To Whom It May Concern:

Acumen Security verified that the following product faithfully embeds a FIPS 140-2 validated cryptographic module,

- Cisco HyperFlex

The software version is known to operate on the following platform(s)

- HyperFlex HX220c M5 Node
- HyperFlex HX240c M5 Node
- HyperFlex HX220c M4 Node
- HyperFlex HX240c M4 Node

During the course of the review, Acumen Security confirmed that the following cryptographic module is properly incorporated into the product:

- CiscoSSl FIPS Object Module (FOM) Version 6.2 – Cert #2984

As part of the review, the software was tested on the following platforms:

- HyperFlex HX Data Platform Software version 3.5

Acumen Security confirmed that the following features leverage the embedded cryptographic module to provide cryptographic services for **SSH and TLS.**

- Session establishment supporting each service,
- All underlying cryptographic algorithms supporting each services' key derivation functions,
- Hashing for each service,
- Symmetric encryption for each service.

Details of the verification may be obtained from Cisco Systems, Inc. at the request of interested parties. This letter represents the independent opinions of Acumen Security and does not imply endorsement of the product by the CMVP or any other parties.

Sincerely,

Ashit Vora
Laboratory Director
