Overview

Cisco Secure Email Submission add-in allows you to submit feedback to Cisco about unsolicited and unwanted messages such as spam, viruses, phishing, marketing messages, and legitimate messages that were incorrectly filtered out. We use this feedback to update our filters to stop unwanted messages from getting delivered to your mailbox. You can track your submissions by logging in to the Cisco Talos Email Status Portal (https://talosintelligence.com/email_status_portal). You can add an additional email address to submit your messages to another email. However, this is optional.

What's New In This Release

What's New in Release 10.0.0-002 for Secure Email Submission Add-In

Cisco Secure Email Encryption Service is transitioning to Amazon Web Services (AWS) infrastructure. The migration will be seamless, requiring no action on your part. Following the migration, you can continue to work on the Secure Email Submission Add-in. You will experience no downtime or disruption, and continue to access Secure Email Encryption Service as usual, with no changes to your user accounts or settings. This release of Secure Email Submission Add-In aligns with the transition of Cisco Secure Email Encryption Service infrastructure.

Supported Configurations

See [Compatibility Matrix for Cisco Secure Email Encryption Service](#).

Known and Fixed Issues

There are no known or fixed issues for this release of Secure Email Submission Add-In.
