

# Cisco Training Bootcamps for Teams

## Help your team realize their automation potential

Cisco Training Bootcamps offer in-depth training that gives your team the knowledge they need to build a reliable, scalable, and secure infrastructure. Available for teams of up to 12 people, this multi-week, team-based training is tailored to your team's skills and goals.

### Intensive, hands-on learning builds applicable skills

We deliver a 9-day course over 8 weeks for a team of up to 12 learners. This rigorous schedule offers repetition of highly relevant content so your team will learn and remember these new skills and concepts. They can then swiftly automate your business and help you realize the long-term value of your technology investment.

### Before the Bootcamp, your team will:

- Meet with experts who assess your training needs
- Discuss and agree on a training outline tailored to your needs

### During the Bootcamp, your team will:

- Attend a kick-off meeting where the Bootcamp team will outline the Bootcamp and introduce pre-requisite learning
- Attend a 5-day instructor-led class (ILT) tailored to their needs
- Participate in self-paced training to reinforce their knowledge
- Practice new skills and technologies in a 4-day deep-dive lab (DDL)
- Attend office-hour sessions to support their learning

## Benefits

- Receive in-depth training tailored to your business needs
- Apply knowledge from intensive, hands-on labs to solve real-world automation challenges
- Choose from various types of Cisco Training Bootcamps

“I have attended hundreds of trainings in the last 15 years, and this was one of the best.”

**Akhilesh Pallikkayil**  
Technical Architect at Allianz Germany

## Choose from a variety of Cisco Training Bootcamps

Cisco offers DevNet Automation Bootcamps and Operations and Troubleshooting bootcamps so you can choose the Bootcamp that best suits your needs.

### Cisco DevNet Automation Bootcamps

- Cisco DevNet Automation Bootcamp for ACI
- Cisco DevNet Automation Bootcamp for Meraki
