Cisco MDS 9000 Series Ansible Modules

nxos_devicealias - Configuration of Device Alias

Synopsis

Configures device alias for Cisco MDS NXOS.

Parameters

Parameter	Choices/Defaults	Comments
distribute	bool/False	Enable/Disable device-alias distribution
mode	Choices: <ul style="list-style-type: none">• basic• enhanced Default: <ul style="list-style-type: none">• basic	Mode of devices-alias, basic or enhanced
da		List of device-alias to be added or removed
	name	Name of the device-alias to be added or removed
	pwn	pwn to which the name needs to be associated with
	remove	bool/False Removes the device-alias if set to True

Notes

Examples

```
nxos_devicealias:
  distribute: yes
  mode: enhanced
  da:
    - { name: 'test1_add', pwn: '56:2:22:11:22:88:11:67'}
    - { name: 'test2_add', pwn: '65:22:22:11:22:22:11:d'}
    - { name: 'dev1', remove: True}
    - { name: 'dev2', remove: True}
  provider: "{{ creds }}"
```

```
register: result
- debug: var=result
```

Return Values

Status

nxos_vsan - Configuration of VSAN

Synopsis

Configures VSAN for Cisco MDS NXOS devices.

Parameters

Parameter	Choices/Defaults	Comments	
vsan		List of vsan details to be added or removed.	
	id	vsan id	
	name	Name of the vsan	
	suspend	bool/False	Suspend the vsan if True
	remove	bool/False	Removes the vsan if True
	interface		List of vsan's interfaces to be added.

Notes

Examples

```
nxos_vsan:
  provider: "{{ creds }}"
  vsan:
    - id: 922
      name: vsan-SAN-A
      suspend: False
      interface:
        - fc1/1
        - fc1/2
        - port-channel 1
      remove: False
    - id: 923
      name: vsan-SAN-B
      suspend: True
      interface:
        - fc1/11
        - fc1/21
        - port-channel 2
```

```
    remove: False
  - id: 1923
    name: vsan-SAN-Old
    remove: True
register: result
- debug: var=result
```

Return Values

Status

nxos_zone_zoneset - Configuration of Zone/Zone set

Synopsis

Configures Zone/Zone set for Cisco MD NXOS devices.

Parameters

Parameter	Choices/Defaults	Comments
zone_zoneset_details		List of zone/zoneset details to be added or removed

Parameter		Choices/Defaults	Comments
vsan			vsan id
mode		Choices: <ul style="list-style-type: none"> • enhanced • basic Default: <ul style="list-style-type: none"> • basic 	Mode of the zone for the vsan
default_zone		Choices: <ul style="list-style-type: none"> • permit • deny Default: <ul style="list-style-type: none"> • deny 	default zone behaviour for the vsan
smart_zoning		bool/False	Enables smartzoning on the vsan if True.
zone			List of zone options for that vsan.
	name		name of the zone
	remove	bool/False	Deletes the zone if True
	members		Members of the zone that needs to be removed or added
		pwwn	pwwn member of the zone, use alias 'device-alias' as option for device-alias member
		remove	Removes member from the zone if True
		devtype	

Parameter				Choices/Defaults	Comments	
				Choices: <ul style="list-style-type: none"> • initiator • target • both 	devtype of the zone member used along with Smart zoning config	
	zoneset				List of zoneset options for the vsan	
		name			name of the zoneset	
		remove		bool/False	Removes zoneset if True	
		action		Choices: <ul style="list-style-type: none"> • activate • deactivate Default: <ul style="list-style-type: none"> • deactivate 	activates/de-activates the zoneset	
		members				Members of the zoneset that needs to be removed or added
			name		name of the zone that needs to be added to the zoneset or removed from the zoneset	
			remove	bool/False	Removes zone member from the zoneset	

Notes

Examples

```

nxos_zone_zoneset:
  provider: "{{ creds }}"
  zone_zoneset_details:
    - vsan: 22
      mode: enhanced

```

```
