 * Represents a parameter passed to a function or a property getter/setter, including `this` and extension receiver parameters.  
 */  
@public interface KParameter : KAnnotatedElement {  
    /**  
     * 0-based index of this parameter in the parameter list of its containing callable.  
     */  
    public val index: Int  
    /**  
     * Name of this parameter as it was declared in the source code, or `null` if the parameter has no name or its name is not available at runtime.  
     * Examples of nameless parameters include `this` instance for member functions, extension receiver for extension functions or properties, parameters of Java methods compiled without the debug information, and others.  
     */  
    public val name: String?  
    /**  
     * Type of this parameter. For a `vararg` parameter, this is the type of the corresponding array, not the individual element.  
     */  
    public val type:
```

`KType`

`Kind` Kind of this parameter.

`public val kind: Kind` Kind represents a particular position of the parameter declaration in the source code, such as an instance, an extension receiver parameter or a value parameter.

`public enum class Kind` Instance required to make a call to the member, or an outer class instance for an inner class constructor.

`INSTANCE` Extension receiver of an extension function or property.

`EXTENSION_RECEIVER` Ordinary named value parameter.

`VALUE` `true` if this parameter is optional and can be omitted when making a call via `[KCallable.callBy]`, or `false` otherwise.

A parameter is optional in any of the two cases:

- The default value is provided at the declaration of this parameter.
- The parameter is declared in a member function and one of the corresponding parameters in the super functions is optional.

`public val isOptional: Boolean` `true` if this parameter is `vararg`.

See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/functions.html#variable-number-of-arguments-varargs) for more information.

`@SinceKotlin("1.1")` `public val isVararg: Boolean`

Copyright 2010-2019 JetBrains s.r.o. and Kotlin Programming Language contributors. Use of this source code is governed by the Apache 2.0 license that can be found in the license/LICENSE.txt file.

`package kotlin.reflect`

Represents a type. Type is usually either a class with optional type arguments, or a type parameter of some declaration, plus nullability.

`public interface KType : KAnnotatedElement`

The declaration of the classifier used in this type.

For example, in the type `List<String>` the classifier would be the `[KClass]` instance for `[List]`.

Returns `null` if this type is not denotable in Kotlin, for example if it is an intersection type.

`@SinceKotlin("1.1")` `public val classifier: KClassifier?` Type arguments passed for the parameters of the classifier in this type.

For example, in the type `Array<out Number>` the only type argument is `out Number`.

In case this type is based on an inner class, the returned list contains the type arguments provided for the innermost class first, then its outer class, and so on.

For example, in the type `Outer<A, B>.Inner<C, D>` the returned list is `[C, D, A, B]`.

`@SinceKotlin("1.1")` `public val arguments: List<KTypeProjection>` `true` if this type was marked nullable in the source code.

For Kotlin types, it means that `null` value is allowed to be represented by this type.

In practice it means that the type was declared with a question mark at the end.

For non-Kotlin types, it means the type or the symbol which was declared with this type is annotated with a runtime-retained nullability annotation such as `[javax.annotation.Nullable]`.

Note that even if `[isMarkedNullable]` is false, values of the type can still be `null`.

This may happen if it is a type of the type parameter with a nullable upper bound:

```
fun <T> foo(t: T) { // isMarkedNullable == false for t's type, but t can be null here when T = "Any?" }
```

`public val isMarkedNullable: Boolean`

Represents a type projection. Type projection is usually the argument to another type in a type usage.

For example, in the type `Array<out Number>`, `out Number` is the covariant projection of the type represented by the class `Number`.

Type projection is either the star projection, or an entity consisting of a specific type plus optional variance.

See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/generics.html#type-projections) for more information.

`@SinceKotlin("1.1")` `public data class KTypeProjection constructor` The use-site variance specified in the projection, or `null` if this is a star projection.

`public val variance: KVariance?` The type specified in the projection, or `null` if this is a star projection.

`public val type: KType?` Star projection, denoted by the `*` character.

For example, in the type `KClass<*>`, `*` is the star projection.

See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/generics.html#star-projections) for more information.

`public val STAR: KTypeProjection = KTypeProjection(null, null)` Creates an invariant projection of a given type. Invariant projection is just the type itself, without any use-site variance modifiers applied to it.

For example, in the type `Set<String>`, `String` is an invariant projection of the type represented by the class `String`.

`public fun invariant(type: KType): KTypeProjection = KTypeProjection(KVariance.INVARIANT, type)` Creates a contravariant projection of a given type, denoted by the `in` modifier applied to a type.

For example, in the

```

type `MutableList<in Number>`, `in Number` is a contravariant projection of the type of class `Number`.
    public fun contravariant(type: KType): KTypeProjection = KTypeProjection(KVariance.IN, type)
    /**
     * Creates a covariant projection of a given type, denoted by the `out` modifier applied to a type.
     * For example, in the type `Array<out Number>`, `out Number` is a covariant projection of the type of class
     * `Number`.
     * public fun covariant(type: KType): KTypeProjection =
     * KTypeProjection(KVariance.OUT, type)
     */
}

```

Invocation of `resume(Unit)` starts coroutine immediately in the invoker's call stack without going through the `[ContinuationInterceptor]` that might be present in the completion's `[CoroutineContext]`. It is the invoker's responsibility to ensure that a proper invocation context is established. Note that [completion] of this function may get invoked in an arbitrary context. `[Continuation.intercepted]` can be used to acquire the intercepted continuation. Invocation of `resume(Unit)` on intercepted continuation guarantees that execution of both the coroutine and [completion] happens in the invocation context established by `[ContinuationInterceptor]`. Repeated invocation of any resume function on the resulting continuation corrupts the state machine of the coroutine and may result in arbitrary behaviour or exception.

