Release Notes for the Ultra Cloud Core Policy Control Function Version 2021.02.0

First Published: May 3, 2021 Last Updated: May 6, 2021

Introduction

This Release Notes identifies changes and issues related to this software release.

Release Package Version Information

Software Packages	Version
pcf.2021.02.0.SPA.tgz	2021.02.0

Descriptions for the various packages provided with this release are available in the <u>Release Package Descriptions</u> section.

Verified Compatibility

Products	Version
Ultra Cloud Core SMI	2020.02.2.19
Ultra Cloud Core SMF	2021.02.m0.i204

For information on the Ultra Cloud Core SMI release, refer to the corresponding SMI Release Notes available at:

https://www.cisco.com/c/en/us/support/wireless/ultra-cloud-core-subscriber-microservicesinfrastructure/products-release-notes-list.html

Related Documentation

For the complete list of documentation available for this release, go to:

https://www.cisco.com/c/en/us/support/wireless/ultra-cloud-core-policy-control-function/products-installationand-configuration-guides-list.html Installation and Upgrade Notes

Installation and Upgrade Notes

This Release Notes does not contain general installation and upgrade instructions. Refer to the existing installation documentation for specific installation and upgrade considerations.

Software Integrity Verification

To verify the integrity of the software image you have from Cisco, you can validate the SHA512 checksum information against the checksum identified by Cisco for the software.

Image checksum information is available through **Cisco.com Software Download Details.** To find the checksum, hover the mouse pointer over the software image you have downloaded.

Details	×		
Description : SMF	offline signature package	Related Links and Documentation	
Release : 3099	.01.0	- No related links or documentation -	
Release Date : 29-Ja	an-2020		
FileName : smf.3	3099.1.0.SPA.tgz		
Size : 2414	.57 MB (2531857999 bytes)		
MD5 Checksum : 99e8	c8605cc7cd9eeedd820ac07787e6		
a			
		Release Date Size	
SMF offlin smf.3099.1	ne signature package .0.SPA.tgz SMF offline sign	29–Jan-2020 2414.57 MB	<u>+</u>

At the bottom you find the SHA512 checksum, if you do not see the whole checksum you can expand it by pressing the "..." at the end.

To validate the information, calculate a SHA512 checksum using the information in <u>Table 1</u> and verify that it matches the one provided on the software download page.

To calculate a SHA512 checksum on your local desktop please see the table below.

Operating System	SHA512 checksum calculation command examples	
Microsoft Windows	Open a command line window and type the following command	
	<pre>> certutil.exe -hashfile <filename>.<extension>SHA512</extension></filename></pre>	
Apple MAC	Open a terminal window and type the following command	
	\$ shasum -a 512 <filename>.<extension></extension></filename>	
Linux	Open a terminal window and type the following command	
	\$ sha512sum <filename>.<extension></extension></filename>	
	Or	
	\$ shasum -a 512 <filename>.<extension></extension></filename>	
NOTES:		
NOTES.		
<filename>is the name of the file.</filename>		
<pre><extension>is the file extension (e.gzip or .tgz).</extension></pre>		

Table 1 - Checksum Calculations per Operating System

If the SHA512 checksum matches, you can be sure that no one has tampered with the software image or the image has not been corrupted during download.

If the SHA512 checksum does not match, we advise you to not attempt upgrading any systems with the corrupted software image. Download the software again and verify the SHA512 checksum again. If there is a constant mismatch, please open a case with the Cisco Technical Assistance Center.

MD5 Checksum Details

be36da23751f775f007faff4869246c2 pcf.2021.02.0.SPA.tgz

Certificate Validation

PCF software images are signed via x509 certificates. For information and instructions on how to validate the certificates, refer to the .README file packaged with the software.

Open Bugs for this Release

None in this release.

Resolved Bugs for this Release

The following table lists the known bugs that are resolved in this specific software release.

NOTE: This software release may contain bug fixes first introduced in other releases. Additional information for all resolved bugs for this release are available in the <u>Cisco Bug Search Tool</u>.

Bug ID	Headline	Behavior Change
<u>CSCvx16311</u>	SVI-PCF i82: creating repository name from central with underscore is not supported	No
<u>CSCvx33049</u>	PCF is performing 2 registrations with same NRF	No
<u>CSCvx34649</u>	Response time spikes seen for Heartbeat messages from PCF to NRF	No
<u>CSCvx48044</u>	[PCF-CNDP-SVI] After failback of site with 31M sessions, cdl slot and index pods takes 37 mins	No
<u>CSCvx49859</u>	PCF sends GOAWAY to NRF after 30sec	Yes
<u>CSCvx55449</u>	Simless emergency feature for pcf	No
CSCvx57018	[PCF-CNDP-SVI] - Continuous CDL ep restart on PCF ideal cluster	No
CSCvx61063	[PCF-CNDP-SVI] -etcd space exceeded issue made cdI-ep pods in unhealthy state	No
<u>CSCvx62296</u>	[PCF-CNDP-SVI] - Policy changes done using PB Central causes issue	No
<u>CSCvx74018</u>	PCF is sending N7_NOTIFY on receiving error/timeout for Idap profile refresh event	No

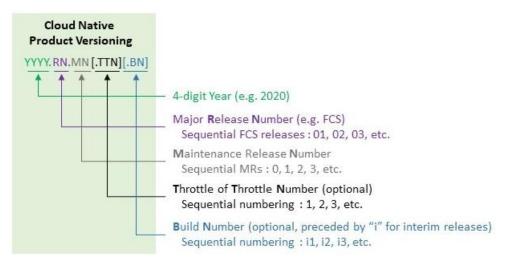

Operator Notes

Bug ID	Headline	Behavior
		Change
<u>CSCvx74071</u>	PCF Flow Information Description overwrites the configured Flow Direction for N7 Dynamic Rule	Yes
<u>CSCvx75126</u>	[PCF-IVT] PCF should not throw error in case AN_INFO reported with servingNetwork and not UE info	No
CSCvx97263	Stale warmup sessions left on the system	No
<u>CSCvy01381</u>	[PCF-CNDP-SVI] Rx traffic doesn't recover after node power off/on scenario	No
<u>CSCvy09897</u>	Splunk unavailability causing PCF pod restarts	No

Operator Notes

Cloud Native Product Version Numbering System

The **show helm list** command displays detailed information about the version of the cloud native product currently deployed.

The appropriate version number field increments after a version has been released. The new version numbering format is a contiguous sequential number that represents incremental changes between releases. This format facilitates identifying the changes between releases when using Bug Search Tool to research software releases.
