for authentication.

Confirmation is performed by

.Xr ssh-askpass 1 .

Successful confirmation is signaled by a zero exit status from

.Xr ssh-askpass 1 ,

rather than text entered into the requester.

.It Fl D

Deletes all identities from the agent.

.It Fl d

Instead of adding identities, removes identities from the agent.

If

.Nm

has been run without arguments, the keys for the default identities and their corresponding certificates will be removed.

Otherwise, the argument list will be interpreted as a list of paths to public key files to specify keys and certificates to be removed from the agent.

If no public key is found at a given path,

.Nm

will append

.Pa .pub

and retry.

.It Fl E Ar fingerprint\_hash

Specifies the hash algorithm used when displaying key fingerprints.

Valid options are:

.Dq md5

and

.Dq sha256 .

The default is

.Dq sha256 .

.It Fl e Ar pkcs11

Remove keys provided by the PKCS#11 shared library

.Ar pkcs11 .

.It Fl k

When loading keys into or deleting keys from the agent, process plain private keys only and skip certificates.

.It Fl L

Lists public key parameters of all identities currently represented by the agent.

.It Fl l

Lists fingerprints of all identities currently represented by the agent.

.It Fl s Ar pkcs11

Add keys provided by the PKCS#11 shared library

.Ar pkcs11 .

.It Fl t Ar life

Set a maximum lifetime when adding identities to an agent.

The lifetime may be specified in seconds or in a time format specified in

.Xr sshd\_config 5 .

.It Fl X

Unlock the agent.

.It Fl x

Lock the agent with a password.

.El

.Sh ENVIRONMENT

.Bl -tag -width Ds

.It Ev "DISPLAY" and "SSH\_ASKPASS"

If

.Nm

needs a passphrase, it will read the passphrase from the current terminal if it was run from a terminal.

If

.Nm

does not have a terminal associated with it but

.Ev DISPLAY

and

.Ev SSH\_ASKPASS

are set, it will execute the program specified by

.Ev SSH\_ASKPASS

(by default

.Dq ssh-askpass )

and open an X11 window to read the passphrase.

This is particularly useful when calling

.Nm

from a

.Pa .xsession

or related script.

(Note that on some machines it

may be necessary to redirect the input from

.Pa /dev/null

to make this work.)

.It Ev SSH\_AUTH\_SOCK

Identifies the path of a

.Ux Ns -domain

socket used to communicate with the agent.

.El

.Sh FILES

.Bl -tag -width Ds

.It Pa ~/.ssh/identity

Contains the protocol version 1 RSA authentication identity of the user.

.It Pa ~/.ssh/id\_dsa

Contains the protocol version 2 DSA authentication identity of the user.

.It Pa ~/.ssh/id\_ecdsa

Contains the protocol version 2 ECDSA authentication identity of the user.

.It Pa ~/.ssh/id\_ed25519

Contains the protocol version 2 Ed25519 authentication identity of the user.

.It Pa ~/.ssh/id\_rsa

Contains the protocol version 2 RSA authentication identity of the user.

.El

.Pp

Identity files should not be readable by anyone but the user.

Note that

.Nm

ignores identity files if they are accessible by others.

.Sh EXIT STATUS

Exit status is 0 on success, 1 if the specified command fails,

and 2 if

.Nm

is unable to contact the authentication agent.

.Sh SEE ALSO

.Xr ssh 1 ,

.Xr ssh-agent 1 ,

.Xr sshd 8

.Sh AUTHORS

OpenSSH is a derivative of the original and free

ssh 1.2.12 release by Tatu Ylonen.

Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos,

Theo de Raadt and Dug Song

removed many bugs, re-added newer features and

created OpenSSH.

Markus Friedl contributed the support for SSH

protocol versions 1.5 and 2.0.

SSH-AGENT(1)          General Commands Manual          SSH-AGENT(1)

```

## NAME

ssh-agent M-bM-^@M-^S authentication agent

## SYNOPSIS

```

ssh-agent [-c | -s] [-Dd] [-a bind_address] [-E fingerprint_hash]
          [-t life] [command [arg ...]]
ssh-agent [-c | -s] -k

```

## DESCRIPTION

ssh-agent is a program to hold private keys used for public key authentication (RSA, DSA, ECDSA, Ed25519). ssh-agent is usually started in the beginning of an X-session or a login session, and all other windows or programs are started as clients to the ssh-agent program. Through use of environment variables the agent can be located and automatically used for authentication when logging in to other machines using ssh(1).

The agent initially does not have any private keys. Keys are added using ssh(1) (see AddKeysToAgent in ssh\_config(5) for details) or ssh-add(1). Multiple identities may be stored in ssh-agent concurrently and ssh(1) will automatically use them if present. ssh-add(1) is also used to remove keys from ssh-agent and to query the keys that are held in one.

The options are as follows:

-a bind\_address

Bind the agent to the UNIX-domain socket bind\_address. The default is \$TMPDIR/ssh-XXXXXXXXXX/agent.<ppid>.

-c Generate C-shell commands on stdout. This is the default if

SHELL looks like it's a csh style of shell.

- D Foreground mode. When this option is specified ssh-agent will not fork.
- d Debug mode. When this option is specified ssh-agent will not fork and will write debug information to standard error.
- E fingerprint\_hash  
Specifies the hash algorithm used when displaying key fingerprints. Valid options are: M-bM-^@M-^\md5M-bM-^@M-^] and M-bM-^@M-^\sha256M-bM-^@M-^]. The default is M-bM-^@M-^\sha256M-bM-^@M-^].
- k Kill the current agent (given by the SSH\_AGENT\_PID environment variable).
- s Generate Bourne shell commands on stdout. This is the default if SHELL does not look like it's a csh style of shell.
- t life  
Set a default value for the maximum lifetime of identities added to the agent. The lifetime may be specified in seconds or in a time format specified in sshd\_config(5). A lifetime specified for an identity with ssh-add(1) overrides this value. Without this option the default maximum lifetime is forever.

If a command line is given, this is executed as a subprocess of the agent. When the command dies, so does the agent.

The idea is that the agent is run in the user's local PC, laptop, or terminal. Authentication data need not be stored on any other machine, and authentication passphrases never go over the network. However, the connection to the agent is forwarded over SSH remote logins, and the user can thus use the privileges given by the identities anywhere in the network in a secure way.

There are two main ways to get an agent set up: The first is that the agent starts a new subcommand into which some environment variables are exported, eg ssh-agent xterm &. The second is that the agent prints the needed shell commands (either sh(1) or csh(1) syntax can be generated) which can be evaluated in the calling shell, eg eval `ssh-agent -s` for Bourne-type shells such as sh(1) or ksh(1) and eval `ssh-agent -c` for csh(1) and derivatives.

Later ssh(1) looks at these variables and uses them to establish a connection to the agent.

The agent will never send a private key over its request channel. Instead, operations that require a private key will be performed by the agent, and the result will be returned to the requester. This way, private keys are not exposed to clients using the agent.

A UNIX-domain socket is created and the name of this socket is stored in the SSH\_AUTH\_SOCK environment variable. The socket is made accessible only to the current user. This method is easily abused by root or another instance of the same user.

The SSH\_AGENT\_PID environment variable holds the agent's process ID.

The agent exits automatically when the command given on the command line terminates.

## FILES

\$TMPDIR/ssh-XXXXXXXXXX/agent.<ppid>

UNIX-domain sockets used to contain the connection to the authentication agent. These sockets should only be readable by the owner. The sockets should get automatically removed when the agent exits.

.Op Fl \&Dd

.Op Fl a Ar bind\_address

.Op Fl E Ar fingerprint\_hash

.Op Fl t Ar life

.Op Ar command Op Ar arg ...

.Nm ssh-agent

.Op Fl c | s

.Fl k

.Sh DESCRIPTION

.Nm

is a program to hold private keys used for public key authentication  
(RSA, DSA, ECDSA, Ed25519).

.Nm

is usually started in the beginning of an X-session or a login session, and  
all other windows or programs are started as clients to the ssh-agent  
program.

Through use of environment variables the agent can be located  
and automatically used for authentication when logging in to other

machines using

```
.Xr ssh 1 .
```

.Pp

The agent initially does not have any private keys.

Keys are added using

```
.Xr ssh 1
```

(see

```
.Cm AddKeysToAgent
```

in

```
.Xr ssh_config 5
```

for details)

or

```
.Xr ssh-add 1 .
```

Multiple identities may be stored in

```
.Nm
```

concurrently and

```
.Xr ssh 1
```

will automatically use them if present.

```
.Xr ssh-add 1
```

is also used to remove keys from

```
.Nm
```

and to query the keys that are held in one.

.Pp

The options are as follows:

```
.Bl -tag -width Ds
```

```
.It Fl a Ar bind_address
```

Bind the agent to the

```
.Ux Ns -domain
```

socket

```
.Ar bind_address .
```

The default is

```
.Pa $TMPDIR/ssh-XXXXXXXXXX/agent.\*(Ltpid\*(Gt .
```

```
.It Fl c
```

Generate C-shell commands on

```
.Dv stdout .
```

This is the default if

```
.Ev SHELL
```

looks like it's a csh style of shell.

```
.It Fl D
```

Foreground mode.

When this option is specified

```
.Nm
```

will not fork.

```
.It Fl d
```

Debug mode.

When this option is specified

```
.Nm
```

will not fork and will write debug information to standard error.

.It Fl E Ar fingerprint\_hash

Specifies the hash algorithm used when displaying key fingerprints.

Valid options are:

.Dq md5

and

.Dq sha256 .

The default is

.Dq sha256 .

.It Fl k

Kill the current agent (given by the

.Ev SSH\_AGENT\_PID

environment variable).

.It Fl s

Generate Bourne shell commands on

.Dv stdout .

This is the default if

.Ev SHELL

does not look like it's a csh style of shell.

.It Fl t Ar life

Set a default value for the maximum lifetime of identities added to the agent.

The lifetime may be specified in seconds or in a time format specified in

.Xr sshd\_config 5 .

A lifetime specified for an identity with

.Xr ssh-add 1

overrides this value.

Without this option the default maximum lifetime is forever.

.El

.Pp

If a command line is given, this is executed as a subprocess of the agent.

When the command dies, so does the agent.

.Pp

The idea is that the agent is run in the user's local PC, laptop, or terminal.

Authentication data need not be stored on any other machine, and authentication passphrases never go over the network.

However, the connection to the agent is forwarded over SSH remote logins, and the user can thus use the privileges given by the identities anywhere in the network in a secure way.

.Pp

There are two main ways to get an agent set up:

The first is that the agent starts a new subcommand into which some environment variables are exported, eg

.Cm ssh-agent xterm & .

The second is that the agent prints the needed shell commands (either

.Xr sh 1

or

.Xr csh 1

syntax can be generated) which can be evaluated in the calling shell, eg

.Cm eval `ssh-agent -s`  
for Bourne-type shells such as

.Xr sh 1

or

.Xr ksh 1

and

.Cm eval `ssh-agent -c`

for

.Xr csh 1

and derivatives.

.Pp

Later

.Xr ssh 1

looks at these variables and uses them to establish a connection to the agent.

.Pp

The agent will never send a private key over its request channel.

Instead, operations that require a private key will be performed

by the agent, and the result will be returned to the requester.

This way, private keys are not exposed to clients using the agent.

.Pp

A

.Ux Ns -domain

socket is created and the name of this socket is stored in the

.Ev SSH\_AUTH\_SOCK

environment

variable.

The socket is made accessible only to the current user.

This method is easily abused by root or another instance of the same

user.

.Pp

The

.Ev SSH\_AGENT\_PID

environment variable holds the agent's process ID.

.Pp

The agent exits automatically when the command given on the command

line terminates.

.Sh FILES

.Bl -tag -width Ds

.It Pa \$TMPDIR/ssh-XXXXXXXXXX/agent.\\*(Ltpid\\*(Gt

.Ux Ns -domain

sockets used to contain the connection to the authentication agent.

These sockets should only be readable by the owner.

The sockets should get automatically removed when the agent exits.

## DESCRIPTION

ssh-keygen generates, manages and converts authentication keys for ssh(1). ssh-keygen can create keys for use by SSH protocol versions 1 and 2. Protocol 1 should not be used and is only offered to support legacy devices. It suffers from a number of cryptographic weaknesses and doesn't support many of the advanced features available for protocol 2.

The type of key to be generated is specified with the -t option. If invoked without any arguments, ssh-keygen will generate an RSA key for use in SSH protocol 2 connections.

ssh-keygen is also used to generate groups for use in Diffie-Hellman group exchange (DH-GEX). See the MODULI GENERATION section for details.

Finally, ssh-keygen can be used to generate and update Key Revocation Lists, and to test whether given keys have been revoked by one. See the KEY REVOCATION LISTS section for details.

Normally each user wishing to use SSH with public key authentication runs this once to create the authentication key in ~/.ssh/identity, ~/.ssh/id\_dsa, ~/.ssh/id\_ecdsa, ~/.ssh/id\_ed25519 or ~/.ssh/id\_rsa. Additionally, the system administrator may use this to generate host

keys, as seen in /etc/rc.

Normally this program generates the key and asks for a file in which to store the private key. The public key is stored in a file with the same name but `M-bM-^@M-^\.pubM-bM-^@M-^]` appended. The program also asks for a passphrase. The passphrase may be empty to indicate no passphrase (host keys must have an empty passphrase), or it may be a string of arbitrary length. A passphrase is similar to a password, except it can be a phrase with a series of words, punctuation, numbers, whitespace, or any string of characters you want. Good passphrases are 10-30 characters long, are not simple sentences or otherwise easily guessable (English prose has only 1-2 bits of entropy per character, and provides very bad passphrases), and contain a mix of upper and lowercase letters, numbers, and non-alphanumeric characters. The passphrase can be changed later by using the `-p` option.

There is no way to recover a lost passphrase. If the passphrase is lost or forgotten, a new key must be generated and the corresponding public key copied to other machines.

For RSA1 keys, there is also a comment field in the key file that is only for convenience to the user to help identify the key. The comment can tell what the key is for, or whatever is useful. The comment is initialized to `M-bM-^@M-^\user@hostM-bM-^@M-^]` when the key is created, but can be changed using the `-c` option.

After a key is generated, instructions below detail where the keys should be placed to be activated.

The options are as follows:

`-A` For each of the key types (`rsa1`, `rsa`, `dsa`, `ecdsa` and `ed25519`) for which host keys do not exist, generate the host keys with the default key file path, an empty passphrase, default bits for the key type, and default comment. This is used by /etc/rc to generate new host keys.

`-a` rounds

When saving a new-format private key (i.e. an `ed25519` key or any SSH protocol 2 key when the `-o` flag is set), this option specifies the number of KDF (key derivation function) rounds used. Higher numbers result in slower passphrase verification and increased resistance to brute-force password cracking (should the keys be stolen).

When screening DH-GEX candidates ( using the `-T` command). This option specifies the number of primality tests to perform.

**-B** Show the bubblebabble digest of specified private or public key file.

**-b** bits

Specifies the number of bits in the key to create. For RSA keys, the minimum size is 1024 bits and the default is 2048 bits. Generally, 2048 bits is considered sufficient. DSA keys must be exactly 1024 bits as specified by FIPS 186-2. For ECDSA keys, the **-b** flag determines the key length by selecting from one of three elliptic curve sizes: 256, 384 or 521 bits. Attempting to use bit lengths other than these three values for ECDSA keys will fail. Ed25519 keys have a fixed length and the **-b** flag will be ignored.

**-C** comment

Provides a new comment.

**-c** Requests changing the comment in the private and public key files. This operation is only supported for RSA1 keys. The program will prompt for the file containing the private keys, for the passphrase if the key has one, and for the new comment.

**-D** pkcs11

Download the RSA public keys provided by the PKCS#11 shared library pkcs11. When used in combination with **-s**, this option indicates that a CA key resides in a PKCS#11 token (see the CERTIFICATES section for details).

**-E** fingerprint\_hash

Specifies the hash algorithm used when displaying key fingerprints. Valid options are: `M-bM-^@M-^\md5M-bM-^@M-^]` and `M-bM-^@M-^\sha256M-bM-^@M-^]`. The default is `M-bM-^@M-^\sha256M-bM-^@M-^]`.

**-e** This option will read a private or public OpenSSH key file and print to stdout the key in one of the formats specified by the **-m** option. The default export format is `M-bM-^@M-^\RFC4716M-bM-^@M-^]`. This option allows exporting OpenSSH keys for use by other programs, including several commercial SSH implementations.

**-F** hostname

Search for the specified hostname in a `known_hosts` file, listing any occurrences found. This option is useful to find hashed host names or addresses and may also be used in conjunction with the **-H** option to print found keys in a hashed format.

**-f** filename

Specifies the filename of the key file.

- G output\_file**  
Generate candidate primes for DH-GEX. These primes must be screened for safety (using the **-T** option) before use.
- g** Use generic DNS format when printing fingerprint resource records using the **-r** command.
- H** Hash a known\_hosts file. This replaces all hostnames and addresses with hashed representations within the specified file; the original content is moved to a file with a .old suffix. These hashes may be used normally by ssh and sshd, but they do not reveal identifying information should the file's contents be disclosed. This option will not modify existing hashed hostnames and is therefore safe to use on files that mix hashed and non-hashed names.
- h** When signing a key, create a host certificate instead of a user certificate. Please see the CERTIFICATES section for details.
- I certificate\_identity**  
Specify the key identity when signing a public key. Please see the CERTIFICATES section for details.
- i** This option will read an unencrypted private (or public) key file in the format specified by the **-m** option and print an OpenSSH compatible private (or public) key to stdout. This option allows importing keys from other software, including several commercial SSH implementations. The default import format is `M-bM-^@M-^[\RFC4716M-bM-^@M-^]`.
- J num\_lines**  
Exit after screening the specified number of lines while performing DH candidate screening using the **-T** option.
- j start\_line**  
Start screening at the specified line number while performing DH candidate screening using the **-T** option.
- K checkpt**  
Write the last line processed to the file checkpt while performing DH candidate screening using the **-T** option. This will be used to skip lines in the input file that have already been processed if the job is restarted.
- k** Generate a KRL file. In this mode, ssh-keygen will generate a KRL file at the location specified via the **-f** flag that revokes every key or certificate presented on the command line. Keys/certificates to be revoked may be specified by public key

file or using the format described in the KEY REVOCATION LISTS section.

**-L** Prints the contents of one or more certificates.

**-l** Show fingerprint of specified public key file. Private RSA1 keys are also supported. For RSA and DSA keys ssh-keygen tries to find the matching public key file and prints its fingerprint. If combined with **-v**, an ASCII art representation of the key is supplied with the fingerprint.

**-M** memory

Specify the amount of memory to use (in megabytes) when generating candidate moduli for DH-GEX.

**-m** key\_format

Specify a key format for the **-i** (import) or **-e** (export) conversion options. The supported key formats are: M-bM-^@M-^RFC4716M-bM-^@M-^] (RFC 4716/SSH2 public or private key), M-bM-^@M-^PKCS8M-bM-^@M-^] (PEM PKCS8 public key) or M-bM-^@M-^PEMM-bM-^@M-^] (PEM public key). The default conversion format is M-bM-^@M-^RFC4716M-bM-^@M-^].

**-N** new\_passphrase

Provides the new passphrase.

**-n** principals

Specify one or more principals (user or host names) to be included in a certificate when signing a key. Multiple principals may be specified, separated by commas. Please see the CERTIFICATES section for details.

**-O** option

Specify a certificate option when signing a key. This option may be specified multiple times. Please see the CERTIFICATES section for details. The options that are valid for user certificates are:

**clear** Clear all enabled permissions. This is useful for clearing the default set of permissions so permissions may be added individually.

**force-command=command**

Forces the execution of command instead of any shell or command specified by the user when the certificate is used for authentication.

**no-agent-forwarding**

Disable ssh-agent(1) forwarding (permitted by default).

no-port-forwarding

Disable port forwarding (permitted by default).

no-pty Disable PTY allocation (permitted by default).

no-user-rc

Disable execution of ~/.ssh/rc by sshd(8) (permitted by default).

no-x11-forwarding

Disable X11 forwarding (permitted by default).

permit-agent-forwarding

Allows ssh-agent(1) forwarding.

permit-port-forwarding

Allows port forwarding.

permit-pty

Allows PTY allocation.

permit-user-rc

Allows execution of ~/.ssh/rc by sshd(8).

permit-x11-forwarding

Allows X11 forwarding.

source-address=address\_list

Restrict the source addresses from which the certificate is considered valid. The address\_list is a comma-separated list of one or more address/netmask pairs in CIDR format.

At present, no options are valid for host keys.

- o Causes ssh-keygen to save private keys using the new OpenSSH format rather than the more compatible PEM format. The new format has increased resistance to brute-force password cracking but is not supported by versions of OpenSSH prior to 6.5. Ed25519 keys always use the new private key format.

-P passphrase

Provides the (old) passphrase.

- p Requests changing the passphrase of a private key file instead of creating a new private key. The program will prompt for the file containing the private key, for the old passphrase, and twice for

the new passphrase.

**-Q** Test whether keys have been revoked in a KRL.

**-q** Silence ssh-keygen.

**-R hostname**

Removes all keys belonging to hostname from a known\_hosts file.

This option is useful to delete hashed hosts (see the **-H** option above).

**-r hostname**

Print the SSHFP fingerprint resource record named hostname for the specified public key file.

**-S start**

Specify start point (in hex) when generating candidate moduli for DH-GEX.

**-s ca\_key**

Certify (sign) a public key using the specified CA key. Please see the CERTIFICATES section for details.

When generating a KRL, **-s** specifies a path to a CA public key file used to revoke certificates directly by key ID or serial number. See the KEY REVOCATION LISTS section for details.

**-T output\_file**

Test DH group exchange candidate primes (generated using the **-G** option) for safety.

**-t dsa | ecdsa | ed25519 | rsa | rsa1**

Specifies the type of key to create. The possible values are

M-bM-^@M-^\rsa1M-bM-^@M-^] for protocol version 1 and M-bM-^@M-^\dsaM-bM-^@M-^], M-bM-^@M-^\ecdsaM-bM-^@M-^], M-bM-^@M-^\ed25519M-bM-^@M-^], or M-bM-^@M-^\rsaM-bM-^@M-^] for protocol version 2.

**-u** Update a KRL. When specified with **-k**, keys listed via the command line are added to the existing KRL rather than a new KRL being created.

**-V validity\_interval**

Specify a validity interval when signing a certificate. A validity interval may consist of a single time, indicating that the certificate is valid beginning now and expiring at that time, or may consist of two times separated by a colon to indicate an explicit time interval. The start time may be specified as a date in YYYYMMDD format, a time in YYYYMMDDHHMMSS format or a

relative time (to the current time) consisting of a minus sign followed by a relative time in the format described in the TIME FORMATS section of sshd\_config(5). The end time may be specified as a YYYYMMDD date, a YYYYMMDDHHMMSS time or a relative time starting with a plus character.

For example: M-bM-^@M-^\+52w1dM-bM-^@M-^] (valid from now to 52 weeks and one day from now), M-bM-^@M-^\-4w:+4wM-bM-^@M-^] (valid from four weeks ago to four weeks from now), M-bM-^@M-^\20100101123000:20110101123000M-bM-^@M-^] (valid from 12:30 PM, January 1st, 2010 to 12:30 PM, January 1st, 2011), M-bM-^@M-^\-1d:20110101M-bM-^@M-^] (valid from yesterday to midnight, January 1st, 2011).

-v Verbose mode. Causes ssh-keygen to print debugging messages about its progress. This is helpful for debugging moduli generation. Multiple -v options increase the verbosity. The maximum is 3.

-W generator

Specify desired generator when testing candidate moduli for DH-GEX.

-y This option will read a private OpenSSH format file and print an OpenSSH public key to stdout.

-z serial\_number

Specifies a serial number to be embedded in the certificate to distinguish this certificate from others from the same CA. The default serial number is zero.

When generating a KRL, the -z flag is used to specify a KRL version number.

## MODULI GENERATION

ssh-keygen may be used to generate groups for the Diffie-Hellman Group Exchange (DH-GEX) protocol. Generating these groups is a two-step process: first, candidate primes are generated using a fast, but memory intensive process. These candidate primes are then tested for suitability (a CPU-intensive process).

Generation of primes is performed using the -G option. The desired length of the primes may be specified by the -b option. For example:

```
# ssh-keygen -G moduli-2048.candidates -b 2048
```

By default, the search for primes begins at a random point in the desired length range. This may be overridden using the -S option, which specifies a different start point (in hex).

Once a set of candidates have been generated, they must be screened for suitability. This may be performed using the -T option. In this mode ssh-keygen will read candidates from standard input (or a file specified using the -f option). For example:

```
# ssh-keygen -T moduli-2048 -f moduli-2048.candidates
```

By default, each candidate will be subjected to 100 primality tests. This may be overridden using the -a option. The DH generator value will be chosen automatically for the prime under consideration. If a specific generator is desired, it may be requested using the -W option. Valid generator values are 2, 3, and 5.

Screened DH groups may be installed in /etc/moduli. It is important that this file contains moduli of a range of bit lengths and that both ends of a connection share common moduli.

## CERTIFICATES

ssh-keygen supports signing of keys to produce certificates that may be used for user or host authentication. Certificates consist of a public key, some identity information, zero or more principal (user or host) names and a set of options that are signed by a Certification Authority (CA) key. Clients or servers may then trust only the CA key and verify its signature on a certificate rather than trusting many user/host keys. Note that OpenSSH certificates are a different, and much simpler, format to the X.509 certificates used in ssl(8).

ssh-keygen supports two types of certificates: user and host. User certificates authenticate users to servers, whereas host certificates authenticate server hosts to users. To generate a user certificate:

```
$ ssh-keygen -s /path/to/ca_key -I key_id /path/to/user_key.pub
```

The resultant certificate will be placed in /path/to/user\_key-cert.pub. A host certificate requires the -h option:

```
$ ssh-keygen -s /path/to/ca_key -I key_id -h /path/to/host_key.pub
```

The host certificate will be output to /path/to/host\_key-cert.pub.

It is possible to sign using a CA key stored in a PKCS#11 token by providing the token library using -D and identifying the CA key by providing its public half as an argument to -s:

```
$ ssh-keygen -s ca_key.pub -D libpkcs11.so -I key_id user_key.pub
```

In all cases, key\_id is a "key identifier" that is logged by the server when the certificate is used for authentication.

Certificates may be limited to be valid for a set of principal (user/host) names. By default, generated certificates are valid for all users or hosts. To generate a certificate for a specified set of principals:

```
$ ssh-keygen -s ca_key -I key_id -n user1,user2 user_key.pub
$ ssh-keygen -s ca_key -I key_id -h -n host.domain host_key.pub
```

Additional limitations on the validity and use of user certificates may be specified through certificate options. A certificate option may disable features of the SSH session, may be valid only when presented from particular source addresses or may force the use of a specific command. For a list of valid certificate options, see the documentation for the `-O` option above.

Finally, certificates may be defined with a validity lifetime. The `-V` option allows specification of certificate start and end times. A certificate that is presented at a time outside this range will not be considered valid. By default, certificates are valid from UNIX Epoch to the distant future.

For certificates to be used for user or host authentication, the CA public key must be trusted by `sshd(8)` or `ssh(1)`. Please refer to those manual pages for details.

## KEY REVOCATION LISTS

`ssh-keygen` is able to manage OpenSSH format Key Revocation Lists (KRLs). These binary files specify keys or certificates to be revoked using a compact format, taking as little as one bit per certificate if they are being revoked by serial number.

KRLs may be generated using the `-k` flag. This option reads one or more files from the command line and generates a new KRL. The files may either contain a KRL specification (see below) or public keys, listed one per line. Plain public keys are revoked by listing their hash or contents in the KRL and certificates revoked by serial number or key ID (if the serial is zero or not available).

Revoking keys using a KRL specification offers explicit control over the types of record used to revoke keys and may be used to directly revoke certificates by serial number or key ID without having the complete original certificate on hand. A KRL specification consists of lines containing one of the following directives followed by a colon and some directive-specific information.

```
serial: serial_number[-serial_number]
```

Revokes a certificate with the specified serial number. Serial

numbers are 64-bit values, not including zero and may be expressed in decimal, hex or octal. If two serial numbers are specified separated by a hyphen, then the range of serial numbers including and between each is revoked. The CA key must have been specified on the ssh-keygen command line using the -s option.

id: key\_id

Revokes a certificate with the specified key ID string. The CA key must have been specified on the ssh-keygen command line using the -s option.

key: public\_key

Revokes the specified key. If a certificate is listed, then it is revoked as a plain public key.

sha1: public\_key

Revokes the specified key by its SHA1 hash.

KRLs may be updated using the -u flag in addition to -k. When this option is specified, keys listed via the command line are merged into the KRL, adding to those already there.

It is also possible, given a KRL, to test whether it revokes a particular key (or keys). The -Q flag will query an existing KRL, testing each key specified on the command line. If any key listed on the command line has been revoked (or an error encountered) then ssh-keygen will exit with a non-zero exit status. A zero exit status will only be returned if no key was revoked.

## FILES

~/.ssh/identity

Contains the protocol version 1 RSA authentication identity of the user. This file should not be readable by anyone but the user. It is possible to specify a passphrase when generating the key; that passphrase will be used to encrypt the private part of this file using 3DES. This file is not automatically accessed by ssh-keygen but it is offered as the default file for the private key. ssh(1) will read this file when a login attempt is made.

~/.ssh/identity.pub

Contains the protocol version 1 RSA public key for authentication. The contents of this file should be added to ~/.ssh/authorized\_keys on all machines where the user wishes to log in using RSA authentication. There is no need to keep the contents of this file secret.

~/.ssh/id\_dsa

~/.ssh/id\_ecdsa

~/.ssh/id\_ed25519

~/.ssh/id\_rsa

Contains the protocol version 2 DSA, ECDSA, Ed25519 or RSA authentication identity of the user. This file should not be readable by anyone but the user. It is possible to specify a passphrase when generating the key; that passphrase will be used to encrypt the private part of this file using 128-bit AES. This file is not automatically accessed by ssh-keygen but it is offered as the default file for the private key. ssh(1) will read this file when a login attempt is made.

~/.ssh/id\_dsa.pub

~/.ssh/id\_ecdsa.pub

~/.ssh/id\_ed25519.pub

~/.ssh/id\_rsa.pub

Contains the protocol version 2 DSA, ECDSA, Ed25519 or RSA public key for authentication. The contents of this file should be added to ~/.ssh/authorized\_keys on all machines where the user wishes to log in using public key authentication. There is no need to keep the contents of this file secret.

/etc/moduli

Contains Diffie-Hellman groups used for DH-GEX. The file format is described in moduli(5).

.Sh DESCRIPTION
.Nm
generates, manages and converts authentication keys for
.Xr ssh 1 .
.Nm
can create keys for use by SSH protocol versions 1 and 2.
Protocol 1 should not be used
and is only offered to support legacy devices.
It suffers from a number of cryptographic weaknesses
and doesn't support many of the advanced features available for protocol 2.
.Pp
The type of key to be generated is specified with the
.Fl t
option.
If invoked without any arguments,
.Nm

```

will generate an RSA key for use in SSH protocol 2 connections.

.Pp

.Nm

is also used to generate groups for use in Diffie-Hellman group exchange (DH-GEX).

See the

.Sx MODULI GENERATION

section for details.

.Pp

Finally,

.Nm

can be used to generate and update Key Revocation Lists, and to test whether given keys have been revoked by one.

See the

.Sx KEY REVOCATION LISTS

section for details.

.Pp

Normally each user wishing to use SSH

with public key authentication runs this once to create the authentication key in

.Pa ~/.ssh/identity ,

.Pa ~/.ssh/id\_dsa ,

.Pa ~/.ssh/id\_ecdsa ,

.Pa ~/.ssh/id\_ed25519

or

.Pa ~/.ssh/id\_rsa .

Additionally, the system administrator may use this to generate host keys, as seen in

.Pa /etc/rc .

.Pp

Normally this program generates the key and asks for a file in which to store the private key.

The public key is stored in a file with the same name but

.Dq .pub

appended.

The program also asks for a passphrase.

The passphrase may be empty to indicate no passphrase

(host keys must have an empty passphrase), or it may be a string of arbitrary length.

A passphrase is similar to a password, except it can be a phrase with a series of words, punctuation, numbers, whitespace, or any string of characters you want.

Good passphrases are 10-30 characters long, are

not simple sentences or otherwise easily guessable (English

prose has only 1-2 bits of entropy per character, and provides very bad passphrases), and contain a mix of upper and lowercase letters,

numbers, and non-alphanumeric characters.

The passphrase can be changed later by using the

.Fl p

option.

.Pp

There is no way to recover a lost passphrase.

If the passphrase is lost or forgotten, a new key must be generated and the corresponding public key copied to other machines.

.Pp

For RSA1 keys,

there is also a comment field in the key file that is only for convenience to the user to help identify the key.

The comment can tell what the key is for, or whatever is useful.

The comment is initialized to

.Dq user@host

when the key is created, but can be changed using the

.Fl c

option.

.Pp

After a key is generated, instructions below detail where the keys should be placed to be activated.

.Pp

The options are as follows:

.Bl -tag -width Ds

.It Fl A

For each of the key types (rsa1, rsa, dsa, ecdsa and ed25519)

for which host keys

do not exist, generate the host keys with the default key file path,

an empty passphrase, default bits for the key type, and default comment.

This is used by

.Pa /etc/rc

to generate new host keys.

.It Fl a Ar rounds

When saving a new-format private key (i.e. an ed25519 key or any SSH protocol 2 key when the

.Fl o

flag is set), this option specifies the number of KDF (key derivation function) rounds used.

Higher numbers result in slower passphrase verification and increased resistance to brute-force password cracking (should the keys be stolen).

.Pp

When screening DH-GEX candidates (using the

.Fl T

command).

This option specifies the number of primality tests to perform.

.It Fl B

Show the bubblebabble digest of specified private or public key file.

.It Fl b Ar bits

Specifies the number of bits in the key to create.

For RSA keys, the minimum size is 1024 bits and the default is 2048 bits.

Generally, 2048 bits is considered sufficient.

DSA keys must be exactly 1024 bits as specified by FIPS 186-2.

For ECDSA keys, the

.Fl b

flag determines the key length by selecting from one of three elliptic

curve sizes: 256, 384 or 521 bits.

Attempting to use bit lengths other than these three values for ECDSA keys will fail.

Ed25519 keys have a fixed length and the

.Fl b

flag will be ignored.

.It Fl C Ar comment

Provides a new comment.

.It Fl c

Requests changing the comment in the private and public key files.

This operation is only supported for RSA1 keys.

The program will prompt for the file containing the private keys, for the passphrase if the key has one, and for the new comment.

.It Fl D Ar pkcs11

Download the RSA public keys provided by the PKCS#11 shared library

.Ar pkcs11 .

When used in combination with

.Fl s ,

this option indicates that a CA key resides in a PKCS#11 token (see the

.Sx CERTIFICATES

section for details).

.It Fl E Ar fingerprint\_hash

Specifies the hash algorithm used when displaying key fingerprints.

Valid options are:

.Dq md5

and

.Dq sha256 .

The default is

.Dq sha256 .

.It Fl e

This option will read a private or public OpenSSH key file and

print to stdout the key in one of the formats specified by the

.Fl m

option.

The default export format is

.Dq RFC4716 .

This option allows exporting OpenSSH keys for use by other programs, including several commercial SSH implementations.

.It Fl F Ar hostname

Search for the specified

.Ar hostname

in a

.Pa known\_hosts

file, listing any occurrences found.

This option is useful to find hashed host names or addresses and may also be used in conjunction with the

.Fl H

option to print found keys in a hashed format.

.It Fl f Ar filename

Specifies the filename of the key file.

.It Fl G Ar output\_file

Generate candidate primes for DH-GEX.

These primes must be screened for safety (using the

.Fl T

option) before use.

.It Fl g

Use generic DNS format when printing fingerprint resource records using the

.Fl r

command.

.It Fl H

Hash a

.Pa known\_hosts

file.

This replaces all hostnames and addresses with hashed representations within the specified file; the original content is moved to a file with a .old suffix.

These hashes may be used normally by

.Nm ssh

and

.Nm sshd ,

but they do not reveal identifying information should the file's contents be disclosed.

This option will not modify existing hashed hostnames and is therefore safe to use on files that mix hashed and non-hashed names.

.It Fl h

When signing a key, create a host certificate instead of a user certificate.

Please see the

.Sx CERTIFICATES

section for details.

.It Fl I Ar certificate\_identity

Specify the key identity when signing a public key.

Please see the

.Sx CERTIFICATES

section for details.

.It Fl i

This option will read an unencrypted private (or public) key file in the format specified by the

.Fl m

option and print an OpenSSH compatible private (or public) key to stdout.

This option allows importing keys from other software, including several commercial SSH implementations.

The default import format is

`.Dq RFC4716 .`

`.It Fl J Ar num_lines`

Exit after screening the specified number of lines while performing DH candidate screening using the

`.Fl T`

option.

`.It Fl j Ar start_line`

Start screening at the specified line number while performing DH candidate screening using the

`.Fl T`

option.

`.It Fl K Ar checkpt`

Write the last line processed to the file

`.Ar checkpt`

while performing DH candidate screening using the

`.Fl T`

option.

This will be used to skip lines in the input file that have already been processed if the job is restarted.

`.It Fl k`

Generate a KRL file.

In this mode,

`.Nm`

will generate a KRL file at the location specified via the

`.Fl f`

flag that revokes every key or certificate presented on the command line. Keys/certificates to be revoked may be specified by public key file or using the format described in the

`.Sx KEY REVOCATION LISTS`

section.

`.It Fl L`

Prints the contents of one or more certificates.

`.It Fl l`

Show fingerprint of specified public key file. Private RSA1 keys are also supported.

For RSA and DSA keys

`.Nm`

tries to find the matching public key file and prints its fingerprint. If combined with

`.Fl v ,`

an ASCII art representation of the key is supplied with the fingerprint.

`.It Fl M Ar memory`

Specify the amount of memory to use (in megabytes) when generating

candidate moduli for DH-GEX.

.It Fl m Ar key\_format

Specify a key format for the

.Fl i

(import) or

.Fl e

(export) conversion options.

The supported key formats are:

.Dq RFC4716

(RFC 4716/SSH2 public or private key),

.Dq PKCS8

(PEM PKCS8 public key)

or

.Dq PEM

(PEM public key).

The default conversion format is

.Dq RFC4716 .

.It Fl N Ar new\_passphrase

Provides the new passphrase.

.It Fl n Ar principals

Specify one or more principals (user or host names) to be included in a certificate when signing a key.

Multiple principals may be specified, separated by commas.

Please see the

.Sx CERTIFICATES

section for details.

.It Fl O Ar option

Specify a certificate option when signing a key.

This option may be specified multiple times.

Please see the

.Sx CERTIFICATES

section for details.

The options that are valid for user certificates are:

.Bl -tag -width Ds

.It Ic clear

Clear all enabled permissions.

This is useful for clearing the default set of permissions so permissions may be added individually.

.It Ic force-command Ns = Ns Ar command

Forces the execution of

.Ar command

instead of any shell or command specified by the user when the certificate is used for authentication.

.It Ic no-agent-forwarding

Disable

.Xr ssh-agent 1

forwarding (permitted by default).

.It Ic no-port-forwarding

Disable port forwarding (permitted by default).  
 .It Ic no-pty  
 Disable PTY allocation (permitted by default).  
 .It Ic no-user-rc  
 Disable execution of  
 .Pa ~/.ssh/rc  
 by  
 .Xr sshd 8  
 (permitted by default).  
 .It Ic no-x11-forwarding  
 Disable X11 forwarding (permitted by default).  
 .It Ic permit-agent-forwarding  
 Allows  
 .Xr ssh-agent 1  
 forwarding.  
 .It Ic permit-port-forwarding  
 Allows port forwarding.  
 .It Ic permit-pty  
 Allows PTY allocation.  
 .It Ic permit-user-rc  
 Allows execution of  
 .Pa ~/.ssh/rc  
 by  
 .Xr sshd 8 .  
 .It Ic permit-x11-forwarding  
 Allows X11 forwarding.  
 .It Ic source-address Ns = Ns Ar address\_list  
 Restrict the source addresses from which the certificate is considered valid.  
 The  
 .Ar address\_list  
 is a comma-separated list of one or more address/netmask pairs in CIDR  
 format.  
 .El  
 .Pp  
 At present, no options are valid for host keys.  
 .It Fl o  
 Causes  
 .Nm  
 to save private keys using the new OpenSSH format rather than  
 the more compatible PEM format.  
 The new format has increased resistance to brute-force password cracking  
 but is not supported by versions of OpenSSH prior to 6.5.  
 Ed25519 keys always use the new private key format.  
 .It Fl P Ar passphrase  
 Provides the (old) passphrase.  
 .It Fl p  
 Requests changing the passphrase of a private key file instead of  
 creating a new private key.

The program will prompt for the file containing the private key, for the old passphrase, and twice for the new passphrase.

.It Fl Q

Test whether keys have been revoked in a KRL.

.It Fl q

Silence

.Nm ssh-keygen .

.It Fl R Ar hostname

Removes all keys belonging to

.Ar hostname

from a

.Pa known\_hosts

file.

This option is useful to delete hashed hosts (see the

.Fl H

option above).

.It Fl r Ar hostname

Print the SSHFP fingerprint resource record named

.Ar hostname

for the specified public key file.

.It Fl S Ar start

Specify start point (in hex) when generating candidate moduli for DH-GEX.

.It Fl s Ar ca\_key

Certify (sign) a public key using the specified CA key.

Please see the

.Sx CERTIFICATES

section for details.

.Pp

When generating a KRL,

.Fl s

specifies a path to a CA public key file used to revoke certificates directly by key ID or serial number.

See the

.Sx KEY REVOCATION LISTS

section for details.

.It Fl T Ar output\_file

Test DH group exchange candidate primes (generated using the

.Fl G

option) for safety.

.It Fl t Cm dsa | ecdsa | ed25519 | rsa | rsa1

Specifies the type of key to create.

The possible values are

.Dq rsa1

for protocol version 1 and

.Dq dsa ,

.Dq ecdsa ,

.Dq ed25519 ,

or

.Dq rsa

for protocol version 2.

.It Fl u

Update a KRL.

When specified with

.Fl k ,

keys listed via the command line are added to the existing KRL rather than a new KRL being created.

.It Fl V Ar validity\_interval

Specify a validity interval when signing a certificate.

A validity interval may consist of a single time, indicating that the certificate is valid beginning now and expiring at that time, or may consist of two times separated by a colon to indicate an explicit time interval.

The start time may be specified as a date in YYYYMMDD format, a time in YYYYMMDDHHMMSS format or a relative time (to the current time) consisting of a minus sign followed by a relative time in the format described in the TIME FORMATS section of

.Xr sshd\_config 5 .

The end time may be specified as a YYYYMMDD date, a YYYYMMDDHHMMSS time or a relative time starting with a plus character.

.Pp

For example:

.Dq +52w1d

(valid from now to 52 weeks and one day from now),

.Dq -4w:+4w

(valid from four weeks ago to four weeks from now),

.Dq 20100101123000:20110101123000

(valid from 12:30 PM, January 1st, 2010 to 12:30 PM, January 1st, 2011),

.Dq -1d:20110101

(valid from yesterday to midnight, January 1st, 2011).

.It Fl v

Verbose mode.

Causes

.Nm

to print debugging messages about its progress.

This is helpful for debugging moduli generation.

Multiple

.Fl v

options increase the verbosity.

The maximum is 3.

.It Fl W Ar generator

Specify desired generator when testing candidate moduli for DH-GEX.

.It Fl y

This option will read a private

OpenSSH format file and print an OpenSSH public key to stdout.

.It Fl z Ar serial\_number

Specifies a serial number to be embedded in the certificate to distinguish

this certificate from others from the same CA.

The default serial number is zero.

.Pp

When generating a KRL, the

.Fl z

flag is used to specify a KRL version number.

.El

.Sh MODULI GENERATION

.Nm

may be used to generate groups for the Diffie-Hellman Group Exchange (DH-GEX) protocol.

Generating these groups is a two-step process: first, candidate primes are generated using a fast, but memory intensive process.

These candidate primes are then tested for suitability (a CPU-intensive process).

.Pp

Generation of primes is performed using the

.Fl G

option.

The desired length of the primes may be specified by the

.Fl b

option.

For example:

.Pp

.Dl # ssh-keygen -G moduli-2048.candidates -b 2048

.Pp

By default, the search for primes begins at a random point in the desired length range.

This may be overridden using the

.Fl S

option, which specifies a different start point (in hex).

.Pp

Once a set of candidates have been generated, they must be screened for suitability.

This may be performed using the

.Fl T

option.

In this mode

.Nm

will read candidates from standard input (or a file specified using the

.Fl f

option).

For example:

.Pp

.Dl # ssh-keygen -T moduli-2048 -f moduli-2048.candidates

.Pp

By default, each candidate will be subjected to 100 primality tests.

This may be overridden using the

.Fl a

option.

The DH generator value will be chosen automatically for the prime under consideration.

If a specific generator is desired, it may be requested using the

.Fl W

option.

Valid generator values are 2, 3, and 5.

.Pp

Screened DH groups may be installed in

.Pa /etc/moduli .

It is important that this file contains moduli of a range of bit lengths and that both ends of a connection share common moduli.

.Sh CERTIFICATES

.Nm

supports signing of keys to produce certificates that may be used for user or host authentication.

Certificates consist of a public key, some identity information, zero or more principal (user or host) names and a set of options that are signed by a Certification Authority (CA) key.

Clients or servers may then trust only the CA key and verify its signature on a certificate rather than trusting many user/host keys.

Note that OpenSSH certificates are a different, and much simpler, format to the X.509 certificates used in

.Xr ssl 8 .

.Pp

.Nm

supports two types of certificates: user and host.

User certificates authenticate users to servers, whereas host certificates authenticate server hosts to users.

To generate a user certificate:

.Pp

.Dl \$ ssh-keygen -s /path/to/ca\_key -I key\_id /path/to/user\_key.pub

.Pp

The resultant certificate will be placed in

.Pa /path/to/user\_key-cert.pub .

A host certificate requires the

.Fl h

option:

.Pp

.Dl \$ ssh-keygen -s /path/to/ca\_key -I key\_id -h /path/to/host\_key.pub

.Pp

The host certificate will be output to

.Pa /path/to/host\_key-cert.pub .

.Pp

It is possible to sign using a CA key stored in a PKCS#11 token by providing the token library using

.Fl D

and identifying the CA key by providing its public half as an argument

to

.Fl s :

.Pp

```
.Dl $ ssh-keygen -s ca_key.pub -D libpkcs11.so -I key_id user_key.pub
```

.Pp

In all cases,

.Ar key\_id

is a "key identifier" that is logged by the server when the certificate is used for authentication.

.Pp

Certificates may be limited to be valid for a set of principal (user/host) names.

By default, generated certificates are valid for all users or hosts.

To generate a certificate for a specified set of principals:

.Pp

```
.Dl $ ssh-keygen -s ca_key -I key_id -n user1,user2 user_key.pub
```

```
.Dl "$ ssh-keygen -s ca_key -I key_id -h -n host.domain host_key.pub"
```

.Pp

Additional limitations on the validity and use of user certificates may be specified through certificate options.

A certificate option may disable features of the SSH session, may be valid only when presented from particular source addresses or may force the use of a specific command.

For a list of valid certificate options, see the documentation for the

.Fl O

option above.

.Pp

Finally, certificates may be defined with a validity lifetime.

The

.Fl V

option allows specification of certificate start and end times.

A certificate that is presented at a time outside this range will not be considered valid.

By default, certificates are valid from

.Ux

Epoch to the distant future.

.Pp

For certificates to be used for user or host authentication, the CA public key must be trusted by

.Xr sshd 8

or

.Xr ssh 1 .

Please refer to those manual pages for details.

.Sh KEY REVOCATION LISTS

.Nm

is able to manage OpenSSH format Key Revocation Lists (KRLs).

These binary files specify keys or certificates to be revoked using a

compact format, taking as little as one bit per certificate if they are being revoked by serial number.

.Pp

KRLs may be generated using the

.Fl k

flag.

This option reads one or more files from the command line and generates a new KRL.

The files may either contain a KRL specification (see below) or public keys, listed one per line.

Plain public keys are revoked by listing their hash or contents in the KRL and certificates revoked by serial number or key ID (if the serial is zero or not available).

.Pp

Revoking keys using a KRL specification offers explicit control over the types of record used to revoke keys and may be used to directly revoke certificates by serial number or key ID without having the complete original certificate on hand.

A KRL specification consists of lines containing one of the following directives followed by a colon and some directive-specific information.

.Bl -tag -width Ds

.It Cm serial : Ar serial\_number Ns Op - Ns Ar serial\_number

Revokes a certificate with the specified serial number.