```

@SinceKotlin("1.3")
public actual fun <R, T>
(suspend R.() -> T).createCoroutineUnintercepted(
    receiver: R, completion: Continuation<T>):
Continuation<Unit> =
    // Kotlin/JS suspend lambdas have an extra parameter `suspended` if
    (this.asDynamic().length == 3) {
        // When `suspended` is true the continuation is created, but not executed
        this.asDynamic()(receiver, completion, true)
    } else {
        createCoroutineFromSuspendFunction(completion)
        {
            this.asDynamic()(receiver, completion)
        }
    }
}

```

Intercepts this continuation with `[ContinuationInterceptor]`. This function shall be used on the immediate result of `[createCoroutineUnintercepted]` or `[suspendCoroutineUninterceptedOrReturn]`, in which case it checks for `[ContinuationInterceptor]` in the continuation's `[context][Continuation.context]`, invokes `[ContinuationInterceptor.interceptContinuation]`, caches and returns the result. If this function is invoked on other `[Continuation]` instances it returns `this` continuation unchanged.

"")\n\n@Target(CLASS)\ninternal annotation class marker\n\n/**\n * Gives a declaration (a function, a property or
a class) specific name in JavaScript.\n * This may be useful in the following cases:\n * * There are two
functions for which the compiler gives same name in JavaScript, you can\n * mark one with `@JsName(...)` to
prevent the compiler from reporting error.\n * * You are writing a JavaScript library in Kotlin. The compiler
produces mangled names\n * for functions with parameters, which is unnatural for usual JavaScript developer.\n *
You can put `@JsName(...)` on functions you want to be available from JavaScript.\n * * For some reason you
want to rename declaration, e.g. there's common term in JavaScript\n * for a concept provided by the declaration,
which is uncommon in Kotlin.\n * Example:\n * ```\n * kotlin\n * class Person(val name: String) {\n * fun
hello() {\n * println("Hello $name!")\n * }\n * @JsName("helloWithGreeting")\n * fun
hello(greeting: String) {\n * println("$greeting $name!")\n * }\n * }\n * ```\n * @property name the
name which compiler uses both for declaration itself and for all references to the declaration.\n * It's required
to denote a valid JavaScript identifier.\n * \n\n@Retention(AnnotationRetention.BINARY)\n@Target(CLASS,
FUNCTION, PROPERTY, CONSTRUCTOR, PROPERTY_GETTER, PROPERTY_SETTER)\npublic actual
annotation class JsName(actual val name: String)\n\n/**\n * Denotes an `external` declaration that must be imported
from native JavaScript library.\n * The compiler produces the code relevant for the target module system, for
example, in case of CommonJS,\n * it will import the declaration via the `require(...)` function.\n * The
annotation can be used on top-level external declarations (classes, properties, functions) and files.\n * In case of file
(which can't be `external`) the following rule applies: all the declarations in\n * the file must be `external`. By
applying `@JsModule(...)` on a file you tell the compiler to import a JavaScript object\n * that contain all the
declarations from the file.\n * Example:\n * ```\n * kotlin\n * @JsModule("jquery")\n * external abstract class
JQuery() {\n * // some declarations here\n * }\n * @JsModule("jquery")\n * external fun JQuery(element:
Element): JQuery\n * ```\n * @property import name of a module to import declaration from.\n * It is not
```

interpreted by the Kotlin compiler, it's passed as is directly to the target module system.

```

@see JsNonModule
@Retention(AnnotationRetention.BINARY)
@Target(CLASS, PROPERTY, FUNCTION, FILE)
public annotation class JsModule(val import: String)
// Denotes an `external` declaration that can be used without module system.
// By default, an `external` declaration is available regardless your target module system.
// However, by applying [JsModule] annotation you can make a declaration unavailable to `plain` module system.
// Some JavaScript libraries are distributed both as a standalone downloadable piece of JavaScript and as a module available as an npm package.
// To tell the Kotlin compiler to accept both cases, you can augment [JsModule] with the `@JsNonModule` annotation.
// For example:
kotlin
@JsModule("jquery")
@JsNonModule
@JsName("$")
external abstract class JQuery() {
    // some declarations here
}
@JsModule("jquery")
@JsNonModule
@JsName("$")
external fun JQuery(element: Element): JQuery
@see JsModule
@Retention(AnnotationRetention.BINARY)
@Target(CLASS, PROPERTY, FUNCTION, FILE)
public annotation class JsNonModule
// Adds prefix to `external` declarations in a source file.
// JavaScript does not have concept of packages (namespaces). They are usually emulated by nested objects.
// The compiler turns references to `external` declarations either to plain unprefixed names (in case of `plain` modules) or to plain imports.
// However, if a JavaScript library provides its declarations in packages, you won't be satisfied with this.
// You can tell the compiler to generate additional prefix before references to `external` declarations using the `@JsQualifier(...)` annotation.
// Note that a file marked with the `@JsQualifier(...)` annotation can't contain non-`external` declarations.
// Example:
@file:JsQualifier("my.jsPackageName")
package some.kotlinPackage
external fun foo(x: Int)
external fun bar(): String
@property value the qualifier to add to the declarations in the generated code. It must be a sequence of valid JavaScript identifiers separated by the `.` character.
Examples of valid qualifiers are: `foo`, `bar.Baz`, `_.$.f`

for special cases.

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun log2(x: Double): Double =
    nativeMath.log2(x)

```

Computes $\ln(x + 1)$. This function can be implemented to produce more precise result for $[x]$ near zero.

Special cases:

- $\ln(\text{NaN})$ is NaN
- $\ln(x)$ is NaN where $x < -1.0$
- $\ln(-1.0)$ is $-\text{Inf}$
- $\ln(+\text{Inf})$ is $+\text{Inf}$

@see [ln] function @see [expm1] function

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun ln1p(x: Double): Double =
    nativeMath.log1p(x)

```

Rounds the given value $[x]$ to an integer towards positive infinity. @return the smallest double value that is greater than or equal to the given value $[x]$ and is a mathematical integer.

Special cases:

- $\text{ceil}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun ceil(x: Double): Double =
    nativeMath.ceil(x).unsafeCast<Double>() // TODO: Remove unsafe cast after removing public js.math

```

Rounds the given value $[x]$ to an integer towards negative infinity. @return the largest double value that is smaller than or equal to the given value $[x]$ and is a mathematical integer.

