Contents

Scope of CCI Release 2.1 . . . 1
New capabilities in CCI Release 2.1 . . . 2
References . . . 2
Document Organization . . . 3
Solution Overview . . . 4
Cisco Connected Communities Infrastructure . . . 4
CCI Network Architecture . . . 4
CCI Unique Selling Points . . . 5
Solution Architecture . . . 6
CCI Overall Network Architecture . . . 6
CCI Modularity . . . 6
CCI Major Building Blocks . . . 7
Centralized Infrastructure . . . 7
Point of Presence (PoP) . . . 10
Backhaul for Points of Presence . . . 12
Remote Point of Presence (RPoP) . . . 13
CCI's Cisco Software-Defined Access Fabric . . . 13
The SD-Access Fabric Network Layers of CCI . . . 13
Underlay Network . . . 15
Overlay Network . . . 16
Fabric Data Plane and Control Plane . . . 16
Fabric Border . . . 17
Fabric Edge . . . 18
Fabric-in-a-Box (FiaB) . . . 19
Extended Nodes and Policy Extended Nodes . . . 19
Endpoints . . . 21
Transit Network . . . 21
Fusion Router . . . 23
Access Networks . . . 23
Solution Components . . . 24
CCI Switched Ethernet Access Network (PoPs) . . . 28
Daisy chaining Linear and Star Topology Design . . . 28
Design Considerations . . . 30
Ring Topology . . . 31
Spanning Tree Protocol (STP) Ring . . . 32

STP Ring Design Considerations . . . 32
Resilient Ethernet Protocol (REP) Ring . . . 32
Provisioning the REP Ring using Cisco DNA Center REP Workflow . . . 35
REP Ring Design Considerations, Limitations, and Restrictions . . . 35
Ten Gigabit Ethernet Access Ring Design . . . 37
CCI Remote Point-of-Presence Design . . . 39
Remote Point-of-Presence Gateways . . . 39
Cisco IR1101 as RPoP Gateway . . . 39
Cisco IR1800 as RPoP Gateway . . . 40
Cisco CGR1240 as RPoP Gateway . . . 40
Remote Point-of-Presence Design Considerations . . . 40
RPoP Multiservice design in IR1101 . . . 40
RPoP Macro-Segmentation Design . . . 41
RPoP High Availability Design . . . 43
CCI HER Redundancy . . . 44
WAN Backhaul Redundancy . . . 45
Combined Redundancy . . . 46
RPoP DSL Backhaul Design . . . 47
DSLAM . . . 47
Broadband Remote Access Server (B-RAS) . . . 47
ADSL2/ADSL2+ . . . 48
VDSL2 . . . 48
Remote PoP Gateways Management . . . 50
Cisco DNA Center for RPoP Management . . . 51
RPoP Gateway Network Management and Service using Cisco DNA Center . . . 52
IE switch Management in Cisco DNA Center managed RPoP . . . 53
IE Switch Network Management and Serviceability in RPoP . . . 54
Cisco IoT Operations Dashboard for RPoP Management . . . 54
Ultra Reliable Wireless Backhaul . . . 58
Solution Components . . . 58
Resiliency (TITAN) . . . 59
Quality of Service Support . . . 59
Network Provisioning and Monitoring . . . 60
Configuration Tools (Configurator and RACER) . . . 60
Fixed Infrastructure and CCI Network Integration . . . 62
Backhaul . . . 62
Access . . . 63
CCI Wi-Fi Access Network . . . 65
Cisco Unified Wireless Network (CUWN) with Mesh . . . 66
Centralized WLC deployment . . . 68
Per-PoP WLC deployment . . . 69

Wi-Fi network management using Cisco Prime Infrastructure . . . 69
SD Access Wireless . . . 69
Wi-Fi network management using DNA Center . . . 70
Comparison of Wi-Fi Deployment types . . . 71
Cisco DNA Spaces . . . 71
CCI Wireless IoT Devices Networks . . . 72
CR-Mesh Network . . . 72
CR-Mesh Access Network Architecture . . . 72
CR-Mesh in the CCI network . . . 72
CR-Mesh Networking Components . . . 74
Data Center Services . . . 77
CR-Mesh Authentication and Data Flow . . . 83
LoRaWAN Access Network . . . 89
LoRaWAN Access Network . . . 89
LoRaWAN Devices . . . 91
LoRaWAN Gateways . . . 91
Network Server . . . 92
Application Server . . . 94
Actility ThingPark Enterprise Management Portal . . . 95
Shared Network Services . . . 97
Next-Generation Firewall (NGFW) and DMZ Network . . . 98
Common Infrastructure and Services . . . 100
Cisco DNA Center . . . 100
Cisco DNA Center Appliance . . . 101
Identity Services Engine (ISE) . . . 101
Application Servers Network . . . 104
Field Network Director (FND) . . . 104
Network Time Protocol (NTP) Server . . . 105
Cisco Prime Network Registrar (CPNR) . . . 105
Headend Routers (HER) . . . 105
Authentication, Authorization, and Accounting (AAA) . . . 106
Remote Authentication Dial-In User Service (RADIUS) . . . 106
Public Key Infrastructure (PKI) . . . 106
Certificate Authority . . . 106
Cisco Wireless LAN Controller (WLC) . . . 106
Cisco Prime Infrastructure . . . 106
Cisco DNA Spaces . . . 107
Security Architecture and Design Considerations . . . 107
Security Segmentation Design . . . 107
Network Visibility and Threat Defense using Cisco Secure Network Analytics . . . 111

Secure Connectivity 116
Cisco Cyber Vision Operational Technology (OT) Flow and Device Visibility Design . 117
Network QoS Design 124
CCI Wired Network QoS design 125
CCI QoS Considerations 131
Ethernet Access Ring QoS Design 132
CCI Wireless Network QoS Design 137
CCI QoS Treatment for CR-Mesh and LoRaWAN Use Cases Traffic 139
CCI QoS Design Considerations for CR-Mesh Traffic 140
CCI QoS Design Considerations for LoRaWAN Traffic 140
QoS Considerations on RPoP 140
Multicast Network Traffic Design 141
Multicast Design in a PoP Site 142
Multicast Design between PoP Sites 145
Network High Availability 148
High Availability for the Access Layer 149
High Availability for the PoP Distribution Layer 149
High Availability for the Super Core Layer 152
High Availability for the SD-Access Transit 152
High Availability for the Shared Services Switch 152
High Availability for the Shared Services Servers 152
CCI Network Scale and Dimensioning 153
CCI Network Access, Distribution, and Core Layer Portfolio Comparison 153
CCI Network Access Layer Dimensioning 156
CCI Network Distribution and Core Layer Dimensioning 156
CCI Network SD-Access Transit Scale 158
Cisco DNA Center Scalability 158
Cisco ISE and NGFW Scalability 158
Conclusions 160
Acronyms and Initialisms 161
