Introduction How do I set up multiple company logos on ESA and CRES? ESA Configuration CRES Configuration

## Introduction

This document describes how to set up multiple brands with use of the new features AsyncOS 7.0 and Cisco Registered Envelope Service (CRES).

# How do I set up multiple company logos on ESA and CRES?

## **ESA Configuration**

1. Create a new CRES encryption profile on the ESA. Edit Encryption Envelope Profile

Encryption Profile Settings		
Profile Name:	Encrypt02	
Key Server Settings		
Key Service Type:	Cisco Registered Envelope Service	
Proxy:	A proxy server is not currently configured.	
Cisco Registered Envelope Service URL:	https://res.cisco.com	
Envelope Settings		
	Example Envelope &	
Envelope Message Security:	<ul> <li>High Security Recipient must enter a password to open the encrypted message, even if credentials are cached ("Remember Me" selected).</li> <li>Medium Security No password entry required if recipient credentials are cached ("Remember Me" selected.</li> </ul>	
Logo Link:	No link      Custom link URL:     By defining a URL, the logo in the upper left corner of the recipient envelope will become     a link (example: http://www.mycompany.com/).	
Read Receipts:	F Enable Read Receipts	
Advanced	Advanced envelope settings.	
Hessage Settings		

 In this case, there is already a profile called Encrypt01 so the new profile is called Encrypt02. Medium Security is set for this brand. Also, a different notification text is used. For this, add a new Text Resource.

#### Add Text Resource

Text Resource	
Name:	Encrypt02
Type:	Encryption Notification Template (HTML)
Text:	This field accepts HTML, but will not validate it. It is recommended you modify or write HTML in another editor.

#### 3. Add this to the encryption profile.

	Example Message 7	
End-User Controls:	Enable Secure Reply All     Enable Secure Message Forwarding	
ification Settings		
Encrypted Message HTML Notification:	Financial   Preview Message   Preview Message   (see Mail Policies > Text Resources > Encryption Notification Template - HTML)	
Encrypted Message Text Notification:	System Generated Preview Message (see Mail Policies > Text Resources > Encryption Notification Template - Text)	
Encryption Failure Notification:	Message Subject:         [ENCRYPTION FAILURE]           Message Body:         System Generated Preview Message 5           (see Mail Policies > Text Resources > DSN Bounce and Encryption Failure Notification Template)	

Cancel

#### 4. Provision the new profile. **IronPort Email Encryption Settings**

IronPort Email Encryption:		Enabled			
	Proxy Server (optional):	Not Configured			
				Ed	t Settings
					_
Email Encryption	Profiles				_
Add Encryption P	rofile				
Profile	Key Service		Provision Status	Ministra and Anna and	Delete
Encrypt01	Cisco Registered En	velope Service	Provisioned	e-provision	8
		alana Camira	Provisioned 8	and the second second	
Encrypt02	Cisco Registered En	velope service		e-provision	
Encrypt02 PXE Engine Upda	Cisco Registered En	anobe service		PSTOVISION	
Encryp102 PXE Engine Upda Type	Cisco Registered En	Last Update	Cur	rent Version	
Encrypt02 PXE Engine Upda Type PXE Engine	Cisco Registered En	Last Update 21 Jan 2010 21:39 (GMT)	Cur 6.7.	rent Version	-

5. Add an outgoing content filter to use the new encryption profile.

dit Action		
Quarantine Encrypt on Delivery Strip Attachment by Content Strip Attachment by File Info Add Disclaimer Text Bypass Outbreak Filter Scanning Send Copy (Bcc:) Notify Change Recipient to Send to Alternate Destination Host Deliver from IP Interface Strip Header Add Header	Encrypt and Encrypts the mess processing. Encryption Rule: Encryption Profile: Subject:	Deliver Now (Final Action) Help age, then delivers without further Always use message encryption. (See TLS settings at Mail Policies > Destination Controls) Encryptio
Action) Bounce (Final Action) Skip Remaining Content Filters (Final Action) Drop (Final Action)		

6. Submit and commit changes.

### **CRES** Configuration

1. Use the CRES administrator ID in order to add an image associated with the new ESA encryption profile. The Envelope Profile name here must be the same as the encryption profile on the

ccount	Management -	A_3157 11808

Envelope Image Fil	Profile e* Image Name	Encrypt02	Browne	Add Ime Delete Ima nage Actions

ESA.

2. When you send a message through the new content filter the recipient receives the new

the file or save (down) access from a mobile	oad) it to your computer. For best results, save the file first, then open it in a Web browser. To device, forward this message to mobile pres.cisco.com to receive a mobile login URL.
f you have concerns a	about the validity of this message, contact the sender directly.

A	From:         Dave Miller «Dave@ironport.eu»           To:         davmill2@cisco.com           Subject:         other brand           Password:         No password required.
	If you experience problems opening this message, thy to open online

Not

1

e that the envelope shows that no password is required as the message security is set to Medium and you had already entered your password and set the remember me cookie previously. The new logo also appears in the opened envelope, but not in the secure reply, reply all, or forward

screens.

T

3. The registration process remains Cisco branded. Remember that CRES users register with Cisco, not with the company who sent them their first CRES secure email. It is an important distinction to remember.