Special cases:

- $\text{floor}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun floor(x: Double): Double =
    nativeMath.floor(x).unsafeCast<Double>()

```

Rounds the given value $[x]$ to an integer towards zero. @return the value $[x]$ having its fractional part truncated.

Special cases:

- $\text{truncate}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun truncate(x: Double): Double = nativeMath.trunc(x)

```

Rounds the given value $[x]$ towards the closest integer with ties rounded towards even integer.

Special cases:

- $\text{round}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

```

@SinceKotlin("1.2")
public actual fun round(x: Double): Double {
    if (x % 0.5 != 0.0) {
        return nativeMath.round(x).unsafeCast<Double>()
    }
    val floor = floor(x)
    return if (floor % 2 == 0) floor else ceil(x)
}

```

Returns the absolute value of the given value $[x]$.

Special cases:

- $\text{abs}(\text{NaN})$ is NaN

@see absoluteValue extension property for [Double]

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun abs(x: Double): Double =
    nativeMath.abs(x)

```

Returns the sign of the given value $[x]$:

- -1.0 if the value is negative,
- zero if the value is zero,
- 1.0 if the value is positive

Special case:

- $\text{sign}(\text{NaN})$ is NaN

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun sign(x: Double): Double =
    nativeMath.sign(x)

```

Returns the smaller of two values. If either value is NaN , then the result is NaN .

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun min(a: Double, b: Double): Double =
    nativeMath.min(a, b)

```

Returns the greater of two values. If either value is NaN , then the result is NaN .

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun max(a: Double, b: Double): Double =
    nativeMath.max(a, b)

```

// extensions

Raises this value to the power $[x]$.

Special cases:

- $b.\text{pow}(0.0)$ is 1.0
- $b.\text{pow}(1.0) == b$
- $b.\text{pow}(\text{NaN})$ is NaN
- $\text{NaN}.\text{pow}(x)$ is NaN for $x != 0.0$
- $b.\text{pow}(\text{Inf})$ is NaN for $\text{abs}(b) == 1.0$
- $b.\text{pow}(x)$ is NaN for $b < 0$ and x is finite and not an integer

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun Double.pow(x: Double): Double =
    nativeMath.pow(this, x)

```

Raises this value to the integer power $[n]$. See the other overload of [pow] for details.

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun Double.pow(n: Int): Double =
    nativeMath.pow(this, n.toDouble())

```

Returns the absolute value of this value.

Special cases:

- $\text{NaN}.\text{absoluteValue}$ is NaN

@see abs function

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline val Double.absoluteValue: Double get() = nativeMath.abs(this)

```

Returns the sign of this value:

- -1.0 if the value is negative,
- zero if the value is zero,
- 1.0 if the value is positive

Special case:

- $\text{NaN}.\text{sign}$ is NaN

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline val Double.sign: Double get() = nativeMath.sign(this)

```

Returns this value with the sign bit same as of the [sign] value.

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun Double.withSign(sign: Int): Double = this.withSign(sign.toDouble())

```

Returns the ulp (unit in the last place) of this value. An ulp is a positive distance between this value and the next nearest [Double] value larger in magnitude.

Special Cases:

- $\text{NaN}.\text{ulp}$ is NaN
- $x.\text{ulp}$ is $+\text{Inf}$ when x is $+\text{Inf}$ or $-\text{Inf}$
- $0.0.\text{ulp}$ is $\text{Double}.\text{MIN_VALUE}$

```

@SinceKotlin("1.2")
public actual val Double.ulp: Double get() = when {
    this

```

```

for $x < 0$ $\text{atan2}(y, +\text{Inf})$ is 0.0 for $0 < y < +\text{Inf}$ and -0.0 for $-\text{Inf} < y < 0$ $\text{atan2}(y, -\text{Inf})$ is PI for $0 < y < +\text{Inf}$ and $-\text{PI}$ for $-\text{Inf} < y < 0$ $\text{atan2}(y, 0.0)$ is $\text{PI}/2$ for $y > 0$ and $-\text{PI}/2$ for $y < 0$ $\text{atan2}(+\text{Inf}, x)$ is $\text{PI}/2$ for finite x $\text{atan2}(-\text{Inf}, x)$ is $-\text{PI}/2$ for finite x $\text{atan2}(\text{NaN}, x)$ and $\text{atan2}(y, \text{NaN})$ is NaN

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun atan2(y: Float, x: Float): Float = nativeMath.atan2(y.toDouble(), x.toDouble()).toFloat()

```

Computes the hyperbolic sine of the value [x].

Special cases:

- $\sinh(\text{NaN})$ is NaN
- $\sinh(+\text{Inf})$ is $+\text{Inf}$
- $\sinh(-\text{Inf})$ is $-\text{Inf}$

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun sinh(x: Float): Float = nativeMath.sinh(x.toDouble()).toFloat()

```

Computes the hyperbolic cosine of the value [x].

Special cases:

- $\cosh(\text{NaN})$ is NaN
- $\cosh(+\text{Inf})$ is $+\text{Inf}$
- $\cosh(-\text{Inf})$ is $+\text{Inf}$

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun cosh(x: Float): Float = nativeMath.cosh(x.toDouble()).toFloat()

```

Computes the hyperbolic tangent of the value [x].

Special cases:

- $\tanh(\text{NaN})$ is NaN
- $\tanh(+\text{Inf})$ is 1.0
- $\tanh(-\text{Inf})$ is -1.0

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun tanh(x: Float): Float = nativeMath.tanh(x.toDouble()).toFloat()

```

Computes the inverse hyperbolic sine of the value [x].

The returned value is y such that $\sinh(y) == x$.

