For Cisco ICM/IP Contact Center Enterprise 6.0(0), CTI OS 6.0(0), Support Tools 1.0(1), Cisco Agent Desktop 6.0(1), Remote Monitoring Suite 2.0(0), E-Mail Manager 4.0.x, 5.0(0), Collaboration Server CCS 4.0, 5.0(0), Media Blender 4.x, 5.0(0), Dynamic Content Adapter 2.x, Internet Service Node 2.x, IP IVR 3.x, IPCC Express 3.x

Last Updated: June 21, 2007

Introduction

This document provides a list of the TCP and UDP ports used by Cisco Contact Center products. It provides extremely important information for configuring both Quality of Service (QoS) and Firewall/VPN solutions on a network when there is an Architecture for Voice, Video and Integrated Data (AVVID) solution implemented.

Caution The information this document provides is based on default configuration settings. If you are working in a live network, ensure that you understand the components installed and the associated ports in use.

Port Utilization Table Column Definitions

The columns in the Port Utilization tables in this document describe the following:

- **Protocol.** A value representing a formal description of rules to follow and messages to be used by two or more systems to exchanging information. The protocol is also used to communicate with an application or service listening to or connecting to a remote device.
- **Port.** A numeric identifier the Internet transport protocol uses to distinguish among multiple, simultaneous connections to a single destination host.
- **Remote Source Port.** An identifier—usually dynamic—for the port the remote application or service uses to connect to the local destination port.
- **Destination Port.** An identifier for the TCP or UDP port that the local service or application is listening on, along with the IP address for incoming connection requests when acting as a server.
- **Source Port.** An identifier—usually dynamic—for the port the local application or service uses to connect to the remote device's destination port.
- **Remote Device Destination Port.** The identifier for the TCP or UDP port that the remote device's service or application is listening on, along with the IP address for incoming connection requests when acting as the server.
- **Remote Device.** The remote application or device making a connection to the server or service specified by the protocol.

Protocol	Remote Source Port	Destination Port	Source Port	Remote Device Destination Port	Remote Device	Notes
IP discovery port		TCP 37350			Cisco Desktop RASCAL Service, Cisco Supervisor Desktop, Cisco Desktop TAI Service	
Cisco Desktop Rascal Service						
Primary server port		TCP 59003			Cisco Agent Desktop, Cisco Supervisor Desktop	
RTP streams		UDP 59100–59169			Cisco Desktop VoIP Monitor Service	
Cisco Desktop TAI Service		TCP 59010			Cisco Desktop Administrator	
Cisco Desktop Enterprise Service		TCP 59004			Cisco Desktop Administrator, Cisco Agent Desktop, Cisco Desktop TAI Service	
Cisco Desktop Sync Service		TCP 59011			Cisco Desktop Administrator	
RPC, NetBIOS, SMB		UDP 135–139 UDP 445 TCP 135–139 TCP 445			Cisco Agent Desktop, Cisco Supervisor Desktop, Cisco Desktop Administrator, IPCC Express Server	CAD server Licensing Shared Network Drive
Nuance						
Nuance Proprietary		TCP/UDP		TCP/UDP	Nuance Recognition Client	No fixed port numbers are assigned. Uses first available port picked by OS socket interface at run time.
Telnet		TCP 7823 UDP 7823		TCP 7823 UDP 7823	Nuance Watcher Daemon	Can run on both the IPCC Express main server or on the ASR/TTS GFS server. This port is used by the Watcher Network component of both the Nuance ASR and Nuance TTS subsystems.

Table 10 Cisco IPCC Express Port Utilization (Continued)

Protocol	Remote Source Port	Destination Port	Source Port	Remote Device Destination Port	Remote Device	Notes
HTTP		TCP 7080 UDP 7080		TCP 7080 UDP 7080	Nuance Watcher Daemon	This port is only used if someone wishes to explicitly monitor the Watcher Daemon from a Web browser.
SNMP		TCP 7161 UDP 7161		TCP 7161 UDP 7161	Nuance Watcher Daemon	Not currently used.
Nuance Proprietary		UDP 8470			Nuance License Manager	Runs only on IPCC Express main server.
Nuance Proprietary		UDP 7777			Nuance Resource Manager	Runs only on IPCC Express main server.
Nuance Proprietary		TCP 8200		TCP 8200	Nuance Recognition Server	Can run on both the IPCC Express main server or on the ASR GFS server.
Nuance Proprietary		TCP 10101+		TCP 10101+	Nuance Compilation Server	Configure to increment by one for each additional Compilation server (ASR Language) configured.
Nuance Proprietary		TCP 32323+		TCP 32323+	Nuance Vocalizer 1.0/3.0 Server	Configure to increment by one for each additional TTS server configured.

Appendix: Ports Utilization Diagrams and Instance Breakdown by Protocol

This appendix contains detailed information about port allocation by instance number for product versions:

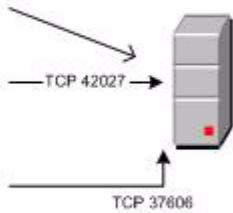

- ICM/IPCC 6.0(0)
- CTI OS 6.0(0)