Serial numbers are 64-bit values, not including zero and may be expressed in decimal, hex or octal.

If two serial numbers are specified separated by a hyphen, then the range of serial numbers including and between each is revoked.

The CA key must have been specified on the

.Nm

command line using the

.Fl s

option.

.It Cm id : Ar key\_id

Revokes a certificate with the specified key ID string.

The CA key must have been specified on the

.Nm

command line using the

.Fl s

option.

.It Cm key : Ar public\_key

Revokes the specified key.

If a certificate is listed, then it is revoked as a plain public key.

.It Cm sha1 : Ar public\_key

Revokes the specified key by its SHA1 hash.

.El

.Pp

KRLs may be updated using the

.Fl u

flag in addition to

.Fl k .

When this option is specified, keys listed via the command line are merged into the KRL, adding to those already there.

.Pp

It is also possible, given a KRL, to test whether it revokes a particular key (or keys).

The

.Fl Q

flag will query an existing KRL, testing each key specified on the command line. If any key listed on the command line has been revoked (or an error encountered) then

.Nm

will exit with a non-zero exit status.

A zero exit status will only be returned if no key was revoked.

.Sh FILES

.Bl -tag -width Ds -compact

.It Pa ~/.ssh/identity

Contains the protocol version 1 RSA authentication identity of the user.

This file should not be readable by anyone but the user.

It is possible to

specify a passphrase when generating the key; that passphrase will be used to encrypt the private part of this file using 3DES.

This file is not automatically accessed by

.Nm

but it is offered as the default file for the private key.

.Xr ssh 1

will read this file when a login attempt is made.

.Pp

.It Pa ~/.ssh/identity.pub

Contains the protocol version 1 RSA public key for authentication.

The contents of this file should be added to

.Pa ~/.ssh/authorized\_keys

on all machines

where the user wishes to log in using RSA authentication.

There is no need to keep the contents of this file secret.

.Pp

.It Pa ~/.ssh/id\_dsa

.It Pa ~/.ssh/id\_ecdsa

.It Pa ~/.ssh/id\_ed25519

.It Pa ~/.ssh/id\_rsa

Contains the protocol version 2 DSA, ECDSA, Ed25519 or RSA authentication identity of the user.

This file should not be readable by anyone but the user.

It is possible to

specify a passphrase when generating the key; that passphrase will be used to encrypt the private part of this file using 128-bit AES.

This file is not automatically accessed by

.Nm

but it is offered as the default file for the private key.

.Xr ssh 1

will read this file when a login attempt is made.

.Pp

.It Pa ~/.ssh/id\_dsa.pub

.It Pa ~/.ssh/id\_ecdsa.pub

.It Pa ~/.ssh/id\_ed25519.pub

.It Pa ~/.ssh/id\_rsa.pub

Contains the protocol version 2 DSA, ECDSA, Ed25519 or RSA public key for authentication.

The contents of this file should be added to

.Pa ~/.ssh/authorized\_keys

on all machines

where the user wishes to log in using public key authentication.

There is no need to keep the contents of this file secret.

.Pp

.It Pa /etc/moduli

Contains Diffie-Hellman groups used for DH-GEX.

The file format is described in

.Xr moduli 5 .

## NAME

ssh-keyscan M-bM-^@M-^S gather ssh public keys

## SYNOPSIS

ssh-keyscan [-4cHv] [-f file] [-p port] [-T timeout] [-t type]  
[host | addrlist namelist] ...

## DESCRIPTION

ssh-keyscan is a utility for gathering the public ssh host keys of a number of hosts. It was designed to aid in building and verifying ssh\_known\_hosts files. ssh-keyscan provides a minimal interface suitable for use by shell and perl scripts.

ssh-keyscan uses non-blocking socket I/O to contact as many hosts as possible in parallel, so it is very efficient. The keys from a domain of 1,000 hosts can be collected in tens of seconds, even when some of those hosts are down or do not run ssh. For scanning, one does not need login access to the machines that are being scanned, nor does the scanning process involve any encryption.

The options are as follows:

- 4 Forces ssh-keyscan to use IPv4 addresses only.
- 6 Forces ssh-keyscan to use IPv6 addresses only.
- c Request certificates from target hosts instead of plain keys.
- f file  
Read hosts or M-bM-^@M-^addrlist namelistM-bM-^@M-^] pairs from file, one per line. If - is supplied instead of a filename, ssh-keyscan will read hosts or M-bM-^@M-^addrlist namelistM-bM-^@M-^] pairs from the standard input.
- H Hash all hostnames and addresses in the output. Hashed names may be used normally by ssh and sshd, but they do not reveal identifying information should the file's contents be disclosed.
- p port  
Port to connect to on the remote host.
- T timeout  
Set the timeout for connection attempts. If timeout seconds have elapsed since a connection was initiated to a host or since the last time anything was read from that host, then the connection is closed and the host in question considered unavailable. Default is 5 seconds.

-t type

Specifies the type of the key to fetch from the scanned hosts.

The possible values are `M-bM-^@M-^\rsa1M-bM-^@M-^]` for protocol version 1 and `M-bM-^@M-^\dsaM-bM-^@M-^]`,

`M-bM-^@M-^\ecdsaM-bM-^@M-^]`, `M-bM-^@M-^\ed25519M-bM-^@M-^]`, or `M-bM-^@M-^\rsaM-bM-^@M-^]` for protocol version 2. Multiple

values may be specified by separating them with commas. The

default is to fetch `M-bM-^@M-^\rsaM-bM-^@M-^]`, `M-bM-^@M-^\ecdsaM-bM-^@M-^]`, and `M-bM-^@M-^\ed25519M-bM-^@M-^]` keys.

-v Verbose mode. Causes ssh-keyscan to print debugging messages about its progress.

## SECURITY

If an `ssh_known_hosts` file is constructed using `ssh-keyscan` without verifying the keys, users will be vulnerable to man in the middle attacks. On the other hand, if the security model allows such a risk, `ssh-keyscan` can help in the detection of tampered keyfiles or man in the middle attacks which have begun after the `ssh_known_hosts` file was created.

## FILES

Input format:

1.2.3.4,1.2.4.4 name.my.domain,name,n.my.domain,n,1.2.3.4,1.2.4.4

Output format for RSA1 keys:

host-or-namelist bits exponent modulus

Output format for RSA, DSA, ECDSA, and Ed25519 keys:

host-or-namelist keytype base64-encoded-key

Where keytype is either `M-bM-^@M-^\ecdsa-sha2-nistp256M-bM-^@M-^]`, `M-bM-^@M-^\ecdsa-sha2-nistp384M-bM-^@M-^]`,

`M-bM-^@M-^\ecdsa-sha2-nistp521M-bM-^@M-^]`, `M-bM-^@M-^\ssh-ed25519M-bM-^@M-^]`, `M-bM-^@M-^\ssh-dssM-bM-^@M-^]` or `M-bM-^@M-^\ssh-rsaM-bM-^@M-^]`.

`/etc/ssh/ssh_known_hosts`

## EXAMPLES

Print the rsa host key for machine hostname:

```
$ ssh-keyscan hostname
```

Find all hosts from the file `ssh_hosts` which have new or different keys

from those in the sorted file `ssh_known_hosts`:

```
$ ssh-keyscan -t rsa,dsa,ecdsa,ed25519 -f ssh_hosts | \
  sort -u - ssh_known_hosts | diff ssh_known_hosts -
```

## SEE ALSO

`ssh(1)`, `sshd(8)`

## AUTHORS

David Mazieres <dm@lcs.mit.edu> wrote the initial version, and Wayne Davison <wayned@users.sourceforge.net> added support for protocol version 2.

## BUGS

It generates "Connection closed by remote host" messages on the consoles of all the machines it scans if the server is older than version 2.9.

This is because it opens a connection to the ssh port, reads the public key, and drops the connection as soon as it gets the key.

.Os

.Sh NAME

.Nm ssh-keyscan

.Nd gather ssh public keys

.Sh SYNOPSIS

.Nm ssh-keyscan

.Bk -words

.Op Fl 46cHv

.Op Fl f Ar file

.Op Fl p Ar port

.Op Fl T Ar timeout

.Op Fl t Ar type

.Op Ar host | addrlist namelist

.Ar ...

.Ek

.Sh DESCRIPTION

.Nm

is a utility for gathering the public ssh host keys of a number of

hosts.

It was designed to aid in building and verifying

.Pa ssh\_known\_hosts

files.

.Nm

provides a minimal interface suitable for use by shell and perl scripts.

.Pp

.Nm

uses non-blocking socket I/O to contact as many hosts as possible in parallel, so it is very efficient.

The keys from a domain of 1,000

hosts can be collected in tens of seconds, even when some of those hosts are down or do not run ssh.

For scanning, one does not need

login access to the machines that are being scanned, nor does the scanning process involve any encryption.

.Pp

The options are as follows:

.Bl -tag -width Ds

.It Fl 4

Forces

.Nm

to use IPv4 addresses only.

.It Fl 6

Forces

.Nm

to use IPv6 addresses only.

.It Fl c

Request certificates from target hosts instead of plain keys.

.It Fl f Ar file

Read hosts or

.Dq addrlist namelist

pairs from

.Ar file ,

one per line.

If

.Pa -

is supplied instead of a filename,

.Nm

will read hosts or

.Dq addrlist namelist

pairs from the standard input.

.It Fl H

Hash all hostnames and addresses in the output.

Hashed names may be used normally by

.Nm ssh

and

.Nm sshd ,  
but they do not reveal identifying information should the file's contents  
be disclosed.

.It Fl p Ar port

Port to connect to on the remote host.

.It Fl T Ar timeout

Set the timeout for connection attempts.

If

.Ar timeout

seconds have elapsed since a connection was initiated to a host or since the  
last time anything was read from that host, then the connection is  
closed and the host in question considered unavailable.

Default is 5 seconds.

.It Fl t Ar type

Specifies the type of the key to fetch from the scanned hosts.

The possible values are

.Dq rsa1

for protocol version 1 and

.Dq dsa ,

.Dq ecdsa ,

.Dq ed25519 ,

or

.Dq rsa

for protocol version 2.

Multiple values may be specified by separating them with commas.

The default is to fetch

.Dq rsa ,

.Dq ecdsa ,

and

.Dq ed25519

keys.

.It Fl v

Verbose mode.

Causes

.Nm

to print debugging messages about its progress.

.El

.Sh SECURITY

If an ssh\_known\_hosts file is constructed using

.Nm

without verifying the keys, users will be vulnerable to

.Em man in the middle

attacks.

On the other hand, if the security model allows such a risk,

.Nm

can help in the detection of tampered keyfiles or man in the middle  
attacks which have begun after the ssh\_known\_hosts file was created.

.Sh FILES

Input format:

SSH-KEYSIGN(8)      System Manager's Manual      SSH-KEYSIGN(8)

```

## NAME

ssh-keysign M-bM-^@M-^S ssh helper program for host-based authentication

## SYNOPSIS

ssh-keysign

## DESCRIPTION

ssh-keysign is used by ssh(1) to access the local host keys and generate the digital signature required during host-based authentication.

ssh-keysign is disabled by default and can only be enabled in the global client configuration file /etc/ssh/ssh\_config by setting EnableSSHKeysign to M-bM-^@M-^\yesM-bM-^@M-^].

ssh-keysign is not intended to be invoked by the user, but from ssh(1). See ssh(1) and sshd(8) for more information about host-based authentication.

## FILES

/etc/ssh/ssh\_config

Controls whether ssh-keysign is enabled.

/etc/ssh/ssh\_host\_dsa\_key

/etc/ssh/ssh\_host\_ecdsa\_key

/etc/ssh/ssh\_host\_ed25519\_key

/etc/ssh/ssh\_host\_rsa\_key

These files contain the private parts of the host keys used to generate the digital signature. They should be owned by root, readable only by root, and not accessible to others. Since they are readable only by root, ssh-keysign must be set-uid root if host-based authentication is used.

/etc/ssh/ssh\_host\_dsa\_key-cert.pub

/etc/ssh/ssh\_host\_ecdsa\_key-cert.pub

/etc/ssh/ssh\_host\_ed25519\_key-cert.pub

/etc/ssh/ssh\_host\_rsa\_key-cert.pub

If these files exist they are assumed to contain public certificate information corresponding with the private keys above.

## SEE ALSO

ssh(1), ssh-keygen(1), ssh\_config(5), sshd(8)

## HISTORY

ssh-keysign first appeared in OpenBSD 3.2.

## NAME

ssh-pkcs11-helper M-bM-^@M-^S ssh-agent helper program for PKCS#11 support

## SYNOPSIS

ssh-pkcs11-helper

## DESCRIPTION

ssh-pkcs11-helper is used by ssh-agent(1) to access keys provided by a PKCS#11 token.

ssh-pkcs11-helper is not intended to be invoked by the user, but from ssh-agent(1).

## SEE ALSO

ssh(1), ssh-add(1), ssh-agent(1)

## HISTORY

ssh-pkcs11-helper first appeared in OpenBSD 4.7.

## AUTHORS

Markus Friedl <markus@openbsd.org>

## NAME

ssh M-bM-^@M-^S OpenSSH SSH client (remote login program)

## SYNOPSIS

```
ssh [-1246AaCfGgKkMMNnqsTtVvXxYy] [-b bind_address] [-c cipher_spec]
    [-D [bind_address:]port] [-E log_file] [-e escape_char]
    [-F configfile] [-I pkcs11] [-i identity_file] [-L address]
    [-l login_name] [-m mac_spec] [-O ctl_cmd] [-o option] [-p port]
    [-Q query_option] [-R address] [-S ctl_path] [-W host:port]
    [-w local_tun[:remote_tun]] [user@]hostname [command]
```

## DESCRIPTION

ssh (SSH client) is a program for logging into a remote machine and for executing commands on a remote machine. It is intended to provide secure encrypted communications between two untrusted hosts over an insecure network. X11 connections, arbitrary TCP ports and UNIX-domain sockets can also be forwarded over the secure channel.

ssh connects and logs into the specified hostname (with optional user name). The user must prove his/her identity to the remote machine using one of several methods (see below).

If command is specified, it is executed on the remote host instead of a login shell.

The options are as follows:

- 1 Forces ssh to try protocol version 1 only.
- 2 Forces ssh to try protocol version 2 only.
- 4 Forces ssh to use IPv4 addresses only.
- 6 Forces ssh to use IPv6 addresses only.
- A Enables forwarding of the authentication agent connection. This can also be specified on a per-host basis in a configuration file.

Agent forwarding should be enabled with caution. Users with the ability to bypass file permissions on the remote host (for the agent's UNIX-domain socket) can access the local agent through the forwarded connection. An attacker cannot obtain key material from the agent, however they can perform operations on the keys that enable them to authenticate using the identities loaded into the agent.

- a Disables forwarding of the authentication agent connection.

**-b bind\_address**

Use bind\_address on the local machine as the source address of the connection. Only useful on systems with more than one address.

- C Requests compression of all data (including stdin, stdout, stderr, and data for forwarded X11, TCP and UNIX-domain connections). The compression algorithm is the same used by gzip(1), and the `M-bM-^@M-^\levelM-bM-^@M-^` can be controlled by the CompressionLevel option for protocol version 1. Compression is desirable on modem lines and other slow connections, but will only slow down things on fast networks. The default value can be set on a host-by-host basis in the configuration files; see the Compression option.

**-c cipher\_spec**

Selects the cipher specification for encrypting the session.

Protocol version 1 allows specification of a single cipher. The supported values are `M-bM-^@M-^\3desM-bM-^@M-^`, `M-bM-^@M-^\blowfishM-bM-^@M-^`, and `M-bM-^@M-^\desM-bM-^@M-^`. For protocol version 2, cipher\_spec is a comma-separated list of ciphers listed in order of preference. See the Ciphers keyword in ssh\_config(5) for more information.

**-D [bind\_address:]port**

Specifies a local `M-bM-^@M-^\dynamicM-bM-^@M-^]` application-level port forwarding. This works by allocating a socket to listen to port on the local side, optionally bound to the specified `bind_address`. Whenever a connection is made to this port, the connection is forwarded over the secure channel, and the application protocol is then used to determine where to connect to from the remote machine. Currently the SOCKS4 and SOCKS5 protocols are supported, and ssh will act as a SOCKS server. Only root can forward privileged ports. Dynamic port forwardings can also be specified in the configuration file.

IPv6 addresses can be specified by enclosing the address in square brackets. Only the superuser can forward privileged ports. By default, the local port is bound in accordance with the GatewayPorts setting. However, an explicit `bind_address` may be used to bind the connection to a specific address. The `bind_address` of `M-bM-^@M-^\localhostM-bM-^@M-^]` indicates that the listening port be bound for local use only, while an empty address or `M-bM-^@M-^X*M-bM-^@M-^Y` indicates that the port should be available from all interfaces.

`-E log_file`

Append debug logs to `log_file` instead of standard error.

`-e escape_char`

Sets the escape character for sessions with a pty (default: `M-bM-^@M-^X~M-bM-^@M-^Y`). The escape character is only recognized at the beginning of a line. The escape character followed by a dot (`M-bM-^@M-^X.M-bM-^@M-^Y`) closes the connection; followed by control-Z suspends the connection; and followed by itself sends the escape character once. Setting the character to `M-bM-^@M-^\noneM-bM-^@M-^]` disables any escapes and makes the session fully transparent.

`-F configfile`

Specifies an alternative per-user configuration file. If a configuration file is given on the command line, the system-wide configuration file (`/etc/ssh/ssh_config`) will be ignored. The default for the per-user configuration file is `~/.ssh/config`.

`-f` Requests ssh to go to background just before command execution.

This is useful if ssh is going to ask for passwords or passphrases, but the user wants it in the background. This implies `-n`. The recommended way to start X11 programs at a remote site is with something like `ssh -f host xterm`.

If the `ExitOnForwardFailure` configuration option is set to `M-bM-^@M-^\yesM-bM-^@M-^]`, then a client started with `-f` will wait for all remote port forwards to be successfully established before placing itself in the background.

- G Causes ssh to print its configuration after evaluating Host and Match blocks and exit.
- g Allows remote hosts to connect to local forwarded ports. If used on a multiplexed connection, then this option must be specified on the master process.
- I pkcs11  
Specify the PKCS#11 shared library ssh should use to communicate with a PKCS#11 token providing the user's private RSA key.
- i identity\_file  
Selects a file from which the identity (private key) for public key authentication is read. The default is ~/.ssh/identity for protocol version 1, and ~/.ssh/id\_dsa, ~/.ssh/id\_ecdsa, ~/.ssh/id\_ed25519 and ~/.ssh/id\_rsa for protocol version 2. Identity files may also be specified on a per-host basis in the configuration file. It is possible to have multiple -i options (and multiple identities specified in configuration files). If no certificates have been explicitly specified by the CertificateFile directive, ssh will also try to load certificate information from the filename obtained by appending -cert.pub to identity filenames.
- K Enables GSSAPI-based authentication and forwarding (delegation) of GSSAPI credentials to the server.
- k Disables forwarding (delegation) of GSSAPI credentials to the server.
- L [bind\_address:]port:host:hostport  
-L [bind\_address:]port:remote\_socket  
-L local\_socket:host:hostport  
-L local\_socket:remote\_socket  
Specifies that connections to the given TCP port or Unix socket on the local (client) host are to be forwarded to the given host and port, or Unix socket, on the remote side. This works by allocating a socket to listen to either a TCP port on the local side, optionally bound to the specified bind\_address, or to a Unix socket. Whenever a connection is made to the local port or socket, the connection is forwarded over the secure channel, and a connection is made to either host port hostport, or the Unix socket remote\_socket, from the remote machine.
- Port forwardings can also be specified in the configuration file. Only the superuser can forward privileged ports. IPv6 addresses can be specified by enclosing the address in square brackets.

By default, the local port is bound in accordance with the GatewayPorts setting. However, an explicit bind\_address may be used to bind the connection to a specific address. The bind\_address of M-bM-^@M-^\localhostM-bM-^@M-^] indicates that the listening port be bound for local use only, while an empty address or M-bM-^@M-^X\*M-bM-^@M-^Y indicates that the port should be available from all interfaces.

**-l login\_name**

Specifies the user to log in as on the remote machine. This also may be specified on a per-host basis in the configuration file.

**-M** Places the ssh client into M-bM-^@M-^\masterM-bM-^@M-^] mode for connection sharing.

Multiple -M options places ssh into M-bM-^@M-^\masterM-bM-^@M-^] mode with confirmation required before slave connections are accepted. Refer to the description of ControlMaster in ssh\_config(5) for details.

**-m mac\_spec**

A comma-separated list of MAC (message authentication code) algorithms, specified in order of preference. See the MACs keyword for more information.

**-N** Do not execute a remote command. This is useful for just forwarding ports.

**-n** Redirects stdin from /dev/null (actually, prevents reading from stdin). This must be used when ssh is run in the background. A common trick is to use this to run X11 programs on a remote machine. For example, ssh -n shadows.cs.hut.fi emacs & will start an emacs on shadows.cs.hut.fi, and the X11 connection will be automatically forwarded over an encrypted channel. The ssh program will be put in the background. (This does not work if ssh needs to ask for a password or passphrase; see also the -f option.)

**-O ctl\_cmd**

Control an active connection multiplexing master process. When the -O option is specified, the ctl\_cmd argument is interpreted and passed to the master process. Valid commands are: M-bM-^@M-^\checkM-bM-^@M-^] (check that the master process is running), M-bM-^@M-^\forwardM-bM-^@M-^] (request forwardings without command execution), M-bM-^@M-^\cancelM-bM-^@M-^] (cancel forwardings), M-bM-^@M-^\exitM-bM-^@M-^] (request the master to exit), and M-bM-^@M-^\stopM-bM-^@M-^] (request the master to stop accepting further multiplexing requests).

**-o option**

Can be used to give options in the format used in the configuration file. This is useful for specifying options for which there is no separate command-line flag. For full details of the options listed below, and their possible values, see `ssh_config(5)`.

- AddKeysToAgent
- AddressFamily
- BatchMode
- BindAddress
- CanonicalDomains
- CanonicalizeFallbackLocal
- CanonicalizeHostname
- CanonicalizeMaxDots
- CanonicalizePermittedCNAMEs
- CertificateFile
- ChallengeResponseAuthentication
- CheckHostIP
- Cipher
- Ciphers
- ClearAllForwardings
- Compression
- CompressionLevel
- ConnectionAttempts
- ConnectTimeout
- ControlMaster
- ControlPath
- ControlPersist
- DynamicForward
- EscapeChar
- ExitOnForwardFailure
- FingerprintHash
- ForwardAgent
- ForwardX11
- ForwardX11Timeout
- ForwardX11Trusted
- GatewayPorts
- GlobalKnownHostsFile
- GSSAPIAuthentication
- GSSAPIDelegateCredentials
- HashKnownHosts

-p port

Port to connect to on the remote host. This can be specified on a per-host basis in the configuration file.

-Q query\_option

Queries ssh for the algorithms supported for the specified version 2. The available features are: cipher (supported symmetric ciphers), cipher-auth (supported symmetric ciphers that support authenticated encryption), mac (supported message integrity codes), kex (key exchange algorithms), key (key types), key-cert (certificate key types), key-plain (non-certificate key types), and protocol-version (supported SSH protocol versions).

-q Quiet mode. Causes most warning and diagnostic messages to be suppressed.

-R [bind\_address:]port:host:hostport

-R [bind\_address:]port:local\_socket

-R remote\_socket:host:hostport

-R remote\_socket:local\_socket

Specifies that connections to the given TCP port or Unix socket on the remote (server) host are to be forwarded to the given host and port, or Unix socket, on the local side. This works by allocating a socket to listen to either a TCP port or to a Unix socket on the remote side. Whenever a connection is made to this port or Unix socket, the connection is forwarded over the secure channel, and a connection is made to either host port hostport, or local\_socket, from the local machine.

Port forwardings can also be specified in the configuration file. Privileged ports can be forwarded only when logging in as root on the remote machine. IPv6 addresses can be specified by enclosing the address in square brackets.

By default, TCP listening sockets on the server will be bound to the loopback interface only. This may be overridden by specifying a bind\_address. An empty bind\_address, or the address M-bM-^@M-^X\*M-bM-^@M-^Y, indicates that the remote socket should listen on all interfaces. Specifying a remote bind\_address will only succeed if the server's GatewayPorts option is enabled (see sshd\_config(5)).

If the port argument is M-bM-^@M-^X0M-bM-^@M-^Y, the listen port will be dynamically allocated on the server and reported to the client at run time.

When used together with -O forward the allocated port will be printed to the standard output.

-S ctl\_path

Specifies the location of a control socket for connection sharing, or the string M-bM-^@M-^\\noneM-bM-^@M-^] to disable connection sharing. Refer to the description of ControlPath and ControlMaster in ssh\_config(5) for details.

- s May be used to request invocation of a subsystem on the remote system. Subsystems facilitate the use of SSH as a secure transport for other applications (e.g. sftp(1)). The subsystem is specified as the remote command.
  
- T Disable pseudo-terminal allocation.
  
- t Force pseudo-terminal allocation. This can be used to execute arbitrary screen-based programs on a remote machine, which can be very useful, e.g. when implementing menu services. Multiple -t options force tty allocation, even if ssh has no local tty.
  
- V Display the version number and exit.
  
- v Verbose mode. Causes ssh to print debugging messages about its progress. This is helpful in debugging connection, authentication, and configuration problems. Multiple -v options increase the verbosity. The maximum is 3.

**-W host:port**

Requests that standard input and output on the client be forwarded to host on port over the secure channel. Implies -N, -T, ExitOnForwardFailure and ClearAllForwardings.

**-w local\_tun[:remote\_tun]**

Requests tunnel device forwarding with the specified tun(4) devices between the client (local\_tun) and the server (remote\_tun).

The devices may be specified by numerical ID or the keyword `M-bM-^@M-^anyM-bM-^@M-^`, which uses the next available tunnel device. If remote\_tun is not specified, it defaults to `M-bM-^@M-^anyM-bM-^@M-^`. See also the Tunnel and TunnelDevice directives in ssh\_config(5). If the Tunnel directive is unset, it is set to the default tunnel mode, which is `M-bM-^@M-^point-to-pointM-bM-^@M-^`.

- X Enables X11 forwarding. This can also be specified on a per-host basis in a configuration file.

X11 forwarding should be enabled with caution. Users with the ability to bypass file permissions on the remote host (for the user's X authorization database) can access the local X11 display through the forwarded connection. An attacker may then be able to perform activities such as keystroke monitoring.

For this reason, X11 forwarding is subjected to X11 SECURITY extension restrictions by default. Please refer to the ssh -Y

option and the `ForwardX11Trusted` directive in `ssh_config(5)` for more information.

- x Disables X11 forwarding.
- Y Enables trusted X11 forwarding. Trusted X11 forwardings are not subjected to the X11 SECURITY extension controls.
- y Send log information using the `syslog(3)` system module. By default this information is sent to `stderr`.

ssh may additionally obtain configuration data from a per-user configuration file and a system-wide configuration file. The file format and configuration options are described in `ssh_config(5)`.

## AUTHENTICATION

The OpenSSH SSH client supports SSH protocols 1 and 2. The default is to use protocol 2 only, though this can be changed via the `Protocol` option in `ssh_config(5)` or the `-1` and `-2` options (see above). Protocol 1 should not be used and is only offered to support legacy devices. It suffers from a number of cryptographic weaknesses and doesn't support many of the advanced features available for protocol 2.

The methods available for authentication are: GSSAPI-based authentication, host-based authentication, public key authentication, challenge-response authentication, and password authentication. Authentication methods are tried in the order specified above, though `PreferredAuthentications` can be used to change the default order.

Host-based authentication works as follows: If the machine the user logs in from is listed in `/etc/hosts.equiv` or `/etc/shosts.equiv` on the remote machine, and the user names are the same on both sides, or if the files `~/.rhosts` or `~/.shosts` exist in the user's home directory on the remote machine and contain a line containing the name of the client machine and the name of the user on that machine, the user is considered for login. Additionally, the server must be able to verify the client's host key (see the description of `/etc/ssh/ssh_known_hosts` and `~/.ssh/known_hosts`, below) for login to be permitted. This authentication method closes security holes due to IP spoofing, DNS spoofing, and routing spoofing. [Note to the administrator: `/etc/hosts.equiv`, `~/.rhosts`, and the `rlogin/rsh` protocol in general, are inherently insecure and should be disabled if security is desired.]

Public key authentication works as follows: The scheme is based on public-key cryptography, using cryptosystems where encryption and decryption are done using separate keys, and it is unfeasible to derive the decryption key from the encryption key. The idea is that each user creates a public/private key pair for authentication purposes. The

server knows the public key, and only the user knows the private key. ssh implements public key authentication protocol automatically, using one of the DSA, ECDSA, Ed25519 or RSA algorithms. The HISTORY section of ssh(8) contains a brief discussion of the DSA and RSA algorithms.

The file `~/.ssh/authorized_keys` lists the public keys that are permitted for logging in. When the user logs in, the ssh program tells the server which key pair it would like to use for authentication. The client proves that it has access to the private key and the server checks that the corresponding public key is authorized to accept the account.

The user creates his/her key pair by running `ssh-keygen(1)`. This stores the private key in `~/.ssh/identity` (protocol 1), `~/.ssh/id_dsa` (DSA), `~/.ssh/id_ecdsa` (ECDSA), `~/.ssh/id_ed25519` (Ed25519), or `~/.ssh/id_rsa` (RSA) and stores the public key in `~/.ssh/identity.pub` (protocol 1), `~/.ssh/id_dsa.pub` (DSA), `~/.ssh/id_ecdsa.pub` (ECDSA), `~/.ssh/id_ed25519.pub` (Ed25519), or `~/.ssh/id_rsa.pub` (RSA) in the user's home directory. The user should then copy the public key to `~/.ssh/authorized_keys` in his/her home directory on the remote machine. The `authorized_keys` file corresponds to the conventional `~/.rhosts` file, and has one key per line, though the lines can be very long. After this, the user can log in without giving the password.

A variation on public key authentication is available in the form of certificate authentication: instead of a set of public/private keys, signed certificates are used. This has the advantage that a single trusted certification authority can be used in place of many public/private keys. See the CERTIFICATES section of `ssh-keygen(1)` for more information.

The most convenient way to use public key or certificate authentication may be with an authentication agent. See `ssh-agent(1)` and (optionally) the `AddKeysToAgent` directive in `ssh_config(5)` for more information.

Challenge-response authentication works as follows: The server sends an arbitrary "challenge" text, and prompts for a response. Examples of challenge-response authentication include BSD Authentication (see `login.conf(5)`) and PAM (some non-OpenBSD systems).

Finally, if other authentication methods fail, ssh prompts the user for a password. The password is sent to the remote host for checking; however, since all communications are encrypted, the password cannot be seen by someone listening on the network.

ssh automatically maintains and checks a database containing identification for all hosts it has ever been used with. Host keys are stored in `~/.ssh/known_hosts` in the user's home directory. Additionally, the file `/etc/ssh/ssh_known_hosts` is automatically checked for known

hosts. Any new hosts are automatically added to the user's file. If a host's identification ever changes, ssh warns about this and disables password authentication to prevent server spoofing or man-in-the-middle attacks, which could otherwise be used to circumvent the encryption. The `StrictHostKeyChecking` option can be used to control logins to machines whose host key is not known or has changed.

When the user's identity has been accepted by the server, the server either executes the given command in a non-interactive session or, if no command has been specified, logs into the machine and gives the user a normal shell as an interactive session. All communication with the remote command or shell will be automatically encrypted.

If an interactive session is requested ssh by default will only request a pseudo-terminal (pty) for interactive sessions when the client has one. The flags `-T` and `-t` can be used to override this behaviour.

If a pseudo-terminal has been allocated the user may use the escape characters noted below.

If no pseudo-terminal has been allocated, the session is transparent and can be used to reliably transfer binary data. On most systems, setting the escape character to `M-bM-^@M-^\noneM-bM-^@M-^]` will also make the session transparent even if a tty is used.

The session terminates when the command or shell on the remote machine exits and all X11 and TCP connections have been closed.

## ESCAPE CHARACTERS

When a pseudo-terminal has been requested, ssh supports a number of functions through the use of an escape character.

A single tilde character can be sent as `~~` or by following the tilde by a character other than those described below. The escape character must always follow a newline to be interpreted as special. The escape character can be changed in configuration files using the `EscapeChar` configuration directive or on the command line by the `-e` option.

The supported escapes (assuming the default `M-bM-^@M-^X~M-bM-^@M-^Y`) are:

`~.` Disconnect.

`~^Z` Background ssh.

`~#` List forwarded connections.

`~&` Background ssh at logout when waiting for forwarded connection / X11 sessions to terminate.

- ~? Display a list of escape characters.
  
- ~B Send a BREAK to the remote system (only useful if the peer supports it).
  
- ~C Open command line. Currently this allows the addition of port forwardings using the -L, -R and -D options (see above). It also allows the cancellation of existing port-forwardings with -KL[bind\_address:]port for local, -KR[bind\_address:]port for remote and -KD[bind\_address:]port for dynamic port-forwardings. !command allows the user to execute a local command if the PermitLocalCommand option is enabled in ssh\_config(5). Basic help is available, using the -h option.
  
- ~R Request rekeying of the connection (only useful if the peer supports it).
  
- ~V Decrease the verbosity (LogLevel) when errors are being written to stderr.
  
- ~v Increase the verbosity (LogLevel) when errors are being written to stderr.

#### TCP FORWARDING

Forwarding of arbitrary TCP connections over the secure channel can be specified either on the command line or in a configuration file. One possible application of TCP forwarding is a secure connection to a mail server; another is going through firewalls.

In the example below, we look at encrypting communication between an IRC client and server, even though the IRC server does not directly support encrypted communications. This works as follows: the user connects to the remote host using ssh, specifying a port to be used to forward connections to the remote server. After that it is possible to start the service which is to be encrypted on the client machine, connecting to the same local port, and ssh will encrypt and forward the connection.

The following example tunnels an IRC session from client machine M-bM-^@M-^[127.0.0.1M-bM-^@M-^] (localhost) to remote server M-bM-^@M-^\server.example.comM-bM-^@M-^]:

```
$ ssh -f -L 1234:localhost:6667 server.example.com sleep 10
$ irc -c '#users' -p 1234 pinky 127.0.0.1
```

This tunnels a connection to IRC server M-bM-^@M-^\server.example.comM-bM-^@M-^], joining channel M-bM-^@M-^\#usersM-bM-^@M-^], nickname M-bM-^@M-^\pinkyM-bM-^@M-^], using port 1234. It doesn't matter

which port is used, as long as it's greater than 1023 (remember, only root can open sockets on privileged ports) and doesn't conflict with any ports already in use. The connection is forwarded to port 6667 on the remote server, since that's the standard port for IRC services.

The `-f` option backgrounds `ssh` and the remote command `M-bM-^@M-^\sleep 10M-bM-^@M-^]` is specified to allow an amount of time (10 seconds, in the example) to start the service which is to be tunnelled. If no connections are made within the time specified, `ssh` will exit.

## X11 FORWARDING

If the `ForwardX11` variable is set to `M-bM-^@M-^\yesM-bM-^@M-^]` (or see the description of the `-X`, `-x`, and `-Y` options above) and the user is using X11 (the `DISPLAY` environment variable is set), the connection to the X11 display is automatically forwarded to the remote side in such a way that any X11 programs started from the shell (or command) will go through the encrypted channel, and the connection to the real X server will be made from the local machine. The user should not manually set `DISPLAY`. Forwarding of X11 connections can be configured on the command line or in configuration files.

The `DISPLAY` value set by `ssh` will point to the server machine, but with a display number greater than zero. This is normal, and happens because `ssh` creates a `M-bM-^@M-^\proxyM-bM-^@M-^]` X server on the server machine for forwarding the connections over the encrypted channel.

`ssh` will also automatically set up `Xauthority` data on the server machine. For this purpose, it will generate a random authorization cookie, store it in `Xauthority` on the server, and verify that any forwarded connections carry this cookie and replace it by the real cookie when the connection is opened. The real authentication cookie is never sent to the server machine (and no cookies are sent in the plain).

If the `ForwardAgent` variable is set to `M-bM-^@M-^\yesM-bM-^@M-^]` (or see the description of the `-A` and `-a` options above) and the user is using an authentication agent, the connection to the agent is automatically forwarded to the remote side.

## VERIFYING HOST KEYS

When connecting to a server for the first time, a fingerprint of the server's public key is presented to the user (unless the option `StrictHostKeyChecking` has been disabled). Fingerprints can be determined using `ssh-keygen(1)`:

```
$ ssh-keygen -l -f /etc/ssh/ssh_host_rsa_key
```

If the fingerprint is already known, it can be matched and the key can be accepted or rejected. If only legacy (MD5) fingerprints for the server

are available, the `ssh-keygen(1) -E` option may be used to downgrade the fingerprint algorithm to match.

Because of the difficulty of comparing host keys just by looking at fingerprint strings, there is also support to compare host keys visually, using random art. By setting the `VisualHostKey` option to `M-bM-^@M-^\yesM-bM-^@M-^]`, a small ASCII graphic gets displayed on every login to a server, no matter if the session itself is interactive or not. By learning the pattern a known server produces, a user can easily find out that the host key has changed when a completely different pattern is displayed. Because these patterns are not unambiguous however, a pattern that looks similar to the pattern remembered only gives a good probability that the host key is the same, not guaranteed proof.

To get a listing of the fingerprints along with their random art for all known hosts, the following command line can be used:

```
$ ssh-keygen -lv -f ~/.ssh/known_hosts
```

If the fingerprint is unknown, an alternative method of verification is available: SSH fingerprints verified by DNS. An additional resource record (RR), SSHFP, is added to a zonefile and the connecting client is able to match the fingerprint with that of the key presented.

In this example, we are connecting a client to a server, `M-bM-^@M-^\host.example.comM-bM-^@M-^]`. The SSHFP resource records should first be added to the zonefile for `host.example.com`:

```
$ ssh-keygen -r host.example.com.
```

The output lines will have to be added to the zonefile. To check that the zone is answering fingerprint queries:

```
$ dig -t SSHFP host.example.com
```

Finally the client connects:

```
$ ssh -o "VerifyHostKeyDNS ask" host.example.com
[...]
Matching host key fingerprint found in DNS.
Are you sure you want to continue connecting (yes/no)?
```

See the `VerifyHostKeyDNS` option in `ssh_config(5)` for more information.

## SSH-BASED VIRTUAL PRIVATE NETWORKS

`ssh` contains support for Virtual Private Network (VPN) tunnelling using the `tun(4)` network pseudo-device, allowing two networks to be joined securely. The `sshd_config(5)` configuration option `PermitTunnel` controls

whether the server supports this, and at what level (layer 2 or 3 traffic).

The following example would connect client network 10.0.50.0/24 with remote network 10.0.99.0/24 using a point-to-point connection from 10.1.1.1 to 10.1.1.2, provided that the SSH server running on the gateway to the remote network, at 192.168.1.15, allows it.

On the client:

```
# ssh -f -w 0:1 192.168.1.15 true
# ifconfig tun0 10.1.1.1 10.1.1.2 netmask 255.255.255.252
# route add 10.0.99.0/24 10.1.1.2
```

On the server:

```
# ifconfig tun1 10.1.1.2 10.1.1.1 netmask 255.255.255.252
# route add 10.0.50.0/24 10.1.1.1
```

Client access may be more finely tuned via the `/root/.ssh/authorized_keys` file (see below) and the `PermitRootLogin` server option. The following entry would permit connections on `tun(4)` device 1 from user `M-bM-^@M-^janeM-bM-^@M-^` and on `tun` device 2 from user `M-bM-^@M-^johnM-bM-^@M-^`, if `PermitRootLogin` is set to `M-bM-^@M-^forced-commands-onlyM-bM-^@M-^`:

```
tunnel="1",command="sh /etc/netstart tun1" ssh-rsa ... jane
tunnel="2",command="sh /etc/netstart tun2" ssh-rsa ... john
```

Since an SSH-based setup entails a fair amount of overhead, it may be more suited to temporary setups, such as for wireless VPNs. More permanent VPNs are better provided by tools such as `ipsecctl(8)` and `isakmpd(8)`.

## ENVIRONMENT

ssh will normally set the following environment variables:

**DISPLAY**            The `DISPLAY` variable indicates the location of the X11 server. It is automatically set by ssh to point to a value of the form `M-bM-^@M-^[hostname:nM-bM-^@M-^]`, where `M-bM-^@M-^[hostnameM-bM-^@M-^]` indicates the host where the shell runs, and `M-bM-^@M-^XnM-bM-^@M-^Y` is an integer `M-bM-^IM-%` 1. ssh uses this special value to forward X11 connections over the secure channel. The user should normally not set `DISPLAY` explicitly, as that will render the X11 connection insecure (and will require the user to manually copy any required authorization cookies).

**HOME**                Set to the path of the user's home directory.

- LOGNAME**           Synonym for **USER**; set for compatibility with systems that use this variable.
- MAIL**               Set to the path of the user's mailbox.
- PATH**               Set to the default **PATH**, as specified when compiling **ssh**.
- SSH\_ASKPASS**       If **ssh** needs a passphrase, it will read the passphrase from the current terminal if it was run from a terminal. If **ssh** does not have a terminal associated with it but **DISPLAY** and **SSH\_ASKPASS** are set, it will execute the program specified by **SSH\_ASKPASS** and open an X11 window to read the passphrase. This is particularly useful when calling **ssh** from a **.xsession** or related script. (Note that on some machines it may be necessary to redirect the input from **/dev/null** to make this work.)
- SSH\_AUTH\_SOCKET**   Identifies the path of a UNIX-domain socket used to communicate with the agent.
- SSH\_CONNECTION**   Identifies the client and server ends of the connection. The variable contains four space-separated values: client IP address, client port number, server IP address, and server port number.
- SSH\_ORIGINAL\_COMMAND** This variable contains the original command line if a forced command is executed. It can be used to extract the original arguments.
- SSH\_TTY**            This is set to the name of the tty (path to the device) associated with the current shell or command. If the current session has no tty, this variable is not set.
- TZ**                 This variable is set to indicate the present time zone if it was set when the daemon was started (i.e. the daemon passes the value on to new connections).
- USER**               Set to the name of the user logging in.

Additionally, **ssh** reads **~/.ssh/environment**, and adds lines of the format **M-bM-^@M-^\\VARNAME=valueM-bM-^@M-^]** to the environment if the file exists and users are allowed to change their environment. For more information, see the

PermitUserEnvironment option in sshd\_config(5).

## FILES

### ~/.rhosts

This file is used for host-based authentication (see above). On some machines this file may need to be world-readable if the user's home directory is on an NFS partition, because sshd(8) reads it as root. Additionally, this file must be owned by the user, and must not have write permissions for anyone else. The recommended permission for most machines is read/write for the user, and not accessible by others.

### ~/.shosts

This file is used in exactly the same way as .rhosts, but allows host-based authentication without permitting login with rlogin/rsh.

### ~/.ssh/

This directory is the default location for all user-specific configuration and authentication information. There is no general requirement to keep the entire contents of this directory secret, but the recommended permissions are read/write/execute for the user, and not accessible by others.

### ~/.ssh/authorized\_keys

Lists the public keys (DSA, ECDSA, Ed25519, RSA) that can be used for logging in as this user. The format of this file is described in the sshd(8) manual page. This file is not highly sensitive, but the recommended permissions are read/write for the user, and not accessible by others.

### ~/.ssh/config

This is the per-user configuration file. The file format and configuration options are described in ssh\_config(5). Because of the potential for abuse, this file must have strict permissions: read/write for the user, and not writable by others.

### ~/.ssh/environment

Contains additional definitions for environment variables; see ENVIRONMENT, above.

### ~/.ssh/identity

### ~/.ssh/id\_dsa

### ~/.ssh/id\_ecdsa

### ~/.ssh/id\_ed25519

### ~/.ssh/id\_rsa

Contains the private key for authentication. These files contain sensitive data and should be readable by the user but not

accessible by others (read/write/execute). ssh will simply ignore a private key file if it is accessible by others. It is possible to specify a passphrase when generating the key which will be used to encrypt the sensitive part of this file using 3DES.

~/.ssh/identity.pub

~/.ssh/id\_dsa.pub

~/.ssh/id\_ecdsa.pub

~/.ssh/id\_ed25519.pub

~/.ssh/id\_rsa.pub

Contains the public key for authentication. These files are not sensitive and can (but need not) be readable by anyone.

~/.ssh/known\_hosts

Contains a list of host keys for all hosts the user has logged into that are not already in the systemwide list of known host keys. See sshd(8) for further details of the format of this file.

~/.ssh/rc

Commands in this file are executed by ssh when the user logs in, just before the user's shell (or command) is started. See the sshd(8) manual page for more information.

/etc/hosts.equiv

This file is for host-based authentication (see above). It should only be writable by root.

/etc/shosts.equiv

This file is used in exactly the same way as hosts.equiv, but allows host-based authentication without permitting login with rlogin/rsh.

/etc/ssh/ssh\_config

Systemwide configuration file. The file format and configuration options are described in ssh\_config(5).

/etc/ssh/ssh\_host\_key

/etc/ssh/ssh\_host\_dsa\_key

/etc/ssh/ssh\_host\_ecdsa\_key

/etc/ssh/ssh\_host\_ed25519\_key

/etc/ssh/ssh\_host\_rsa\_key

These files contain the private parts of the host keys and are used for host-based authentication.

/etc/ssh/ssh\_known\_hosts

Systemwide list of known host keys. This file should be prepared

by the system administrator to contain the public host keys of all machines in the organization. It should be world-readable. See `sshd(8)` for further details of the format of this file.

`/etc/ssh/sshr`

Commands in this file are executed by `ssh` when the user logs in, just before the user's shell (or command) is started. See the `sshd(8)` manual page for more information.

#### EXIT STATUS

`ssh` exits with the exit status of the remote command or with 255 if an error occurred.

#### SEE ALSO

## AUTHORS

OpenSSH is a derivative of the original and free ssh 1.2.12 release by Tatu Ylonen. Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt and Dug Song removed many bugs, re-added newer features and created OpenSSH. Markus Friedl contributed the support for SSH protocol versions 1.5 and 2.0.

.Ek

.Sh DESCRIPTION

.Nm

(SSH client) is a program for logging into a remote machine and for executing commands on a remote machine.

It is intended to provide secure encrypted communications between two untrusted hosts over an insecure network.

X11 connections, arbitrary TCP ports and

.Ux Ns -domain

sockets can also be forwarded over the secure channel.

.Pp

.Nm

connects and logs into the specified

.Ar hostname

(with optional

.Ar user

name).

The user must prove

his/her identity to the remote machine using one of several methods

(see below).

.Pp

If

.Ar command

is specified,

it is executed on the remote host instead of a login shell.

.Pp

The options are as follows:

.Pp

.Bl -tag -width Ds -compact

.It Fl 1

Forces

.Nm

to try protocol version 1 only.

.Pp

.It Fl 2

Forces

.Nm

to try protocol version 2 only.

.Pp

.It Fl 4

Forces

.Nm

to use IPv4 addresses only.

.Pp

.It Fl 6

Forces

.Nm

to use IPv6 addresses only.

.Pp

.It Fl A

Enables forwarding of the authentication agent connection.

This can also be specified on a per-host basis in a configuration file.

.Pp

Agent forwarding should be enabled with caution.

Users with the ability to bypass file permissions on the remote host

(for the agent's

.Ux Ns -domain

socket) can access the local agent through the forwarded connection.

An attacker cannot obtain key material from the agent, however they can perform operations on the keys that enable them to authenticate using the identities loaded into the agent.

.Pp

.It Fl a

Disables forwarding of the authentication agent connection.

.Pp

.It Fl b Ar bind\_address

Use

.Ar bind\_address

on the local machine as the source address of the connection.

Only useful on systems with more than one address.

.Pp

.It Fl C

Requests compression of all data (including stdin, stdout, stderr, and data for forwarded X11, TCP and

.Ux Ns -domain connections).

The compression algorithm is the same used by

.Xr gzip 1 ,

and the

.Dq level

can be controlled by the

.Cm CompressionLevel

option for protocol version 1.

Compression is desirable on modem lines and other slow connections, but will only slow down things on fast networks.

The default value can be set on a host-by-host basis in the configuration files; see the

.Cm Compression

option.

.Pp

.It Fl c Ar cipher\_spec

Selects the cipher specification for encrypting the session.

.Pp

Protocol version 1 allows specification of a single cipher.

The supported values are

.Dq 3des ,

.Dq blowfish ,

and

.Dq des .

For protocol version 2,

.Ar cipher\_spec

is a comma-separated list of ciphers

listed in order of preference.

See the  
.Cm Ciphers  
keyword in  
.Xr ssh\_config 5  
for more information.

.Pp  
.It Fl D Xo  
.Sm off  
.Oo Ar bind\_address : Oc  
.Ar port  
.Sm on  
.Xc

Specifies a local  
.Dq dynamic  
application-level port forwarding.  
This works by allocating a socket to listen to  
.Ar port  
on the local side, optionally bound to the specified  
.Ar bind\_address .  
Whenever a connection is made to this port, the  
connection is forwarded over the secure channel, and the application  
protocol is then used to determine where to connect to from the  
remote machine.  
Currently the SOCKS4 and SOCKS5 protocols are supported, and  
.Nm  
will act as a SOCKS server.  
Only root can forward privileged ports.  
Dynamic port forwardings can also be specified in the configuration file.

.Pp  
IPv6 addresses can be specified by enclosing the address in square brackets.  
Only the superuser can forward privileged ports.  
By default, the local port is bound in accordance with the  
.Cm GatewayPorts  
setting.  
However, an explicit  
.Ar bind\_address  
may be used to bind the connection to a specific address.  
The  
.Ar bind\_address  
of  
.Dq localhost  
indicates that the listening port be bound for local use only, while an  
empty address or  
.Sq \*  
indicates that the port should be available from all interfaces.

.Pp  
.It Fl E Ar log\_file  
Append debug logs to

.Ar log\_file  
instead of standard error.

.Pp

.It Fl e Ar escape\_char  
Sets the escape character for sessions with a pty (default:  
.Ql ~ ).  
The escape character is only recognized at the beginning of a line.  
The escape character followed by a dot  
.Pq Ql \&.  
closes the connection;  
followed by control-Z suspends the connection;  
and followed by itself sends the escape character once.  
Setting the character to  
.Dq none  
disables any escapes and makes the session fully transparent.

.Pp

.It Fl F Ar configfile  
Specifies an alternative per-user configuration file.  
If a configuration file is given on the command line,  
the system-wide configuration file  
.Pq Pa /etc/ssh/ssh\_config  
will be ignored.  
The default for the per-user configuration file is  
.Pa ~/.ssh/config .

.Pp

.It Fl f  
Requests  
Requests  
.Nm  
to go to background just before command execution.  
This is useful if  
.Nm  
is going to ask for passwords or passphrases, but the user  
wants it in the background.  
This implies  
.Fl n .  
The recommended way to start X11 programs at a remote site is with  
something like  
.Ic ssh -f host xterm .

.Pp

If the  
.Cm ExitOnForwardFailure  
configuration option is set to  
.Dq yes ,  
then a client started with  
.Fl f  
will wait for all remote port forwards to be successfully established  
before placing itself in the background.

.Pp

.It Fl G

Causes

.Nm

to print its configuration after evaluating

.Cm Host

and

.Cm Match

blocks and exit.

.Pp

.It Fl g

Allows remote hosts to connect to local forwarded ports.

If used on a multiplexed connection, then this option must be specified on the master process.

.Pp

.It Fl I Ar pkcs11

Specify the PKCS#11 shared library

.Nm

should use to communicate with a PKCS#11 token providing the user's private RSA key.

.Pp

.It Fl i Ar identity\_file

Selects a file from which the identity (private key) for public key authentication is read.

The default is

.Pa ~/.ssh/identity

for protocol version 1, and

.Pa ~/.ssh/id\_dsa ,

.Pa ~/.ssh/id\_ecdsa ,

.Pa ~/.ssh/id\_ed25519

and

.Pa ~/.ssh/id\_rsa

for protocol version 2.

Identity files may also be specified on a per-host basis in the configuration file.

It is possible to have multiple

.Fl i

options (and multiple identities specified in configuration files).

If no certificates have been explicitly specified by the

.Cm CertificateFile

directive,

.Nm

will also try to load certificate information from the filename obtained by appending

.Pa -cert.pub

to identity filenames.

.Pp

.It Fl K

Enables GSSAPI-based authentication and forwarding (delegation) of GSSAPI credentials to the server.

.Pp

.It Fl k

Disables forwarding (delegation) of GSSAPI credentials to the server.

.Pp

.It Fl L Xo

.Sm off

.Oo Ar bind\_address : Oc

.Ar port : host : hostport

.Sm on

.Xc

.It Fl L Xo

.Sm off

.Oo Ar bind\_address : Oc

.Sm on

.Xc

.It Fl L Xo

.Sm off

.Ar local\_socket : host : hostport

.Sm on

.Xc

.It Fl L Xo

.Sm off

.Ar local\_socket : remote\_socket

.Sm on

.Xc

Specifies that connections to the given TCP port or Unix socket on the local (client) host are to be forwarded to the given host and port, or Unix socket, on the remote side.

This works by allocating a socket to listen to either a TCP

.Ar port

on the local side, optionally bound to the specified

.Ar bind\_address ,

or to a Unix socket.

Whenever a connection is made to the local port or socket, the connection is forwarded over the secure channel, and a connection is made to either

.Ar host

port

.Ar hostport ,

or the Unix socket

.Ar remote\_socket ,

from the remote machine.

.Pp

Port forwardings can also be specified in the configuration file.

Only the superuser can forward privileged ports.

IPv6 addresses can be specified by enclosing the address in square brackets.

.Pp

By default, the local port is bound in accordance with the

.Cm GatewayPorts

setting.

However, an explicit

.Ar bind\_address

may be used to bind the connection to a specific address.

The

.Ar bind\_address

of

.Dq localhost

indicates that the listening port be bound for local use only, while an empty address or

.Sq \*

indicates that the port should be available from all interfaces.

.Pp

.It Fl l Ar login\_name

Specifies the user to log in as on the remote machine.

This also may be specified on a per-host basis in the configuration file.

.Pp

.It Fl M

Places the

.Nm

client into

.Dq master

mode for connection sharing.

Multiple

.Fl M

options places

.Nm

into

.Dq master

mode with confirmation required before slave connections are accepted.

Refer to the description of

.Cm ControlMaster

in

.Xr ssh\_config 5

for details.

.Pp

.It Fl m Ar mac\_spec

A comma-separated list of MAC (message authentication code) algorithms, specified in order of preference.

See the

.Cm MACs

keyword for more information.

.Pp

.It Fl N

Do not execute a remote command.

This is useful for just forwarding ports.

.Pp

.It Fl n

Redirects stdin from

.Pa /dev/null

(actually, prevents reading from stdin).

This must be used when

.Nm

is run in the background.

A common trick is to use this to run X11 programs on a remote machine.

For example,

.Ic ssh -n shadows.cs.hut.fi emacs &

will start an emacs on shadows.cs.hut.fi, and the X11

connection will be automatically forwarded over an encrypted channel.

The

.Nm

program will be put in the background.

(This does not work if

.Nm

needs to ask for a password or passphrase; see also the

.Fl f

option.)

.Pp

.It Fl O Ar ctl\_cmd

Control an active connection multiplexing master process.

When the

.Fl O

option is specified, the

.Ar ctl\_cmd

argument is interpreted and passed to the master process.

Valid commands are:

.Dq check

(check that the master process is running),

.Dq forward

(request forwardings without command execution),

.Dq cancel

(cancel forwardings),

.Dq exit

(request the master to exit), and

.Dq stop

(request the master to stop accepting further multiplexing requests).

.Pp

.It Fl o Ar option

Can be used to give options in the format used in the configuration file.

This is useful for specifying options for which there is no separate command-line flag.

For full details of the options listed below, and their possible values, see

.Xr ssh\_config 5 .

.Pp  
.It Fl Q Ar query\_option

Queries

.Nm

for the algorithms supported for the specified version 2.

The available features are:

.Ar cipher

(supported symmetric ciphers),

.Ar cipher-auth

(supported symmetric ciphers that support authenticated encryption),

.Ar mac

(supported message integrity codes),

.Ar kex

(key exchange algorithms),

.Ar key

(key types),

.Ar key-cert

(certificate key types),

.Ar key-plain

(non-certificate key types), and

.Ar protocol-version

(supported SSH protocol versions).

.Pp

.It Fl q

Quiet mode.

Causes most warning and diagnostic messages to be suppressed.

.Ar remote\_socket : local\_socket

.Sm on

.Xc

Specifies that connections to the given TCP port or Unix socket on the remote

(server) host are to be forwarded to the given host and port, or Unix socket, on the local side.

This works by allocating a socket to listen to either a TCP

.Ar port

or to a Unix socket on the remote side.

Whenever a connection is made to this port or Unix socket, the connection is forwarded over the secure channel, and a connection is made to either

.Ar host

port

.Ar hostport ,

or

.Ar local\_socket ,

from the local machine.

.Pp

Port forwardings can also be specified in the configuration file.

Privileged ports can be forwarded only when

logging in as root on the remote machine.

IPv6 addresses can be specified by enclosing the address in square brackets.

.Pp

By default, TCP listening sockets on the server will be bound to the loopback interface only.

This may be overridden by specifying a

.Ar bind\_address .

An empty

.Ar bind\_address ,

or the address

.Ql \* ,

indicates that the remote socket should listen on all interfaces.

Specifying a remote

.Ar bind\_address

will only succeed if the server's

.Cm GatewayPorts

option is enabled (see

.Xr sshd\_config 5 ) .

.Pp

If the

.Ar port

argument is

.Ql 0 ,

the listen port will be dynamically allocated on the server and reported to the client at run time.

When used together with

.Ic -O forward

the allocated port will be printed to the standard output.

.Pp

.It Fl S Ar ctl\_path

Specifies the location of a control socket for connection sharing,

or the string

.Dq none

to disable connection sharing.

Refer to the description of

.Cm ControlPath

and

.Cm ControlMaster

in

.Xr ssh\_config 5

for details.

.Pp

.It Fl s

May be used to request invocation of a subsystem on the remote system.

Subsystems facilitate the use of SSH

as a secure transport for other applications (e.g. \&

.Xr sftp 1 ) .

The subsystem is specified as the remote command.

.Pp

.It Fl T

Disable pseudo-terminal allocation.

.Pp

.It Fl t

Force pseudo-terminal allocation.

This can be used to execute arbitrary

screen-based programs on a remote machine, which can be very useful,

e.g. when implementing menu services.

Multiple

.Fl t

options force tty allocation, even if

.Nm

has no local tty.

.Pp

.It Fl V

Display the version number and exit.

.Pp

.It Fl v

Verbose mode.

Causes

.Nm

to print debugging messages about its progress.

This is helpful in

debugging connection, authentication, and configuration problems.

Multiple

.Fl v

options increase the verbosity.

The maximum is 3.

.Pp

.It Fl W Ar host : Ns Ar port

Requests that standard input and output on the client be forwarded to

.Ar host

on

.Ar port

over the secure channel.

Implies

.FI N ,

.FI T ,

.Cm ExitOnForwardFailure

and

.Cm ClearAllForwardings .

.Pp

.It FI w Xo

.Ar local\_tun Ns Op : Ns Ar remote\_tun

.Xc

Requests

tunnel

device forwarding with the specified

.Xr tun 4

devices between the client

.Pq Ar local\_tun

and the server

.Pq Ar remote\_tun .

.Pp

The devices may be specified by numerical ID or the keyword

.Dq any ,

which uses the next available tunnel device.

If

.Ar remote\_tun

is not specified, it defaults to

.Dq any .

See also the

.Cm Tunnel

and

.Cm TunnelDevice

directives in

.Xr ssh\_config 5 .

If the

.Cm Tunnel

directive is unset, it is set to the default tunnel mode, which is

.Dq point-to-point .

.Pp

.It FI X

Enables X11 forwarding.

This can also be specified on a per-host basis in a configuration file.

.Pp

X11 forwarding should be enabled with caution.

Users with the ability to bypass file permissions on the remote host

(for the user's X authorization database)

can access the local X11 display through the forwarded connection.

An attacker may then be able to perform activities such as keystroke monitoring.

.Pp

For this reason, X11 forwarding is subjected to X11 SECURITY extension restrictions by default.

Please refer to the

.Nm

.Fl Y

option and the

.Cm ForwardX11Trusted

directive in

.Xr ssh\_config 5

for more information.

.Pp

.It Fl x

Disables X11 forwarding.

.Pp

.It Fl Y

Enables trusted X11 forwarding.

Trusted X11 forwardings are not subjected to the X11 SECURITY extension controls.

.Pp

.It Fl y

Send log information using the

.Xr syslog 3

system module.

By default this information is sent to stderr.

.El

.Pp

.Nm

may additionally obtain configuration data from

a per-user configuration file and a system-wide configuration file.

The file format and configuration options are described in

.Xr ssh\_config 5 .

.Sh AUTHENTICATION

The OpenSSH SSH client supports SSH protocols 1 and 2.

The default is to use protocol 2 only,

though this can be changed via the

.Cm Protocol

option in

.Xr ssh\_config 5

or the

.Fl 1

and

.Fl 2

options (see above).

Protocol 1 should not be used

and is only offered to support legacy devices.  
It suffers from a number of cryptographic weaknesses  
and doesn't support many of the advanced features available for protocol 2.

.Pp

The methods available for authentication are:

GSSAPI-based authentication,  
host-based authentication,  
public key authentication,  
challenge-response authentication,  
and password authentication.

Authentication methods are tried in the order specified above,  
though

.Cm PreferredAuthentications

can be used to change the default order.

.Pp

Host-based authentication works as follows:

If the machine the user logs in from is listed in

.Pa /etc/hosts.equiv

or

.Pa /etc/shosts.equiv

on the remote machine, and the user names are  
the same on both sides, or if the files

.Pa ~/.rhosts

or

.Pa ~/.shosts

exist in the user's home directory on the  
remote machine and contain a line containing the name of the client  
machine and the name of the user on that machine, the user is  
considered for login.

Additionally, the server

.Em must

be able to verify the client's  
host key (see the description of

.Pa /etc/ssh/ssh\_known\_hosts

and

.Pa ~/.ssh/known\_hosts ,

below)

for login to be permitted.

This authentication method closes security holes due to IP  
spoofing, DNS spoofing, and routing spoofing.

[Note to the administrator:

.Pa /etc/hosts.equiv ,

.Pa ~/.rhosts ,

and the rlogin/rsh protocol in general, are inherently insecure and should be  
disabled if security is desired.]

.Pp

Public key authentication works as follows:

The scheme is based on public-key cryptography,

using cryptosystems  
where encryption and decryption are done using separate keys,  
and it is unfeasible to derive the decryption key from the encryption key.  
The idea is that each user creates a public/private  
key pair for authentication purposes.  
The server knows the public key, and only the user knows the private key.

.Nm

implements public key authentication protocol automatically,  
using one of the DSA, ECDSA, Ed25519 or RSA algorithms.  
The HISTORY section of

.Xr ssl 8

contains a brief discussion of the DSA and RSA algorithms.

.Pp

The file

.Pa ~/.ssh/authorized\_keys

lists the public keys that are permitted for logging in.

When the user logs in, the

.Nm

program tells the server which key pair it would like to use for  
authentication.

The client proves that it has access to the private key  
and the server checks that the corresponding public key  
is authorized to accept the account.

.Pp

The user creates his/her key pair by running

.Xr ssh-keygen 1 .

This stores the private key in

.Pa ~/.ssh/identity

(protocol 1),

.Pa ~/.ssh/id\_dsa

(DSA),

.Pa ~/.ssh/id\_ecdsa

(ECDSA),

.Pa ~/.ssh/id\_ed25519

(Ed25519),

or

.Pa ~/.ssh/id\_rsa

(RSA)

and stores the public key in

.Pa ~/.ssh/identity.pub

(protocol 1),

.Pa ~/.ssh/id\_dsa.pub

(DSA),

.Pa ~/.ssh/id\_ecdsa.pub

(ECDSA),

.Pa ~/.ssh/id\_ed25519.pub

(Ed25519),

or

.Pa ~/.ssh/id\_rsa.pub

(RSA)

in the user's home directory.

The user should then copy the public key

to

.Pa ~/.ssh/authorized\_keys

in his/her home directory on the remote machine.

The

.Pa authorized\_keys

file corresponds to the conventional

.Pa ~/.rhosts

file, and has one key

per line, though the lines can be very long.

After this, the user can log in without giving the password.

.Pp

A variation on public key authentication

is available in the form of certificate authentication:

instead of a set of public/private keys,

signed certificates are used.

This has the advantage that a single trusted certification authority

can be used in place of many public/private keys.

See the CERTIFICATES section of

.Xr ssh-keygen 1

for more information.

.Pp

The most convenient way to use public key or certificate authentication

may be with an authentication agent.

See

.Xr ssh-agent 1

and (optionally) the

.Cm AddKeysToAgent

directive in

.Xr ssh\_config 5

for more information.

.Pp

Challenge-response authentication works as follows:

The server sends an arbitrary

.Qq challenge

text, and prompts for a response.

Examples of challenge-response authentication include

.Bx

Authentication (see

.Xr login.conf 5 )

and PAM (some

.Pf non-Ox

systems).

.Pp

Finally, if other authentication methods fail,

.Nm

prompts the user for a password.

The password is sent to the remote host for checking; however, since all communications are encrypted, the password cannot be seen by someone listening on the network.

.Pp

.Nm

automatically maintains and checks a database containing identification for all hosts it has ever been used with.

Host keys are stored in

.Pa ~/.ssh/known\_hosts

in the user's home directory.

Additionally, the file

.Pa /etc/ssh/ssh\_known\_hosts

is automatically checked for known hosts.

Any new hosts are automatically added to the user's file.

If a host's identification ever changes,

.Nm

warns about this and disables password authentication to prevent server spoofing or man-in-the-middle attacks, which could otherwise be used to circumvent the encryption.

The

.Cm StrictHostKeyChecking

option can be used to control logins to machines whose host key is not known or has changed.

.Pp

When the user's identity has been accepted by the server, the server either executes the given command in a non-interactive session or, if no command has been specified, logs into the machine and gives the user a normal shell as an interactive session.

All communication with the remote command or shell will be automatically encrypted.

.Pp

If an interactive session is requested

.Nm

by default will only request a pseudo-terminal (pty) for interactive sessions when the client has one.

The flags

.Fl T

and

.Fl t

can be used to override this behaviour.

.Pp

If a pseudo-terminal has been allocated the user may use the escape characters noted below.

.Pp

If no pseudo-terminal has been allocated, the session is transparent and can be used to reliably transfer binary data.

On most systems, setting the escape character to

.Dq none

will also make the session transparent even if a tty is used.

.Pp

The session terminates when the command or shell on the remote machine exits and all X11 and TCP connections have been closed.

.Sh ESCAPE CHARACTERS

When a pseudo-terminal has been requested,

.Nm

supports a number of functions through the use of an escape character.

.Pp

A single tilde character can be sent as

.Ic ~~

or by following the tilde by a character other than those described below.

The escape character must always follow a newline to be interpreted as special.

The escape character can be changed in configuration files using the

.Cm EscapeChar

configuration directive or on the command line by the

.Fl e

option.

.Pp

The supported escapes (assuming the default

.Ql ~ )

are:

.Bl -tag -width Ds

.It Cm ~.

Disconnect.

.It Cm ~^Z

Background

.Nm .

.It Cm ~#

List forwarded connections.

.It Cm ~&

Background

.Nm

at logout when waiting for forwarded connection / X11 sessions to terminate.

.It Cm ~?

Display a list of escape characters.

.It Cm ~B

Send a BREAK to the remote system

(only useful if the peer supports it).

.It Cm ~C

Open command line.

Currently this allows the addition of port forwardings using the

.Fl L ,

.Fl R

and

.Fl D

options (see above).

It also allows the cancellation of existing port-forwardings with

.Sm off

.Fl KL Oo Ar bind\_address : Oc Ar port

.Sm on

for local,

.Sm off

.Fl KR Oo Ar bind\_address : Oc Ar port

.Sm on

for remote and

.Sm off

.Fl KD Oo Ar bind\_address : Oc Ar port

.Sm on

for dynamic port-forwardings.

.Ic !\& Ns Ar command

allows the user to execute a local command if the

.Ic PermitLocalCommand

option is enabled in

.Xr ssh\_config 5 .

Basic help is available, using the

.Fl h

option.

.It Cm ~R

Request rekeying of the connection

(only useful if the peer supports it).

.It Cm ~V

Decrease the verbosity

.Pq Ic LogLevel

when errors are being written to stderr.

.It Cm ~v

Increase the verbosity

.Pq Ic LogLevel

when errors are being written to stderr.

.El

.Sh TCP FORWARDING

Forwarding of arbitrary TCP connections over the secure channel can be specified either on the command line or in a configuration file.

One possible application of TCP forwarding is a secure connection to a mail server; another is going through firewalls.

.Pp

In the example below, we look at encrypting communication between an IRC client and server, even though the IRC server does not directly support encrypted communications.

This works as follows:

the user connects to the remote host using

.Nm ,

specifying a port to be used to forward connections to the remote server.  
After that it is possible to start the service which is to be encrypted on the client machine, connecting to the same local port, and  
.Nm  
will encrypt and forward the connection.

.Pp  
The following example tunnels an IRC session from client machine

```
.Dq 127.0.0.1  
(localhost)  
to remote server  
.Dq server.example.com :  
.Bd -literal -offset 4n  
$ ssh -f -L 1234:localhost:6667 server.example.com sleep 10  
$ irc -c '#users' -p 1234 pinky 127.0.0.1  
.Ed  
.Pp
```

This tunnels a connection to IRC server

```
.Dq server.example.com ,  
joining channel  
.Dq #users ,  
nickname  
.Dq pinky ,  
using port 1234.
```

It doesn't matter which port is used, as long as it's greater than 1023 (remember, only root can open sockets on privileged ports) and doesn't conflict with any ports already in use.

The connection is forwarded to port 6667 on the remote server, since that's the standard port for IRC services.

.Pp

The

```
.Fl f
```

option backgrounds

```
.Nm
```

and the remote command

```
.Dq sleep 10
```

is specified to allow an amount of time

(10 seconds, in the example)

to start the service which is to be tunnelled.

If no connections are made within the time specified,

```
.Nm
```

will exit.

```
.Sh X11 FORWARDING
```

If the

```
.Cm ForwardX11
```

variable is set to

.Dq yes

(or see the description of the

.Fl X ,

.Fl x ,

and

.Fl Y

options above)

and the user is using X11 (the

.Ev DISPLAY

environment variable is set), the connection to the X11 display is automatically forwarded to the remote side in such a way that any X11 programs started from the shell (or command) will go through the encrypted channel, and the connection to the real X server will be made from the local machine.

The user should not manually set

.Ev DISPLAY .

Forwarding of X11 connections can be configured on the command line or in configuration files.

.Pp

The

.Ev DISPLAY

value set by

.Nm

will point to the server machine, but with a display number greater than zero.

This is normal, and happens because

.Nm

creates a

.Dq proxy

X server on the server machine for forwarding the connections over the encrypted channel.

.Pp

.Nm

will also automatically set up Xauthority data on the server machine.

For this purpose, it will generate a random authorization cookie, store it in Xauthority on the server, and verify that any forwarded connections carry this cookie and replace it by the real cookie when the connection is opened.

The real authentication cookie is never sent to the server machine (and no cookies are sent in the plain).

.Pp

If the

.Cm ForwardAgent

variable is set to

.Dq yes

(or see the description of the

.Fl A

and

.Fl a

options above) and

the user is using an authentication agent, the connection to the agent is automatically forwarded to the remote side.

.Sh VERIFYING HOST KEYS

When connecting to a server for the first time,

a fingerprint of the server's public key is presented to the user (unless the option

.Cm StrictHostKeyChecking

has been disabled).

Fingerprints can be determined using

.Xr ssh-keygen 1 :

.Pp

.Dl \$ ssh-keygen -l -f /etc/ssh/ssh\_host\_rsa\_key

.Pp

If the fingerprint is already known, it can be matched and the key can be accepted or rejected.

If only legacy (MD5) fingerprints for the server are available, the

.Xr ssh-keygen 1

.Fl E

option may be used to downgrade the fingerprint algorithm to match.

.Pp

Because of the difficulty of comparing host keys

just by looking at fingerprint strings,

there is also support to compare host keys visually, using

.Em random art .

By setting the

.Cm VisualHostKey

option to

.Dq yes ,

a small ASCII graphic gets displayed on every login to a server, no matter if the session itself is interactive or not.

By learning the pattern a known server produces, a user can easily find out that the host key has changed when a completely different pattern is displayed.

Because these patterns are not unambiguous however, a pattern that looks similar to the pattern remembered only gives a good probability that the host key is the same, not guaranteed proof.

.Pp

To get a listing of the fingerprints along with their random art for all known hosts, the following command line can be used:

.Pp

.Dl \$ ssh-keygen -lv -f ~/.ssh/known\_hosts

.Pp

If the fingerprint is unknown,

an alternative method of verification is available:

SSH fingerprints verified by DNS.

An additional resource record (RR),  
SSHFP,  
is added to a zonefile  
and the connecting client is able to match the fingerprint  
with that of the key presented.

.Pp

In this example, we are connecting a client to a server,

.Dq host.example.com .

The SSHFP resource records should first be added to the zonefile for  
host.example.com:

.Bd -literal -offset indent

```
$ ssh-keygen -r host.example.com.
```

.Ed

.Pp

The output lines will have to be added to the zonefile.

To check that the zone is answering fingerprint queries:

.Pp

```
.Dl $ dig -t SSHFP host.example.com
```

.Pp

Finally the client connects:

.Bd -literal -offset indent

```
$ ssh -o "VerifyHostKeyDNS ask" host.example.com
```

```
[...]
```

Matching host key fingerprint found in DNS.

Are you sure you want to continue connecting (yes/no)?

.Ed

.Pp

See the

.Cm VerifyHostKeyDNS

option in

.Xr ssh\_config 5

for more information.

.Sh SSH-BASED VIRTUAL PRIVATE NETWORKS

.Nm

contains support for Virtual Private Network (VPN) tunnelling  
using the

.Xr tun 4

network pseudo-device,

allowing two networks to be joined securely.

The

.Xr sshd\_config 5

configuration option

.Cm PermitTunnel

controls whether the server supports this,

and at what level (layer 2 or 3 traffic).

.Pp

The following example would connect client network 10.0.50.0/24  
with remote network 10.0.99.0/24 using a point-to-point connection

from 10.1.1.1 to 10.1.1.2,  
provided that the SSH server running on the gateway to the remote network,  
at 192.168.1.15, allows it.

.Pp

On the client:

.Bd -literal -offset indent

```
# ssh -f -w 0:1 192.168.1.15 true
```

```
# ifconfig tun0 10.1.1.1 10.1.1.2 netmask 255.255.255.252
```

```
# route add 10.0.99.0/24 10.1.1.2
```

.Ed

.Pp

On the server:

.Bd -literal -offset indent

```
# ifconfig tun1 10.1.1.2 10.1.1.1 netmask 255.255.255.252
```

```
# route add 10.0.50.0/24 10.1.1.1
```

.Ed

.Pp

Client access may be more finely tuned via the

.Pa /root/.ssh/authorized\_keys

file (see below) and the

.Cm PermitRootLogin

server option.

The following entry would permit connections on

.Xr tun 4

device 1 from user

.Dq jane

and on tun device 2 from user

.Dq john ,

if

.Cm PermitRootLogin

is set to

.Dq forced-commands-only :

.Bd -literal -offset 2n

```
tunnel="1",command="sh /etc/netstart tun1" ssh-rsa ... jane
```

```
tunnel="2",command="sh /etc/netstart tun2" ssh-rsa ... john
```

.Ed

.Pp

Since an SSH-based setup entails a fair amount of overhead,

it may be more suited to temporary setups,

such as for wireless VPNs.

More permanent VPNs are better provided by tools such as

.Xr ipsecctl 8

and

.Xr isakmpd 8 .

.Sh ENVIRONMENT

.Nm

will normally set the following environment variables:

.Bl -tag -width "SSH\_ORIGINAL\_COMMAND"

.It Ev DISPLAY

The

.Ev DISPLAY

variable indicates the location of the X11 server.

It is automatically set by

.Nm

to point to a value of the form

.Dq hostname:n ,

where

.Dq hostname

indicates the host where the shell runs, and

.Sq n

is an integer \\*(Ge 1.

.Nm

uses this special value to forward X11 connections over the secure channel.

The user should normally not set

.Ev DISPLAY

explicitly, as that

will render the X11 connection insecure (and will require the user to manually copy any required authorization cookies).

.It Ev HOME

Set to the path of the user's home directory.

.It Ev LOGNAME

Synonym for

.Ev USER ;

set for compatibility with systems that use this variable.

.It Ev MAIL

Set to the path of the user's mailbox.

.It Ev PATH

Set to the default

.Ev PATH ,

as specified when compiling

.Nm .

.It Ev SSH\_ASKPASS

If

.Nm

needs a passphrase, it will read the passphrase from the current terminal if it was run from a terminal.

If

.Nm

does not have a terminal associated with it but

.Ev DISPLAY

and

.Ev SSH\_ASKPASS

are set, it will execute the program specified by

.Ev SSH\_ASKPASS

and open an X11 window to read the passphrase.

This is particularly useful when calling

.Nm

from a

.Pa .xsession

or related script.

(Note that on some machines it

may be necessary to redirect the input from

.Pa /dev/null

to make this work.)

.It Ev SSH\_AUTH\_SOCK

Identifies the path of a

.Ux Ns -domain

socket used to communicate with the agent.

.It Ev SSH\_CONNECTION

Identifies the client and server ends of the connection.

The variable contains

four space-separated values: client IP address, client port number,

server IP address, and server port number.

.It Ev SSH\_ORIGINAL\_COMMAND

This variable contains the original command line if a forced command is executed.

It can be used to extract the original arguments.

.It Ev SSH\_TTY

This is set to the name of the tty (path to the device) associated

with the current shell or command.

If the current session has no tty,

this variable is not set.

.It Ev TZ

This variable is set to indicate the present time zone if it

was set when the daemon was started (i.e. the daemon passes the value on to new connections).

.It Ev USER

Set to the name of the user logging in.

.El

.Pp

Additionally,

.Nm

reads

.Pa ~/.ssh/environment ,

and adds lines of the format

.Dq VARNAME=value

to the environment if the file exists and users are allowed to change their environment.

For more information, see the

.Cm PermitUserEnvironment

option in

.Xr sshd\_config 5 .

.Sh FILES

.Bl -tag -width Ds -compact

.It Pa ~/.rhosts

This file is used for host-based authentication (see above).

On some machines this file may need to be world-readable if the user's home directory is on an NFS partition, because

.Xr sshd 8

reads it as root.

Additionally, this file must be owned by the user, and must not have write permissions for anyone else.

The recommended

permission for most machines is read/write for the user, and not accessible by others.

.Pp

.It Pa ~/.shosts

This file is used in exactly the same way as

.Pa .rhosts ,

but allows host-based authentication without permitting login with rlogin/rsh.

.Pp

.It Pa ~/.ssh/

This directory is the default location for all user-specific configuration and authentication information.

There is no general requirement to keep the entire contents of this directory secret, but the recommended permissions are read/write/execute for the user, and not accessible by others.

.Pp

.It Pa ~/.ssh/authorized\_keys

Lists the public keys (DSA, ECDSA, Ed25519, RSA) that can be used for logging in as this user.

The format of this file is described in the

.Xr sshd 8

manual page.

This file is not highly sensitive, but the recommended permissions are read/write for the user, and not accessible by others.

.Pp

.It Pa ~/.ssh/config

This is the per-user configuration file.

The file format and configuration options are described in

.Xr ssh\_config 5 .

Because of the potential for abuse, this file must have strict permissions: read/write for the user, and not writable by others.

.Pp

.It Pa ~/.ssh/environment

Contains additional definitions for environment variables; see

.Sx ENVIRONMENT ,

above.

.Pp

.It Pa ~/.ssh/identity

.It Pa ~/.ssh/id\_dsa

.It Pa ~/.ssh/id\_ecdsa

.It Pa ~/.ssh/id\_ed25519

.It Pa ~/.ssh/id\_rsa

Contains the private key for authentication.

These files

contain sensitive data and should be readable by the user but not accessible by others (read/write/execute).

.Nm

will simply ignore a private key file if it is accessible by others.

It is possible to specify a passphrase when generating the key which will be used to encrypt the sensitive part of this file using 3DES.

.Pp

.It Pa ~/.ssh/identity.pub

.It Pa ~/.ssh/id\_dsa.pub

.It Pa ~/.ssh/id\_ecdsa.pub

.It Pa ~/.ssh/id\_ed25519.pub

.It Pa ~/.ssh/id\_rsa.pub

Contains the public key for authentication.

These files are not

sensitive and can (but need not) be readable by anyone.

.Pp

.It Pa ~/.ssh/known\_hosts

Contains a list of host keys for all hosts the user has logged into that are not already in the systemwide list of known host keys.

See

.Xr sshd 8

for further details of the format of this file.

.Pp

.It Pa ~/.ssh/rc

Commands in this file are executed by

.Nm

when the user logs in, just before the user's shell (or command) is started.

See the

.Xr sshd 8

manual page for more information.

.Pp

.It Pa /etc/hosts.equiv

This file is for host-based authentication (see above).

It should only be writable by root.

.Pp

.It Pa /etc/shosts.equiv

This file is used in exactly the same way as

.Pa hosts.equiv ,

but allows host-based authentication without permitting login with

rlogin/rsh.

.Pp

.It Pa /etc/ssh/ssh\_config

Systemwide configuration file.

The file format and configuration options are described in

.Xr ssh\_config 5 .

.Pp

.It Pa /etc/ssh/ssh\_host\_key

.It Pa /etc/ssh/ssh\_host\_dsa\_key

.It Pa /etc/ssh/ssh\_host\_ecdsa\_key

.It Pa /etc/ssh/ssh\_host\_ed25519\_key

.It Pa /etc/ssh/ssh\_host\_rsa\_key

These files contain the private parts of the host keys and are used for host-based authentication.

.Pp

.It Pa /etc/ssh/ssh\_known\_hosts

Systemwide list of known host keys.

This file should be prepared by the

system administrator to contain the public host keys of all machines in the organization.

It should be world-readable.

See

.Xr sshd 8

for further details of the format of this file.

.Pp

.It Pa /etc/ssh/sshr

Commands in this file are executed by

.Nm

when the user logs in, just before the user's shell (or command) is started.

See the

.Xr sshd 8

manual page for more information.

.El

.Sh EXIT STATUS

.Nm

exits with the exit status of the remote command or with 255

if an error occurred.

.Sh AUTHORS
OpenSSH is a derivative of the original and free
ssh 1.2.12 release by Tatu Ylonen.
Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos,
Theo de Raadt and Dug Song
removed many bugs, re-added newer features and
created OpenSSH.
Markus Friedl contributed the support for SSH
protocol versions 1.5 and 2.0.
/* $OpenBSD: ssh.c,v 1.436 2016/02/15 09:47:49 dtucker Exp $ */

*       All rights reserved
* Ssh client program. This program can be used to log into a remote machine.
* The software supports strong authentication, encryption, and forwarding
* of X11, TCP/IP, and authentication connections.
*
* As far as I am concerned, the code I have written for this software
* can be used freely for any purpose. Any derived versions of this
* software must be clearly marked as such, and if the derived work is
* incompatible with the protocol description in the RFC file, it must be
* called by a name other than "ssh" or "Secure Shell".

# This is the ssh client system-wide configuration file. See
# ssh_config(5) for more information. This file provides defaults for
# users, and the values can be changed in per-user configuration files
# or on the command line.

# Configuration data is parsed as follows:
# 1. command line options
# 2. user-specific file
# 3. system-wide file
# Any configuration value is only changed the first time it is set.
# Thus, host-specific definitions should be at the beginning of the
# configuration file, and defaults at the end.

# Site-wide defaults for some commonly used options. For a comprehensive
# list of available options, their meanings and defaults, please see the
# ssh_config(5) man page.

```

## NAME

ssh\_config M-bM-^@M-^S OpenSSH SSH client configuration files

## SYNOPSIS

```

~/.ssh/config
/etc/ssh/ssh_config

```

## DESCRIPTION

ssh(1) obtains configuration data from the following sources in the following order:

1. command-line options
2. user's configuration file (~/.ssh/config)
3. system-wide configuration file (/etc/ssh/ssh\_config)

For each parameter, the first obtained value will be used. The configuration files contain sections separated by M-bM-^@M-^[HostM-bM-^@M-^] specifications, and that section is only applied for hosts that match one of the patterns given in the specification. The matched host name is usually the one given on the command line (see the CanonicalizeHostname option for exceptions.)

Since the first obtained value for each parameter is used, more host-specific declarations should be given near the beginning of the file, and general defaults at the end.

The configuration file has the following format:

Empty lines and lines starting with M-bM-^@M-^X#M-bM-^@M-^Y are comments. Otherwise a line is of the format M-bM-^@M-^[keyword argumentsM-bM-^@M-^]. Configuration options may be

separated by whitespace or optional whitespace and exactly one `M-bM-^@M-^X=M-bM-^@M-^Y`; the latter format is useful to avoid the need to quote whitespace when specifying configuration options using the `ssh`, `scp`, and `sftp -o` option. Arguments may optionally be enclosed in double quotes (") in order to represent arguments containing spaces.

The possible keywords and their meanings are as follows (note that keywords are case-insensitive and arguments are case-sensitive):

**Host** Restricts the following declarations (up to the next `Host` or `Match` keyword) to be only for those hosts that match one of the patterns given after the keyword. If more than one pattern is provided, they should be separated by whitespace. A single `M-bM-^@M-^X*M-bM-^@M-^Y` as a pattern can be used to provide global defaults for all hosts. The host is usually the `hostname` argument given on the command line (see the `CanonicalizeHostname` option for exceptions.)

A pattern entry may be negated by prefixing it with an exclamation mark (`M-bM-^@M-^X!M-bM-^@M-^Y`). If a negated entry is matched, then the `Host` entry is ignored, regardless of whether any other patterns on the line match. Negated matches are therefore useful to provide exceptions for wildcard matches.

See `PATTERNS` for more information on patterns.

**Match** Restricts the following declarations (up to the next `Host` or `Match` keyword) to be used only when the conditions following the `Match` keyword are satisfied. Match conditions are specified using one or more criteria or the `single` token all which always matches. The available criteria keywords are: `canonical`, `exec`, `host`, `originalhost`, `user`, and `localuser`. The all criteria must appear alone or immediately after `canonical`. Other criteria may be combined arbitrarily. All criteria but `all` and `canonical` require an argument. Criteria may be negated by prepending an exclamation mark (`M-bM-^@M-^X!M-bM-^@M-^Y`).

The `canonical` keyword matches only when the configuration file is being re-parsed after `hostname` canonicalization (see the `CanonicalizeHostname` option.) This may be useful to specify conditions that work with canonical host names only. The `exec` keyword executes the specified command under the user's shell. If the command returns a zero exit status then the condition is considered true. Commands containing whitespace characters must be quoted. The following character sequences in the command will be expanded prior to execution: `M-bM-^@M-^X%LM-bM-^@M-^Y` will be substituted by the first component of the local host name, `M-bM-^@M-^X%IM-bM-^@M-^Y` will be substituted by the local host name (including any domain name), `M-bM-^@M-^X%hM-bM-^@M-^Y` will be

substituted by the target host name, `M-bM-^@M-^X%nM-bM-^@M-^Y` will be substituted by the original target host name specified on the command-line, `M-bM-^@M-^X%pM-bM-^@M-^Y` the destination port, `M-bM-^@M-^X%rM-bM-^@M-^Y` by the remote login username, and `M-bM-^@M-^X%uM-bM-^@M-^Y` by the username of the user running `ssh(1)`.

The other keywords' criteria must be single entries or comma-separated lists and may use the wildcard and negation operators described in the PATTERNS section. The criteria for the host keyword are matched against the target hostname, after any substitution by the Hostname or CanonicalizeHostname options. The originalhost keyword matches against the hostname as it was specified on the command-line. The user keyword matches against the target username on the remote host. The localuser keyword matches against the name of the local user running `ssh(1)` (this keyword may be useful in system-wide `ssh_config` files).

#### AddKeysToAgent

Specifies whether keys should be automatically added to a running `ssh-agent(1)`. If this option is set to `M-bM-^@M-^yesM-bM-^@M-^]` and a key is loaded from a file, the key and its passphrase are added to the agent with the default lifetime, as if by `ssh-add(1)`. If this option is set to `M-bM-^@M-^askM-bM-^@M-^]`, `ssh` will require confirmation using the `SSH_ASKPASS` program before adding a key (see `ssh-add(1)` for details). If this option is set to `M-bM-^@M-^confirmM-bM-^@M-^]`, each use of the key must be confirmed, as if the `-c` option was specified to `ssh-add(1)`. If this option is set to `M-bM-^@M-^noM-bM-^@M-^]`, no keys are added to the agent. The argument must be `M-bM-^@M-^yesM-bM-^@M-^]`, `M-bM-^@M-^confirmM-bM-^@M-^]`, `M-bM-^@M-^askM-bM-^@M-^]`, or `M-bM-^@M-^noM-bM-^@M-^]`. The default is `M-bM-^@M-^noM-bM-^@M-^]`.

#### AddressFamily

Specifies which address family to use when connecting. Valid arguments are `M-bM-^@M-^anyM-bM-^@M-^]`, `M-bM-^@M-^inetM-bM-^@M-^]` (use IPv4 only), or `M-bM-^@M-^inet6M-bM-^@M-^]` (use IPv6 only). The default is `M-bM-^@M-^anyM-bM-^@M-^]`.

#### BatchMode

If set to `M-bM-^@M-^yesM-bM-^@M-^]`, passphrase/password querying will be disabled. This option is useful in scripts and other batch jobs where no user is present to supply the password. The argument must be `M-bM-^@M-^yesM-bM-^@M-^]` or `M-bM-^@M-^noM-bM-^@M-^]`. The default is `M-bM-^@M-^noM-bM-^@M-^]`.

#### BindAddress

Use the specified address on the local machine as the source address of the connection. Only useful on systems with more than one address. Note that this option does not work if

UsePrivilegedPort is set to `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### CanonicalDomains

When CanonicalizeHostname is enabled, this option specifies the list of domain suffixes in which to search for the specified destination host.

#### CanonicalizeFallbackLocal

Specifies whether to fail with an error when hostname canonicalization fails. The default, `M-bM-^@M-^\yesM-bM-^@M-^]`, will attempt to look up the unqualified hostname using the system resolver's search rules. A value of `M-bM-^@M-^\noM-bM-^@M-^]` will cause `ssh(1)` to fail instantly if CanonicalizeHostname is enabled and the target hostname cannot be found in any of the domains specified by CanonicalDomains.

#### CanonicalizeHostname

Controls whether explicit hostname canonicalization is performed. The default, `M-bM-^@M-^\noM-bM-^@M-^]`, is not to perform any name rewriting and let the system resolver handle all hostname lookups. If set to `M-bM-^@M-^\yesM-bM-^@M-^]` then, for connections that do not use a ProxyCommand, `ssh(1)` will attempt to canonicalize the hostname specified on the command line using the CanonicalDomains suffixes and CanonicalizePermittedCNAMEs rules. If CanonicalizeHostname is set to `M-bM-^@M-^\alwaysM-bM-^@M-^]`, then canonicalization is applied to proxied connections too.

If this option is enabled, then the configuration files are processed again using the new target name to pick up any new configuration in matching Host and Match stanzas.

#### CanonicalizeMaxDots

Specifies the maximum number of dot characters in a hostname before canonicalization is disabled. The default, `M-bM-^@M-^\1M-bM-^@M-^]`, allows a single dot (i.e. `hostname.subdomain`).

#### CanonicalizePermittedCNAMEs

Specifies rules to determine whether CNAMEs should be followed when canonicalizing hostnames. The rules consist of one or more arguments of `source_domain_list:target_domain_list`, where `source_domain_list` is a pattern-list of domains that may follow CNAMEs in canonicalization, and `target_domain_list` is a pattern-list of domains that they may resolve to.

For example, `M-bM-^@M-^\*.a.example.com:*.b.example.com,*.c.example.comM-bM-^@M-^]` will allow hostnames matching `M-bM-^@M-^\*.a.example.comM-bM-^@M-^]` to be canonicalized to names in the `M-bM-^@M-^\*.b.example.comM-bM-^@M-^]` or `M-bM-^@M-^\*.c.example.comM-bM-^@M-^]` domains.

### CertificateFile

Specifies a file from which the user's certificate is read. A corresponding private key must be provided separately in order to use this certificate either from an IdentityFile directive or -i flag to ssh(1), via ssh-agent(1), or via a PKCS11Provider.

The file name may use the tilde syntax to refer to a user's home directory or one of the following escape characters: M-bM-^@M-^X%M-bM-^@M-^Y (local user's home directory), M-bM-^@M-^X%uM-bM-^@M-^Y (local user name), M-bM-^@M-^X%lM-bM-^@M-^Y (local host name), M-bM-^@M-^X%hM-bM-^@M-^Y (remote host name) or M-bM-^@M-^X%rM-bM-^@M-^Y (remote user name).

It is possible to have multiple certificate files specified in configuration files; these certificates will be tried in sequence. Multiple CertificateFile directives will add to the list of certificates used for authentication.

### ChallengeResponseAuthentication

Specifies whether to use challenge-response authentication. The argument to this keyword must be M-bM-^@M-^yesM-bM-^@M-^] or M-bM-^@M-^noM-bM-^@M-^]. The default is M-bM-^@M-^yesM-bM-^@M-^].

### CheckHostIP

If this flag is set to M-bM-^@M-^yesM-bM-^@M-^], ssh(1) will additionally check the host IP address in the known\_hosts file. This allows ssh to detect if a host key changed due to DNS spoofing and will add addresses of destination hosts to ~/.ssh/known\_hosts in the process, regardless of the setting of StrictHostKeyChecking. If the option is set to M-bM-^@M-^noM-bM-^@M-^], the check will not be executed. The default is M-bM-^@M-^yesM-bM-^@M-^].

**Cipher** Specifies the cipher to use for encrypting the session in protocol version 1. Currently, M-bM-^@M-^blowfishM-bM-^@M-^], M-bM-^@M-^3desM-bM-^@M-^], and M-bM-^@M-^desM-bM-^@M-^] are supported. des is only supported in the ssh(1) client for interoperability with legacy protocol 1 implementations that do not support the 3des cipher. Its use is strongly discouraged due to cryptographic weaknesses. The default is M-bM-^@M-^3desM-bM-^@M-^].

### Ciphers

Specifies the ciphers allowed for protocol version 2 in order of preference. Multiple ciphers must be comma-separated. If the specified value begins with a M-bM-^@M-^X+M-bM-^@M-^Y character, then the specified ciphers will be appended to the default set instead of replacing them.

The supported ciphers are:

```
3des-cbc
aes128-cbc
aes192-cbc
aes256-cbc
aes128-ctr
aes192-ctr
aes256-ctr
aes128-gcm@openssh.com
aes256-gcm@openssh.com
arcfour
arcfour128
arcfour256
blowfish-cbc
cast128-cbc
chacha20-poly1305@openssh.com
```

The default is:

```
chacha20-poly1305@openssh.com,
aes128-ctr,aes192-ctr,aes256-ctr,
aes128-gcm@openssh.com,aes256-gcm@openssh.com,
aes128-cbc,aes192-cbc,aes256-cbc,3des-cbc
```

The list of available ciphers may also be obtained using the `-Q` option of `ssh(1)` with an argument of `M-bM-^@M-^\cipherM-bM-^@M-^]`.

#### ClearAllForwardings

Specifies that all local, remote, and dynamic port forwardings specified in the configuration files or on the command line be cleared. This option is primarily useful when used from the `ssh(1)` command line to clear port forwardings set in configuration files, and is automatically set by `scp(1)` and `sftp(1)`. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`.

The default is

```
M-bM-^@M-^\noM-bM-^@M-^]
```

#### Compression

Specifies whether to use compression. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### CompressionLevel

Specifies the compression level to use if compression is enabled. The argument must be an integer from 1 (fast) to 9 (slow, best). The default level is 6, which is good for most applications. The meaning of the values is the same as in `gzip(1)`. Note that this option applies to protocol version 1 only.

### ConnectionAttempts

Specifies the number of tries (one per second) to make before exiting. The argument must be an integer. This may be useful in scripts if the connection sometimes fails. The default is 1.

### ConnectTimeout

Specifies the timeout (in seconds) used when connecting to the SSH server, instead of using the default system TCP timeout.

This value is used only when the target is down or really unreachable, not when it refuses the connection.

### ControlMaster

Enables the sharing of multiple sessions over a single network connection. When set to `M-bM-^@M-^\yesM-bM-^@M-^]`, `ssh(1)` will listen for connections on a control socket specified using the `ControlPath` argument. Additional sessions can connect to this socket using the same `ControlPath` with `ControlMaster` set to `M-bM-^@M-^\noM-bM-^@M-^]` (the default). These sessions will try to reuse the master instance's network connection rather than initiating new ones, but will fall back to connecting normally if the control socket does not exist, or is not listening.