Special cases:

- $\text{asinh}(\text{NaN})$ is NaN
- $\text{asinh}(+\text{Inf})$ is $+\text{Inf}$
- $\text{asinh}(-\text{Inf})$ is $-\text{Inf}$

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun asinh(x: Float): Float = nativeMath.asinh(x.toDouble()).toFloat()

```

Computes the inverse hyperbolic cosine of the value [x].

The returned value is positive y such that $\cosh(y) == x$.

Special cases:

- $\text{acosh}(\text{NaN})$ is NaN
- $\text{acosh}(x)$ is NaN when $x < 1$
- $\text{acosh}(+\text{Inf})$ is $+\text{Inf}$

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun acosh(x: Float): Float = nativeMath.acosh(x.toDouble()).toFloat()

```

Computes the inverse hyperbolic tangent of the value [x].

The returned value is y such that $\tanh(y) == x$.

Special cases:

- $\text{atanh}(\text{NaN})$ is NaN
- $\text{atanh}(x)$ is NaN when $x > 1$ or $x < -1$
- $\text{atanh}(1.0)$ is $+\text{Inf}$
- $\text{atanh}(-1.0)$ is $-\text{Inf}$

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun atanh(x: Float): Float = nativeMath.atanh(x.toDouble()).toFloat()

```

Computes $\sqrt{x^2 + y^2}$ without intermediate overflow or underflow.

Special cases:

- returns $+\text{Inf}$ if any of arguments is infinite
- returns NaN if any of arguments is NaN and the other is not infinite

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun hypot(x: Float, y: Float): Float = nativeMath.hypot(x.toDouble(), y.toDouble()).toFloat()

```

Computes the positive square root of the value [x].

Special cases:

- \sqrt{x} is NaN when $x < 0$ or x is NaN

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun sqrt(x: Float): Float = nativeMath.sqrt(x.toDouble()).toFloat()

```

Computes Euler's number e raised to the power of the value [x].

Special cases:

- $\exp(\text{NaN})$ is NaN
- $\exp(+\text{Inf})$ is $+\text{Inf}$
- $\exp(-\text{Inf})$ is 0.0

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun exp(x: Float): Float = nativeMath.exp(x.toDouble()).toFloat()

```

Computes $\exp(x) - 1$.

This function can be implemented to produce more precise result for [x] near zero.

Special cases:

- $\text{expm1}(\text{NaN})$ is NaN
- $\text{expm1}(+\text{Inf})$ is $+\text{Inf}$
- $\text{expm1}(-\text{Inf})$ is -1.0

@see [exp] function.

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun expm1(x: Float): Float = nativeMath.expm1(x.toDouble()).toFloat()

```

Computes the logarithm of the value [x] to the given [base].

Special cases:

- $\log(x, b)$ is NaN if either x or b are NaN
- $\log(x, b)$ is NaN when $x < 0$ or $b \leq 0$ or $b == 1.0$
- $\log(+\text{Inf}, +\text{Inf})$ is NaN
- $\log(+\text{Inf}, b)$ is $+\text{Inf}$ for $b > 1$ and $-\text{Inf}$ for $b < 1$
- $\log(0.0, b)$ is $-\text{Inf}$ for $b > 1$ and $+\text{Inf}$ for $b > 1$

See also logarithm functions for common fixed bases: [ln], [log10] and [log2].

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun log(x: Float, base: Float): Float = log(x.toDouble(), base.toDouble()).toFloat()

```

Computes the natural logarithm (base E) of the value [x].

Special cases:

- $\ln(\text{NaN})$ is NaN
- $\ln(x)$ is NaN when $x < 0$
- $\ln(+\text{Inf})$ is $+\text{Inf}$
- $\ln(0.0)$ is $-\text{Inf}$

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun ln(x: Float): Float = nativeMath.log(x.toDouble()).toFloat()

```

Computes the common logarithm (base 10) of the value [x].

@see [ln] function for special cases.

```

@SinceKotlin("1.2")
@InlineOnly
public actual inline fun log10(x: Float): Float = nativeMath.log10(x.toDouble()).toFloat()

```

Computes the binary

logarithm (base 2) of the value [x].
`@see [ln] function for special cases.`

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun log2(x: Float): Float =
nativeMath.log2(x.toDouble()).toFloat()

```

Computes $\ln(a + 1)$.
This function can be implemented to produce more precise result for [x] near zero.
Special cases:
 $\ln(\text{NaN})$ is NaN
 $\ln(x)$ is NaN where $x < -1.0$
 $\ln(-1.0)$ is $-\text{Inf}$
 $\ln(+\text{Inf})$ is $+\text{Inf}$
@see [ln] function
@see [expm1] function

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun ln1p(x: Float): Float =
nativeMath.log1p(x.toDouble()).toFloat()

```

Rounds the given value [x] to an integer towards positive infinity.
@return the smallest Float value that is greater than or equal to the given value [x] and is a mathematical integer.
Special cases:
 $\text{ceil}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun ceil(x: Float): Float =
nativeMath.ceil(x.toDouble()).toFloat()

```

Rounds the given value [x] to an integer towards negative infinity.
@return the largest Float value that is smaller than or equal to the given value [x] and is a mathematical integer.
Special cases:
 $\text{floor}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun floor(x: Float): Float =
nativeMath.floor(x.toDouble()).toFloat()

```

Rounds the given value [x] to an integer towards zero.
@return the value [x] having its fractional part truncated.
Special cases:
 $\text{truncate}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun truncate(x: Float): Float =
truncate(x.toDouble()).toFloat()

```

Rounds the given value [x] towards the closest integer with ties rounded towards even integer.
Special cases:
 $\text{round}(x)$ is x where x is NaN or $+\text{Inf}$ or $-\text{Inf}$ or already a mathematical integer.

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun round(x: Float): Float =
round(x.toDouble()).toFloat()

```

Returns the absolute value of the given value [x].
Special cases:
 $\text{abs}(\text{NaN})$ is NaN
@see absoluteValue extension property for [Float]

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun abs(x: Float): Float =
nativeMath.abs(x.toDouble()).toFloat()

```

Returns the sign of the given value [x]:
 -1.0 if the value is negative,
zero if the value is zero,
 1.0 if the value is positive
Special case:
 $\text{sign}(\text{NaN})$ is NaN

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun sign(x: Float): Float =
nativeMath.sign(x.toDouble()).toFloat()

```

Returns the smaller of two values.
If either value is NaN , then the result is NaN .

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun min(a: Float, b: Float): Float =
nativeMath.min(a, b)

```

Returns the greater of two values.
If either value is NaN , then the result is NaN .

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun max(a: Float, b: Float): Float =
nativeMath.max(a, b)

```

extensions

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun Float.pow(x: Float): Float =
nativeMath.pow(this.toDouble(), x.toDouble()).toFloat()

```

Raises this value to the power [x].
Special cases:
 $\text{b.pow}(0.0)$ is 1.0
 $\text{b.pow}(1.0) == b$
 $\text{b.pow}(\text{NaN})$ is NaN
 $\text{NaN.pow}(x)$ is NaN for $x \neq 0.0$
 $\text{b.pow}(\text{Inf})$ is NaN for $\text{abs}(b) == 1.0$
 $\text{b.pow}(x)$ is NaN for $b < 0$ and x is finite and not an integer

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun Float.pow(n: Int): Float =
nativeMath.pow(this.toDouble(), n.toDouble()).toFloat()

```

Raises this value to the integer power [n].
See the other overload of [pow] for details.

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun Float.absoluteValue: Float get() =
nativeMath.abs(this.toDouble()).toFloat()

```

Returns the sign of this value:
 -1.0 if the value is negative,
zero if the value is zero,
 1.0 if the value is positive
Special case:
 NaN.sign is NaN

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun Float.sign: Float get() =
nativeMath.sign(this.toDouble()).toFloat()

```

Returns this value with the sign bit same as of the [sign] value.
If [sign] is NaN the sign of the result is undefined.

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun Float.withSign(sign: Float): Float =
this.toDouble().withSign(sign.toDouble()).toFloat()

```

Returns this value with the sign bit same as of the [sign] value.

```

*^@SinceKotlin("1.2")@InlineOnly\npublic actual inline fun Float.withSign(sign: Int): Float =

```

```

from the calls in the annotated function parameter of that function.\n *\n * When this annotation is placed on a
generic function parameter of a function,\n * it enables to infer the type arguments of that generic function from the
lambda body passed to that parameter.\n *\n * The calls that affect inference are either members of the receiver type

```

of an annotated function parameter or `* extensions` for that type. The extensions must be themselves annotated with `@BuilderInference`.
 Example: we declare `fun <T> sequence(@BuilderInference block: suspend SequenceScope<T>().-> Unit): Sequence<T>` and use it like `val result = sequence { yield("result") }`. Here the type argument of the resulting sequence is inferred to `String` from the argument of the `[SequenceScope.yield]` function, that is called inside the lambda passed to `[sequence]`.
 Note: this annotation is experimental, see `[ExperimentalTypeInference]` on how to opt-in for it.

 * Describes a situation when a function returns normally, without any exceptions thrown.
 * Use [SimpleEffect.implies] function to describe a conditional effect that happens in such case.
 // @sample samples.contracts.returnsContract
 @ContractsDsl public fun returns(): Returns

 * Describes a situation when a function returns normally with the specified return [value].
 * The possible values of [value] are limited to `true`, `false` or `null`.
 * Use [SimpleEffect.implies] function to describe a conditional effect that happens in such case.
 // @sample samples.contracts.returnsTrueContract
 // @sample samples.contracts.returnsFalseContract
 // @sample samples.contracts.returnsNullContract
 @ContractsDsl public fun returns(value: Any?): Returns

 * Describes a situation when a function returns normally with any value that is not `null`.
 * Use [SimpleEffect.implies] function to describe a conditional effect that happens in such case.
 // @sample samples.contracts.returnsNotNullContract
 @ContractsDsl public fun returnsNotNull(): ReturnsNotNull

 * Specifies that the function parameter [lambda] is invoked in place.
 * This contract specifies that:
 * 1. the function [lambda] can only be invoked during the call of the owner function, and it won't be invoked after that owner function call is completed;
 * 2. _(optionally)_ the function [lambda] is invoked the amount of times specified by the [kind] parameter, see the [InvocationKind] enum for possible values.
 * A function declaring the `callsInPlace` effect must be _inline_.
 // @sample samples.contracts.callsInPlaceAtMostOnceContract
 // @sample samples.contracts.callsInPlaceAtLeastOnceContract
 // @sample samples.contracts.callsInPlaceExactlyOnceContract
 // @sample samples.contracts.callsInPlaceUnknownContract
 @ContractsDsl public fun <R> callsInPlace(lambda: Function<R>, kind: InvocationKind = InvocationKind.UNKNOWN): CallsInPlace

 * Specifies how many times a function invokes its function parameter in place.
 * See [ContractBuilder.callsInPlace] for the details of the call-in-place function contract.

@ContractsDsl
@ExperimentalContracts
@SinceKotlin("1.3")
public enum class InvocationKind {

 * A function parameter will be invoked one time or not invoked at all.
 // @sample samples.contracts.callsInPlaceAtMostOnceContract
 @ContractsDsl AT_MOST_ONCE,

 * A function parameter will be invoked one or more times.
 // @sample samples.contracts.callsInPlaceAtLeastOnceContract
 @ContractsDsl AT_LEAST_ONCE,

 * A function parameter will be invoked exactly one time.
 // @sample samples.contracts.callsInPlaceExactlyOnceContract
 @ContractsDsl EXACTLY_ONCE,

 * A function parameter is called in place, but it's unknown how many times it can be called.
 // @sample samples.contracts.callsInPlaceUnknownContract
 @ContractsDsl UNKNOWN
}

 * Specifies the contract of a function.
 * The contract description must be at the beginning of a function and have at least one effect.
 * Only the top-level functions can have a contract for now.
 * @param builder the lambda where the contract of a function is described with the help of the [ContractBuilder] members.
 // @sample samples.contracts.returnsContract
 // @sample samples.contracts.returnsTrueContract