Setting this to `M-bM-^@M-^\askM-bM-^@M-^]` will cause `ssh` to listen for control connections, but require confirmation using `ssh-askpass(1)`. If the `ControlPath` cannot be opened, `ssh` will continue without connecting to a master instance.

X11 and `ssh-agent(1)` forwarding is supported over these multiplexed connections, however the display and agent forwarded will be the one belonging to the master connection i.e. it is not possible to forward multiple displays or agents.

Two additional options allow for opportunistic multiplexing: try to use a master connection but fall back to creating a new one if one does not already exist. These options are: `M-bM-^@M-^\autoM-bM-^@M-^]` and `M-bM-^@M-^\autoaskM-bM-^@M-^]`. The latter requires confirmation like the `M-bM-^@M-^\askM-bM-^@M-^]` option.

### ControlPath

Specify the path to the control socket used for connection sharing as described in the `ControlMaster` section above or the string `M-bM-^@M-^\noneM-bM-^@M-^]` to disable connection sharing. In the path, `M-bM-^@M-^X%LM-bM-^@M-^Y`

will be substituted by the first component of the local host name, `M-bM-^@M-^X%IM-bM-^@M-^Y` will be substituted by the local host name (including any domain name), `M-bM-^@M-^X%hM-bM-^@M-^Y` will be substituted by the target host

name, `M-bM-^@M-^X%nM-bM-^@M-^Y` will be substituted by the original target host name specified on the command line, `M-bM-^@M-^X%pM-bM-^@M-^Y` the destination port, `M-bM-^@M-^X%rM-bM-^@M-^Y` by the remote login username, `M-bM-^@M-^X%uM-bM-^@M-^Y` by the username and `M-bM-^@M-^X%iM-bM-^@M-^Y` by the numeric user ID (uid) of the user running `ssh(1)`, and `M-bM-^@M-^X%CM-bM-^@M-^Y` by a hash of the concatenation: `%l%h%p%r`. It is recommended that any `ControlPath` used for opportunistic connection sharing include at least `%h`, `%p`, and `%r` (or alternatively `%C`) and be placed in a directory that is not writable by other users. This ensures that shared connections are uniquely identified.

#### ControlPersist

When used in conjunction with `ControlMaster`, specifies that the master connection should remain open in the background (waiting for future client connections) after the initial client connection has been closed. If set to `M-bM-^@M-^[\noM-bM-^@M-^]`, then the master connection will not be placed into the background, and will close as soon as the initial client connection is closed. If set to `M-bM-^@M-^[\yesM-bM-^@M-^]` or `M-bM-^@M-^[\0M-bM-^@M-^]`, then the master connection will remain in the background indefinitely (until killed or closed via a mechanism such as the `ssh(1) M-bM-^@M-^[-O exitM-bM-^@M-^]` option). If set to a time in seconds, or a time in any of the formats documented in `sshd_config(5)`, then the backgrounded master connection will automatically terminate after it has remained idle (with no client connections) for the specified time.

#### DynamicForward

Specifies that a TCP port on the local machine be forwarded over the secure channel, and the application protocol is then used to determine where to connect to from the remote machine.

The argument must be `[bind_address:]port`. IPv6 addresses can be specified by enclosing addresses in square brackets. By default, the local port is bound in accordance with the `GatewayPorts` setting. However, an explicit `bind_address` may be used to bind the connection to a specific address. The `bind_address` of `M-bM-^@M-^[\localhostM-bM-^@M-^]` indicates that the listening port be bound for local use only, while an empty address or `M-bM-^@M-^X*M-bM-^@M-^Y` indicates that the port should be available from all interfaces.

Currently the `SOCKS4` and `SOCKS5` protocols are supported, and `ssh(1)` will act as a `SOCKS` server. Multiple forwardings may be specified, and additional forwardings can be given on the command line. Only the superuser can forward privileged ports.

#### EnableSSHKeySign

Setting this option to `yes` in the global client configuration file `/etc/ssh/ssh_config` enables the use of the helper program `ssh-keysign(8)` during `HostbasedAuthentication`. The argument must be `yes` or `no`. The default is `no`. This option should be placed in the non-hostspecific section. See `ssh-keysign(8)` for more information.

#### EscapeChar

Sets the escape character (default: `X~`). The escape character can also be set on the command line. The argument should be a single character, `X^` followed by a letter, or `none` to disable the escape character entirely (making the connection transparent for binary data).

#### ExitOnForwardFailure

Specifies whether `ssh(1)` should terminate the connection if it cannot set up all requested dynamic, tunnel, local, and remote port forwardings, (e.g. if either end is unable to bind and listen on a specified port). Note that `ExitOnForwardFailure` does not apply to connections made over port forwardings and will not, for example, cause `ssh(1)` to exit if TCP connections to the ultimate forwarding destination fail. The argument must be `yes` or `no`. The default is `no`.

#### FingerprintHash

Specifies the hash algorithm used when displaying key fingerprints. Valid options are: `md5` and `sha256`. The default is `sha256`.

#### ForwardAgent

Specifies whether the connection to the authentication agent (if any) will be forwarded to the remote machine. The argument must be `yes` or `no`. The default is `no`.

Agent forwarding should be enabled with caution. Users with the ability to bypass file permissions on the remote host (for the agent's Unix-domain socket) can access the local agent through the forwarded connection. An attacker cannot obtain key material from the agent, however they can perform operations on the keys that enable them to authenticate using the identities loaded into the agent.

#### ForwardX11

Specifies whether X11 connections will be automatically

redirected over the secure channel and DISPLAY set. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

X11 forwarding should be enabled with caution. Users with the ability to bypass file permissions on the remote host (for the user's X11 authorization database) can access the local X11 display through the forwarded connection. An attacker may then be able to perform activities such as keystroke monitoring if the `ForwardX11Trusted` option is also enabled.

#### ForwardX11Timeout

Specify a timeout for untrusted X11 forwarding using the format described in the TIME FORMATS section of `sshd_config(5)`. X11 connections received by `ssh(1)` after this time will be refused. The default is to disable untrusted X11 forwarding after twenty minutes has elapsed.

#### ForwardX11Trusted

If this option is set to `M-bM-^@M-^\yesM-bM-^@M-^]`, remote X11 clients will have full access to the original X11 display.

If this option is set to `M-bM-^@M-^\noM-bM-^@M-^]`, remote X11 clients will be considered untrusted and prevented from stealing or tampering with data belonging to trusted X11 clients. Furthermore, the `xauth(1)` token used for the session will be set to expire after 20 minutes. Remote clients will be refused access after this time.

The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

See the X11 SECURITY extension specification for full details on the restrictions imposed on untrusted clients.

#### GatewayPorts

Specifies whether remote hosts are allowed to connect to local forwarded ports. By default, `ssh(1)` binds local port forwardings to the loopback address. This prevents other remote hosts from connecting to forwarded ports. `GatewayPorts` can be used to specify that `ssh` should bind local port forwardings to the wildcard address, thus allowing remote hosts to connect to forwarded ports. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### GlobalKnownHostsFile

Specifies one or more files to use for the global host key database, separated by whitespace. The default is

/etc/ssh/ssh\_known\_hosts, /etc/ssh/ssh\_known\_hosts2.

#### GSSAPIAuthentication

Specifies whether user authentication based on GSSAPI is allowed.  
The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### GSSAPIDelegateCredentials

Forward (delegate) credentials to the server. The default is  
`M-bM-^@M-^\noM-bM-^@M-^]`.

#### HashKnownHosts

Indicates that `ssh(1)` should hash host names and addresses when they are added to `~/.ssh/known_hosts`. These hashed names may be used normally by `ssh(1)` and `sshd(8)`, but they do not reveal identifying information should the file's contents be disclosed.  
The default is `M-bM-^@M-^\noM-bM-^@M-^]`. Note that existing names and addresses in known hosts files will not be converted automatically, but may be manually hashed using `ssh-keygen(1)`.

#### HostbasedAuthentication

Specifies whether to try rhosts based authentication with public key authentication. The argument must be `M-bM-^@M-^[yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### HostbasedKeyTypes

Specifies the key types that will be used for hostbased authentication as a comma-separated pattern list. Alternately if the specified value begins with a `M-bM-^@M-^X+M-bM-^@M-^Y` character, then the specified key types will be appended to the default set instead of replacing them. The default for this option is:

```
ecdsa-sha2-nistp256-cert-v01@openssh.com,  
ecdsa-sha2-nistp384-cert-v01@openssh.com,  
ecdsa-sha2-nistp521-cert-v01@openssh.com,  
ssh-ed25519-cert-v01@openssh.com,  
ssh-rsa-cert-v01@openssh.com,  
ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,  
ssh-ed25519,ssh-rsa
```

The `-Q` option of `ssh(1)` may be used to list supported key types.

#### HostKeyAlgorithms

Specifies the host key algorithms that the client wants to use in order of preference. Alternately if the specified value begins with a `M-bM-^@M-^X+M-bM-^@M-^Y` character, then the specified key types will be appended to the default set instead of replacing them. The default for this option is:

ecdsa-sha2-nistp256-cert-v01@openssh.com,  
ecdsa-sha2-nistp384-cert-v01@openssh.com,  
ecdsa-sha2-nistp521-cert-v01@openssh.com,  
ssh-ed25519-cert-v01@openssh.com,  
ssh-rsa-cert-v01@openssh.com,  
ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,  
ssh-ed25519,ssh-rsa

If hostkeys are known for the destination host then this default is modified to prefer their algorithms.

The list of available key types may also be obtained using the -Q option of ssh(1) with an argument of M-bM-^@M-^keyM-bM-^@M-^].

#### HostKeyAlias

Specifies an alias that should be used instead of the real host name when looking up or saving the host key in the host key database files. This option is useful for tunneling SSH connections or for multiple servers running on a single host.

#### HostName

Specifies the real host name to log into. This can be used to specify nicknames or abbreviations for hosts. If the hostname contains the character sequence M-bM-^@M-^X%hM-bM-^@M-^Y, then this will be replaced with the host name specified on the command line (this is useful for manipulating unqualified names). The character sequence M-bM-^@M-^X%M-bM-^@M-^Y will be replaced by a single M-bM-^@M-^X%M-bM-^@M-^Y character, which may be used when specifying IPv6 link-local addresses.

The default is the name given on the command line. Numeric IP addresses are also permitted (both on the command line and in HostName specifications).

#### IdentitiesOnly

Specifies that ssh(1) should only use the authentication identity and certificate files explicitly configured in the ssh\_config files or passed on the ssh(1) command-line, even if ssh-agent(1) or a PKCS11Provider offers more identities. The argument to this keyword must be M-bM-^@M-^yesM-bM-^@M-^] or M-bM-^@M-^\noM-bM-^@M-^]. This option is intended for

situations where ssh-agent offers many different identities. The default is M-bM-^@M-^\noM-bM-^@M-^].

#### IdentityFile

Specifies a file from which the user's DSA, ECDSA, Ed25519 or RSA authentication identity is read. The default is ~/.ssh/identity for protocol version 1, and ~/.ssh/id\_dsa, ~/.ssh/id\_ecdsa,

~/.ssh/id\_ed25519 and ~/.ssh/id\_rsa for protocol version 2. Additionally, any identities represented by the authentication agent will be used for authentication unless IdentitiesOnly is set. If no certificates have been explicitly specified by CertificateFile, ssh(1) will try to load certificate information from the filename obtained by appending -cert.pub to the path of a specified IdentityFile.

The file name may use the tilde syntax to refer to a user's home directory or one of the following escape characters: M-bM-^@M-^X%dM-bM-^@M-^Y (local user's home directory), M-bM-^@M-^X%uM-bM-^@M-^Y (local user name), M-bM-^@M-^X%lM-bM-^@M-^Y (local host name), M-bM-^@M-^X%hM-bM-^@M-^Y (remote host name) or M-bM-^@M-^X%rM-bM-^@M-^Y (remote user name).

It is possible to have multiple identity files specified in configuration files; all these identities will be tried in sequence. Multiple IdentityFile directives will add to the list of identities tried (this behaviour differs from that of other configuration directives).

IdentityFile may be used in conjunction with IdentitiesOnly to select which identities in an agent are offered during authentication. IdentityFile may also be used in conjunction with CertificateFile in order to provide any certificate also needed for authentication with the identity.

#### IgnoreUnknown

Specifies a pattern-list of unknown options to be ignored if they are encountered in configuration parsing. This may be used to suppress errors if ssh\_config contains options that are unrecognised by ssh(1). It is recommended that IgnoreUnknown be listed early in the configuration file as it will not be applied to unknown options that appear before it.

**IPQoS** Specifies the IPv4 type-of-service or DSCP class for connections.

Accepted values are M-bM-^@M-^af11M-bM-^@M-^], M-bM-^@M-^af12M-bM-^@M-^], M-bM-^@M-^af13M-bM-^@M-^], M-bM-^@M-^af21M-bM-^@M-^], M-bM-^@M-^af22M-bM-^@M-^],

M-bM-^@M-^af23M-bM-^@M-^], M-bM-^@M-^af31M-bM-^@M-^], M-bM-^@M-^af32M-bM-^@M-^], M-bM-^@M-^af33M-bM-^@M-^], M-bM-^@M-^af41M-bM-^@M-^], M-bM-^@M-^af42M-bM-^@M-^], M-bM-^@M-^af43M-bM-^@M-^], M-bM-^@M-^cs0M-bM-^@M-^],

M-bM-^@M-^cs1M-bM-^@M-^], M-bM-^@M-^cs2M-bM-^@M-^], M-bM-^@M-^cs3M-bM-^@M-^], M-bM-^@M-^cs4M-bM-^@M-^], M-bM-^@M-^cs5M-bM-^@M-^], M-bM-^@M-^cs6M-bM-^@M-^], M-bM-^@M-^cs7M-bM-^@M-^], M-bM-^@M-^efM-bM-^@M-^],

M-bM-^@M-^lowdelayM-bM-^@M-^], M-bM-^@M-^throughputM-bM-^@M-^], M-bM-^@M-^reliabilityM-bM-^@M-^], or a numeric value.

This option may take one or two arguments, separated by whitespace. If one argument is specified, it is used as the

packet class unconditionally. If two values are specified, the first is automatically selected for interactive sessions and the second for non-interactive sessions. The default is `M-bM-^@M-^\lowdelayM-bM-^@M-^]` for interactive sessions and `M-bM-^@M-^\throughputM-bM-^@M-^]` for non-interactive sessions.

#### KbdInteractiveAuthentication

Specifies whether to use keyboard-interactive authentication.

The argument to this keyword must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### KbdInteractiveDevices

Specifies the list of methods to use in keyboard-interactive authentication. Multiple method names must be comma-separated.

The default is to use the server specified list. The methods available vary depending on what the server supports. For an

OpenSSH server, it may be zero or more of: `M-bM-^@M-^\bsdauthM-bM-^@M-^]`, `M-bM-^@M-^\pamM-bM-^@M-^]`, and `M-bM-^@M-^\skM-bM-^@M-^]`.

#### KexAlgorithms

Specifies the available KEX (Key Exchange) algorithms. Multiple algorithms must be comma-separated. Alternately if the specified value begins with a `M-bM-^@M-^X+M-bM-^@M-^Y` character, then the specified methods will be appended to the default set instead of replacing them.

The default is:

```
curve25519-sha256@libssh.org,  
ecdh-sha2-nistp256,ecdh-sha2-nistp384,ecdh-sha2-nistp521,  
diffie-hellman-group-exchange-sha256,  
diffie-hellman-group-exchange-sha1,  
diffie-hellman-group14-sha1
```

The list of available key exchange algorithms may also be obtained using the `-Q` option of `ssh(1)` with an argument of `M-bM-^@M-^\kexM-bM-^@M-^]`.

#### LocalCommand

Specifies a command to execute on the local machine after successfully connecting to the server. The command string extends to the end of the line, and is executed with the user's shell. The following escape character substitutions will be

performed: `M-bM-^@M-^X%M-bM-^@M-^Y` (local user's home directory), `M-bM-^@M-^X%hM-bM-^@M-^Y` (remote host name), `M-bM-^@M-^X%IM-bM-^@M-^Y` (local host name), `M-bM-^@M-^X%nM-bM-^@M-^Y` (host name as provided on the command line), `M-bM-^@M-^X%pM-bM-^@M-^Y` (remote port), `M-bM-^@M-^X%rM-bM-^@M-^Y` (remote user name) or

M-bM-^@M-^X%uM-bM-^@M-^Y (local user name) or M-bM-^@M-^X%CM-bM-^@M-^Y by a hash of the concatenation:

```
%l%h%p%r.
```

The command is run synchronously and does not have access to the session of the ssh(1) that spawned it. It should not be used for interactive commands.

This directive is ignored unless PermitLocalCommand has been enabled.

#### LocalForward

Specifies that a TCP port on the local machine be forwarded over the secure channel to the specified host and port from the remote machine. The first argument must be [bind\_address:]port and the second argument must be host:hostport. IPv6 addresses can be specified by enclosing addresses in square brackets. Multiple forwardings may be specified, and additional forwardings can be given on the command line. Only the superuser can forward privileged ports. By default, the local port is bound in accordance with the GatewayPorts setting. However, an explicit bind\_address may be used to bind the connection to a specific address. The bind\_address of M-bM-^@M-^[localhostM-bM-^@M-^] indicates that the listening port be bound for local use only, while an empty address or M-bM-^@M-^X\*M-bM-^@M-^Y indicates that the port should be available from all interfaces.

#### LogLevel

Gives the verbosity level that is used when logging messages from ssh(1). The possible values are: QUIET, FATAL, ERROR, INFO, VERBOSE, DEBUG, DEBUG1, DEBUG2, and DEBUG3. The default is INFO. DEBUG and DEBUG1 are equivalent. DEBUG2 and DEBUG3 each specify higher levels of verbose output.

**MACs** Specifies the MAC (message authentication code) algorithms in order of preference. The MAC algorithm is used for data integrity protection. Multiple algorithms must be comma-separated. If the specified value begins with a M-bM-^@M-^X+M-bM-^@M-^Y character, then the specified algorithms will be appended to the default set instead of replacing them.

The algorithms that contain M-bM-^@M-^[-etmM-bM-^@M-^] calculate the MAC after encryption (encrypt-then-mac). These are considered safer and their use recommended.

The default is:

```
umac-64-etm@openssh.com,umac-128-etm@openssh.com,
```

hmac-sha2-256-etm@openssh.com,hmac-sha2-512-etm@openssh.com,  
hmac-sha1-etm@openssh.com,  
umac-64@openssh.com,umac-128@openssh.com,  
hmac-sha2-256,hmac-sha2-512,hmac-sha1

The list of available MAC algorithms may also be obtained using the `-Q` option of `ssh(1)` with an argument of `M-bM-^@M-^\macM-bM-^@M-^]`.

#### NoHostAuthenticationForLocalhost

This option can be used if the home directory is shared across machines. In this case localhost will refer to a different machine on each of the machines and the user will get many warnings about changed host keys. However, this option disables host authentication for localhost. The argument to this keyword must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is to check the host key for localhost.

#### NumberOfPasswordPrompts

Specifies the number of password prompts before giving up. The argument to this keyword must be an integer. The default is 3.

#### PasswordAuthentication

Specifies whether to use password authentication. The argument to this keyword must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### PermitLocalCommand

Allow local command execution via the `LocalCommand` option or using the `!command` escape sequence in `ssh(1)`. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### PKCS11Provider

Specifies which PKCS#11 provider to use. The argument to this keyword is the PKCS#11 shared library `ssh(1)` should use to communicate with a PKCS#11 token providing the user's private RSA key.

**Port** Specifies the port number to connect on the remote host. The default is 22.

#### PreferredAuthentications

Specifies the order in which the client should try authentication methods. This allows a client to prefer one method (e.g. keyboard-interactive) over another method (e.g. password). The default is:

gssapi-with-mic,hostbased,publickey,  
keyboard-interactive,password

#### Protocol

Specifies the protocol versions ssh(1) should support in order of preference. The possible values are `M-bM-^@M-^X1M-bM-^@M-^Y` and `M-bM-^@M-^X2M-bM-^@M-^Y`. Multiple versions must be comma-separated. When this option is set to `M-bM-^@M-^2,1M-bM-^@M-^]` ssh will try version 2 and fall back to version 1 if version 2 is not available. The default is `M-bM-^@M-^X2M-bM-^@M-^Y`. Protocol 1 suffers from a number of cryptographic weaknesses and should not be used. It is only offered to support legacy devices.

#### ProxyCommand

Specifies the command to use to connect to the server. The command string extends to the end of the line, and is executed using the user's shell `M-bM-^@M-^XexecM-bM-^@M-^Y` directive to avoid a lingering shell process.

In the command string, any occurrence of `M-bM-^@M-^X%hM-bM-^@M-^Y` will be substituted by the host name to connect, `M-bM-^@M-^X%pM-bM-^@M-^Y` by the port, and `M-bM-^@M-^X%rM-bM-^@M-^Y` by the

remote user name. The command can be basically anything, and should read from its standard input and write to its standard output. It should eventually connect an sshd(8) server running on some machine, or execute `sshd -i` somewhere. Host key management will be done using the `HostName` of the host being connected (defaulting to the name typed by the user). Setting the command to `M-bM-^@M-^\noneM-bM-^@M-^]` disables this option entirely. Note that `CheckHostIP` is not available for connects with a proxy command.

This directive is useful in conjunction with `nc(1)` and its proxy support. For example, the following directive would connect via an HTTP proxy at 192.0.2.0:

```
ProxyCommand /usr/bin/nc -X connect -x 192.0.2.0:8080 %h %p
```

#### ProxyUseFdpass

Specifies that `ProxyCommand` will pass a connected file descriptor back to ssh(1) instead of continuing to execute and pass data. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### PubkeyAcceptedKeyTypes

Specifies the key types that will be used for public key authentication as a comma-separated pattern list. Alternately if the specified value begins with a `M-bM-^@M-^X+M-bM-^@M-^Y` character, then the key types after it will be appended to the default instead of replacing it. The default for this option is:

ecdsa-sha2-nistp256-cert-v01@openssh.com,  
ecdsa-sha2-nistp384-cert-v01@openssh.com,  
ecdsa-sha2-nistp521-cert-v01@openssh.com,  
ssh-ed25519-cert-v01@openssh.com,  
ssh-rsa-cert-v01@openssh.com,  
ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,  
ssh-ed25519,ssh-rsa

The -Q option of ssh(1) may be used to list supported key types.

#### PubkeyAuthentication

Specifies whether to try public key authentication. The argument to this keyword must be `M-bM-^@M-^yesM-bM-^@M-^` or `M-bM-^@M-^noM-bM-^@M-^`. The default is `M-bM-^@M-^yesM-bM-^@M-^`.

#### RekeyLimit

Specifies the maximum amount of data that may be transmitted before the session key is renegotiated, optionally followed a maximum amount of time that may pass before the session key is renegotiated. The first argument is specified in bytes and may have a suffix of `M-bM-^@M-^XKM-bM-^@M-^Y`, `M-bM-^@M-^XMM-bM-^@M-^Y`, or `M-bM-^@M-^XGM-bM-^@M-^Y` to indicate Kilobytes, Megabytes, or Gigabytes, respectively. The default is between `M-bM-^@M-^X1GM-bM-^@M-^Y` and `M-bM-^@M-^X4GM-bM-^@M-^Y`, depending on the cipher. The optional second value is specified in seconds and may use any of the units documented in the TIME FORMATS section of sshd\_config(5). The default value for RekeyLimit is `M-bM-^@M-^default noneM-bM-^@M-^`, which means that rekeying is performed after the cipher's default amount of data has been sent or received and no time based rekeying is done.

#### RemoteForward

Specifies that a TCP port on the remote machine be forwarded over the secure channel to the specified host and port from the local machine. The first argument must be `[bind_address:]port` and the second argument must be `host:hostport`. IPv6 addresses can be specified by enclosing addresses in square brackets. Multiple forwardings may be specified, and additional forwardings can be given on the command line. Privileged ports can be forwarded only when logging in as root on the remote machine.

If the port argument is `M-bM-^@M-^X0M-bM-^@M-^Y`, the listen port will be dynamically allocated on the server and reported to the client at run time.

If the `bind_address` is not specified, the default is to only bind to loopback addresses. If the `bind_address` is `M-bM-^@M-^X*M-bM-^@M-^Y` or an empty string, then the forwarding is requested to listen on all

interfaces. Specifying a remote `bind_address` will only succeed if the server's `GatewayPorts` option is enabled (see `sshd_config(5)`).

#### RequestTTY

Specifies whether to request a pseudo-tty for the session. The argument may be one of: `M-bM-^@M-^\noM-bM-^@M-^]` (never request a TTY), `M-bM-^@M-^\yesM-bM-^@M-^]` (always request a TTY when standard input is a TTY), `M-bM-^@M-^\forceM-bM-^@M-^]` (always request a TTY) or `M-bM-^@M-^\autoM-bM-^@M-^]` (request a TTY when opening a login session). This option mirrors the `-t` and `-T` flags for `ssh(1)`.

#### RevokedHostKeys

Specifies revoked host public keys. Keys listed in this file will be refused for host authentication. Note that if this file does not exist or is not readable, then host authentication will be refused for all hosts. Keys may be specified as a text file, listing one public key per line, or as an OpenSSH Key Revocation List (KRL) as generated by `ssh-keygen(1)`. For more information on KRLs, see the `KEY REVOCATION LISTS` section in `ssh-keygen(1)`.

#### RhostsRSAAuthentication

Specifies whether to try rhosts based authentication with RSA host authentication. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`. This option applies to protocol version 1 only and requires `ssh(1)` to be setuid root.

#### RSAAuthentication

Specifies whether to try RSA authentication. The argument to this keyword must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. RSA authentication will only be attempted if the identity file exists, or an authentication agent is running. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`. Note that this option applies to protocol version 1 only.

#### SendEnv

Specifies what variables from the local `environ(7)` should be sent to the server. The server must also support it, and the server must be configured to accept these environment variables. Note that the `TERM` environment variable is always sent whenever a pseudo-terminal is requested as it is required by the protocol. Refer to `AcceptEnv` in `sshd_config(5)` for how to configure the server. Variables are specified by name, which may contain wildcard characters. Multiple environment variables may be separated by whitespace or spread across multiple `SendEnv` directives. The default is not to send any environment variables.

See PATTERNS for more information on patterns.

#### ServerAliveCountMax

Sets the number of server alive messages (see below) which may be sent without ssh(1) receiving any messages back from the server.

If this threshold is reached while server alive messages are being sent, ssh will disconnect from the server, terminating the session. It is important to note that the use of server alive messages is very different from TCPKeepAlive (below). The server alive messages are sent through the encrypted channel and therefore will not be spoofable. The TCP keepalive option enabled by TCPKeepAlive is spoofable. The server alive mechanism is valuable when the client or server depend on knowing when a connection has become inactive.

The default value is 3. If, for example, ServerAliveInterval (see below) is set to 15 and ServerAliveCountMax is left at the default, if the server becomes unresponsive, ssh will disconnect after approximately 45 seconds.

#### ServerAliveInterval

Sets a timeout interval in seconds after which if no data has been received from the server, ssh(1) will send a message through the encrypted channel to request a response from the server. The default is 0, indicating that these messages will not be sent to the server.

#### StreamLocalBindMask

Sets the octal file creation mode mask (umask) used when creating a Unix-domain socket file for local or remote port forwarding. This option is only used for port forwarding to a Unix-domain socket file.

The default value is 0177, which creates a Unix-domain socket file that is readable and writable only by the owner. Note that not all operating systems honor the file mode on Unix-domain socket files.

#### StreamLocalBindUnlink

Specifies whether to remove an existing Unix-domain socket file for local or remote port forwarding before creating a new one. If the socket file already exists and StreamLocalBindUnlink is not enabled, ssh will be unable to forward the port to the Unix-domain socket file. This option is only used for port forwarding to a Unix-domain socket file.

The argument must be M-bM-^@M-^yesM-bM-^@M-^ or M-bM-^@M-^noM-bM-^@M-^]. The default

is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### StrictHostKeyChecking

If this flag is set to `M-bM-^@M-^\yesM-bM-^@M-^]`, `ssh(1)` will never automatically add host keys to the `~/.ssh/known_hosts` file, and refuses to connect to hosts whose host key has changed. This provides maximum protection against trojan horse attacks, though it can be annoying when the `/etc/ssh/ssh_known_hosts` file is poorly maintained or when connections to new hosts are frequently made. This option forces the user to manually add all new hosts. If this flag is set to `M-bM-^@M-^\noM-bM-^@M-^]`, `ssh` will automatically add new host keys to the user known hosts files. If this flag is set to `M-bM-^@M-^\askM-bM-^@M-^]`, new host keys will be added to the user known host files only after the user has confirmed that is what they really want to do, and `ssh` will refuse to connect to hosts whose host key has changed. The host keys of known hosts will be verified automatically in all cases. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]`, `M-bM-^@M-^\noM-bM-^@M-^]`, or `M-bM-^@M-^\askM-bM-^@M-^]`. The default is `M-bM-^@M-^\askM-bM-^@M-^]`.

#### TCPKeepAlive

Specifies whether the system should send TCP keepalive messages to the other side. If they are sent, death of the connection or crash of one of the machines will be properly noticed. However, this means that connections will die if the route is down temporarily, and some people find it annoying.

The default is `M-bM-^@M-^\yesM-bM-^@M-^]` (to send TCP keepalive messages), and the client will notice if the network goes down or the remote host dies. This is important in scripts, and many users want it too.

To disable TCP keepalive messages, the value should be set to `M-bM-^@M-^\noM-bM-^@M-^]`.

**Tunnel** Request `tun(4)` device forwarding between the client and the server. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]`, `M-bM-^@M-^\point-to-pointM-bM-^@M-^]` (layer 3), `M-bM-^@M-^\ethernetM-bM-^@M-^]` (layer 2), or `M-bM-^@M-^\noM-bM-^@M-^]`. Specifying `M-bM-^@M-^\yesM-bM-^@M-^]` requests the default tunnel mode, which is `M-bM-^@M-^\point-to-pointM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### TunnelDevice

Specifies the `tun(4)` devices to open on the client (`local_tun`) and the server (`remote_tun`).

The argument must be `local_tun[:remote_tun]`. The devices may be specified by numerical ID or the keyword `M-bM-^@M-^\anyM-bM-^@M-^]`, which uses the

next available tunnel device. If `remote_tun` is not specified, it defaults to `M-bM-^@M-^\anyM-bM-^@M-^]`. The default is `M-bM-^@M-^\any:anyM-bM-^@M-^]`.

#### UpdateHostKeys

Specifies whether `ssh(1)` should accept notifications of additional hostkeys from the server sent after authentication has completed and add them to `UserKnownHostsFile`. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]`, `M-bM-^@M-^\noM-bM-^@M-^]` (the default) or `M-bM-^@M-^\askM-bM-^@M-^]`. Enabling this option allows learning alternate hostkeys for a server and supports graceful key rotation by allowing a server to send replacement public keys before old ones are removed. Additional hostkeys are only accepted if the key used to authenticate the host was already trusted or explicitly accepted by the user. If `UpdateHostKeys` is set to `M-bM-^@M-^\askM-bM-^@M-^]`, then the user is asked to confirm the modifications to the `known_hosts` file. Confirmation is currently incompatible with `ControlPersist`, and will be disabled if it is enabled.

Presently, only `sshd(8)` from OpenSSH 6.8 and greater support the `M-bM-^@M-^\hostkeys@openssh.comM-bM-^@M-^]` protocol extension used to inform the client of all the server's hostkeys.

#### UsePrivilegedPort

Specifies whether to use a privileged port for outgoing connections. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`. If set to `M-bM-^@M-^\yesM-bM-^@M-^]`, `ssh(1)` must be setuid root.

Note that

this option must be set to `M-bM-^@M-^\yesM-bM-^@M-^]` for `RhostsRSAAuthentication` with older servers.

**User** Specifies the user to log in as. This can be useful when a different user name is used on different machines. This saves the trouble of having to remember to give the user name on the command line.

#### UserKnownHostsFile

Specifies one or more files to use for the user host key database, separated by whitespace. The default is `~/.ssh/known_hosts, ~/.ssh/known_hosts2`.

#### VerifyHostKeyDNS

Specifies whether to verify the remote key using DNS and SSHFP resource records. If this option is set to `M-bM-^@M-^\yesM-bM-^@M-^]`, the client will implicitly trust keys that match a secure fingerprint from DNS. Insecure fingerprints will be handled as if this option was set to `M-bM-^@M-^\askM-bM-^@M-^]`. If this option is set to `M-bM-^@M-^\askM-bM-^@M-^]`,

information on

fingerprints will be displayed, but the user will still need to confirm new host keys according to the `StrictHostKeyChecking` option. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]`, `M-bM-^@M-^\noM-bM-^@M-^]`, or `M-bM-^@M-^\askM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

See also `VERIFYING HOST KEYS` in `ssh(1)`.

#### VisualHostKey

If this flag is set to `M-bM-^@M-^\yesM-bM-^@M-^]`, an ASCII art representation of the remote host key fingerprint is printed in addition to the fingerprint string at login and for unknown host keys. If this flag is set to `M-bM-^@M-^\noM-bM-^@M-^]`, no fingerprint strings are printed at login and only the fingerprint string will be printed for unknown host keys. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### XAuthLocation

Specifies the full pathname of the `xauth(1)` program. The default is `/usr/X11R6/bin/xauth`.

## PATTERNS

A pattern consists of zero or more non-whitespace characters, `M-bM-^@M-^X*M-bM-^@M-^Y` (a wildcard that matches zero or more characters), or `M-bM-^@M-^X?M-bM-^@M-^Y` (a wildcard that matches exactly one character). For example, to specify a set of declarations for any host in the `M-bM-^@M-^\co.ukM-bM-^@M-^]` set of domains, the following pattern could be used:

```
Host *.co.uk
```

The following pattern would match any host in the `192.168.0.[0-9]` network range:

```
Host 192.168.0.?
```

A pattern-list is a comma-separated list of patterns. Patterns within pattern-lists may be negated by preceding them with an exclamation mark (`M-bM-^@M-^X!M-bM-^@M-^Y`). For example, to allow a key to be used from anywhere within an organization except from the `M-bM-^@M-^\dialupM-bM-^@M-^]` pool, the following entry (in `authorized_keys`) could be used:

```
from="!*dialup.example.com,*.example.com"
```

## FILES

```
~/.ssh/config
```

This is the per-user configuration file. The format of this file is described above. This file is used by the SSH client.

Because of the potential for abuse, this file must have strict

permissions: read/write for the user, and not accessible by others.

/etc/ssh/ssh\_config

Systemwide configuration file. This file provides defaults for those values that are not specified in the user's configuration file, and for those users who do not have a configuration file. This file must be world-readable.

## SEE ALSO

ssh(1)

## AUTHORS

OpenSSH is a derivative of the original and free ssh 1.2.12 release by Tatu Ylonen. Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt and Dug Song removed many bugs, re-added newer features and created OpenSSH. Markus Friedl contributed the support for SSH protocol versions 1.5 and 2.0.

.Dt SSH\_CONFIG 5

.Os

.Sh NAME

.Nm ssh\_config

.Nd OpenSSH SSH client configuration files

.Sh SYNOPSIS

.Nm ~/.ssh/config

.Nm /etc/ssh/ssh\_config

.Sh DESCRIPTION

.Xr ssh 1

obtains configuration data from the following sources in  
the following order:

.Pp

.Bl -enum -offset indent -compact

.It

command-line options

.It

user's configuration file

.Pq Pa ~/.ssh/config

.It

system-wide configuration file

.Pq Pa /etc/ssh/ssh\_config

.El

.Pp

For each parameter, the first obtained value  
will be used.

The configuration files contain sections separated by

.Dq Host

specifications, and that section is only applied for hosts that  
match one of the patterns given in the specification.

The matched host name is usually the one given on the command line  
(see the

.Cm CanonicalizeHostname

option for exceptions.)

.Pp

Since the first obtained value for each parameter is used, more  
host-specific declarations should be given near the beginning of the  
file, and general defaults at the end.

.Pp

The configuration file has the following format:

.Pp

Empty lines and lines starting with

.Ql #

are comments.

Otherwise a line is of the format

.Dq keyword arguments .

Configuration options may be separated by whitespace or optional whitespace and exactly one

.Ql = ;

the latter format is useful to avoid the need to quote whitespace when specifying configuration options using the

.Nm ssh ,

.Nm scp ,

and

.Nm sftp

.Fl o

option.

Arguments may optionally be enclosed in double quotes

.Pq \&"

in order to represent arguments containing spaces.

.Pp

The possible

keywords and their meanings are as follows (note that keywords are case-insensitive and arguments are case-sensitive):

.Bl -tag -width Ds

.It Cm Host

Restricts the following declarations (up to the next

.Cm Host

or

.Cm Match

keyword) to be only for those hosts that match one of the patterns given after the keyword.

If more than one pattern is provided, they should be separated by whitespace.

A single

.Ql \*

as a pattern can be used to provide global defaults for all hosts.

The host is usually the

.Ar hostname

argument given on the command line

(see the

.Cm CanonicalizeHostname

option for exceptions.)

.Pp

A pattern entry may be negated by prefixing it with an exclamation mark

.Pq Sq !\& .

If a negated entry is matched, then the

.Cm Host

entry is ignored, regardless of whether any other patterns on the line match.

Negated matches are therefore useful to provide exceptions for wildcard matches.

.Pp

See

.Sx PATTERNS

for more information on patterns.

.It Cm Match

Restricts the following declarations (up to the next

.Cm Host

or

.Cm Match

keyword) to be used only when the conditions following the

.Cm Match

keyword are satisfied.

Match conditions are specified using one or more criteria

or the single token

.Cm all

which always matches.

The available criteria keywords are:

.Cm canonical ,

.Cm exec ,

.Cm host ,

.Cm originalhost ,

.Cm user ,

and

.Cm localuser .

The

.Cm all

criteria must appear alone or immediately after

.Cm canonical .

Other criteria may be combined arbitrarily.

All criteria but

.Cm all

and

.Cm canonical

require an argument.

Criteria may be negated by prepending an exclamation mark

.Pq Sq !\& .

.Pp

The

.Cm canonical

keyword matches only when the configuration file is being re-parsed

after hostname canonicalization (see the

.Cm CanonicalizeHostname

option.)

This may be useful to specify conditions that work with canonical host names only.

The

`.Cm exec`

keyword executes the specified command under the user's shell.

If the command returns a zero exit status then the condition is considered true.

Commands containing whitespace characters must be quoted.

The following character sequences in the command will be expanded prior to execution:

`.Ql %L`

will be substituted by the first component of the local host name,

`.Ql %l`

will be substituted by the local host name (including any domain name),

`.Ql %h`

will be substituted by the target host name,

`.Ql %n`

will be substituted by the original target host name

specified on the command-line,

`.Ql %p`

the destination port,

`.Ql %r`

by the remote login username, and

`.Ql %u`

by the username of the user running

`.Xr ssh 1 .`

`.Pp`

The other keywords' criteria must be single entries or comma-separated lists and may use the wildcard and negation operators described in the

`.Sx PATTERNS`

section.

The criteria for the

`.Cm host`

keyword are matched against the target hostname, after any substitution

by the

`.Cm Hostname`

or

`.Cm CanonicalizeHostname`

options.

The

`.Cm originalhost`

keyword matches against the hostname as it was specified on the command-line.

The

`.Cm user`

keyword matches against the target username on the remote host.

The

`.Cm localuser`

keyword matches against the name of the local user running

`.Xr ssh 1`

(this keyword may be useful in system-wide

.Nm

files).

.It Cm AddKeysToAgent

Specifies whether keys should be automatically added to a running

.Xr ssh-agent 1 .

If this option is set to

.Dq yes

and a key is loaded from a file, the key and its passphrase are added to the agent with the default lifetime, as if by

.Xr ssh-add 1 .

If this option is set to

.Dq ask ,

.Nm ssh

will require confirmation using the

.Ev SSH\_ASKPASS

program before adding a key (see

.Xr ssh-add 1

for details).

If this option is set to

.Dq confirm ,

each use of the key must be confirmed, as if the

.Fl c

option was specified to

.Xr ssh-add 1 .

If this option is set to

.Dq no ,

no keys are added to the agent.

The argument must be

.Dq yes ,

.Dq confirm ,

.Dq ask ,

or

.Dq no .

The default is

.Dq no .

.It Cm AddressFamily

Specifies which address family to use when connecting.

Valid arguments are

.Dq any ,

.Dq inet

(use IPv4 only), or

.Dq inet6

(use IPv6 only).

The default is

.Dq any .

.It Cm BatchMode

If set to

.Dq yes ,  
passphrase/password querying will be disabled.  
This option is useful in scripts and other batch jobs where no user  
is present to supply the password.  
The argument must be  
.Dq yes  
or  
.Dq no .  
The default is  
.Dq no .  
.It Cm BindAddress  
Use the specified address on the local machine as the source address of  
the connection.  
Only useful on systems with more than one address.  
Note that this option does not work if  
.Cm UsePrivilegedPort  
is set to  
.Dq yes .  
.It Cm CanonicalDomains  
When  
.Cm CanonicalizeHostname  
is enabled, this option specifies the list of domain suffixes in which to  
search for the specified destination host.  
.It Cm CanonicalizeFallbackLocal  
Specifies whether to fail with an error when hostname canonicalization fails.  
The default,  
.Dq yes ,  
will attempt to look up the unqualified hostname using the system resolver's  
search rules.  
A value of  
.Dq no  
will cause  
.Xr ssh 1  
to fail instantly if  
.Cm CanonicalizeHostname  
is enabled and the target hostname cannot be found in any of the domains  
specified by  
.Cm CanonicalDomains .  
.It Cm CanonicalizeHostname  
Controls whether explicit hostname canonicalization is performed.  
The default,  
.Dq no ,  
is not to perform any name rewriting and let the system resolver handle all  
hostname lookups.  
If set to  
.Dq yes  
then, for connections that do not use a  
.Cm ProxyCommand ,

.Xr ssh 1

will attempt to canonicalize the hostname specified on the command line using the

.Cm CanonicalDomains  
suffixes and

.Cm CanonicalizePermittedCNAMEs  
rules.

If

.Cm CanonicalizeHostname

is set to

.Dq always ,  
then canonicalization is applied to proxied connections too.

.Pp

If this option is enabled, then the configuration files are processed again using the new target name to pick up any new configuration in matching

.Cm Host  
and

.Cm Match  
stanzas.

.It Cm CanonicalizeMaxDots

Specifies the maximum number of dot characters in a hostname before canonicalization is disabled.

The default,

.Dq 1 ,  
allows a single dot (i.e. hostname.subdomain).

.It Cm CanonicalizePermittedCNAMEs

Specifies rules to determine whether CNAMEs should be followed when canonicalizing hostnames.

The rules consist of one or more arguments of

.Ar source\_domain\_list : Ns Ar target\_domain\_list ,  
where

.Ar source\_domain\_list

is a pattern-list of domains that may follow CNAMEs in canonicalization,  
and

.Ar target\_domain\_list

is a pattern-list of domains that they may resolve to.

.Pp

For example,

.Dq \*.a.example.com:\*.b.example.com,\*.c.example.com  
will allow hostnames matching

.Dq \*.a.example.com  
to be canonicalized to names in the

.Dq \*.b.example.com

or

.Dq \*.c.example.com

domains.

.It Cm CertificateFile

Specifies a file from which the user's certificate is read.

A corresponding private key must be provided separately in order to use this certificate either from an `.Cm IdentityFile` directive or `.Fl i` flag to `.Xr ssh 1`, via `.Xr ssh-agent 1`, or via a `.Cm PKCS11Provider`. `.Pp`

The file name may use the tilde syntax to refer to a user's home directory or one of the following escape characters:

`.Ql %d`  
(local user's home directory),  
`.Ql %u`  
(local user name),  
`.Ql %l`  
(local host name),  
`.Ql %h`  
(remote host name) or  
`.Ql %r`  
(remote user name).  
`.Pp`

It is possible to have multiple certificate files specified in configuration files; these certificates will be tried in sequence.

#### Multiple

`.Cm CertificateFile` directives will add to the list of certificates used for authentication.

`.It Cm ChallengeResponseAuthentication`  
Specifies whether to use challenge-response authentication. The argument to this keyword must be

`.Dq yes`  
or  
`.Dq no`.

The default is

`.Dq yes`.

`.It Cm CheckHostIP`

If this flag is set to

`.Dq yes`,  
`.Xr ssh 1`

will additionally check the host IP address in the

`.Pa known_hosts` file.

This allows ssh to detect if a host key changed due to DNS spoofing and will add addresses of destination hosts to

```
.Pa ~/.ssh/known_hosts
```

in the process, regardless of the setting of

```
.Cm StrictHostKeyChecking .
```

If the option is set to

```
.Dq no ,
```

the check will not be executed.

The default is

```
.Dq yes .
```

```
.It Cm Cipher
```

Specifies the cipher to use for encrypting the session in protocol version 1.

Currently,

```
.Dq blowfish ,
```

```
.Dq 3des ,
```

and

```
.Dq des
```

are supported.

```
.Ar des
```

is only supported in the

```
.Xr ssh 1
```

client for interoperability with legacy protocol 1 implementations that do not support the

```
.Ar 3des
```

cipher.

Its use is strongly discouraged due to cryptographic weaknesses.

The default is

```
.Dq 3des .
```

```
.It Cm Ciphers
```

Specifies the ciphers allowed for protocol version 2 in order of preference.

Multiple ciphers must be comma-separated.

If the specified value begins with a

```
.Sq +
```

character, then the specified ciphers will be appended to the default set instead of replacing them.

```
.Pp
```

The supported ciphers are:

```
.Pp
```

```
.Bl -item -compact -offset indent
```

```
.It
```

```
3des-cbc
```

```
.It
```

```
aes128-cbc
```

```
.It
```

```
aes192-cbc
```

```
.It
```

aes256-cbc  
.It  
aes128-ctr  
.It  
aes192-ctr  
.It  
aes256-ctr  
.It  
aes128-gcm@openssh.com  
.It  
aes256-gcm@openssh.com  
.It  
arcfour  
.It  
arcfour128  
.It  
arcfour256  
.It  
blowfish-cbc  
.It  
cast128-cbc  
.It  
chacha20-poly1305@openssh.com  
.El  
.Pp  
The default is:  
.Bd -literal -offset indent  
chacha20-poly1305@openssh.com,  
aes128-ctr,aes192-ctr,aes256-ctr,  
aes128-gcm@openssh.com,aes256-gcm@openssh.com,  
aes128-cbc,aes192-cbc,aes256-cbc,3des-cbc  
.Ed  
.Pp

The list of available ciphers may also be obtained using the

.Fl Q  
option of  
.Xr ssh 1  
with an argument of  
.Dq cipher .  
.It Cm ClearAllForwardings

Specifies that all local, remote, and dynamic port forwardings specified in the configuration files or on the command line be cleared.

This option is primarily useful when used from the

.Xr ssh 1  
command line to clear port forwardings set in configuration files, and is automatically set by  
.Xr scp 1

and

.Xr sftp 1 .

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.It Cm Compression

Specifies whether to use compression.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.It Cm CompressionLevel

Specifies the compression level to use if compression is enabled.

The argument must be an integer from 1 (fast) to 9 (slow, best).

The default level is 6, which is good for most applications.

The meaning of the values is the same as in

.Xr gzip 1 .

Note that this option applies to protocol version 1 only.

.It Cm ConnectionAttempts

Specifies the number of tries (one per second) to make before exiting.

The argument must be an integer.

This may be useful in scripts if the connection sometimes fails.

The default is 1.

.It Cm ConnectTimeout

Specifies the timeout (in seconds) used when connecting to the SSH server, instead of using the default system TCP timeout.

This value is used only when the target is down or really unreachable, not when it refuses the connection.

.It Cm ControlMaster

Enables the sharing of multiple sessions over a single network connection.

When set to

.Dq yes ,

.Xr ssh 1

will listen for connections on a control socket specified using the

.Cm ControlPath

argument.

Additional sessions can connect to this socket using the same

.Cm ControlPath

with

.Cm ControlMaster

set to

.Dq no

(the default).

These sessions will try to reuse the master instance's network connection rather than initiating new ones, but will fall back to connecting normally if the control socket does not exist, or is not listening.

.Pp

Setting this to

.Dq ask

will cause ssh

to listen for control connections, but require confirmation using

.Xr ssh-askpass 1 .

If the

.Cm ControlPath

cannot be opened,

ssh will continue without connecting to a master instance.

.Pp

X11 and

.Xr ssh-agent 1

forwarding is supported over these multiplexed connections, however the display and agent forwarded will be the one belonging to the master connection i.e. it is not possible to forward multiple displays or agents.

.Pp

Two additional options allow for opportunistic multiplexing: try to use a master connection but fall back to creating a new one if one does not already exist.