Double Math =====

```

* Computes the sine of the angle [x]

given in radians.
`sin`: `Double` Computes the sine of the angle [x] given in radians.
`cos`: `Double` Computes the cosine of the angle [x] given in radians.
`tan`: `Double` Computes the tangent of the angle [x] given in radians.
`asin`: `Double` Computes the arc sine of the value [x]; the returned value is an angle in the range from $-\pi/2$ to $\pi/2$ radians.
`acos`: `Double` Computes the arc cosine of the value [x]; the returned value is an angle in the range from 0.0 to π radians.
`atan`: `Double` Computes the arc tangent of the value [x]; the returned value is an angle in the range from $-\pi/2$ to $\pi/2$ radians.
`atan2`: `Double, Double` Returns the angle θ of the polar coordinates (r, theta) that correspond to the rectangular coordinates (x, y) by computing the arc tangent of the value y / x ; the returned value is an angle in the range from $-\pi$ to π radians.
`sinh`: `Double` Computes the hyperbolic sine of the value [x].
`cosh`: `Double` Computes the hyperbolic cosine of the value [x].
`tanh`: `Double` Computes the hyperbolic tangent of the value [x].
`asinh`: `Double` Computes the inverse hyperbolic sine of the value [x]. The returned value is y such that $\sinh(y) == x$.
`acosh`: `Double` Computes the inverse hyperbolic cosine of the value [x]. The returned value is positive y such that $\cosh(y) == x$.
`atanh`: `Double` Computes the inverse hyperbolic tangent of the value [x]. The returned value is y such that $\tanh(y) == x$.
`hypot`: `Double, Double` Computes the positive square root of the value $\sqrt{x^2 + y^2}$ without intermediate overflow or underflow.
`exp`: `Double` Computes Euler's number e raised to the power of the value [x].
`expm1`: `Double` Computes $\exp(x) - 1$. This function can be implemented to produce more precise result for [x] near zero.
`log`: `Double, Double` Computes the logarithm of the value [x] to the given [base].
`log10`: `Double` Computes the logarithm of the value [x] to the given [base].

+Inf for $b > 1$. See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`.

`fun log(x: Double, base: Double): Double` Computes the natural logarithm (base `E`) of the value `[x]`.
 Special cases: `ln(NaN)` is `NaN`, `ln(x)` is `NaN` when `x < 0.0`, `ln(+Inf)` is `+Inf`, `ln(0.0)` is `-Inf`.

`fun ln(x: Double): Double` Computes the common logarithm (base 10) of the value `[x]`.
 @see `[ln]` function for special cases.

`fun log10(x: Double): Double` Computes the binary logarithm (base 2) of the value `[x]`.
 @see `[ln]` function for special cases.

`fun log2(x: Double): Double` Computes `ln(x + 1)`.
 This function can be implemented to produce more precise result for `[x]` near zero.
 Special cases: `ln1p(NaN)` is `NaN`, `ln1p(x)` is `NaN` where `x < -1.0`, `ln1p(-1.0)` is `-Inf`, `ln1p(+Inf)` is `+Inf`.
 @see `[ln]` function @see `[expm1]` function

`fun ln1p(x: Double): Double` Rounds the given value `[x]` to an integer towards positive infinity.
 @return the smallest double value that is greater than or equal to the given value `[x]` and is a mathematical integer.
 Special cases: `ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

`fun ceil(x: Double): Double` Rounds the given value `[x]` to an integer towards negative infinity.
 @return the largest double value that is smaller than or equal to the given value `[x]` and is a mathematical integer.
 Special cases: `floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

`fun floor(x: Double): Double` Rounds the given value `[x]` to an integer towards zero.
 @return the value `[x]` having its fractional part truncated.
 Special cases: `truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

`fun truncate(x: Double): Double` Rounds the given value `[x]` towards the closest integer with ties rounded towards even integer.
 Special cases: `round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.

`fun round(x: Double): Double` Returns the absolute value of the given value `[x]`.
 Special cases: `abs(NaN)` is `NaN`.
 @see `absoluteValue` extension property for `[Double]`.

`fun abs(x: Double): Double` Returns the sign of the given value `[x]`: `-1.0` if the value is negative, `0` if the value is zero, `1.0` if the value is positive.
 Special case: `sign(NaN)` is `NaN`.

`fun sign(x: Double): Double` Returns the smaller of two values.
 If either value is `NaN`, then the result is `NaN`.

`fun min(a: Double, b: Double): Double` Returns the greater of two values.
 If either value is `NaN`, then the result is `NaN`.

`fun max(a: Double, b: Double): Double` Raises this value to the power `[x]`.
 Special cases: `b.pow(0.0)` is `1.0`, `b.pow(1.0) == b`, `b.pow(NaN)` is `NaN`, `NaN.pow(x)` is `NaN` for `x != 0.0`, `b.pow(Inf)` is `NaN` for `abs(b) == 1.0`, `b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer.

`fun Double.pow(x: Double): Double` Raises this value to the integer power `[n]`.
 See the other overload of `[pow]` for details.

`fun Double.pow(n: Int): Double` Returns the absolute value of this value.
 Special cases: `NaN.absoluteValue` is `NaN`.
 @see `abs` function

`val Double.absoluteValue: Double` Returns the sign of this value: `-1.0` if the value is negative, `0` if the value is zero, `1.0` if the value is positive.
 Special case: `NaN.sign` is `NaN`.

`val Double.sign: Double` Returns this value with the sign bit same as of the `[sign]` value.
 If `[sign]` is `NaN` the sign of the result is undefined.

`fun Double.withSign(sign: Double): Double` Returns this value with the sign bit same as of the `[sign]` value.

`fun Double.withSign(sign: Int): Double` Returns the ulp (unit in the last place) of this value.
 An ulp is a positive distance between this value and the next nearest `[Double]` value larger in magnitude.
 Special Cases: `NaN.ulp` is `NaN`, `x.ulp` is `+Inf` when `x` is `+Inf` or `-Inf`, `0.0.ulp` is `Double.MIN_VALUE`.

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.1

1. Definitions.

1.1. "Contributor" means each individual or entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version" means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. "Covered Software" means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original

Software with files containing Modifications, in each case including portions thereof.

1.4. "Executable" means the Covered Software in any form other than Source Code.

1.5. "Initial Developer" means the individual or entity that first makes Original Software available under this License.

1.6. "Larger Work" means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. "License" means this document.

1.8. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications" means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. "Original Software" means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. "Source Code" means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct

or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained

within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.

Oracle is the initial license steward and may publish revised and/or

new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach.

Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as "Participant") alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. If You assert a patent infringement claim against Participant alleging that the Participant Software directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

6.4. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH

LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Software is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" (as that term is defined at 48 C.F.R. § 252.227-7014(a)(1)) and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or