These options are:

.Dq auto

and

.Dq autoask .

The latter requires confirmation like the

.Dq ask

option.

.It Cm ControlPath

Specify the path to the control socket used for connection sharing as described in the

.Cm ControlMaster

section above or the string

.Dq none

to disable connection sharing.

In the path,

.Ql %L

will be substituted by the first component of the local host name,

.Ql %l

will be substituted by the local host name (including any domain name),

.Ql %h

will be substituted by the target host name,

.Ql %n

will be substituted by the original target host name

specified on the command line,

.Ql %p

the destination port,

.Ql %r

by the remote login username,

.Ql %u

by the username and

.Ql %i

by the numeric user ID (uid) of the user running

.Xr ssh 1 ,

and

.Ql \&%C

by a hash of the concatenation: %l%h%p%r.

It is recommended that any

.Cm ControlPath

used for opportunistic connection sharing include

at least %h, %p, and %r (or alternatively %C) and be placed in a directory

that is not writable by other users.

This ensures that shared connections are uniquely identified.

.It Cm ControlPersist

When used in conjunction with

.Cm ControlMaster ,

specifies that the master connection should remain open

in the background (waiting for future client connections)

after the initial client connection has been closed.

If set to

.Dq no ,

then the master connection will not be placed into the background,

and will close as soon as the initial client connection is closed.

If set to

.Dq yes

or

.Dq 0 ,

then the master connection will remain in the background indefinitely

(until killed or closed via a mechanism such as the

.Xr ssh 1

.Dq Fl O No exit

option).

If set to a time in seconds, or a time in any of the formats documented in

.Xr sshd\_config 5 ,

then the backgrounded master connection will automatically terminate

after it has remained idle (with no client connections) for the

specified time.

.It Cm DynamicForward

Specifies that a TCP port on the local machine be forwarded

over the secure channel, and the application

protocol is then used to determine where to connect to from the

remote machine.

.Pp

The argument must be

.Sm off  
.Oo Ar bind\_address : Oc Ar port .  
.Sm on  
IPv6 addresses can be specified by enclosing addresses in square brackets.  
By default, the local port is bound in accordance with the  
.Cm GatewayPorts  
setting.  
However, an explicit  
.Ar bind\_address  
may be used to bind the connection to a specific address.  
The  
.Ar bind\_address  
of  
.Dq localhost  
indicates that the listening port be bound for local use only, while an  
empty address or  
.Sq \*  
indicates that the port should be available from all interfaces.  
.Pp  
Currently the SOCKS4 and SOCKS5 protocols are supported, and  
.Xr ssh 1  
will act as a SOCKS server.  
Multiple forwardings may be specified, and  
additional forwardings can be given on the command line.  
Only the superuser can forward privileged ports.  
.It Cm EnableSSHKeysign  
Setting this option to  
.Dq yes  
in the global client configuration file  
.Pa /etc/ssh/ssh\_config  
enables the use of the helper program  
.Xr ssh-keysign 8  
during  
.Cm HostbasedAuthentication .  
The argument must be  
.Dq yes  
or  
.Dq no .  
The default is  
.Dq no .  
This option should be placed in the non-hostspecific section.  
See  
.Xr ssh-keysign 8  
for more information.  
.It Cm EscapeChar  
Sets the escape character (default:  
.Ql ~ ) .  
The escape character can also

be set on the command line.

The argument should be a single character,

.Ql ^

followed by a letter, or

.Dq none

to disable the escape

character entirely (making the connection transparent for binary data).

.It Cm ExitOnForwardFailure

Specifies whether

.Xr ssh 1

should terminate the connection if it cannot set up all requested dynamic, tunnel, local, and remote port forwardings, (e.g. \& if either end is unable to bind and listen on a specified port).

Note that

.Cm ExitOnForwardFailure

does not apply to connections made over port forwardings and will not, for example, cause

.Xr ssh 1

to exit if TCP connections to the ultimate forwarding destination fail.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.It Cm FingerprintHash

Specifies the hash algorithm used when displaying key fingerprints.

Valid options are:

.Dq md5

and

.Dq sha256 .

The default is

.Dq sha256 .

.It Cm ForwardAgent

Specifies whether the connection to the authentication agent (if any) will be forwarded to the remote machine.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.Pp

Agent forwarding should be enabled with caution.

Users with the ability to bypass file permissions on the remote host (for the agent's Unix-domain socket)

can access the local agent through the forwarded connection.

An attacker cannot obtain key material from the agent, however they can perform operations on the keys that enable them to authenticate using the identities loaded into the agent.

.It Cm ForwardX11

Specifies whether X11 connections will be automatically redirected over the secure channel and

.Ev DISPLAY

set.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.Pp

X11 forwarding should be enabled with caution.

Users with the ability to bypass file permissions on the remote host (for the user's X11 authorization database)

can access the local X11 display through the forwarded connection.

An attacker may then be able to perform activities such as keystroke monitoring if the

.Cm ForwardX11Trusted

option is also enabled.

.It Cm ForwardX11Timeout

Specify a timeout for untrusted X11 forwarding

using the format described in the

TIME FORMATS section of

.Xr sshd\_config 5 .

X11 connections received by

.Xr ssh 1

after this time will be refused.

The default is to disable untrusted X11 forwarding after twenty minutes has elapsed.

.It Cm ForwardX11Trusted

If this option is set to

.Dq yes ,

remote X11 clients will have full access to the original X11 display.

.Pp

If this option is set to

.Dq no ,

remote X11 clients will be considered untrusted and prevented from stealing or tampering with data belonging to trusted X11 clients.

Furthermore, the

.Xr xauth 1

token used for the session will be set to expire after 20 minutes.

Remote clients will be refused access after this time.

.Pp

The default is

.Dq no .

.Pp

See the X11 SECURITY extension specification for full details on the restrictions imposed on untrusted clients.

.It Cm GatewayPorts

Specifies whether remote hosts are allowed to connect to local forwarded ports.

By default,

.Xr ssh 1

binds local port forwardings to the loopback address.

This prevents other remote hosts from connecting to forwarded ports.

.Cm GatewayPorts

can be used to specify that ssh

should bind local port forwardings to the wildcard address,

thus allowing remote hosts to connect to forwarded ports.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.It Cm GlobalKnownHostsFile

Specifies one or more files to use for the global host key database, separated by whitespace.

The default is

.Pa /etc/ssh/ssh\_known\_hosts ,

.Pa /etc/ssh/ssh\_known\_hosts2 .

.It Cm GSSAPIAuthentication

Specifies whether user authentication based on GSSAPI is allowed.

The default is

.Dq no .

.It Cm GSSAPIDelegateCredentials

Forward (delegate) credentials to the server.

The default is

.Dq no .

.It Cm HashKnownHosts

Indicates that

.Xr ssh 1

should hash host names and addresses when they are added to

.Pa ~/.ssh/known\_hosts .

These hashed names may be used normally by

.Xr ssh 1

and

.Xr sshd 8 ,

but they do not reveal identifying information should the file's contents be disclosed.

The default is

.Dq no .

Note that existing names and addresses in known hosts files will not be converted automatically, but may be manually hashed using

.Xr ssh-keygen 1 .

.It Cm HostbasedAuthentication

Specifies whether to try rhosts based authentication with public key authentication.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.It Cm HostbasedKeyTypes

Specifies the key types that will be used for hostbased authentication as a comma-separated pattern list.

Alternately if the specified value begins with a

.Sq +

character, then the specified key types will be appended to the default set instead of replacing them.

The default for this option is:

.Bd -literal -offset 3n

ecdsa-sha2-nistp256-cert-v01@openssh.com,

ecdsa-sha2-nistp384-cert-v01@openssh.com,

ecdsa-sha2-nistp521-cert-v01@openssh.com,

ssh-ed25519-cert-v01@openssh.com,

ssh-rsa-cert-v01@openssh.com,

ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,

ssh-ed25519,ssh-rsa

.Ed

.Pp

The

.Fl Q

option of

.Xr ssh 1

may be used to list supported key types.

.It Cm HostKeyAlgorithms

Specifies the host key algorithms

that the client wants to use in order of preference.

Alternately if the specified value begins with a

.Sq +

character, then the specified key types will be appended to the default set instead of replacing them.

The default for this option is:

.Bd -literal -offset 3n

ecdsa-sha2-nistp256-cert-v01@openssh.com,

ecdsa-sha2-nistp384-cert-v01@openssh.com,

ecdsa-sha2-nistp521-cert-v01@openssh.com,  
ssh-ed25519-cert-v01@openssh.com,  
ssh-rsa-cert-v01@openssh.com,  
ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,  
ssh-ed25519,ssh-rsa

.Ed

.Pp

If hostkeys are known for the destination host then this default is modified to prefer their algorithms.

.Pp

The list of available key types may also be obtained using the

.Fl Q

option of

.Xr ssh 1

with an argument of

.Dq key .

.It Cm HostKeyAlias

Specifies an alias that should be used instead of the real host name when looking up or saving the host key in the host key database files.

This option is useful for tunneling SSH connections or for multiple servers running on a single host.

.It Cm HostName

Specifies the real host name to log into.

This can be used to specify nicknames or abbreviations for hosts.

If the hostname contains the character sequence

.Ql %h ,

then this will be replaced with the host name specified on the command line (this is useful for manipulating unqualified names).

The character sequence

.Ql %%

will be replaced by a single

.Ql %

character, which may be used when specifying IPv6 link-local addresses.

.Pp

The default is the name given on the command line.

Numeric IP addresses are also permitted (both on the command line and in

.Cm HostName

specifications).

.It Cm IdentitiesOnly

Specifies that

.Xr ssh 1

should only use the authentication identity and certificate files explicitly configured in the

.Nm

files

or passed on the

.Xr ssh 1

command-line,

even if

.Xr ssh-agent 1

or a

.Cm PKCS11Provider

offers more identities.

The argument to this keyword must be

.Dq yes

or

.Dq no .

This option is intended for situations where ssh-agent

offers many different identities.

The default is

.Dq no .

.It Cm IdentityFile

Specifies a file from which the user's DSA, ECDSA, Ed25519 or RSA authentication identity is read.

The default is

.Pa ~/.ssh/identity

for protocol version 1, and

.Pa ~/.ssh/id\_dsa ,

.Pa ~/.ssh/id\_ecdsa ,

.Pa ~/.ssh/id\_ed25519

and

.Pa ~/.ssh/id\_rsa

for protocol version 2.

Additionally, any identities represented by the authentication agent

will be used for authentication unless

.Cm IdentitiesOnly

is set.

If no certificates have been explicitly specified by

.Cm CertificateFile ,

.Xr ssh 1

will try to load certificate information from the filename obtained by

appending

.Pa -cert.pub

to the path of a specified

.Cm IdentityFile .

.Pp

The file name may use the tilde

syntax to refer to a user's home directory or one of the following

escape characters:

.Ql %d

(local user's home directory),

.Ql %u

(local user name),

.Ql %l

(local host name),

.Ql %h

(remote host name) or

.Ql %r

(remote user name).

.Pp

It is possible to have

multiple identity files specified in configuration files; all these identities will be tried in sequence.

Multiple

.Cm IdentityFile

directives will add to the list of identities tried (this behaviour differs from that of other configuration directives).

.Pp

.Cm IdentityFile

may be used in conjunction with

.Cm IdentitiesOnly

to select which identities in an agent are offered during authentication.

.Cm IdentityFile

may also be used in conjunction with

.Cm CertificateFile

in order to provide any certificate also needed for authentication with the identity.

.It Cm IgnoreUnknown

Specifies a pattern-list of unknown options to be ignored if they are encountered in configuration parsing.

This may be used to suppress errors if

.Nm

contains options that are unrecognised by

.Xr ssh 1 .

It is recommended that

.Cm IgnoreUnknown

be listed early in the configuration file as it will not be applied to unknown options that appear before it.

.It Cm IPQoS

Specifies the IPv4 type-of-service or DSCP class for connections.

Accepted values are

.Dq af11 ,

.Dq af12 ,

.Dq af13 ,

.Dq af21 ,

.Dq af22 ,

.Dq af23 ,

.Dq af31 ,

.Dq af32 ,

.Dq af33 ,

.Dq af41 ,

.Dq af42 ,

.Dq af43 ,

.Dq cs0 ,  
.Dq cs1 ,  
.Dq cs2 ,  
.Dq cs3 ,  
.Dq cs4 ,  
.Dq cs5 ,  
.Dq cs6 ,  
.Dq cs7 ,  
.Dq ef ,  
.Dq lowdelay ,  
.Dq throughput ,  
.Dq reliability ,  
or a numeric value.

This option may take one or two arguments, separated by whitespace.

If one argument is specified, it is used as the packet class unconditionally.

If two values are specified, the first is automatically selected for interactive sessions and the second for non-interactive sessions.

The default is

.Dq lowdelay

for interactive sessions and

.Dq throughput

for non-interactive sessions.

.It Cm KbdInteractiveAuthentication

Specifies whether to use keyboard-interactive authentication.

The argument to this keyword must be

.Dq yes

or

.Dq no .

The default is

.Dq yes .

.It Cm KbdInteractiveDevices

Specifies the list of methods to use in keyboard-interactive authentication.

Multiple method names must be comma-separated.

The default is to use the server specified list.

The methods available vary depending on what the server supports.

For an OpenSSH server,

it may be zero or more of:

.Dq bsdauth ,

.Dq pam ,

and

.Dq skey .

.It Cm KexAlgorithms

Specifies the available KEX (Key Exchange) algorithms.

Multiple algorithms must be comma-separated.

Alternately if the specified value begins with a

.Sq +

character, then the specified methods will be appended to the default set

instead of replacing them.

The default is:

.Bd -literal -offset indent

curve25519-sha256@libssh.org,

ecdh-sha2-nistp256,ecdh-sha2-nistp384,ecdh-sha2-nistp521,

diffie-hellman-group-exchange-sha256,

diffie-hellman-group-exchange-sha1,

diffie-hellman-group14-sha1

.Ed

.Pp

The list of available key exchange algorithms may also be obtained using the

.Fl Q

option of

.Xr ssh 1

with an argument of

.Dq kex .

.It Cm LocalCommand

Specifies a command to execute on the local machine after successfully connecting to the server.

The command string extends to the end of the line, and is executed with the user's shell.

The following escape character substitutions will be performed:

.Ql %d

(local user's home directory),

.Ql %h

(remote host name),

.Ql %l

(local host name),

.Ql %n

(host name as provided on the command line),

.Ql %p

(remote port),

.Ql %r

(remote user name) or

.Ql %u

(local user name) or

.Ql \&%C

by a hash of the concatenation: %l%h%p%r.

.Pp

The command is run synchronously and does not have access to the session of the

.Xr ssh 1

that spawned it.

It should not be used for interactive commands.

.Pp

This directive is ignored unless

.Cm PermitLocalCommand

has been enabled.

.It Cm LocalForward

Specifies that a TCP port on the local machine be forwarded over the secure channel to the specified host and port from the remote machine.

The first argument must be

`.Sm off`

`.Oo Ar bind_address : Oc Ar port`

`.Sm on`

and the second argument must be

`.Ar host : Ns Ar hostport .`

IPv6 addresses can be specified by enclosing addresses in square brackets.

Multiple forwardings may be specified, and additional forwardings can be given on the command line.

Only the superuser can forward privileged ports.

By default, the local port is bound in accordance with the

`.Cm GatewayPorts`

setting.

However, an explicit

`.Ar bind_address`

may be used to bind the connection to a specific address.

The

`.Ar bind_address`

of

`.Dq localhost`

indicates that the listening port be bound for local use only, while an empty address or

`.Sq *`

indicates that the port should be available from all interfaces.

`.It Cm LogLevel`

Gives the verbosity level that is used when logging messages from

`.Xr ssh 1 .`

The possible values are:

QUIET, FATAL, ERROR, INFO, VERBOSE, DEBUG, DEBUG1, DEBUG2, and DEBUG3.

The default is INFO.

DEBUG and DEBUG1 are equivalent.

DEBUG2 and DEBUG3 each specify higher levels of verbose output.

`.It Cm MACs`

Specifies the MAC (message authentication code) algorithms

in order of preference.

The MAC algorithm is used for data integrity protection.

Multiple algorithms must be comma-separated.

If the specified value begins with a

`.Sq +`

character, then the specified algorithms will be appended to the default set instead of replacing them.

`.Pp`

The algorithms that contain

`.Dq -etm`

calculate the MAC after encryption (encrypt-then-mac).

These are considered safer and their use recommended.

.Pp

The default is:

.Bd -literal -offset indent

umac-64-etm@openssh.com,umac-128-etm@openssh.com,  
hmac-sha2-256-etm@openssh.com,hmac-sha2-512-etm@openssh.com,  
hmac-sha1-etm@openssh.com,  
umac-64@openssh.com,umac-128@openssh.com,  
hmac-sha2-256,hmac-sha2-512,hmac-sha1

.Ed

.Pp

The list of available MAC algorithms may also be obtained using the

.F1 Q

option of

.Xr ssh 1

with an argument of

.Dq mac .

.It Cm NoHostAuthenticationForLocalhost

This option can be used if the home directory is shared across machines.

In this case localhost will refer to a different machine on each of  
the machines and the user will get many warnings about changed host keys.

However, this option disables host authentication for localhost.

The argument to this keyword must be

.Dq yes

or

.Dq no .

The default is to check the host key for localhost.

.It Cm NumberOfPasswordPrompts

Specifies the number of password prompts before giving up.

The argument to this keyword must be an integer.

The default is 3.

.It Cm PasswordAuthentication

Specifies whether to use password authentication.

The argument to this keyword must be

.Dq yes

or

.Dq no .

The default is

.Dq yes .

.It Cm PermitLocalCommand

Allow local command execution via the

.Ic LocalCommand

option or using the

.Ic !\& Ns Ar command

escape sequence in

.Xr ssh 1 .

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.It Cm PKCS11Provider

Specifies which PKCS#11 provider to use.

The argument to this keyword is the PKCS#11 shared library

.Xr ssh 1

should use to communicate with a PKCS#11 token providing the user's private RSA key.

.It Cm Port

Specifies the port number to connect on the remote host.

The default is 22.

.It Cm PreferredAuthentications

Specifies the order in which the client should try authentication methods.

This allows a client to prefer one method (e.g.\&

.Cm keyboard-interactive )

over another method (e.g.\&

.Cm password ) .

The default is:

.Bd -literal -offset indent

gssapi-with-mic,hostbased,publickey,

keyboard-interactive,password

.Ed

.It Cm Protocol

Specifies the protocol versions

.Xr ssh 1

should support in order of preference.

The possible values are

.Sq 1

and

.Sq 2 .

Multiple versions must be comma-separated.

When this option is set to

.Dq 2,1

.Nm ssh

will try version 2 and fall back to version 1

if version 2 is not available.

The default is

.Sq 2 .

Protocol 1 suffers from a number of cryptographic weaknesses and should not be used.

It is only offered to support legacy devices.

.It Cm ProxyCommand

Specifies the command to use to connect to the server.

The command

string extends to the end of the line, and is executed

using the user's shell

.Ql exec

directive to avoid a lingering shell process.

.Pp

In the command string, any occurrence of

.Ql %h

will be substituted by the host name to

connect,

.Ql %p

by the port, and

.Ql %r

by the remote user name.

The command can be basically anything,

and should read from its standard input and write to its standard output.

It should eventually connect an

.Xr sshd 8

server running on some machine, or execute

.Ic sshd -i

somewhere.

Host key management will be done using the

HostName of the host being connected (defaulting to the name typed by

the user).

Setting the command to

.Dq none

disables this option entirely.

Note that

.Cm CheckHostIP

is not available for connects with a proxy command.

.Pp

This directive is useful in conjunction with

.Xr nc 1

and its proxy support.

For example, the following directive would connect via an HTTP proxy at 192.0.2.0:

.Bd -literal -offset 3n

ProxyCommand /usr/bin/nc -X connect -x 192.0.2.0:8080 %h %p

.Ed

.It Cm ProxyUseFdpass

Specifies that

.Cm ProxyCommand

will pass a connected file descriptor back to

.Xr ssh 1

instead of continuing to execute and pass data.

The default is

.Dq no .

.It Cm PubkeyAcceptedKeyTypes

Specifies the key types that will be used for public key authentication

as a comma-separated pattern list.

Alternately if the specified value begins with a

.Sq +

character, then the key types after it will be appended to the default instead of replacing it.

The default for this option is:

.Bd -literal -offset 3n

ecdsa-sha2-nistp256-cert-v01@openssh.com,

ecdsa-sha2-nistp384-cert-v01@openssh.com,

ecdsa-sha2-nistp521-cert-v01@openssh.com,

ssh-ed25519-cert-v01@openssh.com,

ssh-rsa-cert-v01@openssh.com,

ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,

ssh-ed25519,ssh-rsa

.Ed

.Pp

The

.Fl Q

option of

.Xr ssh 1

may be used to list supported key types.

.It Cm PubkeyAuthentication

Specifies whether to try public key authentication.

The argument to this keyword must be

.Dq yes

or

.Dq no .

The default is

.Dq yes .

.It Cm RekeyLimit

Specifies the maximum amount of data that may be transmitted before the session key is renegotiated, optionally followed a maximum amount of time that may pass before the session key is renegotiated.

The first argument is specified in bytes and may have a suffix of

.Sq K ,

.Sq M ,

or

.Sq G

to indicate Kilobytes, Megabytes, or Gigabytes, respectively.

The default is between

.Sq 1G

and

.Sq 4G ,

depending on the cipher.

The optional second value is specified in seconds and may use any of the units documented in the

TIME FORMATS section of

.Xr sshd\_config 5 .

The default value for

.Cm RekeyLimit

is

.Dq default none ,  
which means that rekeying is performed after the cipher's default amount of data has been sent or received and no time based rekeying is done.

.It Cm RemoteForward

Specifies that a TCP port on the remote machine be forwarded over the secure channel to the specified host and port from the local machine.

The first argument must be

.Sm off

.Oo Ar bind\_address : Oc Ar port

.Sm on

and the second argument must be

.Ar host : Ns Ar hostport .

IPv6 addresses can be specified by enclosing addresses in square brackets.

Multiple forwardings may be specified, and additional forwardings can be given on the command line.

Privileged ports can be forwarded only when logging in as root on the remote machine.

.Pp

If the

.Ar port

argument is

.Ql 0 ,

the listen port will be dynamically allocated on the server and reported to the client at run time.

.Pp

If the

.Ar bind\_address

is not specified, the default is to only bind to loopback addresses.

If the

.Ar bind\_address

is

.Ql \*

or an empty string, then the forwarding is requested to listen on all interfaces.

Specifying a remote

.Ar bind\_address

will only succeed if the server's

.Cm GatewayPorts

option is enabled (see

.Xr sshd\_config 5 ) .

.It Cm RequestTTY

Specifies whether to request a pseudo-tty for the session.

The argument may be one of:

.Dq no

(never request a TTY),

.Dq yes

(always request a TTY when standard input is a TTY),

.Dq force

(always request a TTY) or

.Dq auto

(request a TTY when opening a login session).

This option mirrors the

.Fl t

and

.Fl T

flags for

.Xr ssh 1 .

.It Cm RevokedHostKeys

Specifies revoked host public keys.

Keys listed in this file will be refused for host authentication.

Note that if this file does not exist or is not readable,

then host authentication will be refused for all hosts.

Keys may be specified as a text file, listing one public key per line, or as an OpenSSH Key Revocation List (KRL) as generated by

.Xr ssh-keygen 1 .

For more information on KRLs, see the KEY REVOCATION LISTS section in

.Xr ssh-keygen 1 .

.It Cm RhostsRSAAuthentication

Specifies whether to try rhosts based authentication with RSA host authentication.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

This option applies to protocol version 1 only and requires

.Xr ssh 1

to be setuid root.

.It Cm RSAAuthentication

Specifies whether to try RSA authentication.

The argument to this keyword must be

.Dq yes

or

.Dq no .

RSA authentication will only be

attempted if the identity file exists, or an authentication agent is running.

The default is

.Dq yes .

Note that this option applies to protocol version 1 only.

.It Cm SendEnv

Specifies what variables from the local

.Xr environ 7

should be sent to the server.

The server must also support it, and the server must be configured to

accept these environment variables.

Note that the

.Ev TERM

environment variable is always sent whenever a pseudo-terminal is requested as it is required by the protocol.

Refer to

.Cm AcceptEnv

in

.Xr sshd\_config 5

for how to configure the server.

Variables are specified by name, which may contain wildcard characters.

Multiple environment variables may be separated by whitespace or spread across multiple

.Cm SendEnv

directives.

The default is not to send any environment variables.

.Pp

See

.Sx PATTERNS

for more information on patterns.

.It Cm ServerAliveCountMax

Sets the number of server alive messages (see below) which may be sent without

.Xr ssh 1

receiving any messages back from the server.

If this threshold is reached while server alive messages are being sent, ssh will disconnect from the server, terminating the session.

It is important to note that the use of server alive messages is very different from

.Cm TCPKeepAlive

(below).

The server alive messages are sent through the encrypted channel and therefore will not be spoofable.

The TCP keepalive option enabled by

.Cm TCPKeepAlive

is spoofable.

The server alive mechanism is valuable when the client or server depend on knowing when a connection has become inactive.

.Pp

The default value is 3.

If, for example,

.Cm ServerAliveInterval

(see below) is set to 15 and

.Cm ServerAliveCountMax

is left at the default, if the server becomes unresponsive,

ssh will disconnect after approximately 45 seconds.

.It Cm ServerAliveInterval

Sets a timeout interval in seconds after which if no data has been received

from the server,

.Xr ssh 1

will send a message through the encrypted channel to request a response from the server.

The default

is 0, indicating that these messages will not be sent to the server.

.It Cm StreamLocalBindMask

Sets the octal file creation mode mask

.Pq umask

used when creating a Unix-domain socket file for local or remote port forwarding.

This option is only used for port forwarding to a Unix-domain socket file.

.Pp

The default value is 0177, which creates a Unix-domain socket file that is readable and writable only by the owner.

Note that not all operating systems honor the file mode on Unix-domain socket files.

.It Cm StreamLocalBindUnlink

Specifies whether to remove an existing Unix-domain socket file for local or remote port forwarding before creating a new one.

If the socket file already exists and

.Cm StreamLocalBindUnlink

is not enabled,

.Nm ssh

will be unable to forward the port to the Unix-domain socket file.

This option is only used for port forwarding to a Unix-domain socket file.

.Pp

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.It Cm StrictHostKeyChecking

If this flag is set to

.Dq yes ,

.Xr ssh 1

will never automatically add host keys to the

.Pa ~/.ssh/known\_hosts

file, and refuses to connect to hosts whose host key has changed.

This provides maximum protection against trojan horse attacks, though it can be annoying when the

.Pa /etc/ssh/ssh\_known\_hosts

file is poorly maintained or when connections to new hosts are frequently made.

This option forces the user to manually add all new hosts.

If this flag is set to

.Dq no ,  
ssh will automatically add new host keys to the  
user known hosts files.  
If this flag is set to  
.Dq ask ,  
new host keys  
will be added to the user known host files only after the user  
has confirmed that is what they really want to do, and  
ssh will refuse to connect to hosts whose host key has changed.  
The host keys of  
known hosts will be verified automatically in all cases.  
The argument must be  
.Dq yes ,  
.Dq no ,  
or  
.Dq ask .  
The default is  
.Dq ask .  
.It Cm TCPKeepAlive  
Specifies whether the system should send TCP keepalive messages to the  
other side.  
If they are sent, death of the connection or crash of one  
of the machines will be properly noticed.  
However, this means that  
connections will die if the route is down temporarily, and some people  
find it annoying.  
.Pp  
The default is  
.Dq yes  
(to send TCP keepalive messages), and the client will notice  
if the network goes down or the remote host dies.  
This is important in scripts, and many users want it too.  
.Pp  
To disable TCP keepalive messages, the value should be set to  
.Dq no .  
.It Cm Tunnel  
Request  
.Xr tun 4  
device forwarding between the client and the server.  
The argument must be  
.Dq yes ,  
.Dq point-to-point  
(layer 3),  
.Dq ethernet  
(layer 2),  
or  
.Dq no .  
Specifying

.Dq yes  
 requests the default tunnel mode, which is  
 .Dq point-to-point .  
 The default is  
 .Dq no .  
 .It Cm TunnelDevice  
 Specifies the  
 .Xr tun 4  
 devices to open on the client  
 .Pq Ar local\_tun  
 and the server  
 .Pq Ar remote\_tun .  
 .Pp  
 The argument must be  
 .Sm off  
 .Ar local\_tun Op : Ar remote\_tun .  
 .Sm on  
 The devices may be specified by numerical ID or the keyword  
 .Dq any ,  
 which uses the next available tunnel device.  
 If  
 .Ar remote\_tun  
 is not specified, it defaults to  
 .Dq any .  
 The default is  
 .Dq any:any .  
 .It Cm UpdateHostKeys  
 Specifies whether  
 .Xr ssh 1  
 should accept notifications of additional hostkeys from the server sent  
 after authentication has completed and add them to  
 .Cm UserKnownHostsFile .  
 The argument must be  
 .Dq yes ,  
 .Dq no  
 (the default) or  
 .Dq ask .  
 Enabling this option allows learning alternate hostkeys for a server  
 and supports graceful key rotation by allowing a server to send replacement  
 public keys before old ones are removed.  
 Additional hostkeys are only accepted if the key used to authenticate the  
 host was already trusted or explicitly accepted by the user.  
 If  
 .Cm UpdateHostKeys  
 is set to  
 .Dq ask ,  
 then the user is asked to confirm the modifications to the known\_hosts file.  
 Confirmation is currently incompatible with

.Cm ControlPersist ,  
and will be disabled if it is enabled.

.Pp  
Presently, only

.Xr sshd 8  
from OpenSSH 6.8 and greater support the  
.Dq hostkeys@openssh.com  
protocol extension used to inform the client of all the server's hostkeys.

.It Cm UsePrivilegedPort  
Specifies whether to use a privileged port for outgoing connections.  
The argument must be  
.Dq yes  
or  
.Dq no .  
The default is  
.Dq no .  
If set to  
.Dq yes ,  
.Xr ssh 1  
must be setuid root.  
Note that this option must be set to  
.Dq yes  
for  
.Cm RhostsRSAAuthentication  
with older servers.

.It Cm User  
Specifies the user to log in as.  
This can be useful when a different user name is used on different machines.  
This saves the trouble of  
having to remember to give the user name on the command line.

.It Cm UserKnownHostsFile  
Specifies one or more files to use for the user  
host key database, separated by whitespace.  
The default is  
.Pa ~/.ssh/known\_hosts ,  
.Pa ~/.ssh/known\_hosts2 .

.It Cm VerifyHostKeyDNS  
Specifies whether to verify the remote key using DNS and SSHFP resource  
records.  
If this option is set to  
.Dq yes ,  
the client will implicitly trust keys that match a secure fingerprint  
from DNS.  
Insecure fingerprints will be handled as if this option was set to  
.Dq ask .  
If this option is set to  
.Dq ask ,  
information on fingerprint match will be displayed, but the user will still

need to confirm new host keys according to the

.Cm StrictHostKeyChecking

option.

The argument must be

.Dq yes ,

.Dq no ,

or

.Dq ask .

The default is

.Dq no .

.Pp

See also VERIFYING HOST KEYS in

.Xr ssh 1 .

.It Cm VisualHostKey

If this flag is set to

.Dq yes ,

an ASCII art representation of the remote host key fingerprint is

printed in addition to the fingerprint string at login and

for unknown host keys.

If this flag is set to

.Dq no ,

no fingerprint strings are printed at login and

only the fingerprint string will be printed for unknown host keys.

The default is

.Dq no .

.It Cm XAuthLocation

Specifies the full pathname of the

.Xr xauth 1

program.

The default is

.Pa /usr/X11R6/bin/xauth .

.El

.Sh PATTERNS

A

.Em pattern

consists of zero or more non-whitespace characters,

.Sq \*

(a wildcard that matches zero or more characters),

or

.Sq ?\&

(a wildcard that matches exactly one character).

For example, to specify a set of declarations for any host in the

.Dq .co.uk

set of domains,

the following pattern could be used:

.Pp

.Dl Host \*.co.uk

.Pp

The following pattern  
would match any host in the 192.168.0.[0-9] network range:

```
.Pp
```

```
.Dl Host 192.168.0.?
```

```
.Pp
```

```
A
```

```
.Em pattern-list
```

is a comma-separated list of patterns.

Patterns within pattern-lists may be negated  
by preceding them with an exclamation mark

```
.Pq Sq !\& .
```

For example,

to allow a key to be used from anywhere within an organization  
except from the

```
.Dq dialup
```

pool,

the following entry (in `authorized_keys`) could be used:

```
.Pp
```

```
.Dl from=\&"!*dialup.example.com,*example.com\&"
```

```
.Sh FILES
```

```
.Bl -tag -width Ds
```

```
.It Pa ~/.ssh/config
```

This is the per-user configuration file.

The format of this file is described above.

This file is used by the SSH client.

Because of the potential for abuse, this file must have strict permissions:  
read/write for the user, and not accessible by others.

```
.It Pa /etc/ssh/ssh_config
```

Systemwide configuration file.

This file provides defaults for those  
values that are not specified in the user's configuration file, and  
for those users who do not have a configuration file.

This file must be world-readable.

```
.El
```

```
.Sh SEE ALSO
```

```
.Xr ssh 1
```

```
.Sh AUTHORS
```

OpenSSH is a derivative of the original and free  
ssh 1.2.12 release by Tatu Ylonen.

Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos,

Theo de Raadt and Dug Song

removed many bugs, re-added newer features and  
created OpenSSH.

Markus Friedl contributed the support for SSH  
protocol versions 1.5 and 2.0.

## NAME

sshd M-bM-^@M-^S OpenSSH SSH daemon

## SYNOPSIS

```
sshd [-4DdeiqTt] [-b bits] [-C connection_spec]
      [-c host_certificate_file] [-E log_file] [-f config_file]
      [-g login_grace_time] [-h host_key_file] [-k key_gen_time]
      [-o option] [-p port] [-u len]
```

## DESCRIPTION

sshd (OpenSSH Daemon) is the daemon program for ssh(1). Together these programs replace rlogin and rsh, and provide secure encrypted communications between two untrusted hosts over an insecure network.

sshd listens for connections from clients. It is normally started at boot from /etc/rc. It forks a new daemon for each incoming connection. The forked daemons handle key exchange, encryption, authentication, command execution, and data exchange.

sshd can be configured using command-line options or a configuration file (by default sshd\_config(5)); command-line options override values specified in the configuration file. sshd rereads its configuration file when it receives a hangup signal, SIGHUP, by executing itself with the name and options it was started with, e.g. /usr/sbin/sshd.

The options are as follows:

-4 Forces sshd to use IPv4 addresses only.

-6 Forces sshd to use IPv6 addresses only.

-b bits

Specifies the number of bits in the ephemeral protocol version 1 server key (default 1024).

-C connection\_spec

Specify the connection parameters to use for the -T extended test mode. If provided, any Match directives in the configuration file that would apply to the specified user, host, and address will be set before the configuration is written to standard output. The connection parameters are supplied as keyword=value pairs. The keywords are M-bM-^@M-^userM-bM-^@M-^], M-bM-^@M-^hostM-bM-^@M-^], M-bM-^@M-^\addrM-bM-^@M-^], M-bM-^@M-^\lportM-bM-^@M-^], and M-bM-^@M-^\addrM-bM-^@M-^]. All are required and may be supplied in any order, either with multiple -C options or as a comma-separated list.

- c `host_certificate_file`  
Specifies a path to a certificate file to identify sshd during key exchange. The certificate file must match a host key file specified using the -h option or the HostKey configuration directive.
- D When this option is specified, sshd will not detach and does not become a daemon. This allows easy monitoring of sshd.
- d Debug mode. The server sends verbose debug output to standard error, and does not put itself in the background. The server also will not fork and will only process one connection. This option is only intended for debugging for the server. Multiple -d options increase the debugging level. Maximum is 3.
- E `log_file`  
Append debug logs to `log_file` instead of the system log.
- e Write debug logs to standard error instead of the system log.
- f `config_file`  
Specifies the name of the configuration file. The default is `/etc/ssh/sshd_config`. sshd refuses to start if there is no configuration file.
- g `login_grace_time`  
Gives the grace time for clients to authenticate themselves (default 120 seconds). If the client fails to authenticate the user within this many seconds, the server disconnects and exits. A value of zero indicates no limit.
- h `host_key_file`  
Specifies a file from which a host key is read. This option must be given if sshd is not run as root (as the normal host key files are normally not readable by anyone but root). The default is `/etc/ssh/ssh_host_key` for protocol version 1, and `/etc/ssh/ssh_host_dsa_key`, `/etc/ssh/ssh_host_ecdsa_key`, `/etc/ssh/ssh_host_ed25519_key` and `/etc/ssh/ssh_host_rsa_key` for protocol version 2. It is possible to have multiple host key files for the different protocol versions and host key algorithms.
- i Specifies that sshd is being run from inetd(8). If SSH protocol 1 is enabled, sshd should not normally be run from inetd because it needs to generate the server key before it can respond to the client, and this may take some time. Clients may have to wait too long if the key was regenerated every time.

- k key\_gen\_time  
Specifies how often the ephemeral protocol version 1 server key is regenerated (default 3600 seconds, or one hour). The motivation for regenerating the key fairly often is that the key is not stored anywhere, and after about an hour it becomes impossible to recover the key for decrypting intercepted communications even if the machine is cracked into or physically seized. A value of zero indicates that the key will never be regenerated.
  
- o option  
Can be used to give options in the format used in the configuration file. This is useful for specifying options for which there is no separate command-line flag. For full details of the options, and their values, see `sshd_config(5)`.
  
- p port  
Specifies the port on which the server listens for connections (default 22). Multiple port options are permitted. Ports specified in the configuration file with the Port option are ignored when a command-line port is specified. Ports specified using the ListenAddress option override command-line ports.
  
- q Quiet mode. Nothing is sent to the system log. Normally the beginning, authentication, and termination of each connection is logged.
  
- T Extended test mode. Check the validity of the configuration file, output the effective configuration to stdout and then exit. Optionally, Match rules may be applied by specifying the connection parameters using one or more -C options.
  
- t Test mode. Only check the validity of the configuration file and sanity of the keys. This is useful for updating sshd reliably as configuration options may change.
  
- u len This option is used to specify the size of the field in the utmp structure that holds the remote host name. If the resolved host name is longer than len, the dotted decimal value will be used instead. This allows hosts with very long host names that overflow this field to still be uniquely identified. Specifying -u0 indicates that only dotted decimal addresses should be put into the utmp file. -u0 may also be used to prevent sshd from making DNS requests unless the authentication mechanism or configuration requires it. Authentication mechanisms that may require DNS include RhostsRSAAuthentication, HostbasedAuthentication, and using a from="pattern-list" option

in a key file. Configuration options that require DNS include using a USER@HOST pattern in AllowUsers or DenyUsers.

## AUTHENTICATION

The OpenSSH SSH daemon supports SSH protocols 1 and 2. The default is to use protocol 2 only, though this can be changed via the Protocol option in sshd\_config(5). Protocol 1 should not be used and is only offered to support legacy devices.

Each host has a host-specific key, used to identify the host. Partial forward security for protocol 1 is provided through an additional server key, normally 1024 bits, generated when the server starts. This key is normally regenerated every hour if it has been used, and is never stored on disk. Whenever a client connects, the daemon responds with its public host and server keys. The client compares the RSA host key against its own database to verify that it has not changed. The client then generates a 256-bit random number. It encrypts this random number using both the host key and the server key, and sends the encrypted number to the server. Both sides then use this random number as a session key which is used to encrypt all further communications in the session. The rest of the session is encrypted using a conventional cipher, currently Blowfish or 3DES, with 3DES being used by default. The client selects the encryption algorithm to use from those offered by the server.

For protocol 2, forward security is provided through a Diffie-Hellman key agreement. This key agreement results in a shared session key. The rest of the session is encrypted using a symmetric cipher, currently 128-bit AES, Blowfish, 3DES, CAST128, Arcfour, 192-bit AES, or 256-bit AES. The client selects the encryption algorithm to use from those offered by the server. Additionally, session integrity is provided through a cryptographic message authentication code (hmac-md5, hmac-sha1, umac-64, umac-128, hmac-ripemd160, hmac-sha2-256 or hmac-sha2-512).

Finally, the server and the client enter an authentication dialog. The client tries to authenticate itself using host-based authentication, public key authentication, challenge-response authentication, or password authentication.

Regardless of the authentication type, the account is checked to ensure that it is accessible. An account is not accessible if it is locked, listed in DenyUsers or its group is listed in DenyGroups. The definition of a locked account is system dependant. Some platforms have their own account database (eg AIX) and some modify the passwd field ( M-bM-^@M-^X\*LK\*M-bM-^@M-^Y on Solaris and UnixWare, M-bM-^@M-^X\*M-bM-^@M-^Y on HP-UX, containing M-bM-^@M-^XNloginM-bM-^@M-^Y on

Tru64, a leading M-bM-^@M-^X\*LOCKED\*M-bM-^@M-^Y on FreeBSD and a leading M-bM-^@M-^X!M-bM-^@M-^Y on most

Linuxes). If there is a requirement to disable password authentication

for the account while allowing still public-key, then the passwd field should be set to something other than these values (eg M-bM-^@M-^XNPM-bM-^@M-^Y or M-bM-^@M-^X\*NP\*M-bM-^@M-^Y ).

If the client successfully authenticates itself, a dialog for preparing the session is entered. At this time the client may request things like allocating a pseudo-tty, forwarding X11 connections, forwarding TCP connections, or forwarding the authentication agent connection over the secure channel.

After this, the client either requests a shell or execution of a command. The sides then enter session mode. In this mode, either side may send data at any time, and such data is forwarded to/from the shell or command on the server side, and the user terminal in the client side.

When the user program terminates and all forwarded X11 and other connections have been closed, the server sends command exit status to the client, and both sides exit.

## LOGIN PROCESS

When a user successfully logs in, sshd does the following:

1. If the login is on a tty, and no command has been specified, prints last login time and /etc/motd (unless prevented in the configuration file or by ~/.hushlogin; see the FILES section).
2. If the login is on a tty, records login time.
3. Checks /etc/nologin; if it exists, prints contents and quits (unless root).
4. Changes to run with normal user privileges.
5. Sets up basic environment.
6. Reads the file ~/.ssh/environment, if it exists, and users are allowed to change their environment. See the PermitUserEnvironment option in sshd\_config(5).
7. Changes to user's home directory.
8. If ~/.ssh/rc exists and the sshd\_config(5) PermitUserRC option is set, runs it; else if /etc/ssh/sshr exists, runs it; otherwise runs xauth. The M-bM-^@M-^[rcM-bM-^@M-^] files are given the X11 authentication protocol and cookie in standard input. See SSHRC, below.
9. Runs user's shell or command. All commands are run under the

user's login shell as specified in the system password database.

## SSHRC

If the file `~/.ssh/rc` exists, `sh(1)` runs it after reading the environment files but before starting the user's shell or command. It must not produce any output on `stdout`; `stderr` must be used instead. If X11 forwarding is in use, it will receive the "proto cookie" pair in its standard input (and `DISPLAY` in its environment). The script must call `xauth(1)` because `sshd` will not run `xauth` automatically to add X11 cookies.

The primary purpose of this file is to run any initialization routines which may be needed before the user's home directory becomes accessible; AFS is a particular example of such an environment.

This file will probably contain some initialization code followed by something similar to:

```
if read proto cookie && [ -n "$DISPLAY" ]; then
    if [ `echo $DISPLAY | cut -c1-10` = 'localhost:' ]; then
        # X11UseLocalhost=yes
        echo add unix:`echo $DISPLAY |
            cut -c11-` $proto $cookie
    else
        # X11UseLocalhost=no
        echo add $DISPLAY $proto $cookie
    fi | xauth -q -
fi
```

If this file does not exist, `/etc/ssh/sshr` is run, and if that does not exist either, `xauth` is used to add the cookie.

## AUTHORIZED\_KEYS FILE FORMAT

`AuthorizedKeysFile` specifies the files containing public keys for public key authentication; if this option is not specified, the default is

`~/.ssh/authorized_keys` and `~/.ssh/authorized_keys2`. Each line of the file contains one key (empty lines and lines starting with a `M-bM-^@M-^X#M-bM-^@M-^Y` are ignored as comments). Protocol 1 public keys consist of the following space-separated fields: options, bits, exponent, modulus, comment.

Protocol 2 public key consist of: options, keytype, base64-encoded key, comment. The options field is optional; its presence is determined by whether the line starts with a number or not (the options field never starts with a number). The bits, exponent, modulus, and comment fields give the RSA key for protocol version 1; the comment field is not used for anything (but may be convenient for the user to identify the key).

For protocol version 2 the keytype is `M-bM-^@M-^ecdsa-sha2-nistp256M-bM-^@M-^]`,

`M-bM-^@M-^ecdsa-sha2-nistp384M-bM-^@M-^]`, `M-bM-^@M-^ecdsa-sha2-nistp521M-bM-^@M-^]`, `M-bM-`

^@M-^\ssh-ed25519M-bM-^@M-^], M-bM-^@M-^\ssh-dssM-bM-^@M-^] or M-bM-^@M-^\ssh-rsaM-bM-^@M-^].

Note that lines in this file are usually several hundred bytes long (because of the size of the public key encoding) up to a limit of 8 kilobytes, which permits DSA keys up to 8 kilobits and RSA keys up to 16 kilobits. You don't want to type them in; instead, copy the identity.pub, id\_dsa.pub, id\_ecdsa.pub, id\_ed25519.pub, or the id\_rsa.pub file and edit it.

sshd enforces a minimum RSA key modulus size for protocol 1 and protocol 2 keys of 768 bits.

The options (if present) consist of comma-separated option specifications. No spaces are permitted, except within double quotes. The following option specifications are supported (note that option keywords are case-insensitive):

#### agent-forwarding

Enable authentication agent forwarding previously disabled by the restrict option.

#### cert-authority

Specifies that the listed key is a certification authority (CA) that is trusted to validate signed certificates for user authentication.

Certificates may encode access restrictions similar to these key options. If both certificate restrictions and key options are present, the most restrictive union of the two is applied.

#### command="command"

Specifies that the command is executed whenever this key is used for authentication. The command supplied by the user (if any) is ignored. The command is run on a pty if the client requests a pty; otherwise it is run without a tty. If an 8-bit clean channel is required, one must not request a pty or should specify no-pty. A quote may be included in the command by quoting it with a backslash. This option might be useful to restrict certain public keys to perform just a specific operation. An example might be a key that permits remote backups but nothing else. Note that the client may specify TCP and/or X11 forwarding unless they are explicitly prohibited. The command originally supplied by the client is available in the SSH\_ORIGINAL\_COMMAND environment variable. Note that this option applies to shell, command or subsystem execution. Also note that this command may be superseded by either a sshd\_config(5) ForceCommand directive or a command embedded in a certificate.

environment="NAME=value"

Specifies that the string is to be added to the environment when logging in using this key. Environment variables set this way override other default environment values. Multiple options of this type are permitted. Environment processing is disabled by default and is controlled via the PermitUserEnvironment option. This option is automatically disabled if UseLogin is enabled.

from="pattern-list"

Specifies that in addition to public key authentication, either the canonical name of the remote host or its IP address must be present in the comma-separated list of patterns. See PATTERNS in ssh\_config(5) for more information on patterns.

In addition to the wildcard matching that may be applied to hostnames or addresses, a from stanza may match IP addresses using CIDR address/masklen notation.

The purpose of this option is to optionally increase security: public key authentication by itself does not trust the network or name servers or anything (but the key); however, if somebody somehow steals the key, the key permits an intruder to log in from anywhere in the world. This additional option makes using a stolen key more difficult (name servers and/or routers would have to be compromised in addition to just the key).

no-agent-forwarding

Forbids authentication agent forwarding when this key is used for authentication.

no-port-forwarding

Forbids TCP forwarding when this key is used for authentication. Any port forward requests by the client will return an error. This might be used, e.g. in connection with the command option.

no-pty Prevents tty allocation (a request to allocate a pty will fail).

no-user-rc

Disables execution of ~/.ssh/rc.

no-X11-forwarding

Forbids X11 forwarding when this key is used for authentication. Any X11 forward requests by the client will return an error.

permitopen="host:port"

Limit local port forwarding with ssh(1) -L such that it may only connect to the specified host and port. IPv6 addresses can be

specified by enclosing the address in square brackets. Multiple permitopen options may be applied separated by commas. No pattern matching is performed on the specified hostnames, they must be literal domains or addresses. A port specification of \* matches any port.