shall be deemed to constitute any admission of liability.

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent

to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work,

excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any

risks associated with Your exercise of permissions under this License.

8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work

(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses

granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

*

* Version 1.00 December 9, 1997 -- initial release

* Version 1.01 December 10, 1997

* fixed bug in octal def (0..7 not 0..8)

* Version 1.10 August 1998 (parrt)

* added tree construction

* fixed definition of WS,comments for mac,pc,unix newlines

* added unary plus

* Version 1.11 (Nov 20, 1998)

* Added "shutup" option to turn off last ambig warning.

* Fixed inner class def to allow named class defs as statements

* synchronized requires compound not simple statement

* add [] after builtInType DOT class in primaryExpression

- * "const" is reserved but not valid..removed from modifiers
- * Version 1.12 (Feb 2, 1999)
 - * Changed LITERAL_XXX to xxx in tree grammar.
 - * Updated java.g to use tokens {...} now for 2.6.0 (new feature).
 - *
- * Version 1.13 (Apr 23, 1999)
 - * Didn't have (stat)? for else clause in tree parser.
 - * Didn't gen ASTs for interface extends. Updated tree parser too.
 - * Updated to 2.6.0.
- * Version 1.14 (Jun 20, 1999)
 - * Allowed final/abstract on local classes.
 - * Removed local interfaces from methods
 - * Put instanceof precedence where it belongs...in relationalExpr
 - * It also had expr not type as arg; fixed it.
 - * Missing ! on SEMI in classBlock
 - * fixed: (expr) + "string" was parsed incorrectly (+ as unary plus).
 - * fixed: didn't like Object[].class in parser or tree parser
- * Version 1.15 (Jun 26, 1999)
 - * Screwed up rule with instanceof in it. :(Fixed.
 - * Tree parser didn't like (expr).something; fixed.
 - * Allowed multiple inheritance in tree grammar. oops.
- * Version 1.16 (August 22, 1999)
 - * Extending an interface built a wacky tree: had extra EXTENDS.
 - * Tree grammar didn't allow multiple superinterfaces.
 - * Tree grammar didn't allow empty var initializer: { }
- * Version 1.17 (October 12, 1999)
 - * ESC lexer rule allowed 399 max not 377 max.
 - * java.tree.g didn't handle the expression of synchronized statements.
- * Version 1.18 (August 12, 2001)
 - * Terence updated to Java 2 Version 1.3 by observing/combining work of Allan Jacobs and Steve Messick. Handles 1.3 src. Summary:
 - * o primary didn't include boolean.class kind of thing
 - * o constructor calls parsed explicitly now:
 - * see explicitConstructorInvocation
 - * o add strictfp modifier
 - * o missing objBlock after new expression in tree grammar
 - * o merged local class definition alternatives, moved after declaration
 - * o fixed problem with ClassName.super.field
 - * o reordered some alternatives to make things more efficient
 - * o long and double constants were not differentiated from int/float
 - * o whitespace rule was inefficient: matched only one char
 - * o add an examples directory with some nasty 1.3 cases
 - * o made Main.java use buffered IO and a Reader for Unicode support
 - * o supports UNICODE?
 - * Using Unicode charVocabulary makes code file big, but only in the bitsets at the end. I need to make ANTLR generate

- * unicode bitsets more efficiently.
- * Version 1.19 (April 25, 2002)
- * Terence added in nice fixes by John Pybus concerning floating constants and problems with super() calls. John did a nice reorg of the primary/postfix expression stuff to read better and makes f.g.super() parse properly (it was METHOD_CALL not a SUPER_CTOR_CALL). Also:
 - * o "finally" clause was a root...made it a child of "try"
 - * o Added stuff for asserts too for Java 1.4, but *commented out* as it is not backward compatible.
- * Version 1.20 (October 27, 2002)
- * Terence ended up reorging John Pybus' stuff to remove some nondeterminisms and some syntactic predicates. Note that the grammar is stricter now; e.g., this(...) must be the first statement.
- * Trinary ?: operator wasn't working as array name:
 - * (isBig ? bigDigits : digits)[i];
- * Checked parser/tree parser on source for Resin-2.0.5, jive-2.1.1, jdk 1.3.1, Lucene, antlr 2.7.2a4, and the 110k-line jGuru server source.
- * Version 1.21 (October 17, 2003)
- * Fixed lots of problems including:
 - * Ray Waldin: add typeDefinition to interfaceBlock in java.tree.g
 - * He found a problem/fix with floating point that start with 0
 - * Ray also fixed problem that (int.class) was not recognized.
 - * Thorsten van Ellen noticed that \n are allowed incorrectly in strings.
 - * TJP fixed CHAR_LITERAL analogously.
- * Version 1.21.2 (March, 2003)
- * Changes by Matt Quail to support generics (as per JDK1.5/JSR14)
 - * Notes:
 - * o We only allow the "extends" keyword and not the "implements" keyword, since that's what JSR14 seems to imply.
 - * o Thanks to Monty Zukowski for his help on the antlr-interest mail list.
 - * o Thanks to Alan Eliassen for testing the grammar over his Fink source base
- * Version 1.22 (July, 2004)
- * Changes by Michael Studman to support Java 1.5 language extensions
 - * Notes:
 - * o Added support for annotations types

- * o Finished off Matt Quail's generics enhancements to support bound type arguments
- * o Added support for new for statement syntax
- * o Added support for static import syntax
- * o Added support for enum types
- * o Tested against JDK 1.5 source base and source base of jdigraph project
- * o Thanks to Matt Quail for doing the hard part by doing most of the generics work
- *
- * Version 1.22.1 (July 28, 2004)
- * Bug/omission fixes for Java 1.5 language support
- * o Fixed tree structure bug with classOrInterface - thanks to Pieter Vangorpto for spotting this
- * o Fixed bug where incorrect handling of SR and BSR tokens would cause type parameters to be recognised as type arguments.
- * o Enabled type parameters on constructors, annotations on enum constants and package definitions
- * o Fixed problems when parsing `if ((char.class.equals(c))) {}` - solution by Matt Quail at Cenqua
- *
- * Version 1.22.2 (July 28, 2004)
- * Slight refactoring of Java 1.5 language support
- * o Refactored for/"foreach" productions so that original literal "for" literal is still used but the for sub-clauses vary by token type
- * o Fixed bug where type parameter was not included in generic constructor's branch of AST
- *
- * Version 1.22.3 (August 26, 2004)
- * Bug fixes as identified by Michael Stahl; clean up of tabs/spaces and other refactorings
- * o Fixed typeParameters omission in identPrimary and newStatement
- * o Replaced GT reconciliation code with simple semantic predicate
- * o Adapted enum/assert keyword checking support from Michael Stahl's java15 grammar
- * o Refactored typeDefinition production and field productions to reduce duplication
- *
- * Version 1.22.4 (October 21, 2004)
- * Small bux fixes
- * o Added typeArguments to explicitConstructorInvocation, e.g. `new <String>MyParameterised()`
- * o Added typeArguments to postfixExpression productions for anonymous inner class super constructor invocation, e.g. `new Outer().<String>super()`
- * o Fixed bug in array declarations identified by Geoff Roy
- *
- * Version 1.22.4.g.1
- * o I have taken java.g for Java 1.5 from Michael Studman (1.22.4) and have applied the groovy.diff from java.g (1.22) by John Rose back onto the new root (1.22.4) - Jeremy Rayner (Jan 2005)
- *
- * Version 1.22.4.g.2
- * o mkempff, rkleeb, Dec 2007
- * o fixed various rules so that they call the correct Create Method to make sure that the line information are correct
- *

/**