#### port-forwarding

Enable port forwarding previously disabled by the restrict

#### principals="principals"

On a cert-authority line, specifies allowed principals for certificate authentication as a comma-separated list. At least one name from the list must appear in the certificate's list of principals for the certificate to be accepted. This option is ignored for keys that are not marked as trusted certificate signers using the cert-authority option.

pty Permits tty allocation previously disabled by the restrict option.

#### restrict

Enable all restrictions, i.e. disable port, agent and X11 forwarding, as well as disabling PTY allocation and execution of ~/.ssh/rc. If any future restriction capabilities are added to authorized\_keys files they will be included in this set.

#### tunnel="n"

Force a tun(4) device on the server. Without this option, the next available device will be used if the client requests a tunnel.

#### user-rc

Enables execution of ~/.ssh/rc previously disabled by the restrict option.

#### X11-forwarding

Permits X11 forwarding previously disabled by the restrict option.

An example authorized\_keys file:

```
# Comments allowed at start of line
ssh-rsa AAAAB3Nza...LiPk== user@example.net
from="*.sales.example.net,!pc.sales.example.net" ssh-rsa
AAAAB2...19Q== john@example.net
command="dump /home",no-pty,no-port-forwarding ssh-dss
AAAAC3...51R== example.net
permitopen="192.0.2.1:80",permitopen="192.0.2.2:25" ssh-dss
```

```

AAAAB5...21S==
tunnel="0",command="sh /etc/netstart tun0" ssh-rsa AAAA...==
jane@example.net
restrict,command="uptime" ssh-rsa AAAA1C8...32Tv==
user@example.net
restrict,pty,command="nethack" ssh-rsa AAAA1f8...IrrC5==
user@example.net

```

## SSH\_KNOWN\_HOSTS FILE FORMAT

The `/etc/ssh/ssh_known_hosts` and `~/.ssh/known_hosts` files contain host public keys for all known hosts. The global file should be prepared by the administrator (optional), and the per-user file is maintained automatically: whenever the user connects from an unknown host, its key is added to the per-user file.

Each line in these files contains the following fields: markers (optional), hostnames, bits, exponent, modulus, comment. The fields are separated by spaces.

The marker is optional, but if it is present then it must be one of `M-bM-^@M-^@cert-authorityM-bM-^@M-^]`, to indicate that the line contains a certification authority (CA) key, or `M-bM-^@M-^@revokedM-bM-^@M-^]`, to indicate that the key contained on the line is revoked and must not ever be accepted. Only one marker should be used on a key line.

Hostnames is a comma-separated list of patterns (`M-bM-^@M-^X*M-bM-^@M-^Y` and `M-bM-^@M-^X?M-bM-^@M-^Y` act as

wildcards); each pattern in turn is matched against the canonical host name (when authenticating a client) or against the user-supplied name (when authenticating a server). A pattern may also be preceded by `M-bM-^@M-^X!M-bM-^@M-^Y` to indicate negation: if the host name matches a negated pattern, it is not accepted (by that line) even if it matched another pattern on the line.

A hostname or address may optionally be enclosed within `M-bM-^@M-^X[M-bM-^@M-^Y` and `M-bM-^@M-^X]M-bM-^@M-^Y`

brackets then followed by `M-bM-^@M-^X:M-bM-^@M-^Y` and a non-standard port number.

Alternately, hostnames may be stored in a hashed form which hides host names and addresses should the file's contents be disclosed. Hashed hostnames start with a `M-bM-^@M-^X[M-bM-^@M-^Y` character. Only one hashed hostname may appear on a single line and none of the above negation or wildcard operators may be applied.

Bits, exponent, and modulus are taken directly from the RSA host key; they can be obtained, for example, from `/etc/ssh/ssh_host_key.pub`. The optional comment field continues to the end of the line, and is not used.

Lines starting with `M-bM-^@M-^X#M-bM-^@M-^Y` and empty lines are ignored as comments.

When performing host authentication, authentication is accepted if any matching line has the proper key; either one that matches exactly or, if the server has presented a certificate for authentication, the key of the certification authority that signed the certificate. For a key to be trusted as a certification authority, it must use the `M-bM-^@M-^@cert-authorityM-bM-^@M-^]` marker described above.

The known hosts file also provides a facility to mark keys as revoked, for example when it is known that the associated private key has been stolen. Revoked keys are specified by including the `M-bM-^@M-^@revokedM-bM-^@M-^]` marker at the beginning of the key line, and are never accepted for authentication or as certification authorities, but instead will produce a warning from `ssh(1)` when they are encountered.

It is permissible (but not recommended) to have several lines or different host keys for the same names. This will inevitably happen when short forms of host names from different domains are put in the file. It is possible that the files contain conflicting information; authentication is accepted if valid information can be found from either file.

Note that the lines in these files are typically hundreds of characters long, and you definitely don't want to type in the host keys by hand. Rather, generate them by a script, `ssh-keyscan(1)` or by taking `/etc/ssh/ssh_host_key.pub` and adding the host names at the front. `ssh-keygen(1)` also offers some basic automated editing for `~/.ssh/known_hosts` including removing hosts matching a host name and converting all host names to their hashed representations.

An example `ssh_known_hosts` file:

```
# Comments allowed at start of line
closenet,...,192.0.2.53 1024 37 159...93 closenet.example.net
cvs.example.net,192.0.2.10 ssh-rsa AAAA1234.....=
# A hashed hostname
|1|JfKTdBh7rNbXkVAQCRp4OQoPfmI=|USECr3SWf1JUPsms5AqfD5QfxkM= ssh-rsa
AAAA1234.....=
# A revoked key
@revoked * ssh-rsa AAAAB5W...
# A CA key, accepted for any host in *.mydomain.com or *.mydomain.org
@cert-authority *.mydomain.org,*.mydomain.com ssh-rsa AAAAB5W...
```

## FILES

`~/.hushlogin`

This file is used to suppress printing the last login time and `/etc/motd`, if `PrintLastLog` and `PrintMotd`, respectively, are enabled. It does not suppress printing of the banner specified by `Banner`.

#### ~/.rhosts

This file is used for host-based authentication (see `ssh(1)` for more information). On some machines this file may need to be world-readable if the user's home directory is on an NFS partition, because `sshd` reads it as root. Additionally, this file must be owned by the user, and must not have write permissions for anyone else. The recommended permission for most machines is read/write for the user, and not accessible by others.

#### ~/.shosts

This file is used in exactly the same way as `.rhosts`, but allows host-based authentication without permitting login with `rlogin/rsh`.

#### ~/.ssh/

This directory is the default location for all user-specific configuration and authentication information. There is no general requirement to keep the entire contents of this directory secret, but the recommended permissions are read/write/execute for the user, and not accessible by others.

#### ~/.ssh/authorized\_keys

Lists the public keys (DSA, ECDSA, Ed25519, RSA) that can be used for logging in as this user. The format of this file is described above. The content of the file is not highly sensitive, but the recommended permissions are read/write for the user, and not accessible by others.

If this file, the `~/.ssh` directory, or the user's home directory are writable by other users, then the file could be modified or replaced by unauthorized users. In this case, `sshd` will not allow it to be used unless the `StrictModes` option has been set to `M-bM-^@M-^\noM-bM-^@M-^]`.

#### ~/.ssh/environment

This file is read into the environment at login (if it exists). It can only contain empty lines, comment lines (that start with `M-bM-^@M-^X#M-bM-^@M-^Y`), and assignment lines of the form `name=value`. The file should be writable only by the user; it need not be readable by anyone else. Environment processing is disabled by default and is controlled via the `PermitUserEnvironment` option.

#### ~/.ssh/known\_hosts

Contains a list of host keys for all hosts the user has logged into that are not already in the systemwide list of known host keys. The format of this file is described above. This file

should be writable only by root/the owner and can, but need not be, world-readable.

~/.ssh/rc

Contains initialization routines to be run before the user's home directory becomes accessible. This file should be writable only by the user, and need not be readable by anyone else.

/etc/hosts.equiv

This file is for host-based authentication (see ssh(1)). It should only be writable by root.

/etc/moduli

Contains Diffie-Hellman groups used for the "Diffie-Hellman Group Exchange" key exchange method. The file format is described in moduli(5). If no usable groups are found in this file then fixed internal groups will be used.

/etc/motd

See motd(5).

/etc/nologin

If this file exists, sshd refuses to let anyone except root log in. The contents of the file are displayed to anyone trying to log in, and non-root connections are refused. The file should be world-readable.

/etc/shosts.equiv

This file is used in exactly the same way as hosts.equiv, but allows host-based authentication without permitting login with rlogin/rsh.

/etc/ssh/ssh\_host\_key

/etc/ssh/ssh\_host\_dsa\_key

/etc/ssh/ssh\_host\_ecdsa\_key

/etc/ssh/ssh\_host\_ed25519\_key

/etc/ssh/ssh\_host\_rsa\_key

These files contain the private parts of the host keys. These files should only be owned by root, readable only by root, and not accessible to others. Note that sshd does not start if these files are group/world-accessible.

/etc/ssh/ssh\_host\_key.pub

/etc/ssh/ssh\_host\_dsa\_key.pub

/etc/ssh/ssh\_host\_ecdsa\_key.pub

/etc/ssh/ssh\_host\_ed25519\_key.pub

/etc/ssh/ssh\_host\_rsa\_key.pub

These files contain the public parts of the host keys. These

files should be world-readable but writable only by root. Their contents should match the respective private parts. These files are not really used for anything; they are provided for the convenience of the user so their contents can be copied to known hosts files. These files are created using `ssh-keygen(1)`.

#### `/etc/ssh/ssh_known_hosts`

Systemwide list of known host keys. This file should be prepared by the system administrator to contain the public host keys of all machines in the organization. The format of this file is described above. This file should be writable only by root/the owner and should be world-readable.

#### `/etc/ssh/sshd_config`

Contains configuration data for `sshd`. The file format and configuration options are described in `sshd_config(5)`.

#### `/etc/ssh/sshrdrc`

Similar to `~/.ssh/rc`, it can be used to specify machine-specific login-time initializations globally. This file should be writable only by root, and should be world-readable.

#### `/var/empty`

`chroot(2)` directory used by `sshd` during privilege separation in the pre-authentication phase. The directory should not contain any files and must be owned by root and not group or world-writable.

#### `/var/run/sshd.pid`

Contains the process ID of the `sshd` listening for connections (if there are several daemons running concurrently for different ports, this contains the process ID of the one started last). The content of this file is not sensitive; it can be world-readable.

### AUTHORS

OpenSSH is a derivative of the original and free `ssh 1.2.12` release by Tatu Ylonen. Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt and Dug Song removed many bugs, re-added newer features and created OpenSSH. Markus Friedl contributed the support for SSH protocol versions 1.5 and 2.0. Niels Provos and Markus Friedl contributed support for privilege separation.

.Sh DESCRIPTION

.Nm

(OpenSSH Daemon) is the daemon program for

.Xr ssh 1 .

Together these programs replace rlogin and rsh,  
and provide secure encrypted communications between two untrusted hosts  
over an insecure network.

.Pp

.Nm

listens for connections from clients.

It is normally started at boot from

.Pa /etc/rc .

It forks a new  
daemon for each incoming connection.

The forked daemons handle  
key exchange, encryption, authentication, command execution,  
and data exchange.

.Pp

.Nm

can be configured using command-line options or a configuration file  
(by default

.Xr sshd\_config 5 ) ;

command-line options override values specified in the  
configuration file.

.Nm

rereads its configuration file when it receives a hangup signal,

.Dv SIGHUP ,

by executing itself with the name and options it was started with, e.g. \&

.Pa /usr/sbin/sshd .

.Pp

The options are as follows:

.Bl -tag -width Ds

.It Fl 4

Forces

.Nm

to use IPv4 addresses only.

.It Fl 6

Forces

.Nm

to use IPv6 addresses only.

.It Fl b Ar bits

Specifies the number of bits in the ephemeral protocol version 1 server key (default 1024).

.It Fl C Ar connection\_spec

Specify the connection parameters to use for the

.Fl T

extended test mode.

If provided, any

.Cm Match

directives in the configuration file

that would apply to the specified user, host, and address will be set before the configuration is written to standard output.

The connection parameters are supplied as keyword=value pairs.

The keywords are

.Dq user ,

.Dq host ,

.Dq laddr ,

.Dq lport ,

and

.Dq addr .

All are required and may be supplied in any order, either with multiple

.Fl C

options or as a comma-separated list.

.It Fl c Ar host\_certificate\_file

Specifies a path to a certificate file to identify

.Nm

during key exchange.

The certificate file must match a host key file specified using the

.Fl h

option or the

.Cm HostKey

configuration directive.

.It Fl D

When this option is specified,

.Nm

will not detach and does not become a daemon.

This allows easy monitoring of

.Nm sshd .

.It Fl d

Debug mode.

The server sends verbose debug output to standard error, and does not put itself in the background.

The server also will not fork and will only process one connection.

This option is only intended for debugging for the server.

Multiple

.Fl d

options increase the debugging level.

Maximum is 3.

.It Fl E Ar log\_file

Append debug logs to

.Ar log\_file

instead of the system log.

.It Fl e

Write debug logs to standard error instead of the system log.

.It Fl f Ar config\_file

Specifies the name of the configuration file.

The default is

.Pa /etc/ssh/sshd\_config .

.Nm

refuses to start if there is no configuration file.

.It Fl g Ar login\_grace\_time

Gives the grace time for clients to authenticate themselves (default 120 seconds).

If the client fails to authenticate the user within this many seconds, the server disconnects and exits.

A value of zero indicates no limit.

.It Fl h Ar host\_key\_file

Specifies a file from which a host key is read.

This option must be given if

.Nm

is not run as root (as the normal host key files are normally not readable by anyone but root).

The default is

.Pa /etc/ssh/ssh\_host\_key

for protocol version 1, and

.Pa /etc/ssh/ssh\_host\_dsa\_key ,

.Pa /etc/ssh/ssh\_host\_ecdsa\_key .

.Pa /etc/ssh/ssh\_host\_ed25519\_key

and

.Pa /etc/ssh/ssh\_host\_rsa\_key

for protocol version 2.

It is possible to have multiple host key files for the different protocol versions and host key algorithms.

.It Fl i

Specifies that

.Nm

is being run from

.Xr inetd 8 .

If SSH protocol 1 is enabled,

.Nm

should not normally be run

from inetd because it needs to generate the server key before it can respond to the client, and this may take some time.

Clients may have to wait too long if the key was regenerated every time.

.It Fl k Ar key\_gen\_time

Specifies how often the ephemeral protocol version 1 server key is regenerated (default 3600 seconds, or one hour).

The motivation for regenerating the key fairly often is that the key is not stored anywhere, and after about an hour it becomes impossible to recover the key for decrypting intercepted communications even if the machine is cracked into or physically seized.

A value of zero indicates that the key will never be regenerated.

.It Fl o Ar option

Can be used to give options in the format used in the configuration file.

This is useful for specifying options for which there is no separate command-line flag.

For full details of the options, and their values, see

.Xr sshd\_config 5 .

.It Fl p Ar port

Specifies the port on which the server listens for connections (default 22).

Multiple port options are permitted.

Ports specified in the configuration file with the

.Cm Port

option are ignored when a command-line port is specified.

Ports specified using the

.Cm ListenAddress

option override command-line ports.

.It Fl q

Quiet mode.

Nothing is sent to the system log.

Normally the beginning, authentication, and termination of each connection is logged.

.It Fl T

Extended test mode.

Check the validity of the configuration file, output the effective configuration to stdout and then exit.

Optionally,

.Cm Match

rules may be applied by specifying the connection parameters using one or more

.Fl C

options.

.It Fl t

Test mode.

Only check the validity of the configuration file and sanity of the keys.

This is useful for updating

.Nm

reliably as configuration options may change.

.It Fl u Ar len

This option is used to specify the size of the field

in the  
.Li utmp  
structure that holds the remote host name.  
If the resolved host name is longer than  
.Ar len ,  
the dotted decimal value will be used instead.  
This allows hosts with very long host names that  
overflow this field to still be uniquely identified.  
Specifying  
.Fl u0  
indicates that only dotted decimal addresses  
should be put into the  
.Pa utmp  
file.  
.Fl u0  
may also be used to prevent  
.Nm  
from making DNS requests unless the authentication  
mechanism or configuration requires it.  
Authentication mechanisms that may require DNS include  
.Cm RhostsRSAAuthentication ,  
.Cm HostbasedAuthentication ,  
and using a  
.Cm from="pattern-list"  
option in a key file.  
Configuration options that require DNS include using a  
USER@HOST pattern in  
.Cm AllowUsers  
or  
.Cm DenyUsers .  
.El  
.Sh AUTHENTICATION  
The OpenSSH SSH daemon supports SSH protocols 1 and 2.  
The default is to use protocol 2 only,  
though this can be changed via the  
.Cm Protocol  
option in  
.Xr sshd\_config 5 .  
Protocol 1 should not be used  
and is only offered to support legacy devices.  
.Pp  
Each host has a host-specific key,  
used to identify the host.  
Partial forward security for protocol 1 is provided through  
an additional server key,  
normally 1024 bits,  
generated when the server starts.  
This key is normally regenerated every hour if it has been used, and

is never stored on disk.

Whenever a client connects, the daemon responds with its public host and server keys.

The client compares the

RSA host key against its own database to verify that it has not changed.

The client then generates a 256-bit random number.

It encrypts this

random number using both the host key and the server key, and sends the encrypted number to the server.

Both sides then use this

random number as a session key which is used to encrypt all further communications in the session.

The rest of the session is encrypted

using a conventional cipher, currently Blowfish or 3DES, with 3DES being used by default.

The client selects the encryption algorithm

to use from those offered by the server.

.Pp

For protocol 2,

forward security is provided through a Diffie-Hellman key agreement.

This key agreement results in a shared session key.

The rest of the session is encrypted using a symmetric cipher, currently

128-bit AES, Blowfish, 3DES, CAST128, Arcfour, 192-bit AES, or 256-bit AES.

The client selects the encryption algorithm

to use from those offered by the server.

Additionally, session integrity is provided

through a cryptographic message authentication code

(hmac-md5, hmac-sha1, umac-64, umac-128, hmac-ripemd160,

hmac-sha2-256 or hmac-sha2-512).

.Pp

Finally, the server and the client enter an authentication dialog.

The client tries to authenticate itself using

host-based authentication,

public key authentication,

challenge-response authentication,

or password authentication.

.Pp

Regardless of the authentication type, the account is checked to

ensure that it is accessible. An account is not accessible if it is

locked, listed in

.Cm DenyUsers

or its group is listed in

.Cm DenyGroups

\&. The definition of a locked account is system dependant. Some platforms

have their own account database (eg AIX) and some modify the passwd field (

.Ql \&\*LK\&\*

on Solaris and UnixWare,

.Ql \&\*

on HP-UX, containing

```
.Ql Nologin
```

on Tru64,

a leading

```
.Ql \&*LOCKED\&*
```

on FreeBSD and a leading

```
.Ql \&!
```

on most Linuxes).

If there is a requirement to disable password authentication for the account while allowing still public-key, then the passwd field should be set to something other than these values (eg

```
.Ql NP
```

or

```
.Ql \&*NP\&*
```

).

```
.Pp
```

If the client successfully authenticates itself, a dialog for preparing the session is entered.

At this time the client may request

things like allocating a pseudo-tty, forwarding X11 connections, forwarding TCP connections, or forwarding the authentication agent connection over the secure channel.

```
.Pp
```

After this, the client either requests a shell or execution of a command.

The sides then enter session mode.

In this mode, either side may send

data at any time, and such data is forwarded to/from the shell or command on the server side, and the user terminal in the client side.

```
.Pp
```

When the user program terminates and all forwarded X11 and other connections have been closed, the server sends command exit status to the client, and both sides exit.

```
.Sh LOGIN PROCESS
```

When a user successfully logs in,

```
.Nm
```

does the following:

```
.Bl -enum -offset indent
```

```
.It
```

If the login is on a tty, and no command has been specified, prints last login time and

```
.Pa /etc/motd
```

(unless prevented in the configuration file or by

```
.Pa ~/.hushlogin ;
```

see the

```
.Sx FILES
```

section).

```
.It
```

If the login is on a tty, records login time.

.It  
Checks  
.Pa /etc/nologin ;  
if it exists, prints contents and quits  
(unless root).  
.It  
Changes to run with normal user privileges.  
.It  
Sets up basic environment.  
.It  
Reads the file  
.Pa ~/.ssh/environment ,  
if it exists, and users are allowed to change their environment.  
See the  
.Cm PermitUserEnvironment  
option in  
.Xr sshd\_config 5 .  
.It  
Changes to user's home directory.  
.It  
If  
.Pa ~/.ssh/rc  
exists and the  
.Xr sshd\_config 5  
.Cm PermitUserRC  
option is set, runs it; else if  
.Pa /etc/ssh/sshrdrc  
exists, runs  
it; otherwise runs xauth.  
The  
.Dq rc  
files are given the X11  
authentication protocol and cookie in standard input.  
See  
.Sx SSHRC ,  
below.  
.It  
Runs user's shell or command.  
All commands are run under the user's login shell as specified in the  
system password database.  
.El  
.Sh SSHRC  
If the file  
.Pa ~/.ssh/rc  
exists,  
.Xr sh 1  
runs it after reading the  
environment files but before starting the user's shell or command.

It must not produce any output on stdout; stderr must be used instead.

If X11 forwarding is in use, it will receive the "proto cookie" pair in its standard input (and

```
.Ev DISPLAY
```

in its environment).

The script must call

```
.Xr xauth 1
```

because

```
.Nm
```

will not run xauth automatically to add X11 cookies.

```
.Pp
```

The primary purpose of this file is to run any initialization routines which may be needed before the user's home directory becomes accessible; AFS is a particular example of such an environment.

```
.Pp
```

This file will probably contain some initialization code followed by something similar to:

```
.Bd -literal -offset 3n
```

```
if read proto cookie && [ -n "$DISPLAY" ]; then
```

```
if [ `echo $DISPLAY | cut -c1-10` = 'localhost:' ]; then
```

```
  # X11UseLocalhost=yes
```

```
  echo add unix:`echo $DISPLAY |
```

```
    cut -c11-` $proto $cookie
```

```
else
```

```
  # X11UseLocalhost=no
```

```
  echo add $DISPLAY $proto $cookie
```

```
fi | xauth -q -
```

```
fi
```

```
.Ed
```

```
.Pp
```

If this file does not exist,

```
.Pa /etc/ssh/sshr
```

is run, and if that

does not exist either, xauth is used to add the cookie.

```
.Sh AUTHORIZED_KEYS FILE FORMAT
```

```
.Cm AuthorizedKeysFile
```

specifies the files containing public keys for public key authentication;

if this option is not specified, the default is

```
.Pa ~/.ssh/authorized_keys
```

and

```
.Pa ~/.ssh/authorized_keys2 .
```

Each line of the file contains one

key (empty lines and lines starting with a

```
.Ql #
```

are ignored as

comments).

Protocol 1 public keys consist of the following space-separated fields:

options, bits, exponent, modulus, comment.

Protocol 2 public key consist of:

options, keytype, base64-encoded key, comment.

The options field is optional;

its presence is determined by whether the line starts

with a number or not (the options field never starts with a number).

The bits, exponent, modulus, and comment fields give the RSA key for protocol version 1; the

comment field is not used for anything (but may be convenient for the user to identify the key).

For protocol version 2 the keytype is

.Dq ecdsa-sha2-nistp256 ,

.Dq ecdsa-sha2-nistp384 ,

.Dq ecdsa-sha2-nistp521 ,

.Dq ssh-ed25519 ,

.Dq ssh-dss

or

.Dq ssh-rsa .

.Pp

Note that lines in this file are usually several hundred bytes long (because of the size of the public key encoding) up to a limit of 8 kilobytes, which permits DSA keys up to 8 kilobits and RSA keys up to 16 kilobits.

You don't want to type them in; instead, copy the

.Pa identity.pub ,

.Pa id\_dsa.pub ,

.Pa id\_ecdsa.pub ,

.Pa id\_ed25519.pub ,

or the

.Pa id\_rsa.pub

file and edit it.

.Pp

.Nm

enforces a minimum RSA key modulus size for protocol 1 and protocol 2 keys of 768 bits.

.Pp

The options (if present) consist of comma-separated option specifications.

No spaces are permitted, except within double quotes.

The following option specifications are supported (note that option keywords are case-insensitive):

.Bl -tag -width Ds

.It Cm agent-forwarding

Enable authentication agent forwarding previously disabled by the

.Cm restrict

option.

.It Cm cert-authority

Specifies that the listed key is a certification authority (CA) that is trusted to validate signed certificates for user authentication.

.Pp

Certificates may encode access restrictions similar to these key options.

If both certificate restrictions and key options are present, the most restrictive union of the two is applied.

.It Cm command="command"

Specifies that the command is executed whenever this key is used for authentication.

The command supplied by the user (if any) is ignored.

The command is run on a pty if the client requests a pty; otherwise it is run without a tty.

If an 8-bit clean channel is required, one must not request a pty or should specify

.Cm no-pty .

A quote may be included in the command by quoting it with a backslash.

This option might be useful

to restrict certain public keys to perform just a specific operation.

An example might be a key that permits remote backups but nothing else.

Note that the client may specify TCP and/or X11

forwarding unless they are explicitly prohibited.

The command originally supplied by the client is available in the

.Ev SSH\_ORIGINAL\_COMMAND

environment variable.

Note that this option applies to shell, command or subsystem execution.

Also note that this command may be superseded by either a

.Xr sshd\_config 5

.Cm ForceCommand

directive or a command embedded in a certificate.

.It Cm environment="NAME=value"

Specifies that the string is to be added to the environment when logging in using this key.

Environment variables set this way

override other default environment values.

Multiple options of this type are permitted.

Environment processing is disabled by default and is controlled via the

.Cm PermitUserEnvironment

option.

This option is automatically disabled if

.Cm UseLogin

is enabled.

.It Cm from="pattern-list"

Specifies that in addition to public key authentication, either the canonical name of the remote host or its IP address must be present in the comma-separated list of patterns.

See PATTERNS in

.Xr ssh\_config 5

for more information on patterns.

.Pp

In addition to the wildcard matching that may be applied to hostnames or addresses, a

.Cm from

stanza may match IP addresses using CIDR address/masklen notation.

.Pp

The purpose of this option is to optionally increase security: public key authentication by itself does not trust the network or name servers or anything (but the key); however, if somebody somehow steals the key, the key permits an intruder to log in from anywhere in the world.

This additional option makes using a stolen key more difficult (name servers and/or routers would have to be compromised in addition to just the key).

.It Cm no-agent-forwarding

Forbids authentication agent forwarding when this key is used for authentication.

.It Cm no-port-forwarding

Forbids TCP forwarding when this key is used for authentication.

Any port forward requests by the client will return an error.

This might be used, e.g. in connection with the

.Cm command

option.

.It Cm no-pty

Prevents tty allocation (a request to allocate a pty will fail).

.It Cm no-user-rc

Disables execution of

.Pa ~/.ssh/rc .

.It Cm no-X11-forwarding

Forbids X11 forwarding when this key is used for authentication.

Any X11 forward requests by the client will return an error.

.It Cm permitopen="host:port"

Limit local port forwarding with

.Xr ssh 1

.Fl L

such that it may only connect to the specified host and port.

IPv6 addresses can be specified by enclosing the address in square brackets.

Multiple

.Cm permitopen

options may be applied separated by commas.

No pattern matching is performed on the specified hostnames, they must be literal domains or addresses.

A port specification of

.Cm \*

matches any port.

.It Cm port-forwarding

Enable port forwarding previously disabled by the

.Cm restrict

.It Cm principals="principals"

On a

.Cm cert-authority

line, specifies allowed principals for certificate authentication as a comma-separated list.

At least one name from the list must appear in the certificate's

list of principals for the certificate to be accepted.

This option is ignored for keys that are not marked as trusted certificate signers using the

.Cm cert-authority

option.

.It Cm pty

Permits tty allocation previously disabled by the

.Cm restrict

option.

.It Cm restrict

Enable all restrictions, i.e. disable port, agent and X11 forwarding,

as well as disabling PTY allocation

and execution of

.Pa ~/.ssh/rc .

If any future restriction capabilities are added to authorized\_keys files they will be included in this set.

.It Cm tunnel="n"

Force a

.Xr tun 4

device on the server.

Without this option, the next available device will be used if

the client requests a tunnel.

.It Cm user-rc

Enables execution of

.Pa ~/.ssh/rc

previously disabled by the

.Cm restrict

option.

.It Cm X11-forwarding

Permits X11 forwarding previously disabled by the

.Cm restrict

option.

.El

.Pp

An example authorized\_keys file:

.Bd -literal -offset 3n

# Comments allowed at start of line

ssh-rsa AAAAB3Nza...LiPk== user@example.net

from="\*.sales.example.net,!pc.sales.example.net" ssh-rsa

user@example.net
restrict,pty,command="nethack" ssh-rsa AAAA1f8...IrrC5==
user@example.net
.Ed
.Sh SSH_KNOWN_HOSTS FILE FORMAT
The
.Pa /etc/ssh/ssh_known_hosts
and
.Pa ~/.ssh/known_hosts
files contain host public keys for all known hosts.
The global file should
be prepared by the administrator (optional), and the per-user file is
maintained automatically: whenever the user connects from an unknown host,
its key is added to the per-user file.
.Pp
Each line in these files contains the following fields: markers (optional),
hostnames, bits, exponent, modulus, comment.
The fields are separated by spaces.
.Pp
The marker is optional, but if it is present then it must be one of
.Dq @cert-authority ,
to indicate that the line contains a certification authority (CA) key,
or
.Dq @revoked ,
to indicate that the key contained on the line is revoked and must not ever
be accepted.
Only one marker should be used on a key line.
.Pp
Hostnames is a comma-separated list of patterns
.Pf ( QI *
and
.QI \&?
act as
wildcards); each pattern in turn is matched against the canonical host
name (when authenticating a client) or against the user-supplied
name (when authenticating a server).
A pattern may also be preceded by
.QI \&!
to indicate negation: if the host name matches a negated
pattern, it is not accepted (by that line) even if it matched another
pattern on the line.
A hostname or address may optionally be enclosed within
.QI \&[

```

and

.Ql \&]

brackets then followed by

.Ql \&:

and a non-standard port number.

.Pp

Alternately, hostnames may be stored in a hashed form which hides host names and addresses should the file's contents be disclosed.

Hashed hostnames start with a

.Ql |

character.

Only one hashed hostname may appear on a single line and none of the above negation or wildcard operators may be applied.

.Pp

Bits, exponent, and modulus are taken directly from the RSA host key; they can be obtained, for example, from

.Pa /etc/ssh/ssh\_host\_key.pub .

The optional comment field continues to the end of the line, and is not used.

.Pp

Lines starting with

.Ql #

and empty lines are ignored as comments.

.Pp

When performing host authentication, authentication is accepted if any matching line has the proper key; either one that matches exactly or, if the server has presented a certificate for authentication, the key of the certification authority that signed the certificate.

For a key to be trusted as a certification authority, it must use the

.Dq @cert-authority

marker described above.

.Pp

The known hosts file also provides a facility to mark keys as revoked, for example when it is known that the associated private key has been stolen.

Revoked keys are specified by including the

.Dq @revoked

marker at the beginning of the key line, and are never accepted for authentication or as certification authorities, but instead will produce a warning from

.Xr ssh 1

when they are encountered.

.Pp

It is permissible (but not recommended) to have several lines or different host keys for the same names.

This will inevitably happen when short forms of host names from different domains are put in the file.

It is possible

that the files contain conflicting information; authentication is accepted if valid information can be found from either file.

.Pp

Note that the lines in these files are typically hundreds of characters long, and you definitely don't want to type in the host keys by hand.

Rather, generate them by a script,

.Xr ssh-keyscan 1

or by taking

.Pa /etc/ssh/ssh\_host\_key.pub

and adding the host names at the front.

.Xr ssh-keygen 1

also offers some basic automated editing for

.Pa ~/.ssh/known\_hosts

including removing hosts matching a host name and converting all host names to their hashed representations.

.Pp

An example ssh\_known\_hosts file:

.Bd -literal -offset 3n

# Comments allowed at start of line

closenet,...,192.0.2.53 1024 37 159...93 closenet.example.net

cvs.example.net,192.0.2.10 ssh-rsa AAAA1234.....=

# A hashed hostname

|1|JfKTdBh7rNbXkVAQCRp4OQoPfmI=|USECr3SWf1JUPsms5AqfD5QfxkM= ssh-rsa

AAAA1234.....=

# A revoked key

@revoked \* ssh-rsa AAAAB5W...

# A CA key, accepted for any host in \*.mydomain.com or \*.mydomain.org

@cert-authority \*.mydomain.org,\*.mydomain.com ssh-rsa AAAAB5W...

.Ed

.Sh FILES

.Bl -tag -width Ds -compact

.It Pa ~/.hushlogin

This file is used to suppress printing the last login time and

.Pa /etc/motd ,

if

.Cm PrintLastLog

and

.Cm PrintMotd ,

respectively,

are enabled.

It does not suppress printing of the banner specified by

.Cm Banner .

.Pp

.It Pa ~/.rhosts

This file is used for host-based authentication (see

.Xr ssh 1

for more information).

On some machines this file may need to be

world-readable if the user's home directory is on an NFS partition,  
because

.Nm

reads it as root.

Additionally, this file must be owned by the user,  
and must not have write permissions for anyone else.

The recommended

permission for most machines is read/write for the user, and not  
accessible by others.

.Pp

.It Pa ~/.shosts

This file is used in exactly the same way as

.Pa .rhosts ,

but allows host-based authentication without permitting login with  
rlogin/rsh.

.Pp

.It Pa ~/.ssh/

This directory is the default location for all user-specific configuration  
and authentication information.

There is no general requirement to keep the entire contents of this directory  
secret, but the recommended permissions are read/write/execute for the user,  
and not accessible by others.

.Pp

.It Pa ~/.ssh/authorized\_keys

Lists the public keys (DSA, ECDSA, Ed25519, RSA)  
that can be used for logging in as this user.

The format of this file is described above.

The content of the file is not highly sensitive, but the recommended  
permissions are read/write for the user, and not accessible by others.

.Pp

If this file, the

.Pa ~/.ssh

directory, or the user's home directory are writable

by other users, then the file could be modified or replaced by unauthorized  
users.

In this case,

.Nm

will not allow it to be used unless the

.Cm StrictModes

option has been set to

.Dq no .

.Pp

.It Pa ~/.ssh/environment

This file is read into the environment at login (if it exists).

It can only contain empty lines, comment lines (that start with

.Ql # ) ,

and assignment lines of the form name=value.

The file should be writable

only by the user; it need not be readable by anyone else.

Environment processing is disabled by default and is controlled via the

.Cm PermitUserEnvironment

option.

.Pp

.It Pa ~/.ssh/known\_hosts

Contains a list of host keys for all hosts the user has logged into that are not already in the systemwide list of known host keys.

The format of this file is described above.

This file should be writable only by root/the owner and can, but need not be, world-readable.

.Pp

.It Pa ~/.ssh/rc

Contains initialization routines to be run before the user's home directory becomes accessible.

This file should be writable only by the user, and need not be readable by anyone else.

.Pp

.It Pa /etc/hosts.equiv

This file is for host-based authentication (see

.Xr ssh 1 ) .

It should only be writable by root.

.Pp

.It Pa /etc/moduli

Contains Diffie-Hellman groups used for the "Diffie-Hellman Group Exchange" key exchange method.

The file format is described in

.Xr moduli 5 .

If no usable groups are found in this file then fixed internal groups will be used.

.Pp

.It Pa /etc/motd

See

.Xr motd 5 .

.Pp

.It Pa /etc/nologin

If this file exists,

.Nm

refuses to let anyone except root log in.

The contents of the file

are displayed to anyone trying to log in, and non-root connections are refused.

The file should be world-readable.

.Pp

.It Pa /etc/shosts.equiv

This file is used in exactly the same way as

.Pa hosts.equiv ,

but allows host-based authentication without permitting login with rlogin/rsh.

.Pp

.It Pa /etc/ssh/ssh\_host\_key

.It Pa /etc/ssh/ssh\_host\_dsa\_key

.It Pa /etc/ssh/ssh\_host\_ecdsa\_key

.It Pa /etc/ssh/ssh\_host\_ed25519\_key

.It Pa /etc/ssh/ssh\_host\_rsa\_key

These files contain the private parts of the host keys.

These files should only be owned by root, readable only by root, and not accessible to others.

Note that

.Nm

does not start if these files are group/world-accessible.

.Pp

.It Pa /etc/ssh/ssh\_host\_key.pub

.It Pa /etc/ssh/ssh\_host\_dsa\_key.pub

.It Pa /etc/ssh/ssh\_host\_ecdsa\_key.pub

.It Pa /etc/ssh/ssh\_host\_ed25519\_key.pub

.It Pa /etc/ssh/ssh\_host\_rsa\_key.pub

These files contain the public parts of the host keys.

These files should be world-readable but writable only by root.

Their contents should match the respective private parts.

These files are not

really used for anything; they are provided for the convenience of the user so their contents can be copied to known hosts files.

These files are created using

.Xr ssh-keygen 1 .

.Pp

.It Pa /etc/ssh/ssh\_known\_hosts

Systemwide list of known host keys.

This file should be prepared by the

system administrator to contain the public host keys of all machines in the organization.

The format of this file is described above.

This file should be writable only by root/the owner and should be world-readable.

.Pp

.It Pa /etc/ssh/sshd\_config

Contains configuration data for

.Nm sshd .

The file format and configuration options are described in

.Xr sshd\_config 5 .

.Pp

.It Pa /etc/ssh/sshrc

Similar to

.Pa ~/.ssh/rc ,

it can be used to specify machine-specific login-time initializations globally. This file should be writable only by root, and should be world-readable.

.Pp

.It Pa /var/empty

.Xr chroot 2

directory used by

.Nm

during privilege separation in the pre-authentication phase.

The directory should not contain any files and must be owned by root and not group or world-writable.

.Pp

.It Pa /var/run/sshd.pid

Contains the process ID of the

.Nm

listening for connections (if there are several daemons running concurrently for different ports, this contains the process ID of the one started last).

The content of this file is not sensitive; it can be world-readable.

.Sh AUTHORS

OpenSSH is a derivative of the original and free ssh 1.2.12 release by Tatu Ylonen.

Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt and Dug Song removed many bugs, re-added newer features and created OpenSSH.

Markus Friedl contributed the support for SSH protocol versions 1.5 and 2.0.

Niels Provos and Markus Friedl contributed support for privilege separation.

* This program is the ssh daemon. It listens for connections from clients,
* and performs authentication, executes use commands or shell, and forwards
* information to/from the application to the user client over an encrypted
* connection. This can also handle forwarding of X11, TCP/IP, and
* authentication agent connections.
*
* As far as I am concerned, the code I have written for this software
* can be used freely for any purpose. Any derived versions of this
* software must be clearly marked as such, and if the derived work is
* incompatible with the protocol description in the RFC file, it must be
* called by a name other than "ssh" or "Secure Shell".

## NAME

sshd\_config M-bM-^@M-^S OpenSSH SSH daemon configuration file

## SYNOPSIS

/etc/ssh/sshd\_config

## DESCRIPTION

sshd(8) reads configuration data from /etc/ssh/sshd\_config (or the file specified with -f on the command line). The file contains keyword-argument pairs, one per line. Lines starting with M-bM-^@M-^X#M-bM-^@M-^Y and empty lines are interpreted as comments. Arguments may optionally be enclosed in double quotes (") in order to represent arguments containing spaces.

The possible keywords and their meanings are as follows (note that keywords are case-insensitive and arguments are case-sensitive):

### AcceptEnv

Specifies what environment variables sent by the client will be copied into the session's environ(7). See SendEnv in ssh\_config(5) for how to configure the client. The TERM

environment variable is always sent whenever the client requests a pseudo-terminal as it is required by the protocol. Variables are specified by name, which may contain the wildcard characters `M-bM-^@M-^X*M-bM-^@M-^Y` and `M-bM-^@M-^X?M-bM-^@M-^Y`. Multiple environment variables may be separated by whitespace or spread across multiple `AcceptEnv` directives. Be warned that some environment variables could be used to bypass restricted user environments. For this reason, care should be taken in the use of this directive. The default is not to accept any environment variables.

#### AddressFamily

Specifies which address family should be used by `sshd(8)`. Valid arguments are `M-bM-^@M-^anyM-bM-^@M-^]`, `M-bM-^@M-^inetM-bM-^@M-^]` (use IPv4 only), or `M-bM-^@M-^inet6M-bM-^@M-^]` (use IPv6 only). The default is `M-bM-^@M-^anyM-bM-^@M-^]`.

#### AllowAgentForwarding

Specifies whether `ssh-agent(1)` forwarding is permitted. The default is `M-bM-^@M-^yesM-bM-^@M-^]`. Note that disabling agent forwarding does not improve security unless users are also denied shell access, as they can always install their own forwarders.

#### AllowGroups

This keyword can be followed by a list of group name patterns, separated by spaces. If specified, login is allowed only for users whose primary group or supplementary group list matches one of the patterns. Only group names are valid; a numerical group ID is not recognized. By default, login is allowed for all groups. The `allow/deny` directives are processed in the following order: `DenyUsers`, `AllowUsers`, `DenyGroups`, and finally `AllowGroups`.

See PATTERNS in `ssh_config(5)` for more information on patterns.

#### AllowTcpForwarding

Specifies whether TCP forwarding is permitted. The available options are `M-bM-^@M-^yesM-bM-^@M-^]` or `M-bM-^@M-^allM-bM-^@M-^]` to allow TCP forwarding, `M-bM-^@M-^noM-bM-^@M-^]` to prevent all TCP forwarding, `M-bM-^@M-^localM-bM-^@M-^]` to allow local (from the perspective of `ssh(1)`) forwarding only or `M-bM-^@M-^remoteM-bM-^@M-^]` to allow remote forwarding only. The default is `M-bM-^@M-^yesM-bM-^@M-^]`. Note that disabling TCP forwarding does not improve security unless users are also denied shell access, as they can always install their own forwarders.

#### AllowStreamLocalForwarding

Specifies whether `StreamLocal` (Unix-domain socket) forwarding is

permitted. The available options are `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\allM-bM-^@M-^]` to allow

StreamLocal forwarding, `M-bM-^@M-^\noM-bM-^@M-^]` to prevent all StreamLocal forwarding, `M-bM-^@M-^\localM-bM-^@M-^]` to allow local (from the perspective of `ssh(1)`) forwarding only or `M-bM-^@M-^\remoteM-bM-^@M-^]` to allow remote forwarding only. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`. Note that disabling StreamLocal forwarding does not improve security unless users are also denied shell access, as they can always install their own forwarders.

#### AllowUsers

This keyword can be followed by a list of user name patterns, separated by spaces. If specified, login is allowed only for user names that match one of the patterns. Only user names are valid; a numerical user ID is not recognized. By default, login is allowed for all users. If the pattern takes the form `USER@HOST` then `USER` and `HOST` are separately checked, restricting logins to particular users from particular hosts. The allow/deny directives are processed in the following order: `DenyUsers`, `AllowUsers`, `DenyGroups`, and finally `AllowGroups`.

See PATTERNS in `ssh_config(5)` for more information on patterns.

#### AuthenticationMethods

Specifies the authentication methods that must be successfully completed for a user to be granted access. This option must be followed by one or more comma-separated lists of authentication method names. Successful authentication requires completion of every method in at least one of these lists.

For example, an argument of `M-bM-^@M-^\publickey,password publickey,keyboard-interactiveM-bM-^@M-^]` would require the user to complete public key authentication, followed by either password or keyboard interactive authentication. Only methods that are next in one or more lists are offered at each stage, so for this example, it would not be possible to attempt password or keyboard-interactive authentication before public key.

For keyboard interactive authentication it is also possible to restrict authentication to a specific device by appending a colon followed by the device identifier `M-bM-^@M-^\bsdauthM-bM-^@M-^]`, `M-bM-^@M-^\pamM-bM-^@M-^]`, or `M-bM-^@M-^\skkeyM-bM-^@M-^]`,

depending on the server configuration. For example, `M-bM-^@M-^\keyboard-interactive:bsdauthM-bM-^@M-^]` would restrict keyboard interactive authentication to the `M-bM-^@M-^\bsdauthM-bM-^@M-^]` device.

If the `M-bM-^@M-^\publickeyM-bM-^@M-^]` method is listed more than once, `sshd(8)` verifies that keys that have been used successfully are not reused for subsequent authentications. For example, an

AuthenticationMethods of M-bM-^@M-^[\publickey,publickeyM-bM-^@M-^] will require successful authentication using two different public keys.

This option will yield a fatal error if enabled if protocol 1 is also enabled. Note that each authentication method listed should also be explicitly enabled in the configuration. The default is not to require multiple authentication; successful completion of a single authentication method is sufficient.

#### AuthorizedKeysCommand

Specifies a program to be used to look up the user's public keys. The program must be owned by root, not writable by group or others and specified by an absolute path.

Arguments to AuthorizedKeysCommand may be provided using the following tokens, which will be expanded at runtime: %% is replaced by a literal '%', %u is replaced by the username being authenticated, %h is replaced by the home directory of the user being authenticated, %t is replaced with the key type offered for authentication, %f is replaced with the fingerprint of the key, and %k is replaced with the key being offered for authentication. If no arguments are specified then the username of the target user will be supplied.

The program should produce on standard output zero or more lines of authorized\_keys output (see AUTHORIZED\_KEYS in sshd(8)). If a key supplied by AuthorizedKeysCommand does not successfully authenticate and authorize the user then public key authentication continues using the usual AuthorizedKeysFile files. By default, no AuthorizedKeysCommand is run.

#### AuthorizedKeysCommandUser

Specifies the user under whose account the AuthorizedKeysCommand is run. It is recommended to use a dedicated user that has no other role on the host than running authorized keys commands. If AuthorizedKeysCommand is specified but AuthorizedKeysCommandUser is not, then sshd(8) will refuse to start.

#### AuthorizedKeysFile

Specifies the file that contains the public keys that can be used for user authentication. The format is described in the AUTHORIZED\_KEYS FILE FORMAT section of sshd(8). AuthorizedKeysFile may contain tokens of the form %T which are substituted during connection setup. The following tokens are defined: %% is replaced by a literal '%', %h is replaced by the home directory of the user being authenticated, and %u is replaced by the username of that user. After expansion, AuthorizedKeysFile is taken to be an absolute path or one

relative to the user's home directory. Multiple files may be listed, separated by whitespace. Alternately this option may be set to `M-bM-^@M-^\noneM-bM-^@M-^]` to skip checking for user keys in files. The default is `M-bM-^@M-^\.ssh/authorized_keys .ssh/authorized_keys2M-bM-^@M-^]`.

#### AuthorizedPrincipalsCommand

Specifies a program to be used to generate the list of allowed certificate principals as per `AuthorizedPrincipalsFile`. The program must be owned by root, not writable by group or others and specified by an absolute path.

Arguments to `AuthorizedPrincipalsCommand` may be provided using the following tokens, which will be expanded at runtime: `%%` is replaced by a literal `'%'`, `%u` is replaced by the username being authenticated and `%h` is replaced by the home directory of the user being authenticated.

The program should produce on standard output zero or more lines of `AuthorizedPrincipalsFile` output. If either `AuthorizedPrincipalsCommand` or `AuthorizedPrincipalsFile` is specified, then certificates offered by the client for authentication must contain a principal that is listed. By default, no `AuthorizedPrincipalsCommand` is run.

#### AuthorizedPrincipalsCommandUser

Specifies the user under whose account the `AuthorizedPrincipalsCommand` is run. It is recommended to use a dedicated user that has no other role on the host than running authorized principals commands. If `AuthorizedPrincipalsCommand` is specified but `AuthorizedPrincipalsCommandUser` is not, then `sshd(8)` will refuse to start.

#### AuthorizedPrincipalsFile

Specifies a file that lists principal names that are accepted for certificate authentication. When using certificates signed by a key listed in `TrustedUserCAKeys`, this file lists names, one of which must appear in the certificate for it to be accepted for authentication. Names are listed one per line preceded by key options (as described in `AUTHORIZED_KEYS FILE FORMAT` in `sshd(8)`). Empty lines and comments starting with `M-bM-^@M-^X#M-bM-^@M-^Y` are ignored.

`AuthorizedPrincipalsFile` may contain tokens of the form `%T` which are substituted during connection setup. The following tokens are defined: `%%` is replaced by a literal `'%'`, `%h` is replaced by the home directory of the user being authenticated, and `%u` is replaced by the username of that user. After expansion, `AuthorizedPrincipalsFile` is taken to be an absolute path or one relative to the user's home directory.

The default is `M-bM-^@M-^\noneM-bM-^@M-^]`, i.e. not to use a principals file `M-bM-^@M-^S` in this case, the username of the user must appear in a certificate's principals list for it to be accepted. Note that `AuthorizedPrincipalsFile` is only used when authentication proceeds using a CA listed in `TrustedUserCAKeys` and is not consulted for certification authorities trusted via `~/.ssh/authorized_keys`, though the `principals=` key option offers a similar facility (see `sshd(8)` for details).

**Banner** The contents of the specified file are sent to the remote user before authentication is allowed. If the argument is `M-bM-^@M-^\noneM-bM-^@M-^]` then no banner is displayed. By default, no banner is displayed.

#### ChallengeResponseAuthentication

Specifies whether challenge-response authentication is allowed (e.g. via PAM or through authentication styles supported in `login.conf(5)`) The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### ChrootDirectory

Specifies the pathname of a directory to `chroot(2)` to after authentication. At session startup `sshd(8)` checks that all components of the pathname are root-owned directories which are not writable by any other user or group. After the `chroot`, `sshd(8)` changes the working directory to the user's home directory.

The pathname may contain the following tokens that are expanded at runtime once the connecting user has been authenticated: `%%` is replaced by a literal `'%'`, `%h` is replaced by the home directory of the user being authenticated, and `%u` is replaced by the username of that user.

The `ChrootDirectory` must contain the necessary files and directories to support the user's session. For an interactive session this requires at least a shell, typically `sh(1)`, and basic `/dev` nodes such as `null(4)`, `zero(4)`, `stdin(4)`, `stdout(4)`, `stderr(4)`, and `tty(4)` devices. For file transfer sessions using `M-bM-^@M-^\sftpM-bM-^@M-^]`, no additional configuration of the environment is necessary if the in-process sftp server is used, though sessions which use logging may require `/dev/log` inside the `chroot` directory on some operating systems (see `sftp-server(8)` for details).

For safety, it is very important that the directory hierarchy be prevented from modification by other processes on the system (especially those outside the jail). Misconfiguration can lead to unsafe environments which `sshd(8)` cannot detect.

The default is `M-bM-^@M-^\noneM-bM-^@M-^]`, indicating not to chroot(2).

## Ciphers

Specifies the ciphers allowed. Multiple ciphers must be comma-separated. If the specified value begins with a `M-bM-^@M-^X+M-bM-^@M-^Y` character, then the specified ciphers will be appended to the default set instead of replacing them.

The supported ciphers are:

```
3des-cbc
aes128-cbc
aes192-cbc
aes256-cbc
aes128-ctr
aes192-ctr
aes256-ctr
aes128-gcm@openssh.com
aes256-gcm@openssh.com
arcfour
arcfour128
arcfour256
blowfish-cbc
cast128-cbc
chacha20-poly1305@openssh.com
```

The default is:

```
chacha20-poly1305@openssh.com,
aes128-ctr,aes192-ctr,aes256-ctr,
aes128-gcm@openssh.com,aes256-gcm@openssh.com
```

The list of available ciphers may also be obtained using the `-Q` option of `ssh(1)` with an argument of `M-bM-^@M-^\cipherM-bM-^@M-^]`.

## ClientAliveCountMax

Sets the number of client alive messages (see below) which may be sent without `sshd(8)` receiving any messages back from the client.

If this threshold is reached while client alive messages are being sent, `sshd` will disconnect the client, terminating the session. It is important to note that the use of client alive messages is very different from `TCPKeepAlive` (below). The client alive messages are sent through the encrypted channel and therefore will not be spoofable. The `TCP` keepalive option enabled by `TCPKeepAlive` is spoofable. The client alive mechanism is valuable when the client or server depend on knowing when a connection has become inactive.

The default value is 3. If ClientAliveInterval (see below) is set to 15, and ClientAliveCountMax is left at the default, unresponsive SSH clients will be disconnected after approximately 45 seconds.

#### ClientAliveInterval

Sets a timeout interval in seconds after which if no data has been received from the client, sshd(8) will send a message through the encrypted channel to request a response from the client. The default is 0, indicating that these messages will not be sent to the client.

#### Compression

Specifies whether compression is allowed, or delayed until the user has authenticated successfully. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]`, `M-bM-^@M-^\delayedM-bM-^@M-^]`, or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\delayedM-bM-^@M-^]`.

#### DenyGroups

This keyword can be followed by a list of group name patterns, separated by spaces. Login is disallowed for users whose primary group or supplementary group list matches one of the patterns. Only group names are valid; a numerical group ID is not recognized. By default, login is allowed for all groups. The allow/deny directives are processed in the following order: DenyUsers, AllowUsers, DenyGroups, and finally AllowGroups.

See PATTERNS in ssh\_config(5) for more information on patterns.

#### DenyUsers

This keyword can be followed by a list of user name patterns, separated by spaces. Login is disallowed for user names that match one of the patterns. Only user names are valid; a numerical user ID is not recognized. By default, login is allowed for all users. If the pattern takes the form USER@HOST then USER and HOST are separately checked, restricting logins to particular users from particular hosts. The allow/deny directives are processed in the following order: DenyUsers, AllowUsers, DenyGroups, and finally AllowGroups.

See PATTERNS in ssh\_config(5) for more information on patterns.

#### FingerprintHash

Specifies the hash algorithm used when logging key fingerprints.

Valid options are: `M-bM-^@M-^\md5M-bM-^@M-^]` and `M-bM-^@M-^\sha256M-bM-^@M-^]`. The default is `M-bM-^@M-^\sha256M-bM-^@M-^]`.

## ForceCommand

Forces the execution of the command specified by ForceCommand, ignoring any command supplied by the client and ~/.ssh/rc if present. The command is invoked by using the user's login shell with the -c option. This applies to shell, command, or subsystem execution. It is most useful inside a Match block. The command originally supplied by the client is available in the SSH\_ORIGINAL\_COMMAND environment variable. Specifying a command of M-bM-^@M-^\internal-sftpM-bM-^@M-^] will force the use of an in-process sftp server that requires no support files when used with ChrootDirectory. The default is M-bM-^@M-^\noneM-bM-^@M-^].

## GatewayPorts

Specifies whether remote hosts are allowed to connect to ports forwarded for the client. By default, sshd(8) binds remote port forwardings to the loopback address. This prevents other remote hosts from connecting to forwarded ports. GatewayPorts can be used to specify that sshd should allow remote port forwardings to bind to non-loopback addresses, thus allowing other hosts to connect. The argument may be M-bM-^@M-^\noM-bM-^@M-^] to force remote port forwardings to be available to the local host only, M-bM-^@M-^\yesM-bM-^@M-^] to force remote port forwardings to bind to the wildcard address, or M-bM-^@M-^\clientspecifiedM-bM-^@M-^] to allow the client to select the address to which the forwarding is bound. The default is M-bM-^@M-^\noM-bM-^@M-^].

## GSSAPIAuthentication

Specifies whether user authentication based on GSSAPI is allowed. The default is M-bM-^@M-^\noM-bM-^@M-^].

## GSSAPICleanupCredentials

Specifies whether to automatically destroy the user's credentials cache on logout. The default is M-bM-^@M-^\yesM-bM-^@M-^].

## GSSAPIStrictAcceptorCheck

Determines whether to be strict about the identity of the GSSAPI acceptor a client authenticates against. If set to M-bM-^@M-^\yesM-bM-^@M-^] then the client must authenticate against the host service on the current hostname. If set to M-bM-^@M-^\noM-bM-^@M-^] then the client may authenticate against any service key stored in the machine's default store. This facility is provided to assist with operation on multi homed machines. The default is M-bM-^@M-^\yesM-bM-^@M-^].

## HostbasedAcceptedKeyTypes

Specifies the key types that will be accepted for hostbased authentication as a comma-separated pattern list. Alternately if the specified value begins with a M-bM-^@M-^X+M-bM-^@M-^Y character, then the specified key types will be appended to the default set instead of replacing them. The default for this option is:

ecdsa-sha2-nistp256-cert-v01@openssh.com,  
ecdsa-sha2-nistp384-cert-v01@openssh.com,  
ecdsa-sha2-nistp521-cert-v01@openssh.com,  
ssh-ed25519-cert-v01@openssh.com,  
ssh-rsa-cert-v01@openssh.com,  
ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,  
ssh-ed25519,ssh-rsa

The -Q option of ssh(1) may be used to list supported key types.

#### HostbasedAuthentication

Specifies whether rhosts or /etc/hosts.equiv authentication together with successful public key client host authentication is allowed (host-based authentication). The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### HostbasedUsesNameFromPacketOnly

Specifies whether or not the server will attempt to perform a reverse name lookup when matching the name in the ~/.shosts, ~/.rhosts, and /etc/hosts.equiv files during HostbasedAuthentication. A setting of `M-bM-^@M-^\yesM-bM-^@M-^]` means that sshd(8) uses the name supplied by the client rather than attempting to resolve the name from the TCP connection itself. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### HostCertificate

Specifies a file containing a public host certificate. The certificate's public key must match a private host key already specified by HostKey. The default behaviour of sshd(8) is not to load any certificates.

#### HostKey

Specifies a file containing a private host key used by SSH. The default is /etc/ssh/ssh\_host\_key for protocol version 1, and /etc/ssh/ssh\_host\_dsa\_key, /etc/ssh/ssh\_host\_ecdsa\_key, /etc/ssh/ssh\_host\_ed25519\_key and /etc/ssh/ssh\_host\_rsa\_key for protocol version 2.

Note that sshd(8) will refuse to use a file if it is group/world-accessible and that the HostKeyAlgorithms option restricts which of the keys are actually used by sshd(8).

It is possible to have multiple host key files. `M-bM-^@M-^\rsa1M-bM-^@M-^]` keys are used for version 1 and `M-bM-^@M-^\dsaM-bM-^@M-^]`, `M-bM-^@M-^\ecdsaM-bM-^@M-^]`, `M-bM-^@M-^\ed25519M-bM-^@M-^]` or `M-bM-^@M-^\rsaM-bM-^@M-^]` are used for version 2 of the SSH protocol. It is also possible to specify public host key files instead. In this case operations on the private key will be delegated to an ssh-agent(1).

## HostKeyAgent

Identifies the UNIX-domain socket used to communicate with an agent that has access to the private host keys. If

`M-bM-^@M-^\SSH_AUTH_SOCKETM-bM-^@M-^]` is specified, the location of the socket will be read from the `SSH_AUTH_SOCKET` environment variable.

## HostKeyAlgorithms

Specifies the host key algorithms that the server offers. The default for this option is:

```
ecdsa-sha2-nistp256-cert-v01@openssh.com,  
ecdsa-sha2-nistp384-cert-v01@openssh.com,  
ecdsa-sha2-nistp521-cert-v01@openssh.com,  
ssh-ed25519-cert-v01@openssh.com,  
ssh-rsa-cert-v01@openssh.com,  
ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,  
ssh-ed25519,ssh-rsa
```

The list of available key types may also be obtained using the `-Q` option of `ssh(1)` with an argument of `M-bM-^@M-^\keyM-bM-^@M-^]`.

## IgnoreRhosts

Specifies that `.rhosts` and `.shosts` files will not be used in `RhostsRSAAuthentication` or `HostbasedAuthentication`.

`/etc/hosts.equiv` and `/etc/shosts.equiv` are still used. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

## IgnoreUserKnownHosts

Specifies whether `sshd(8)` should ignore the user's `~/.ssh/known_hosts` during `RhostsRSAAuthentication` or `HostbasedAuthentication`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

**IPQoS** Specifies the IPv4 type-of-service or DSCP class for the connection. Accepted values are `M-bM-^@M-^\af11M-bM-^@M-^]`, `M-bM-^@M-^\af12M-bM-^@M-^]`, `M-bM-^@M-^\af13M-bM-^@M-^]`, `M-bM-^@M-^\af21M-bM-^@M-^]`, `M-bM-^@M-^\af22M-bM-^@M-^]`, `M-bM-^@M-^\af23M-bM-^@M-^]`, `M-bM-^@M-^\af31M-bM-^@M-^]`, `M-bM-^@M-^\af32M-bM-^@M-^]`, `M-bM-^@M-^\af33M-bM-^@M-^]`, `M-bM-^@M-^\af41M-bM-^@M-^]`, `M-bM-^@M-^\af42M-bM-^@M-^]`, `M-bM-^@M-^\af43M-bM-^@M-^]`, `M-bM-^@M-^\cs0M-bM-^@M-^]`, `M-bM-^@M-^\cs1M-bM-^@M-^]`, `M-bM-^@M-^\cs2M-bM-^@M-^]`, `M-bM-^@M-^\cs3M-bM-^@M-^]`, `M-bM-^@M-^\cs4M-bM-^@M-^]`, `M-bM-^@M-^\cs5M-bM-^@M-^]`, `M-bM-^@M-^\cs6M-bM-^@M-^]`, `M-bM-^@M-^\cs7M-bM-^@M-^]`, `M-bM-^@M-^\efM-bM-^@M-^]`, `M-bM-^@M-^\lowdelayM-bM-^@M-^]`, `M-bM-^@M-^\throughputM-bM-^@M-^]`, `M-bM-^@M-^\reliabilityM-bM-^@M-^]`, or a numeric value.

This option may take one or two arguments, separated by whitespace. If one argument is specified, it is used as the packet class unconditionally. If two values are specified, the

first is automatically selected for interactive sessions and the second for non-interactive sessions. The default is `M-bM-^@M-^\lowdelayM-bM-^@M-^]` for interactive sessions and `M-bM-^@M-^\throughputM-bM-^@M-^]` for non-interactive sessions.

#### KbdInteractiveAuthentication

Specifies whether to allow keyboard-interactive authentication.

The argument to this keyword must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default

is to use whatever value `ChallengeResponseAuthentication` is set to (by default `M-bM-^@M-^\yesM-bM-^@M-^]`).

#### KerberosAuthentication

Specifies whether the password provided by the user for `PasswordAuthentication` will be validated through the Kerberos KDC. To use this option, the server needs a Kerberos servtab which allows the verification of the KDC's identity. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### KerberosGetAFSToken

If AFS is active and the user has a Kerberos 5 TGT, attempt to acquire an AFS token before accessing the user's home directory. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### KerberosOrLocalPasswd

If password authentication through Kerberos fails then the password will be validated via any additional local mechanism such as `/etc/passwd`. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### KerberosTicketCleanup

Specifies whether to automatically destroy the user's ticket cache file on logout. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### KexAlgorithms

Specifies the available KEX (Key Exchange) algorithms. Multiple algorithms must be comma-separated. Alternately if the specified value begins with a `M-bM-^@M-^X+M-bM-^@M-^Y` character, then the specified methods will be appended to the default set instead of replacing them.

The supported algorithms are:

```
curve25519-sha256@libssh.org
diffie-hellman-group1-sha1
diffie-hellman-group14-sha1
diffie-hellman-group-exchange-sha1
diffie-hellman-group-exchange-sha256
ecdh-sha2-nistp256
ecdh-sha2-nistp384
ecdh-sha2-nistp521
```

The default is:

```
curve25519-sha256@libssh.org,  
ecdh-sha2-nistp256,ecdh-sha2-nistp384,ecdh-sha2-nistp521,  
diffie-hellman-group-exchange-sha256,  
diffie-hellman-group14-sha1
```

The list of available key exchange algorithms may also be obtained using the `-Q` option of `ssh(1)` with an argument of `M-bM-^@M-^kexM-bM-^@M-^`.

#### KeyRegenerationInterval

In protocol version 1, the ephemeral server key is automatically regenerated after this many seconds (if it has been used). The purpose of regeneration is to prevent decrypting captured sessions by later breaking into the machine and stealing the keys. The key is never stored anywhere. If the value is 0, the key is never regenerated. The default is 3600 (seconds).

#### ListenAddress

Specifies the local addresses `sshd(8)` should listen on. The following forms may be used:

```
ListenAddress host|IPv4_addr|IPv6_addr  
ListenAddress host|IPv4_addr:port  
ListenAddress [host|IPv6_addr]:port
```

If port is not specified, `sshd` will listen on the address and all Port options specified. The default is to listen on all local addresses. Multiple `ListenAddress` options are permitted.

#### LoginGraceTime

The server disconnects after this time if the user has not successfully logged in. If the value is 0, there is no time limit. The default is 120 seconds.

#### LogLevel

Gives the verbosity level that is used when logging messages from `sshd(8)`. The possible values are: QUIET, FATAL, ERROR, INFO, VERBOSE, DEBUG, DEBUG1, DEBUG2, and DEBUG3. The default is INFO. DEBUG and DEBUG1 are equivalent. DEBUG2 and DEBUG3 each specify higher levels of debugging output. Logging with a DEBUG level violates the privacy of users and is not recommended.

**MACs** Specifies the available MAC (message authentication code) algorithms. The MAC algorithm is used for data integrity protection. Multiple algorithms must be comma-separated. If the specified value begins with a `M-bM-^@M-^X+M-bM-^@M-^Y` character, then the specified

algorithms will be appended to the default set instead of replacing them.

The algorithms that contain M-bM-^@M-^\-etmM-bM-^@M-^] calculate the MAC after encryption (encrypt-then-mac). These are considered safer and their use recommended. The supported MACs are:

```
hmac-md5
hmac-md5-96
hmac-ripemd160
hmac-sha1
hmac-sha1-96
hmac-sha2-256
hmac-sha2-512
umac-64@openssh.com
umac-128@openssh.com
hmac-md5-etm@openssh.com
hmac-md5-96-etm@openssh.com
hmac-ripemd160-etm@openssh.com
hmac-sha1-etm@openssh.com
hmac-sha1-96-etm@openssh.com
hmac-sha2-256-etm@openssh.com
hmac-sha2-512-etm@openssh.com
umac-64-etm@openssh.com
umac-128-etm@openssh.com
```

The default is:

```
umac-64-etm@openssh.com,umac-128-etm@openssh.com,
hmac-sha2-256-etm@openssh.com,hmac-sha2-512-etm@openssh.com,
hmac-sha1-etm@openssh.com,
umac-64@openssh.com,umac-128@openssh.com,
hmac-sha2-256,hmac-sha2-512,hmac-sha1
```

The list of available MAC algorithms may also be obtained using the -Q option of ssh(1) with an argument of M-bM-^@M-^\macM-bM-^@M-^].

**Match** Introduces a conditional block. If all of the criteria on the Match line are satisfied, the keywords on the following lines override those set in the global section of the config file, until either another Match line or the end of the file. If a keyword appears in multiple Match blocks that are satisfied, only the first instance of the keyword is applied.

The arguments to Match are one or more criteria-pattern pairs or the single token All which matches all criteria. The available criteria are User, Group, Host, LocalAddress, LocalPort, and Address. The match patterns may consist of single entries or

comma-separated lists and may use the wildcard and negation operators described in the PATTERNS section of ssh\_config(5).

The patterns in an Address criteria may additionally contain addresses to match in CIDR address/masklen format, e.g.

M-bM-^@M-^\192.0.2.0/24M-bM-^@M-^] or M-bM-^@M-^\3ffe:ffff::/32M-bM-^@M-^]. Note that the mask length

provided must be consistent with the address - it is an error to specify a mask length that is too long for the address or one with bits set in this host portion of the address. For example, M-bM-^@M-^\192.0.2.0/33M-bM-^@M-^] and M-bM-^@M-^\192.0.2.0/8M-bM-^@M-^] respectively.

Only a subset of keywords may be used on the lines following a Match keyword. Available keywords are AcceptEnv, AllowAgentForwarding, AllowGroups, AllowStreamLocalForwarding, AllowTcpForwarding, AllowUsers, AuthenticationMethods, AuthorizedKeysCommand, AuthorizedKeysCommandUser, AuthorizedKeysFile, AuthorizedPrincipalsCommand, AuthorizedPrincipalsCommandUser, AuthorizedPrincipalsFile, Banner, ChrootDirectory, DenyGroups, DenyUsers, ForceCommand, GatewayPorts, GSSAPIAuthentication, HostbasedAcceptedKeyTypes, HostbasedAuthentication, HostbasedUsesNameFromPacketOnly, IPQoS, KbdInteractiveAuthentication, KerberosAuthentication, MaxAuthTries, MaxSessions, PasswordAuthentication, PermitEmptyPasswords, PermitOpen, PermitRootLogin, PermitTTY, PermitTunnel, PermitUserRC, PubkeyAcceptedKeyTypes, PubkeyAuthentication, RekeyLimit, RevokedKeys, RhostsRSAAuthentication, RSAAuthentication, StreamLocalBindMask, StreamLocalBindUnlink, TrustedUserCAKeys, X11DisplayOffset, X11Forwarding and X11UseLocalHost.

#### MaxAuthTries

Specifies the maximum number of authentication attempts permitted per connection. Once the number of failures reaches half this value, additional failures are logged. The default is 6.

#### MaxSessions

Specifies the maximum number of open shell, login or subsystem (e.g. sftp) sessions permitted per network connection. Multiple sessions may be established by clients that support connection multiplexing. Setting MaxSessions to 1 will effectively disable session multiplexing, whereas setting it to 0 will prevent all shell, login and subsystem sessions while still permitting forwarding. The default is 10.

#### MaxStartups

Specifies the maximum number of concurrent unauthenticated connections to the SSH daemon. Additional connections will be

dropped until authentication succeeds or the LoginGraceTime expires for a connection. The default is 10:30:100.

Alternatively, random early drop can be enabled by specifying the three colon separated values `M-bM-^@M-^\start:rate:fullM-bM-^@M-^]` (e.g. "10:30:60"). `sshd(8)` will refuse connection attempts with a probability of `M-bM-^@M-^\rate/100M-bM-^@M-^]` (30%) if there are currently `M-bM-^@M-^\startM-bM-^@M-^]` (10) unauthenticated connections. The probability increases linearly and all connection attempts are refused if the number of unauthenticated connections reaches `M-bM-^@M-^\fullM-bM-^@M-^]` (60).

#### PasswordAuthentication

Specifies whether password authentication is allowed. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### PermitEmptyPasswords

When password authentication is allowed, it specifies whether the server allows login to accounts with empty password strings. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### PermitOpen

Specifies the destinations to which TCP port forwarding is permitted. The forwarding specification must be one of the following forms:

```
PermitOpen host:port
PermitOpen IPv4_addr:port
PermitOpen [IPv6_addr]:port
```

Multiple forwards may be specified by separating them with whitespace. An argument of `M-bM-^@M-^\anyM-bM-^@M-^]` can be used to remove all restrictions and permit any forwarding requests. An argument of `M-bM-^@M-^\noneM-bM-^@M-^]` can be used to prohibit all forwarding requests. By default all port forwarding requests are permitted.

#### PermitRootLogin

Specifies whether root can log in using `ssh(1)`. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]`, `M-bM-^@M-^\prohibit-passwordM-bM-^@M-^]`, `M-bM-^@M-^\without-passwordM-bM-^@M-^]`, `M-bM-^@M-^\forced-commands-onlyM-bM-^@M-^]`, or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\prohibit-passwordM-bM-^@M-^]`.

If this option is set to `M-bM-^@M-^\prohibit-passwordM-bM-^@M-^]` or `M-bM-^@M-^\without-passwordM-bM-^@M-^]`, password and keyboard-interactive authentication are disabled for root.

If this option is set to `M-bM-^@M-^\forced-commands-onlyM-bM-^@M-^]`, root login with public key authentication will be allowed, but only if the

command option has been specified (which may be useful for taking remote backups even if root login is normally not allowed). All other authentication methods are disabled for root.

If this option is set to `M-bM-^@M-^\noM-bM-^@M-^]`, root is not allowed to log in.

#### PermitTunnel

Specifies whether tun(4) device forwarding is allowed. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]`, `M-bM-^@M-^\point-to-pointM-bM-^@M-^]` (layer 3), `M-bM-^@M-^\ethernetM-bM-^@M-^]` (layer 2), or `M-bM-^@M-^\noM-bM-^@M-^]`. Specifying `M-bM-^@M-^\yesM-bM-^@M-^]` permits both `M-bM-^@M-^\point-to-pointM-bM-^@M-^]` and `M-bM-^@M-^\ethernetM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

Independent of this setting, the permissions of the selected tun(4) device must allow access to the user.

#### PermitTTY

Specifies whether pty(4) allocation is permitted. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### PermitUserEnvironment

Specifies whether `~/ssh/environment` and `environment=` options in `~/ssh/authorized_keys` are processed by `sshd(8)`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`. Enabling environment processing may enable users to bypass access restrictions in some configurations using mechanisms such as `LD_PRELOAD`.

#### PermitUserRC

Specifies whether any `~/ssh/rc` file is executed. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### PidFile

Specifies the file that contains the process ID of the SSH daemon, or `M-bM-^@M-^\noneM-bM-^@M-^]` to not write one. The default is `/var/run/sshd.pid`.

**Port** Specifies the port number that `sshd(8)` listens on. The default is 22. Multiple options of this type are permitted. See also `ListenAddress`.

#### PrintLastLog

Specifies whether `sshd(8)` should print the date and time of the last user login when a user logs in interactively. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### PrintMotd

Specifies whether `sshd(8)` should print `/etc/motd` when a user logs

in interactively. (On some systems it is also printed by the shell, /etc/profile, or equivalent.) The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### Protocol

Specifies the protocol versions `sshd(8)` supports. The possible values are `M-bM-^@M-^X1M-bM-^@M-^Y` and `M-bM-^@M-^X2M-bM-^@M-^Y`. Multiple versions must be comma-separated. The default is `M-bM-^@M-^X2M-bM-^@M-^Y`. Protocol 1 suffers from a number of cryptographic weaknesses and should not be used. It is only offered to support legacy devices.

Note that the order of the protocol list does not indicate preference, because the client selects among multiple protocol versions offered by the server. Specifying `M-bM-^@M-^\2,1M-bM-^@M-^]` is identical to `M-bM-^@M-^\1,2M-bM-^@M-^]`.

#### PubkeyAcceptedKeyTypes

Specifies the key types that will be accepted for public key authentication as a comma-separated pattern list. Alternately if the specified value begins with a `M-bM-^@M-^X+M-bM-^@M-^Y` character, then the specified key types will be appended to the default set instead of replacing them. The default for this option is:

```
ecdsa-sha2-nistp256-cert-v01@openssh.com,  
ecdsa-sha2-nistp384-cert-v01@openssh.com,  
ecdsa-sha2-nistp521-cert-v01@openssh.com,  
ssh-ed25519-cert-v01@openssh.com,  
ssh-rsa-cert-v01@openssh.com,  
ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,  
ssh-ed25519,ssh-rsa
```

The `-Q` option of `ssh(1)` may be used to list supported key types.

#### PubkeyAuthentication

Specifies whether public key authentication is allowed. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### RekeyLimit

Specifies the maximum amount of data that may be transmitted before the session key is renegotiated, optionally followed a maximum amount of time that may pass before the session key is renegotiated. The first argument is specified in bytes and may have a suffix of `M-bM-^@M-^XKM-bM-^@M-^Y`, `M-bM-^@M-^XMM-bM-^@M-^Y`, or `M-bM-^@M-^XGM-bM-^@M-^Y` to indicate Kilobytes, Megabytes, or Gigabytes, respectively. The default is between `M-bM-^@M-^X1GM-bM-^@M-^Y` and `M-bM-^@M-^X4GM-bM-^@M-^Y`, depending on the cipher. The optional second value is specified in seconds and may use any of the units

documented in the TIME FORMATS section. The default value for RekeyLimit is `M-bM-^@M-^\default noneM-bM-^@M-^]`, which means that rekeying is performed after the cipher's default amount of data has been sent or received and no time based rekeying is done.

#### RevokedKeys

Specifies revoked public keys file, or `M-bM-^@M-^\noneM-bM-^@M-^]` to not use one. Keys listed in this file will be refused for public key authentication. Note that if this file is not readable, then public key authentication will be refused for all users. Keys may be specified as a text file, listing one public key per line, or as an OpenSSH Key Revocation List (KRL) as generated by `ssh-keygen(1)`. For more information on KRLs, see the KEY REVOCATION LISTS section in `ssh-keygen(1)`.

#### RhostsRSAAuthentication

Specifies whether rhosts or `/etc/hosts.equiv` authentication together with successful RSA host authentication is allowed. The default is `M-bM-^@M-^\noM-bM-^@M-^]`. This option applies to protocol version 1 only.

#### RSAAuthentication

Specifies whether pure RSA authentication is allowed. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`. This option applies to protocol version 1 only.

#### ServerKeyBits

Defines the number of bits in the ephemeral protocol version 1 server key. The default and minimum value is 1024.

#### StreamLocalBindMask

Sets the octal file creation mode mask (umask) used when creating a Unix-domain socket file for local or remote port forwarding. This option is only used for port forwarding to a Unix-domain socket file.

The default value is 0177, which creates a Unix-domain socket file that is readable and writable only by the owner. Note that not all operating systems honor the file mode on Unix-domain socket files.

#### StreamLocalBindUnlink

Specifies whether to remove an existing Unix-domain socket file for local or remote port forwarding before creating a new one. If the socket file already exists and `StreamLocalBindUnlink` is not enabled, `sshd` will be unable to forward the port to the Unix-domain socket file. This option is only used for port forwarding to a Unix-domain socket file.

The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

#### StrictModes

Specifies whether `sshd(8)` should check file modes and ownership of the user's files and home directory before accepting login.

This is normally desirable because novices sometimes accidentally leave their directory or files world-writable. The default is

`M-bM-^@M-^\yesM-bM-^@M-^]`. Note that this does not apply to `ChrootDirectory`, whose permissions and ownership are checked unconditionally.

#### Subsystem

Configures an external subsystem (e.g. file transfer daemon).

Arguments should be a subsystem name and a command (with optional arguments) to execute upon subsystem request.

The command `sftp-server(8)` implements the `M-bM-^@M-^\sftpM-bM-^@M-^]` file transfer subsystem.

Alternately the name `M-bM-^@M-^\internal-sftpM-bM-^@M-^]` implements an in-process `M-bM-^@M-^\sftpM-bM-^@M-^]` server. This may simplify configurations using `ChrootDirectory` to force a different filesystem root on clients.

By default no subsystems are defined.

#### SyslogFacility

Gives the facility code that is used when logging messages from `sshd(8)`. The possible values are: `DAEMON`, `USER`, `AUTH`, `LOCAL0`, `LOCAL1`, `LOCAL2`, `LOCAL3`, `LOCAL4`, `LOCAL5`, `LOCAL6`, `LOCAL7`. The default is `AUTH`.

#### TCPKeepAlive

Specifies whether the system should send TCP keepalive messages to the other side. If they are sent, death of the connection or crash of one of the machines will be properly noticed. However, this means that connections will die if the route is down temporarily, and some people find it annoying. On the other hand, if TCP keepalives are not sent, sessions may hang indefinitely on the server, leaving `M-bM-^@M-^\ghostM-bM-^@M-^]` users and consuming server resources.

The default is `M-bM-^@M-^\yesM-bM-^@M-^]` (to send TCP keepalive messages), and the server will notice if the network goes down or the client host crashes. This avoids infinitely hanging sessions.

To disable TCP keepalive messages, the value should be set to `M-bM-^@M-^\noM-bM-^@M-^]`.

### TrustedUserCAKeys

Specifies a file containing public keys of certificate authorities that are trusted to sign user certificates for authentication, or `M-bM-^@M-^\noneM-bM-^@M-^]` to not use one. Keys are listed one per line; empty lines and comments starting with `M-bM-^@M-^X#M-bM-^@M-^Y` are allowed. If a certificate is presented for authentication and has its signing CA key listed in this file, then it may be used for authentication for any user listed in the certificate's principals list. Note that certificates that lack a list of principals will not be permitted for authentication using `TrustedUserCAKeys`. For more details on certificates, see the `CERTIFICATES` section in `ssh-keygen(1)`.

`UseDNS` Specifies whether `sshd(8)` should look up the remote host name, and to check that the resolved host name for the remote IP address maps back to the very same IP address.

If this option is set to `M-bM-^@M-^\noM-bM-^@M-^]` (the default) then only addresses and not host names may be used in `~/.ssh/known_hosts` from and `sshd_config Match Host` directives.

### UseLogin

Specifies whether `login(1)` is used for interactive login sessions. The default is `M-bM-^@M-^\noM-bM-^@M-^]`. Note that `login(1)` is never used for remote command execution. Note also, that if this is enabled, `X11Forwarding` will be disabled because `login(1)` does not know how to handle `xauth(1)` cookies. If `UsePrivilegeSeparation` is specified, it will be disabled after authentication.

`UsePAM` Enables the Pluggable Authentication Module interface. If set to `M-bM-^@M-^\yesM-bM-^@M-^]` this will enable PAM authentication using `ChallengeResponseAuthentication` and `PasswordAuthentication` in addition to PAM account and session module processing for all authentication types.

Because PAM challenge-response authentication usually serves an equivalent role to password authentication, you should disable either `PasswordAuthentication` or `ChallengeResponseAuthentication`.

If `UsePAM` is enabled, you will not be able to run `sshd(8)` as a non-root user. The default is `M-bM-^@M-^\noM-bM-^@M-^]`.

### UsePrivilegeSeparation

Specifies whether `sshd(8)` separates privileges by creating an unprivileged child process to deal with incoming network traffic. After successful authentication, another process will be created that has the privilege of the authenticated user. The goal of privilege separation is to prevent privilege escalation by

containing any corruption within the unprivileged processes. The argument must be `M-bM-^@M-^yesM-bM-^@M-^]`, `M-bM-^@M-^noM-bM-^@M-^]`, or `M-bM-^@M-^sandboxM-bM-^@M-^]`. If

`UsePrivilegeSeparation` is set to `M-bM-^@M-^sandboxM-bM-^@M-^]` then the pre-authentication unprivileged process is subject to additional restrictions. The default is `M-bM-^@M-^sandboxM-bM-^@M-^]`.

#### VersionAddendum

Optionally specifies additional text to append to the SSH protocol banner sent by the server upon connection. The default is `M-bM-^@M-^noneM-bM-^@M-^]`.

#### X11DisplayOffset

Specifies the first display number available for `sshd(8)`'s X11 forwarding. This prevents `sshd` from interfering with real X11 servers. The default is 10.

#### X11Forwarding

Specifies whether X11 forwarding is permitted. The argument must be `M-bM-^@M-^yesM-bM-^@M-^]` or `M-bM-^@M-^noM-bM-^@M-^]`. The default is `M-bM-^@M-^noM-bM-^@M-^]`.

When X11 forwarding is enabled, there may be additional exposure to the server and to client displays if the `sshd(8)` proxy display is configured to listen on the wildcard address (see `X11UseLocalhost` below), though this is not the default. Additionally, the authentication spoofing and authentication data verification and substitution occur on the client side. The security risk of using X11 forwarding is that the client's X11 display server may be exposed to attack when the SSH client requests forwarding (see the warnings for `ForwardX11` in `ssh_config(5)`). A system administrator may have a stance in which they want to protect clients that may expose themselves to attack by unwittingly requesting X11 forwarding, which can warrant a `M-bM-^@M-^noM-bM-^@M-^]` setting.

Note that disabling X11 forwarding does not prevent users from forwarding X11 traffic, as users can always install their own forwarders. X11 forwarding is automatically disabled if `UseLogin` is enabled.

#### X11UseLocalhost

Specifies whether `sshd(8)` should bind the X11 forwarding server to the loopback address or to the wildcard address. By default, `sshd` binds the forwarding server to the loopback address and sets the hostname part of the `DISPLAY` environment variable to `M-bM-^@M-^localhostM-bM-^@M-^]`. This prevents remote hosts from connecting to the proxy display. However, some older X11 clients may not function

with this configuration. `X11UseLocalhost` may be set to `M-bM-^@M-^\noM-bM-^@M-^]` to specify that the forwarding server should be bound to the wildcard address. The argument must be `M-bM-^@M-^\yesM-bM-^@M-^]` or `M-bM-^@M-^\noM-bM-^@M-^]`. The default is `M-bM-^@M-^\yesM-bM-^@M-^]`.

#### XAuthLocation

Specifies the full pathname of the `xauth(1)` program, or `M-bM-^@M-^\noneM-bM-^@M-^]` to not use one. The default is `/usr/X11R6/bin/xauth`.

#### TIME FORMATS

`sshd(8)` command-line arguments and configuration file options that specify time may be expressed using a sequence of the form: `time[qualifier]`, where `time` is a positive integer value and `qualifier` is one of the following:

`M-bM-^_M-(noneM-bM-^_M-)` seconds  
s | S seconds  
m | M minutes  
h | H hours  
d | D days  
w | W weeks

Each member of the sequence is added together to calculate the total time value.

Time format examples:

600 600 seconds (10 minutes)  
10m 10 minutes  
1h30m 1 hour 30 minutes (90 minutes)

#### FILES

`/etc/ssh/sshd_config`

Contains configuration data for `sshd(8)`. This file should be writable by root only, but it is recommended (though not necessary) that it be world-readable.

#### SEE ALSO

`sshd(8)`

#### AUTHORS

OpenSSH is a derivative of the original and free `ssh 1.2.12` release by Tatu Ylonen. Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt and Dug Song removed many bugs, re-added newer features and created OpenSSH. Markus Friedl contributed the support for SSH protocol versions 1.5 and 2.0. Niels Provos and Markus Friedl contributed support for privilege separation.

.Dt SSHD_CONFIG 5
.Os
.Sh NAME
.Nm sshd_config
.Nd OpenSSH SSH daemon configuration file
.Sh SYNOPSIS
.Nm /etc/ssh/sshd_config
.Sh DESCRIPTION
.Xr sshd 8
```

reads configuration data from

.Pa /etc/ssh/sshd\_config

(or the file specified with

.Ff

on the command line).

The file contains keyword-argument pairs, one per line.

Lines starting with

.Ql #

and empty lines are interpreted as comments.

Arguments may optionally be enclosed in double quotes

.Pq \&"

in order to represent arguments containing spaces.

.Pp

The possible

keywords and their meanings are as follows (note that

keywords are case-insensitive and arguments are case-sensitive):

.Bl -tag -width Ds

.It Cm AcceptEnv

Specifies what environment variables sent by the client will be copied into the session's

.Xr environ 7 .

See

.Cm SendEnv

in

.Xr ssh\_config 5

for how to configure the client.

The

.Ev TERM

environment variable is always sent whenever the client

requests a pseudo-terminal as it is required by the protocol.

Variables are specified by name, which may contain the wildcard characters

.Ql \*

and

.Ql \&? .

Multiple environment variables may be separated by whitespace or spread across multiple

.Cm AcceptEnv

directives.

Be warned that some environment variables could be used to bypass restricted user environments.

For this reason, care should be taken in the use of this directive.

The default is not to accept any environment variables.

.It Cm AddressFamily

Specifies which address family should be used by

.Xr sshd 8 .

Valid arguments are

.Dq any ,

.Dq inet

(use IPv4 only), or

.Dq inet6

(use IPv6 only).

The default is

.Dq any .

.It Cm AllowAgentForwarding

Specifies whether

.Xr ssh-agent 1

forwarding is permitted.

The default is

.Dq yes .

Note that disabling agent forwarding does not improve security unless users are also denied shell access, as they can always install their own forwarders.

.It Cm AllowGroups

This keyword can be followed by a list of group name patterns, separated by spaces.

If specified, login is allowed only for users whose primary group or supplementary group list matches one of the patterns.

Only group names are valid; a numerical group ID is not recognized.

By default, login is allowed for all groups.

The allow/deny directives are processed in the following order:

.Cm DenyUsers ,

.Cm AllowUsers ,

.Cm DenyGroups ,

and finally

.Cm AllowGroups .

.Pp

See PATTERNS in

.Xr ssh\_config 5

for more information on patterns.

.It Cm AllowTcpForwarding

Specifies whether TCP forwarding is permitted.

The available options are

.Dq yes

or

.Dq all

to allow TCP forwarding,

.Dq no

to prevent all TCP forwarding,

.Dq local

to allow local (from the perspective of

.Xr ssh 1 )

forwarding only or

.Dq remote

to allow remote forwarding only.

The default is

.Dq yes .

Note that disabling TCP forwarding does not improve security unless users are also denied shell access, as they can always install their own forwarders.

.It Cm AllowStreamLocalForwarding

Specifies whether StreamLocal (Unix-domain socket) forwarding is permitted.

The available options are

.Dq yes

or

.Dq all

to allow StreamLocal forwarding,

.Dq no

to prevent all StreamLocal forwarding,

.Dq local

to allow local (from the perspective of

.Xr ssh 1 )

forwarding only or

.Dq remote

to allow remote forwarding only.

The default is

.Dq yes .

Note that disabling StreamLocal forwarding does not improve security unless users are also denied shell access, as they can always install their own forwarders.

.It Cm AllowUsers

This keyword can be followed by a list of user name patterns, separated by spaces.

If specified, login is allowed only for user names that match one of the patterns.

Only user names are valid; a numerical user ID is not recognized.

By default, login is allowed for all users.

If the pattern takes the form USER@HOST then USER and HOST are separately checked, restricting logins to particular users from particular hosts.

The allow/deny directives are processed in the following order:

.Cm DenyUsers ,

.Cm AllowUsers ,

.Cm DenyGroups ,

and finally

.Cm AllowGroups .

.Pp

See PATTERNS in

.Xr ssh\_config 5

for more information on patterns.

.It Cm AuthenticationMethods

Specifies the authentication methods that must be successfully completed for a user to be granted access.

This option must be followed by one or more comma-separated lists of authentication method names.

Successful authentication requires completion of every method in at least one of these lists.

.Pp

For example, an argument of

.Dq publickey,password publickey,keyboard-interactive

would require the user to complete public key authentication, followed by either password or keyboard interactive authentication.

Only methods that are next in one or more lists are offered at each stage, so for this example, it would not be possible to attempt password or keyboard-interactive authentication before public key.

.Pp

For keyboard interactive authentication it is also possible to restrict authentication to a specific device by appending a colon followed by the device identifier

.Dq bsdauth ,

.Dq pam ,

or

.Dq skey ,

depending on the server configuration.

For example,

.Dq keyboard-interactive:bsdauth

would restrict keyboard interactive authentication to the

.Dq bsdauth

device.

.Pp

If the

.Dq publickey

method is listed more than once,

.Xr sshd 8

verifies that keys that have been used successfully are not reused for subsequent authentications.

For example, an

.Cm AuthenticationMethods

of

.Dq publickey,publickey

will require successful authentication using two different public keys.

.Pp

This option will yield a fatal

error if enabled if protocol 1 is also enabled.

Note that each authentication method listed should also be explicitly enabled in the configuration.

The default is not to require multiple authentication; successful completion of a single authentication method is sufficient.

.It Cm AuthorizedKeysCommand

Specifies a program to be used to look up the user's public keys.

The program must be owned by root, not writable by group or others and specified by an absolute path.

.Pp

Arguments to

.Cm AuthorizedKeysCommand

may be provided using the following tokens, which will be expanded at runtime: %% is replaced by a literal '%', %u is replaced by the username being authenticated, %h is replaced by the home directory of the user being authenticated, %t is replaced with the key type offered for authentication, %f is replaced with the fingerprint of the key, and %k is replaced with the key being offered for authentication.

If no arguments are specified then the username of the target user will be supplied.

.Pp

The program should produce on standard output zero or more lines of authorized\_keys output (see AUTHORIZED\_KEYS in

.Xr sshd 8 ) .

If a key supplied by AuthorizedKeysCommand does not successfully authenticate and authorize the user then public key authentication continues using the usual

.Cm AuthorizedKeysFile

files.

By default, no AuthorizedKeysCommand is run.

.It Cm AuthorizedKeysCommandUser

Specifies the user under whose account the AuthorizedKeysCommand is run.

It is recommended to use a dedicated user that has no other role on the host than running authorized keys commands.

If

.Cm AuthorizedKeysCommand

is specified but

.Cm AuthorizedKeysCommandUser

is not, then

.Xr sshd 8

will refuse to start.

.It Cm AuthorizedKeysFile

Specifies the file that contains the public keys that can be used for user authentication.

The format is described in the

AUTHORIZED\_KEYS FILE FORMAT

section of

.Xr sshd 8 .

.Cm AuthorizedKeysFile

may contain tokens of the form %T which are substituted during connection setup.

The following tokens are defined: %% is replaced by a literal '%', %h is replaced by the home directory of the user being authenticated, and %u is replaced by the username of that user.

After expansion,

.Cm AuthorizedKeysFile

is taken to be an absolute path or one relative to the user's home directory.

Multiple files may be listed, separated by whitespace.

Alternately this option may be set to

.Dq none

to skip checking for user keys in files.

The default is

.Dq .ssh/authorized\_keys .ssh/authorized\_keys2 .

.It Cm AuthorizedPrincipalsCommand

Specifies a program to be used to generate the list of allowed certificate principals as per

.Cm AuthorizedPrincipalsFile .

The program must be owned by root, not writable by group or others and specified by an absolute path.

.Pp

Arguments to

.Cm AuthorizedPrincipalsCommand

may be provided using the following tokens, which will be expanded at runtime: %% is replaced by a literal '%', %u is replaced by the username being authenticated and %h is replaced by the home directory of the user being authenticated.

.Pp

The program should produce on standard output zero or more lines of

.Cm AuthorizedPrincipalsFile

output.

If either

.Cm AuthorizedPrincipalsCommand

or

.Cm AuthorizedPrincipalsFile

is specified, then certificates offered by the client for authentication must contain a principal that is listed.

By default, no AuthorizedPrincipalsCommand is run.

.It Cm AuthorizedPrincipalsCommandUser

Specifies the user under whose account the AuthorizedPrincipalsCommand is run.

It is recommended to use a dedicated user that has no other role on the host than running authorized principals commands.

If

.Cm AuthorizedPrincipalsCommand

is specified but

.Cm AuthorizedPrincipalsCommandUser

is not, then

.Xr sshd 8

will refuse to start.

.It Cm AuthorizedPrincipalsFile

Specifies a file that lists principal names that are accepted for certificate authentication.

When using certificates signed by a key listed in

.Cm TrustedUserCAKeys ,

this file lists names, one of which must appear in the certificate for it to be accepted for authentication.

Names are listed one per line preceded by key options (as described in AUTHORIZED\_KEYS FILE FORMAT in

.Xr sshd 8 ) .

Empty lines and comments starting with

.Ql #

are ignored.

.Pp

.Cm AuthorizedPrincipalsFile

may contain tokens of the form %T which are substituted during connection setup.

The following tokens are defined: %% is replaced by a literal '%', %h is replaced by the home directory of the user being authenticated, and %u is replaced by the username of that user.

After expansion,

.Cm AuthorizedPrincipalsFile

is taken to be an absolute path or one relative to the user's home directory.

.Pp

The default is

.Dq none ,

i.e. not to use a principals file \ (en in this case, the username of the user must appear in a certificate's principals list for it to be accepted.

Note that

.Cm AuthorizedPrincipalsFile

is only used when authentication proceeds using a CA listed in

.Cm TrustedUserCAKeys

and is not consulted for certification authorities trusted via

.Pa ~/.ssh/authorized\_keys ,

though the

.Cm principals=

key option offers a similar facility (see

.Xr sshd 8

for details).

.It Cm Banner

The contents of the specified file are sent to the remote user before authentication is allowed.

If the argument is

.Dq none

then no banner is displayed.

By default, no banner is displayed.

.It Cm ChallengeResponseAuthentication

Specifies whether challenge-response authentication is allowed (e.g. via PAM or through authentication styles supported in

.Xr login.conf 5 )

The default is

.Dq yes .

.It Cm ChrootDirectory

Specifies the pathname of a directory to

.Xr chroot 2

to after authentication.

At session startup

.Xr sshd 8

checks that all components of the pathname are root-owned directories

which are not writable by any other user or group.

After the chroot,

.Xr sshd 8

changes the working directory to the user's home directory.

.Pp

The pathname may contain the following tokens that are expanded at runtime once

the connecting user has been authenticated: %% is replaced by a literal '%',

%h is replaced by the home directory of the user being authenticated, and

%u is replaced by the username of that user.

.Pp

The

.Cm ChrootDirectory

must contain the necessary files and directories to support the

user's session.

For an interactive session this requires at least a shell, typically

.Xr sh 1 ,

and basic

.Pa /dev

nodes such as

.Xr null 4 ,

.Xr zero 4 ,

.Xr stdin 4 ,

.Xr stdout 4 ,

.Xr stderr 4 ,

and

.Xr tty 4

devices.

For file transfer sessions using

.Dq sftp ,

no additional configuration of the environment is necessary if the

in-process sftp server is used,

though sessions which use logging may require

.Pa /dev/log

inside the chroot directory on some operating systems (see

.Xr sftp-server 8

for details).

.Pp

For safety, it is very important that the directory hierarchy be

prevented from modification by other processes on the system (especially

those outside the jail).

Misconfiguration can lead to unsafe environments which

.Xr sshd 8

cannot detect.

.Pp

The default is

.Dq none ,

indicating not to

.Xr chroot 2 .

.It Cm Ciphers

Specifies the ciphers allowed.

Multiple ciphers must be comma-separated.