```

- * A "path expression" is a name or other primary, possibly qualified by various
- * forms of dot, and/or followed by various kinds of brackets.
- * It can be used for value or assigned to, or else further qualified, indexed, or called.
- * It is called a "path" because it looks like a linear path through a data structure.
- * Examples: x.y, x?.y, x*.y, x.@y; x[], x[y], x[y,z]; x(), x(y), x(y,z); x{s}; a.b[n].c(x).d{s}
- * (Compare to a C lvalue, or LeftHandSide in the JLS section 15.26.)
- * General expressions are built up from path expressions, using operators like '+' and '='.
- *
- * t 0: primary, 1: namePart, 2: arguments, 3: closureOrLambdaExpression, 4: indexPropertyArgs, 5:
 namedPropertyArgs,
- * 6: non-static inner class creator

```

/** Java 1.5 Recognizer
 *
 * Run 'java Main [-showtree] directory-full-of-java-files'
 *
 * [The -showtree option pops up a Swing frame that shows
 * the AST constructed from the parser.]
 *

```

- * Run 'java Main <directory full of java files>'
- *

- *
- * Version 1.00 December 9, 1997 -- initial release
- * Version 1.01 December 10, 1997
- * fixed bug in octal def (0..7 not 0..8)
- * Version 1.10 August 1998 (parrt)
- * added tree construction
- * fixed definition of WS,comments for mac,pc,unix newlines
- * added unary plus
- * Version 1.11 (Nov 20, 1998)
- * Added "shutup" option to turn off last ambig warning.
- * Fixed inner class def to allow named class defs as statements
- * synchronized requires compound not simple statement
- * add [] after builtInType DOT class in primaryExpression
- * "const" is reserved but not valid..removed from modifiers
- * Version 1.12 (Feb 2, 1999)
- * Changed LITERAL_XXX to XXX in tree grammar.
- * Updated java.g to use tokens {...} now for 2.6.0 (new feature).
- *
- * Version 1.13 (Apr 23, 1999)
- * Didn't have (stat)? for else clause in tree parser.
- * Didn't gen ASTs for interface extends. Updated tree parser too.
- * Updated to 2.6.0.
- * Version 1.14 (Jun 20, 1999)
- * Allowed final/abstract on local classes.
- * Removed local interfaces from methods
- * Put instanceof precedence where it belongs...in relationalExpr
- * It also had expr not type as arg; fixed it.
- * Missing ! on SEMI in classBlock
- * fixed: (expr) + "string" was parsed incorrectly (+ as unary plus).
- * fixed: didn't like Object[].class in parser or tree parser
- * Version 1.15 (Jun 26, 1999)
- * Screwed up rule with instanceof in it. :(Fixed.
- * Tree parser didn't like (expr).something; fixed.
- * Allowed multiple inheritance in tree grammar. oops.
- * Version 1.16 (August 22, 1999)

- * Extending an interface built a wacky tree: had extra EXTENDS.
- * Tree grammar didn't allow multiple superinterfaces.
- * Tree grammar didn't allow empty var initializer: { }
- * Version 1.17 (October 12, 1999)
- * ESC lexer rule allowed 399 max not 377 max.
- * java.tree.g didn't handle the expression of synchronized statements.
- * Version 1.18 (August 12, 2001)