If the specified value begins with a

.Sq +

character, then the specified ciphers will be appended to the default set instead of replacing them.

.Pp

The supported ciphers are:

.Pp

.Bl -item -compact -offset indent

.It

3des-cbc

.It

aes128-cbc

.It

.It

arcfour256

.It

blowfish-cbc

.It

cast128-cbc

.It

chacha20-poly1305@openssh.com

.El

.Pp

The default is:

.Bd -literal -offset indent

chacha20-poly1305@openssh.com,

aes128-ctr,aes192-ctr,aes256-ctr,

aes128-gcm@openssh.com,aes256-gcm@openssh.com

.Ed

.Pp

The list of available ciphers may also be obtained using the

.F1 Q

option of

.Xr ssh 1

with an argument of

.Dq cipher .

.It Cm ClientAliveCountMax

Sets the number of client alive messages (see below) which may be sent without

.Xr sshd 8

receiving any messages back from the client.

If this threshold is reached while client alive messages are being sent, sshd will disconnect the client, terminating the session.

It is important to note that the use of client alive messages is very different from

.Cm TCPKeepAlive

(below).

The client alive messages are sent through the encrypted channel and therefore will not be spoofable.

The TCP keepalive option enabled by

.Cm TCPKeepAlive

is spoofable.

The client alive mechanism is valuable when the client or server depend on knowing when a connection has become inactive.

.Pp

The default value is 3.

If

.Cm ClientAliveInterval

(see below) is set to 15, and

.Cm ClientAliveCountMax

is left at the default, unresponsive SSH clients

will be disconnected after approximately 45 seconds.

.It Cm ClientAliveInterval

Sets a timeout interval in seconds after which if no data has been received from the client,

.Xr sshd 8

will send a message through the encrypted channel to request a response from the client.

The default

is 0, indicating that these messages will not be sent to the client.

#### .It Cm Compression

Specifies whether compression is allowed, or delayed until the user has authenticated successfully.

The argument must be

.Dq yes ,

.Dq delayed ,

or

.Dq no .

The default is

.Dq delayed .

#### .It Cm DenyGroups

This keyword can be followed by a list of group name patterns, separated by spaces.

Login is disallowed for users whose primary group or supplementary group list matches one of the patterns.

Only group names are valid; a numerical group ID is not recognized.

By default, login is allowed for all groups.

The allow/deny directives are processed in the following order:

.Cm DenyUsers ,

.Cm AllowUsers ,

.Cm DenyGroups ,

and finally

.Cm AllowGroups .

.Pp

See PATTERNS in

.Xr ssh\_config 5

for more information on patterns.

#### .It Cm DenyUsers

This keyword can be followed by a list of user name patterns, separated by spaces.

Login is disallowed for user names that match one of the patterns.

Only user names are valid; a numerical user ID is not recognized.

By default, login is allowed for all users.

If the pattern takes the form USER@HOST then USER and HOST are separately checked, restricting logins to particular users from particular hosts.

The allow/deny directives are processed in the following order:

.Cm DenyUsers ,

.Cm AllowUsers ,

.Cm DenyGroups ,

and finally

.Cm AllowGroups .

.Pp

See PATTERNS in

.Xr ssh\_config 5

for more information on patterns.

#### .It Cm FingerprintHash

Specifies the hash algorithm used when logging key fingerprints.

Valid options are:

.Dq md5

and

.Dq sha256 .

The default is

.Dq sha256 .

.It Cm ForceCommand

Forces the execution of the command specified by

.Cm ForceCommand ,

ignoring any command supplied by the client and

.Pa ~/.ssh/rc

if present.

The command is invoked by using the user's login shell with the -c option.

This applies to shell, command, or subsystem execution.

It is most useful inside a

.Cm Match

block.

The command originally supplied by the client is available in the

.Ev SSH\_ORIGINAL\_COMMAND

environment variable.

Specifying a command of

.Dq internal-sftp

will force the use of an in-process sftp server that requires no support

files when used with

.Cm ChrootDirectory .

The default is

.Dq none .

.It Cm GatewayPorts

Specifies whether remote hosts are allowed to connect to ports

forwarded for the client.

By default,

.Xr sshd 8

binds remote port forwardings to the loopback address.

This prevents other remote hosts from connecting to forwarded ports.

.Cm GatewayPorts

can be used to specify that sshd

should allow remote port forwardings to bind to non-loopback addresses, thus

allowing other hosts to connect.

The argument may be

.Dq no

to force remote port forwardings to be available to the local host only,

.Dq yes

to force remote port forwardings to bind to the wildcard address, or

.Dq clientspecified

to allow the client to select the address to which the forwarding is bound.

The default is

.Dq no .

.It Cm GSSAPIAuthentication

Specifies whether user authentication based on GSSAPI is allowed.

The default is

.Dq no .

.It Cm GSSAPICleanupCredentials

Specifies whether to automatically destroy the user's credentials cache on logout.

The default is

.Dq yes .

.It Cm GSSAPIStrictAcceptorCheck

Determines whether to be strict about the identity of the GSSAPI acceptor a client authenticates against.

If set to

.Dq yes

then the client must authenticate against the

.Pa host

service on the current hostname.

If set to

.Dq no

then the client may authenticate against any service key stored in the machine's default store.

This facility is provided to assist with operation on multi homed machines.

The default is

.Dq yes .

.It Cm HostbasedAcceptedKeyTypes

Specifies the key types that will be accepted for hostbased authentication as a comma-separated pattern list.

Alternately if the specified value begins with a

.Sq +

character, then the specified key types will be appended to the default set instead of replacing them.

The default for this option is:

.Bd -literal -offset 3n

ecdsa-sha2-nistp256-cert-v01@openssh.com,

ecdsa-sha2-nistp384-cert-v01@openssh.com,

ecdsa-sha2-nistp521-cert-v01@openssh.com,

ssh-ed25519-cert-v01@openssh.com,

ssh-rsa-cert-v01@openssh.com,

ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,

ssh-ed25519,ssh-rsa

.Ed

.Pp

The

.Fl Q

option of

.Xr ssh 1

may be used to list supported key types.

.It Cm HostbasedAuthentication

Specifies whether rhosts or /etc/hosts.equiv authentication together

with successful public key client host authentication is allowed (host-based authentication).

The default is

.Dq no .

.It Cm HostbasedUsesNameFromPacketOnly

Specifies whether or not the server will attempt to perform a reverse name lookup when matching the name in the

.Pa ~/.shosts ,

.Pa ~/.rhosts ,

and

.Pa /etc/hosts.equiv

files during

.Cm HostbasedAuthentication .

A setting of

.Dq yes

means that

.Xr sshd 8

uses the name supplied by the client rather than

attempting to resolve the name from the TCP connection itself.

The default is

.Dq no .

.It Cm HostCertificate

Specifies a file containing a public host certificate.

The certificate's public key must match a private host key already specified by

.Cm HostKey .

The default behaviour of

.Xr sshd 8

is not to load any certificates.

.It Cm HostKey

Specifies a file containing a private host key used by SSH.

The default is

.Pa /etc/ssh/ssh\_host\_key

for protocol version 1, and

.Pa /etc/ssh/ssh\_host\_dsa\_key ,

.Pa /etc/ssh/ssh\_host\_ecdsa\_key ,

.Pa /etc/ssh/ssh\_host\_ed25519\_key

and

.Pa /etc/ssh/ssh\_host\_rsa\_key

for protocol version 2.

.Pp

Note that

.Xr sshd 8

will refuse to use a file if it is group/world-accessible

and that the

.Cm HostKeyAlgorithms

option restricts which of the keys are actually used by

.Xr sshd 8 .

.Pp

It is possible to have multiple host key files.

.Dq rsa1

keys are used for version 1 and

.Dq dsa ,

.Dq ecdsa ,

.Dq ed25519

or

.Dq rsa

are used for version 2 of the SSH protocol.

It is also possible to specify public host key files instead.

In this case operations on the private key will be delegated to an

.Xr ssh-agent 1 .

.It Cm HostKeyAgent

Identifies the UNIX-domain socket used to communicate with an agent that has access to the private host keys.

If

.Dq SSH\_AUTH\_SOCK

is specified, the location of the socket will be read from the

.Ev SSH\_AUTH\_SOCK

environment variable.

.It Cm HostKeyAlgorithms

Specifies the host key algorithms that the server offers.

The default for this option is:

.Bd -literal -offset 3n

ecdsa-sha2-nistp256-cert-v01@openssh.com,

ecdsa-sha2-nistp384-cert-v01@openssh.com,

ecdsa-sha2-nistp521-cert-v01@openssh.com,

ssh-ed25519-cert-v01@openssh.com,

ssh-rsa-cert-v01@openssh.com,

ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,

ssh-ed25519,ssh-rsa

.Ed

.Pp

The list of available key types may also be obtained using the

.Fl Q

option of

.Xr ssh 1

with an argument of

.Dq key .

.It Cm IgnoreRhosts

Specifies that

.Pa .rhosts

and

.Pa .shosts

files will not be used in

.Cm RhostsRSAAuthentication

or

.Cm HostbasedAuthentication .

.Pp

.Pa /etc/hosts.equiv

and

.Pa /etc/shosts.equiv

are still used.

The default is

.Dq yes .

.It Cm IgnoreUserKnownHosts

Specifies whether

.Xr sshd 8

should ignore the user's

.Pa ~/.ssh/known\_hosts

during

.Cm RhostsRSAAuthentication

or

.Cm HostbasedAuthentication .

The default is

.Dq no .

.It Cm IPQoS

Specifies the IPv4 type-of-service or DSCP class for the connection.

Accepted values are

.Dq af11 ,

.Dq af12 ,

.Dq af13 ,

.Dq af21 ,

.Dq af22 ,

.Dq af23 ,

.Dq af31 ,

.Dq af32 ,

.Dq af33 ,

.Dq af41 ,

.Dq af42 ,

.Dq af43 ,

.Dq cs0 ,

.Dq cs1 ,

.Dq cs2 ,

.Dq cs3 ,

.Dq cs4 ,

.Dq cs5 ,

.Dq cs6 ,

.Dq cs7 ,

.Dq ef ,

.Dq lowdelay ,

.Dq throughput ,

.Dq reliability ,  
or a numeric value.

This option may take one or two arguments, separated by whitespace.

If one argument is specified, it is used as the packet class unconditionally.

If two values are specified, the first is automatically selected for interactive sessions and the second for non-interactive sessions.

The default is

.Dq lowdelay

for interactive sessions and

.Dq throughput

for non-interactive sessions.

.It Cm KbdInteractiveAuthentication

Specifies whether to allow keyboard-interactive authentication.

The argument to this keyword must be

.Dq yes

or

.Dq no .

The default is to use whatever value

.Cm ChallengeResponseAuthentication

is set to

(by default

.Dq yes ) .

.It Cm KerberosAuthentication

Specifies whether the password provided by the user for

.Cm PasswordAuthentication

will be validated through the Kerberos KDC.

To use this option, the server needs a

Kerberos servtab which allows the verification of the KDC's identity.

The default is

.Dq no .

.It Cm KerberosGetAFSToken

If AFS is active and the user has a Kerberos 5 TGT, attempt to acquire an AFS token before accessing the user's home directory.

The default is

.Dq no .

.It Cm KerberosOrLocalPasswd

If password authentication through Kerberos fails then

the password will be validated via any additional local mechanism

such as

.Pa /etc/passwd .

The default is

.Dq yes .

.It Cm KerberosTicketCleanup

Specifies whether to automatically destroy the user's ticket cache file on logout.

The default is

.Dq yes .

.It Cm KexAlgorithms

Specifies the available KEX (Key Exchange) algorithms.

Multiple algorithms must be comma-separated.

Alternately if the specified value begins with a

.Sq +

character, then the specified methods will be appended to the default set instead of replacing them.

The supported algorithms are:

.Pp

.Bl -item -compact -offset indent

.It

curve25519-sha256@libssh.org

.It

diffie-hellman-group1-sha1

.It

diffie-hellman-group14-sha1

.It

diffie-hellman-group-exchange-sha1

.It

diffie-hellman-group-exchange-sha256

.It

ecdh-sha2-nistp256

.It

ecdh-sha2-nistp384

.It

ecdh-sha2-nistp521

.El

.Pp

The default is:

.Bd -literal -offset indent

curve25519-sha256@libssh.org,

ecdh-sha2-nistp256,ecdh-sha2-nistp384,ecdh-sha2-nistp521,

diffie-hellman-group-exchange-sha256,

diffie-hellman-group14-sha1

.Ed

.Pp

The list of available key exchange algorithms may also be obtained using the

.Fl Q

option of

.Xr ssh 1

with an argument of

.Dq kex .

.It Cm KeyRegenerationInterval

In protocol version 1, the ephemeral server key is automatically regenerated after this many seconds (if it has been used).

The purpose of regeneration is to prevent

decrypting captured sessions by later breaking into the machine and stealing the keys.

The key is never stored anywhere.

If the value is 0, the key is never regenerated.

The default is 3600 (seconds).

.It Cm ListenAddress

Specifies the local addresses

.Xr sshd 8

should listen on.

The following forms may be used:

.Pp

.Bl -item -offset indent -compact

.It

.Cm ListenAddress

.Sm off

.Ar host | Ar IPv4\_addr | Ar IPv6\_addr

.Sm on

.It

.Cm ListenAddress

.Sm off

.Ar host | Ar IPv4\_addr : Ar port

.Sm on

.It

.Cm ListenAddress

.Sm off

.Oo

.Ar host | Ar IPv6\_addr Oc : Ar port

.Sm on

.El

.Pp

If

.Ar port

is not specified,

sshd will listen on the address and all

.Cm Port

options specified.

The default is to listen on all local addresses.

Multiple

.Cm ListenAddress

options are permitted.

.It Cm LoginGraceTime

The server disconnects after this time if the user has not successfully logged in.

If the value is 0, there is no time limit.

The default is 120 seconds.

.It Cm LogLevel

Gives the verbosity level that is used when logging messages from

.Xr sshd 8 .

The possible values are:

QUIET, FATAL, ERROR, INFO, VERBOSE, DEBUG, DEBUG1, DEBUG2, and DEBUG3.

The default is INFO.

DEBUG and DEBUG1 are equivalent.

DEBUG2 and DEBUG3 each specify higher levels of debugging output.

Logging with a DEBUG level violates the privacy of users and is not recommended.

.It Cm MACs

Specifies the available MAC (message authentication code) algorithms.

The MAC algorithm is used for data integrity protection.

Multiple algorithms must be comma-separated.

If the specified value begins with a

.Sq +

character, then the specified algorithms will be appended to the default set instead of replacing them.

.Pp

The algorithms that contain

.Dq -etm

calculate the MAC after encryption (encrypt-then-mac).

These are considered safer and their use recommended.

The supported MACs are:

.Pp

.Bl -item -compact -offset indent

.It

hmac-md5

.It

hmac-md5-96

.It

hmac-ripemd160

.It

hmac-sha1

.It

hmac-sha1-96

.It

hmac-sha2-256

.It

hmac-sha2-512

.It

umac-64@openssh.com

.It

umac-128@openssh.com

.It

hmac-md5-etm@openssh.com

.It

hmac-md5-96-etm@openssh.com

.It

hmac-ripemd160-etm@openssh.com

.It

hmac-sha1-etm@openssh.com

.It

hmac-sha1-96-etm@openssh.com

.It

hmac-sha2-256-etm@openssh.com

.It

hmac-sha2-512-etm@openssh.com

.It

umac-64-etm@openssh.com

.It

umac-128-etm@openssh.com

.El

.Pp

The default is:

.Bd -literal -offset indent

umac-64-etm@openssh.com,umac-128-etm@openssh.com,

hmac-sha2-256-etm@openssh.com,hmac-sha2-512-etm@openssh.com,

hmac-sha1-etm@openssh.com,

umac-64@openssh.com,umac-128@openssh.com,

hmac-sha2-256,hmac-sha2-512,hmac-sha1

.Ed

.Pp

The list of available MAC algorithms may also be obtained using the

.F1 Q

option of

.Xr ssh 1

with an argument of

.Dq mac .

.It Cm Match

Introduces a conditional block.

If all of the criteria on the

.Cm Match

line are satisfied, the keywords on the following lines override those

set in the global section of the config file, until either another

.Cm Match

line or the end of the file.

If a keyword appears in multiple

.Cm Match

blocks that are satisfied, only the first instance of the keyword is

applied.

.Pp

The arguments to

.Cm Match

are one or more criteria-pattern pairs or the single token

.Cm All

which matches all criteria.

The available criteria are

.Cm User ,

.Cm Group ,

.Cm Host ,

.Cm LocalAddress ,

.Cm LocalPort ,

and

.Cm Address .

The match patterns may consist of single entries or comma-separated lists and may use the wildcard and negation operators described in the PATTERNS section of

.Xr ssh\_config 5 .

.Pp

The patterns in an

.Cm Address

criteria may additionally contain addresses to match in CIDR address/masklen format, e.g.\&

.Dq 192.0.2.0/24

or

.Dq 3ffe:ffff::/32 .

Note that the mask length provided must be consistent with the address - it is an error to specify a mask length that is too long for the address or one with bits set in this host portion of the address.

For example,

.Dq 192.0.2.0/33

and

.Dq 192.0.2.0/8

respectively.

.Pp

Only a subset of keywords may be used on the lines following a

.Cm Match

keyword.

Available keywords are

.Cm AcceptEnv ,

.Cm AllowAgentForwarding ,

.Cm AllowGroups ,

.Cm AllowStreamLocalForwarding ,

.Cm AllowTcpForwarding ,

.Cm AllowUsers ,

.Cm AuthenticationMethods ,

.Cm AuthorizedKeysCommand ,

.Cm AuthorizedKeysCommandUser ,

.Cm AuthorizedKeysFile ,

.Cm AuthorizedPrincipalsCommand ,

.Cm AuthorizedPrincipalsCommandUser ,

.Cm AuthorizedPrincipalsFile ,

.Cm Banner ,

.Cm ChrootDirectory ,

.Cm DenyGroups ,

.Cm DenyUsers ,

.Cm ForceCommand ,

.Cm GatewayPorts ,

.Cm GSSAPIAuthentication ,

.Cm HostbasedAcceptedKeyTypes ,

.Cm HostbasedAuthentication ,  
.Cm HostbasedUsesNameFromPacketOnly ,  
.Cm IPQoS ,  
.Cm KbdInteractiveAuthentication ,  
.Cm KerberosAuthentication ,  
.Cm MaxAuthTries ,  
.Cm MaxSessions ,  
.Cm PasswordAuthentication ,  
.Cm PermitEmptyPasswords ,  
.Cm PermitOpen ,  
.Cm PermitRootLogin ,  
.Cm PermitTTY ,  
.Cm PermitTunnel ,  
.Cm PermitUserRC ,  
.Cm PubkeyAcceptedKeyTypes ,  
.Cm PubkeyAuthentication ,  
.Cm RekeyLimit ,  
.Cm RevokedKeys ,  
.Cm RhostsRSAAuthentication ,  
.Cm RSAAuthentication ,  
.Cm StreamLocalBindMask ,  
.Cm StreamLocalBindUnlink ,  
.Cm TrustedUserCAKeys ,  
.Cm X11DisplayOffset ,  
.Cm X11Forwarding  
and  
.Cm X11UseLocalHost .

.It Cm MaxAuthTries

Specifies the maximum number of authentication attempts permitted per connection.

Once the number of failures reaches half this value, additional failures are logged.

The default is 6.

.It Cm MaxSessions

Specifies the maximum number of open shell, login or subsystem (e.g. sftp) sessions permitted per network connection.

Multiple sessions may be established by clients that support connection multiplexing.

Setting

.Cm MaxSessions

to 1 will effectively disable session multiplexing, whereas setting it to 0 will prevent all shell, login and subsystem sessions while still permitting forwarding.

The default is 10.

.It Cm MaxStartups

Specifies the maximum number of concurrent unauthenticated connections to the SSH daemon.

Additional connections will be dropped until authentication succeeds or the

.Cm LoginGraceTime

expires for a connection.

The default is 10:30:100.

.Pp

Alternatively, random early drop can be enabled by specifying the three colon separated values

.Dq start:rate:full

(e.g. "10:30:60").

.Xr sshd 8

will refuse connection attempts with a probability of

.Dq rate/100

(30%)

if there are currently

.Dq start

(10)

unauthenticated connections.

The probability increases linearly and all connection attempts are refused if the number of unauthenticated connections reaches

.Dq full

(60).

.It Cm PasswordAuthentication

Specifies whether password authentication is allowed.

The default is

.Dq yes .

.It Cm PermitEmptyPasswords

When password authentication is allowed, it specifies whether the server allows login to accounts with empty password strings.

The default is

.Dq no .

.It Cm PermitOpen

Specifies the destinations to which TCP port forwarding is permitted.

The forwarding specification must be one of the following forms:

.Pp

.Bl -item -offset indent -compact

.It

.Cm PermitOpen

.Sm off

.Ar host : port

.Sm on

.It

.Cm PermitOpen

.Sm off

.Ar IPv4\_addr : port

.Sm on

.It

.Cm PermitOpen

.Sm off

.Ar \&[ IPv6\_addr \&] : port

.Sm on

.El

.Pp

Multiple forwards may be specified by separating them with whitespace.

An argument of

.Dq any

can be used to remove all restrictions and permit any forwarding requests.

An argument of

.Dq none

can be used to prohibit all forwarding requests.

By default all port forwarding requests are permitted.

.It Cm PermitRootLogin

Specifies whether root can log in using

.Xr ssh 1 .

The argument must be

.Dq yes ,

.Dq prohibit-password ,

.Dq without-password ,

.Dq forced-commands-only ,

or

.Dq no .

The default is

.Dq prohibit-password .

.Pp

If this option is set to

.Dq prohibit-password

or

.Dq without-password ,

password and keyboard-interactive authentication are disabled for root.

.Pp

If this option is set to

.Dq forced-commands-only ,

root login with public key authentication will be allowed,

but only if the

.Ar command

option has been specified

(which may be useful for taking remote backups even if root login is normally not allowed).

All other authentication methods are disabled for root.

.Pp

If this option is set to

.Dq no ,

root is not allowed to log in.

.It Cm PermitTunnel

Specifies whether

.Xr tun 4

device forwarding is allowed.

The argument must be

.Dq yes ,  
.Dq point-to-point  
(layer 3),  
.Dq ethernet  
(layer 2), or  
.Dq no .  
Specifying  
.Dq yes  
permits both  
.Dq point-to-point  
and  
.Dq ethernet .  
The default is  
.Dq no .  
.Pp  
Independent of this setting, the permissions of the selected  
.Xr tun 4  
device must allow access to the user.  
.It Cm PermitTTY  
Specifies whether  
.Xr pty 4  
allocation is permitted.  
The default is  
.Dq yes .  
.It Cm PermitUserEnvironment  
Specifies whether  
.Pa ~/.ssh/environment  
and  
.Cm environment=  
options in  
.Pa ~/.ssh/authorized\_keys  
are processed by  
.Xr sshd 8 .  
The default is  
.Dq no .  
Enabling environment processing may enable users to bypass access  
restrictions in some configurations using mechanisms such as  
.Ev LD\_PRELOAD .  
.It Cm PermitUserRC  
Specifies whether any  
.Pa ~/.ssh/rc  
file is executed.  
The default is  
.Dq yes .  
.It Cm PidFile  
Specifies the file that contains the process ID of the  
SSH daemon, or  
.Dq none

to not write one.

The default is

.Pa /var/run/sshd.pid .

.It Cm Port

Specifies the port number that

.Xr sshd 8

listens on.

The default is 22.

Multiple options of this type are permitted.

See also

.Cm ListenAddress .

.It Cm PrintLastLog

Specifies whether

.Xr sshd 8

should print the date and time of the last user login when a user logs

in interactively.

The default is

.Dq yes .

.It Cm PrintMotd

Specifies whether

.Xr sshd 8

should print

.Pa /etc/motd

when a user logs in interactively.

(On some systems it is also printed by the shell,

.Pa /etc/profile ,

or equivalent.)

The default is

.Dq yes .

.It Cm Protocol

Specifies the protocol versions

.Xr sshd 8

supports.

The possible values are

.Sq 1

and

.Sq 2 .

Multiple versions must be comma-separated.

The default is

.Sq 2 .

Protocol 1 suffers from a number of cryptographic weaknesses and should

not be used.

It is only offered to support legacy devices.

.Pp

Note that the order of the protocol list does not indicate preference,

because the client selects among multiple protocol versions offered

by the server.

Specifying

.Dq 2,1

is identical to

.Dq 1,2 .

.It Cm PubkeyAcceptedKeyTypes

Specifies the key types that will be accepted for public key authentication as a comma-separated pattern list.

Alternately if the specified value begins with a

.Sq +

character, then the specified key types will be appended to the default set instead of replacing them.

The default for this option is:

.Bd -literal -offset 3n

ecdsa-sha2-nistp256-cert-v01@openssh.com,

ecdsa-sha2-nistp384-cert-v01@openssh.com,

ecdsa-sha2-nistp521-cert-v01@openssh.com,

ssh-ed25519-cert-v01@openssh.com,

ssh-rsa-cert-v01@openssh.com,

ecdsa-sha2-nistp256,ecdsa-sha2-nistp384,ecdsa-sha2-nistp521,

ssh-ed25519,ssh-rsa

.Ed

.Pp

The

.Fl Q

option of

.Xr ssh 1

may be used to list supported key types.

.It Cm PubkeyAuthentication

Specifies whether public key authentication is allowed.

The default is

.Dq yes .

.It Cm RekeyLimit

Specifies the maximum amount of data that may be transmitted before the session key is renegotiated, optionally followed a maximum amount of time that may pass before the session key is renegotiated.

The first argument is specified in bytes and may have a suffix of

.Sq K ,

.Sq M ,

or

.Sq G

to indicate Kilobytes, Megabytes, or Gigabytes, respectively.

The default is between

.Sq 1G

and

.Sq 4G ,

depending on the cipher.

The optional second value is specified in seconds and may use any of the units documented in the

.Sx TIME FORMATS

section.

The default value for

.Cm RekeyLimit

is

.Dq default none ,

which means that rekeying is performed after the cipher's default amount of data has been sent or received and no time based rekeying is done.

.It Cm RevokedKeys

Specifies revoked public keys file, or

.Dq none

to not use one.

Keys listed in this file will be refused for public key authentication.

Note that if this file is not readable, then public key authentication will be refused for all users.

Keys may be specified as a text file, listing one public key per line, or as an OpenSSH Key Revocation List (KRL) as generated by

.Xr ssh-keygen 1 .

For more information on KRLs, see the KEY REVOCATION LISTS section in

.Xr ssh-keygen 1 .

.It Cm RhostsRSAAuthentication

Specifies whether rhosts or /etc/hosts.equiv authentication together with successful RSA host authentication is allowed.

The default is

.Dq no .

This option applies to protocol version 1 only.

.It Cm RSAAuthentication

Specifies whether pure RSA authentication is allowed.

The default is

.Dq yes .

This option applies to protocol version 1 only.

.It Cm ServerKeyBits

Defines the number of bits in the ephemeral protocol version 1 server key.

The default and minimum value is 1024.

.It Cm StreamLocalBindMask

Sets the octal file creation mode mask

.Pq umask

used when creating a Unix-domain socket file for local or remote port forwarding.

This option is only used for port forwarding to a Unix-domain socket file.

.Pp

The default value is 0177, which creates a Unix-domain socket file that is readable and writable only by the owner.

Note that not all operating systems honor the file mode on Unix-domain socket files.

.It Cm StreamLocalBindUnlink

Specifies whether to remove an existing Unix-domain socket file for local or remote port forwarding before creating a new one.

If the socket file already exists and

.Cm StreamLocalBindUnlink

is not enabled,

.Nm sshd

will be unable to forward the port to the Unix-domain socket file.

This option is only used for port forwarding to a Unix-domain socket file.

.Pp

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.It Cm StrictModes

Specifies whether

.Xr sshd 8

should check file modes and ownership of the

user's files and home directory before accepting login.

This is normally desirable because novices sometimes accidentally leave their directory or files world-writable.

The default is

.Dq yes .

Note that this does not apply to

.Cm ChrootDirectory ,

whose permissions and ownership are checked unconditionally.

.It Cm Subsystem

Configures an external subsystem (e.g. file transfer daemon).

Arguments should be a subsystem name and a command (with optional arguments) to execute upon subsystem request.

.Pp

The command

.Xr sftp-server 8

implements the

.Dq sftp

file transfer subsystem.

.Pp

Alternately the name

.Dq internal-sftp

implements an in-process

.Dq sftp

server.

This may simplify configurations using

.Cm ChrootDirectory

to force a different filesystem root on clients.

.Pp

By default no subsystems are defined.

.It Cm SyslogFacility

Gives the facility code that is used when logging messages from

.Xr sshd 8 .

The possible values are: DAEMON, USER, AUTH, LOCAL0, LOCAL1, LOCAL2, LOCAL3, LOCAL4, LOCAL5, LOCAL6, LOCAL7.

The default is AUTH.

.It Cm TCPKeepAlive

Specifies whether the system should send TCP keepalive messages to the other side.

If they are sent, death of the connection or crash of one of the machines will be properly noticed.

However, this means that

connections will die if the route is down temporarily, and some people find it annoying.

On the other hand, if TCP keepalives are not sent, sessions may hang indefinitely on the server, leaving

.Dq ghost

users and consuming server resources.

.Pp

The default is

.Dq yes

(to send TCP keepalive messages), and the server will notice if the network goes down or the client host crashes.

This avoids infinitely hanging sessions.

.Pp

To disable TCP keepalive messages, the value should be set to

.Dq no .

.It Cm TrustedUserCAKeys

Specifies a file containing public keys of certificate authorities that are trusted to sign user certificates for authentication, or

.Dq none

to not use one.

Keys are listed one per line; empty lines and comments starting with

.Ql #

are allowed.

If a certificate is presented for authentication and has its signing CA key listed in this file, then it may be used for authentication for any user listed in the certificate's principals list.

Note that certificates that lack a list of principals will not be permitted for authentication using

.Cm TrustedUserCAKeys .

For more details on certificates, see the CERTIFICATES section in

.Xr ssh-keygen 1 .

.It Cm UseDNS

Specifies whether

.Xr sshd 8

should look up the remote host name, and to check that the resolved host name for the remote IP address maps back to the very same IP address.

.Pp

If this option is set to

.Dq no  
(the default) then only addresses and not host names may be used in

.Pa ~/.ssh/known\_hosts

.Cm from  
and

.Nm

.Cm Match

.Cm Host  
directives.

.It Cm UseLogin  
Specifies whether

.Xr login 1  
is used for interactive login sessions.  
The default is

.Dq no .  
Note that

.Xr login 1  
is never used for remote command execution.  
Note also, that if this is enabled,

.Cm X11Forwarding  
will be disabled because

.Xr login 1  
does not know how to handle

.Xr xauth 1  
cookies.

If

.Cm UsePrivilegeSeparation  
is specified, it will be disabled after authentication.

.It Cm UsePAM  
Enables the Pluggable Authentication Module interface.  
If set to

.Dq yes  
this will enable PAM authentication using

.Cm ChallengeResponseAuthentication  
and

.Cm PasswordAuthentication  
in addition to PAM account and session module processing for all  
authentication types.

.Pp  
Because PAM challenge-response authentication usually serves an equivalent  
role to password authentication, you should disable either

.Cm PasswordAuthentication  
or

.Cm ChallengeResponseAuthentication.

.Pp

If

.Cm UsePAM  
is enabled, you will not be able to run

.Xr sshd 8

as a non-root user.

The default is

.Dq no .

.It Cm UsePrivilegeSeparation

Specifies whether

.Xr sshd 8

separates privileges by creating an unprivileged child process to deal with incoming network traffic.

After successful authentication, another process will be created that has the privilege of the authenticated user.

The goal of privilege separation is to prevent privilege escalation by containing any corruption within the unprivileged processes.

The argument must be

.Dq yes ,

.Dq no ,

or

.Dq sandbox .

If

.Cm UsePrivilegeSeparation

is set to

.Dq sandbox

then the pre-authentication unprivileged process is subject to additional restrictions.

The default is

.Dq sandbox .

.It Cm VersionAddendum

Optionally specifies additional text to append to the SSH protocol banner sent by the server upon connection.

The default is

.Dq none .

.It Cm X11DisplayOffset

Specifies the first display number available for

.Xr sshd 8 Ns 's

X11 forwarding.

This prevents sshd from interfering with real X11 servers.

The default is 10.

.It Cm X11Forwarding

Specifies whether X11 forwarding is permitted.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq no .

.Pp

When X11 forwarding is enabled, there may be additional exposure to the server and to client displays if the

.Xr sshd 8

proxy display is configured to listen on the wildcard address (see

.Cm X11UseLocalhost

below), though this is not the default.

Additionally, the authentication spoofing and authentication data verification and substitution occur on the client side.

The security risk of using X11 forwarding is that the client's X11 display server may be exposed to attack when the SSH client requests forwarding (see the warnings for

.Cm ForwardX11

in

.Xr ssh\_config 5 ) .

A system administrator may have a stance in which they want to protect clients that may expose themselves to attack by unwittingly requesting X11 forwarding, which can warrant a

.Dq no

setting.

.Pp

Note that disabling X11 forwarding does not prevent users from forwarding X11 traffic, as users can always install their own forwarders.

X11 forwarding is automatically disabled if

.Cm UseLogin

is enabled.

.It Cm X11UseLocalhost

Specifies whether

.Xr sshd 8

should bind the X11 forwarding server to the loopback address or to the wildcard address.

By default,

sshd binds the forwarding server to the loopback address and sets the hostname part of the

.Ev DISPLAY

environment variable to

.Dq localhost .

This prevents remote hosts from connecting to the proxy display.

However, some older X11 clients may not function with this configuration.

.Cm X11UseLocalhost

may be set to

.Dq no

to specify that the forwarding server should be bound to the wildcard address.

The argument must be

.Dq yes

or

.Dq no .

The default is

.Dq yes .

.It Cm XAuthLocation

Specifies the full pathname of the

.Xr xauth 1

program, or

.Dq none

to not use one.

The default is

.Pa /usr/X11R6/bin/xauth .

.El

.Sh TIME FORMATS

.Xr sshd 8

command-line arguments and configuration file options that specify time may be expressed using a sequence of the form:

.Sm off

.Ar time Op Ar qualifier ,

.Sm on

where

.Ar time

is a positive integer value and

.Ar qualifier

is one of the following:

.Pp

.Bl -tag -width Ds -compact -offset indent

.It Aq Cm none

seconds

.It Cm s | Cm S

seconds

.It Cm m | Cm M

minutes

.It Cm h | Cm H

hours

.It Cm d | Cm D

days

.It Cm w | Cm W

weeks

.El

.Pp

Each member of the sequence is added together to calculate the total time value.

.Pp

Time format examples:

.Pp

.Bl -tag -width Ds -compact -offset indent

.It 600

600 seconds (10 minutes)

.It 10m

10 minutes

.It 1h30m

1 hour 30 minutes (90 minutes)

.El

.Sh FILES

.Bl -tag -width Ds

.It Pa /etc/ssh/sshd\_config

Contains configuration data for

.Xr sshd 8 .

This file should be writable by root only, but it is recommended (though not necessary) that it be world-readable.

.El

.Sh SEE ALSO

.Xr sshd 8

.Sh AUTHORS

OpenSSH is a derivative of the original and free ssh 1.2.12 release by Tatu Ylonen.

Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt and Dug Song removed many bugs, re-added newer features and created OpenSSH.

Markus Friedl contributed the support for SSH protocol versions 1.5 and 2.0.

Niels Provos and Markus Friedl contributed support for privilege separation.

/*
 * Draw an ASCII-Art representing the fingerprint so human brain can
 * profit from its built-in pattern recognition ability.
 * This technique is called "random art" and can be found in some
 * scientific publications like this original paper:
 *
 * "Hash Visualization: a New Technique to improve Real-World Security",
 * Perrig A. and Song D., 1999, International Workshop on Cryptographic
 * Techniques and E-Commerce (CrypTEC '99)
 * sparrow.ece.cmu.edu/~adrian/projects/validation/validation.pdf
 *
 * The subject came up in a talk by Dan Kaminsky, too.
 *
 * If you see the picture is different, the key is different.
 * If the picture looks the same, you still know nothing.
 *
 * The algorithm used here is a worm crawling over a discrete plane,
 * leaving a trace (augmenting the field) everywhere it goes.
 * Movement is taken from dgst_raw 2bit-wise. Bumping into walls
 * makes the respective movement vector be ignored for this turn.
 * Graphs are not unambiguous, because circles in graphs can be
 * walked in either direction.
 */

/*
 * Field sizes for the random art. Have to be odd, so the starting point
 * can be in the exact middle of the picture, and FLDBASE should be >=8 .
 * Else pictures would be too dense, and drawing the frame would
 * fail, too, because the key type would not fit in anymore.

Copyright (C) 1995-1997 Eric Young (eay@cryptsoft.com)

All rights reserved.

This package is an DES implementation written by Eric Young (eay@cryptsoft.com).

The implementation was written so as to conform with MIT's libdes.

This library is free for commercial and non-commercial use as long as  
the following conditions are aheared to. The following conditions  
apply to all code found in this distribution.

Copyright remains Eric Young's, and as such any Copyright notices in  
the code are not to be removed.

If this package is used in a product, Eric Young should be given attribution  
as the author of that the SSL library. This can be in the form of a textual  
message at program startup or in documentation (online or textual) provided  
with the package.

Redistribution and use in source and binary forms, with or without  
modification, are permitted provided that the following conditions  
are met:

1. Redistributions of source code must retain the copyright  
notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright  
notice, this list of conditions and the following disclaimer in the  
documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software  
must display the following acknowledgement:

This product includes software developed by Eric Young (eay@cryptsoft.com)

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG ``AS IS" AND  
ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE  
IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE  
ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE  
FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL  
DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS  
OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION)  
HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT  
LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY  
OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF  
SUCH DAMAGE.

The license and distribution terms for any publically available version or  
derivative of this code cannot be changed. i.e. this code cannot simply be

copied and put under another distribution license  
[including the GNU Public License.]

The reason behind this being stated in this direct manner is past experience in code simply being copied and the attribution removed from it and then being distributed as part of other packages. This implementation was a non-trivial and unpaid effort.

Copyright (C) 1995-1997 Eric Young (eay@cryptsoft.com)

All rights reserved.

This package is an Blowfish implementation written  
by Eric Young (eay@cryptsoft.com).

This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution.

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed.

[including the GNU Public License.]

The reason behind this being stated in this direct manner is past experience in code simply being copied and the attribution removed from it and then being distributed as part of other packages. This implementation was a non-trivial and unpaid effort.

## LICENSE ISSUES

=====

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact [openssl-core@openssl.org](mailto:openssl-core@openssl.org).

### OpenSSL License

# 1.709 org.aspectj-library 1.6.2.RELEASE

## 1.709.1 Available under license :

Eclipse Public License - v 1.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

### 1. DEFINITIONS

"Contribution" means:

- a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
- b) in the case of each subsequent Contributor:
  - i) changes to the Program, and
  - ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents" mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

### 2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

### 3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

a) it complies with the terms and conditions of this Agreement; and

b) its license agreement:

i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and

iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

a) it must be made available under this Agreement; and

b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

#### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

#### 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

#### 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT

LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

## 3.0.5.RELEASE

### 1.710.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed

with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate

comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

## 3.0.0.RELEASE

## 1.711.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
  
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the

editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.
- Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed

with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,

and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the

Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,

whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

# 1.714 org.springframework.aspects

## 3.0.0.RELEASE

### 1.714.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object

form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## 1.715 org.springframework.beans

### 3.0.0.RELEASE

#### 1.715.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity

exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided

that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity,

or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

# 1.716 org.springframework.beans

## 3.0.0.RELEASE

### 1.716.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner

or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

# 1.717 org.springframework.beans

## 3.0.5.RELEASE

### 1.717.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a

cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,

any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## 3.0.5.RELEASE

### 1.718.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the

editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## 1.719 org.springframework.context

### 3.0.0.RELEASE

#### 1.719.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner

or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

## 3.0.0.RELEASE

### 1.720.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a

cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,

any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

# 1.721 org.springframework.core

## 3.0.5.RELEASE

## 1.721.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
  
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. ## 1.722 org.springframework.expression

### 3.0.0.RELEASE

#### 1.722.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

## 1.723 org.springframework.jdbc

### 3.0.5.RELEASE

#### 1.723.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed

with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

## 1.724.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
  
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## 3.0.5.RELEASE

### 1.725.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,  
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by  
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all  
other entities that control, are controlled by, or are under common  
control with that entity. For the purposes of this definition,  
"control" means (i) the power, direct or indirect, to cause the  
direction or management of such entity, whether by contract or  
otherwise, or (ii) ownership of fifty percent (50%) or more of the  
outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity  
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,  
including but not limited to software source code, documentation  
source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work,

where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or

for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason

of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

## 3.0.0.RELEASE

### 1.726.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed

with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

### 1.727.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
  
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer,

and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

# 1.728 org.springframework.security.core 2.0.4

## 1.728.1 Available under license :

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

## 3.0.0.RELEASE

### 1.729.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed

with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## 1.731 org.springframework.transaction

### 3.0.0.RELEASE

#### 1.731.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole,

an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

1. You must give any other recipients of the Work or Derivative Works a copy of this License; and
2. You must cause any modified files to carry prominent notices stating that You changed the files; and
3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such

third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## 3.0.5.RELEASE

## 1.732.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or

Derivative Works a copy of this License; and

- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
  
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## 1.733 org.springframework.web

### 3.0.0.RELEASE

#### 1.733.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## 1.734.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications

represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without

modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade

names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
  
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the

Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,

whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## 1.737 OSGI Core 1.2.0

### 1.737.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation

source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable

(except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and

may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify,

defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### NOTE

The license is based on the zlib/libpng license. For more details see <http://www.opensource.org/licenses/zlib-license.html>. The intent of the license is to:

- keep the license as simple as possible
- encourage the use of CuTest in both free and commercial applications and libraries
- keep the source code together
- give credit to the CuTest contributors for their work

If you ship CuTest in source form with your source distribution, the following license document must be included with it in unaltered form. If you find CuTest useful we would like to hear about it.

#### LICENSE

Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the following restrictions:

1. The origin of this software must not be misrepresented; you must not claim that you wrote the original software. If you use this software in a product, an acknowledgment in the product documentation would be appreciated but is not required.
2. Altered source versions must be plainly marked as such, and must not be misrepresented as being the original software.
3. This notice may not be removed or altered from any source distribution.

# 1.741 patch 2.7.5 :r1

## 1.741.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

### Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS

### 0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

#### 1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but

which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

## 2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

## 3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid

circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

#### 4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

#### 5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent

works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

#### 6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the

Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for

the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

## 7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some

trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

## 8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

#### 9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

#### 10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

#### 11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are

specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

#### 12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

#### 13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

#### 14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General

Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

#### 15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

#### 16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### 17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<http://www.gnu.org/licenses/>>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>

This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.

This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary.

For more information on this, and how to apply and follow the GNU GPL, see <<http://www.gnu.org/licenses/>>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<http://www.gnu.org/philosophy/why-not-lgpl.html>>.

## 1.742.1 Available under license :

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their

rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License

along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not

signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER

PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

## 1.743 pcre 8.38 :r1

### 1.743.1 Available under license :

PCRE LICENCE

-----

PCRE is a library of functions to support regular expressions whose syntax and semantics are as close as possible to those of the Perl 5 language.

Release 8 of PCRE is distributed under the terms of the "BSD" licence, as specified below. The documentation for PCRE, supplied in the "doc" directory, is distributed under the same terms as the software itself. The data in the testdata directory is not copyrighted and is in the public domain.

The basic library functions are written in C and are freestanding. Also included in the distribution is a set of C++ wrapper functions, and a just-in-time compiler that can be used to optimize pattern matching. These are both optional features that can be omitted when the library is built.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you

distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE

### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or

collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is

void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing

to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING

WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

```
This program is free software; you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation; either version 2 of the License, or  
(at your option) any later version.
```

```
This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.
```

```
You should have received a copy of the GNU General Public License along  
with this program; if not, write to the Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.
```

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w` and `show c` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w` and `show c`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program  
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the

ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE  
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion

of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at

least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses

terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to

be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR

CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library 'Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990

Ty Coon, President of Vice

That's all there is to it!

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence  
the version number 2.1.]

#### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
Licenses are intended to guarantee your freedom to share and change  
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some  
specially designated software packages--typically libraries--of the  
Free Software Foundation and other authors who decide to use it. You  
can use it too, but we suggest you first think carefully about whether  
this license or the ordinary General Public License is the better  
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,  
not price. Our General Public Licenses are designed to make sure that  
you have the freedom to distribute copies of free software (and charge  
for this service if you wish); that you receive source code or can get  
it if you want it; that you can change the software and use pieces of  
it in new free programs; and that you are informed that you can do  
these things.

To protect your rights, we need to make restrictions that forbid  
distributors to deny you these rights or to ask you to surrender these  
rights. These restrictions translate to certain responsibilities for  
you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis  
or for a fee, you must give the recipients all the rights that we gave  
you. You must make sure that they, too, receive or can get the source  
code. If you link other code with the library, you must provide  
complete object files to the recipients, so that they can relink them  
with the library after making changes to the library and recompiling  
it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the  
library, and (2) we offer you this license, which gives you legal  
permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of

free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

#### GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for

writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you

distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a

work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that

uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of

MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library 'Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
  
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer,

and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation,

and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s)

with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.  
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or

indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously

marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of

any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such

Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR

CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices

that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf

of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## 1.4.6

### 1.757.1 Available under license :

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as

indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section)

patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

## 1.761 py-pip 8.1.2 :r0

### 1.761.1 Available under license :

GNU LESSER GENERAL PUBLIC LICENSE  
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is

modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating

system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

## GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the

entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood

that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library

facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO

WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

If you think your name is missing, please add it (alpha order by first name)  
argparse is (c) 2006-2009 Steven J. Bethard <steven.bethard@gmail.com>.

The argparse module was contributed to Python as of Python 2.7 and thus was licensed under the Python license. Same license applies to all files in the argparse package project.

For details about the Python License, please see doc/Python-License.txt.

## History

-----

Before (and including) argparse 1.1, the argparse package was licensed under Apache License v2.0.

After argparse 1.1, all project files from the argparse project were deleted due to license compatibility issues between Apache License 2.0 and GNU GPL v2.

The project repository then had a clean start with some files taken from Python 2.7.1, so definitely all files are under Python License now.

### A. HISTORY OF THE SOFTWARE

=====

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see <http://www.zope.com>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

| Release        | Derived from | Year      | Owner      | GPL-compatible? (1) |
|----------------|--------------|-----------|------------|---------------------|
| 0.9.0 thru 1.2 |              | 1991-1995 | CWI        | yes                 |
| 1.3 thru 1.5.2 | 1.2          | 1995-1999 | CNRI       | yes                 |
| 1.6            | 1.5.2        | 2000      | CNRI       | no                  |
| 2.0            | 1.6          | 2000      | BeOpen.com | no                  |
| 1.6.1          | 1.6          | 2001      | CNRI       | yes (2)             |
| 2.1            | 2.0+1.6.1    | 2001      | PSF        | no                  |
| 2.0.1          | 2.0+1.6.1    | 2001      | PSF        | yes                 |
| 2.1.1          | 2.1+2.0.1    | 2001      | PSF        | yes                 |
| 2.2            | 2.1.1        | 2001      | PSF        | yes                 |
| 2.1.2          | 2.1.1        | 2002      | PSF        | yes                 |
| 2.1.3          | 2.1.2        | 2002      | PSF        | yes                 |
| 2.2.1          | 2.2          | 2002      | PSF        | yes                 |
| 2.2.2          | 2.2.1        | 2002      | PSF        | yes                 |
| 2.2.3          | 2.2.2        | 2003      | PSF        | yes                 |
| 2.3            | 2.2.2        | 2002-2003 | PSF        | yes                 |
| 2.3.1          | 2.3          | 2002-2003 | PSF        | yes                 |
| 2.3.2          | 2.3.1        | 2002-2003 | PSF        | yes                 |
| 2.3.3          | 2.3.2        | 2002-2003 | PSF        | yes                 |
| 2.3.4          | 2.3.3        | 2004      | PSF        | yes                 |
| 2.3.5          | 2.3.4        | 2005      | PSF        | yes                 |

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

## B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON

### PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.
2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010 Python Software Foundation; All Rights Reserved" are retained in Python alone or in any derivative version prepared by Licensee.
3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.
4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.
5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee agrees to be bound by the terms and conditions of this License Agreement.

#### BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

-----

#### BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

#### CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

-----

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

ACCEPT
